PADDLE PALACE PRO SPECIALS

What's so special about Paddle Palace Pro Specials?

Our experts have created 17 brilliant blade+rubber combinations to perfectly match your playing style – and for a super special price! All of these blades and rubbers are popular with tournament-caliber players and are well-suited to a wide range of playing styles. Each Pro Special paddle is custom pre-assembled with smooth, inverted ITTF-approved rubber, with red on one side and black on the other.

STIGA®

Playing Style:
Offensive Speed & Spin

STIGA CARBO 7.6 WRB

\$144⁹⁵ reg. \$193.85

Playing Style: Offensive Speed & Spin

Overall Rating: Speed: 96 Spin: 91

Blade: STIGA Carbo 7.6 WRB (flared or penhold)

Rubber: STIGA Calibra LT Plus (Max sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Carbo 7.6 WRB blade is assembled with Calibra LT Plus rubber. The Carbo 7.6 WRB has six plies of carbon combined with seven plies of wood, giving it amazing speed potential and consistency. It is optimized for speed and gives the player greater distance and a longer trajectory on all their shots. This combination is perfect for the topspin player who is comfortable away from the table and is looking for greater range.

Shakehand Item: ZZSSCA7294 | Penhold Item: ZZPSCA7W295

Playing Style:
Classic Offense & Spin

STIGA CLIPPER CLASSIC

\$139⁹⁵ reg. \$179.85

Playing Style: Classic Offense & Spin

Overall Rating: Speed: 90 Spin: 96

Blade: STIGA Clipper Classic (flared or penhold)

Rubber: STIGA Calibra Tour M (2.1 sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Clipper Classic blade comes assembled with Stiga Calibra Tour M rubber. The Clipper Classic blade is famous throughout the world for its combination of speed and feeling. It is particularly appreciated by players who want extra power behind their strokes. The Stiga Calibra Tour M rubber is equipped with the brand new APS-technology (Advanced Pimple Structure) that generates high speed and the fantastic possibility to shape your shots with increased spin features. This combination is recommended for a wide range of offensive players that demand a paddle that's reliable in any situation.

Shakehand Item: ZZSSCLIN298 | Penhold Item: ZZPSCCLIN298

Playing Style:
Classic Allround

STIGA ALLROUND CLASSIC

\$79⁹⁵ reg. \$96.85

Playing Style: Classic Allround

Overall Rating: Speed: 72 Spin: 75

Blade: STIGA Allround Classic (flared legend)

Rubber: STIGA Mendo Energy (Max sponge)

The Stiga Allround Classic blade comes assembled with Stiga Mendo Energy rubber. The Allround Classic blade is definitely a classic! A perfect balance between speed, weight, and feel lies behind the Allround Classic's enormous popularity among allround and introductory players. The Mendo Energy rubber has been developed in cooperation with world leading players to develop a Power-Soft rubber that creates maximum friction on the ball. Together this combination is ideal for all allround players, and especially recommended for those looking for their first competition paddle.

Item: ZZSSALCN299

MORE PRO SPECIALS NEXT PAGE ►►

Nittaku®

NITTAKU FLYATT CARBON

\$129⁹⁵ reg. \$176.85

Playing Style: Offense, Drive & Spin

Overall Rating: Speed: 89 Spin: 92

Blade: NITTAKU Flyatt Carbon (flared handle)

Rubber: NITTAKU Flyatt Hard (2.0 sponge)

The Nittaku Flyatt Carbon blade comes assembled with Flyatt Hard rubber to create a consistent offensive weapon. The Nittaku Flyatt Carbon blade is a versatile offensive blade. It is thin, light-weight, and loaded with 2 plies of thin carbon to secure its speed and power performance. Combined with Flyatt Hard rubber, produced with high grade natural rubber and "Active Charge Technology" to create outstanding speed and spin with an ideal ball trajectory. This combination is the choice for the offensive player that requires consistent feeling shots.

Item: ZZSNFLY297

NITTAKU FLAME CARBON

\$142⁹⁵ reg. \$189.85

Playing Style: Aggressive Offense

Overall Rating: Speed: 96 Spin: 96

Blade: NITTAKU Flame Carbon (flared handle)

Rubber: NITTAKU Fastarc S-1 (2.0 sponge)

The Nittaku Flame Carbon blade comes assembled with Fastarc S-1 rubber. The Flame Carbon blade has been developed using Nittaku's "burning wood" technology, which hardens the outer wood ply and increases speed. Add two plies of kevlar/carbon, and the result is a blade optimized for speed. We combined this blade with the popular Fastarc S-1 rubber – favored for its amazing spin capabilities. This rubber utilizes a grippy topsheet and soft tension sponge for explosive spin + power. Recommended for the offensive player that demands high speed and spin to put pressure on their opponent.

Item: ZZSNFLC297

NITTAKU MONOPHONIC

\$99⁹⁵ reg. \$128.85

Playing Style: Defense with Spin

Overall Rating: Speed: 67 Spin: 92

Blade: NITTAKU Monophonic (straight handle)

Rubber: NITTAKU Moristo DF (1.9 sponge)

The Nittaku Monophonic blade comes assembled with Moristo DF rubber. The Monophonic blade has 5 plies of soft wood and 2 plies of glass fiber, creating a huge sweet spot combined with a soft feel that modern defensive players demand. The Moristo DF rubber allows the ball to dig deep into the sponge for a great spring effect with slower speed, providing a "hang effect" to give extra control on chops. This combination is outstanding for pure defensive and chopping players.

Item: ZZSNMON297

DONIC

DONIC WALDNER EXCLUSIVE AR+

\$79⁹⁵ reg. \$98.85

Playing Style: Allround Control & Placement

Overall Rating: Speed: 75 Spin: 82

Blade: DONIC Waldner Exclusive AR+ (flared handle)

Rubber: DONIC Vario (Max sponge)

The Donic Waldner Exclusive AR+ blade comes assembled with Donic Vario rubber. The Waldner Exclusive AR+ blade is constructed with special wood veneer combinations to create a competitive blade with high control characteristics. It combines the power of an offensive blade with the ball feeling of an allround blade. It is combined with Vario rubber, one of Donic's all-time most popular rubbers. Vario rubber has high grip, high elasticity, and excellent control. This combo is ideal for offensive oriented all-round players focused on ball placement to out maneuver their opponent.

Item: ZZSDWEP298

DONIC OVTCHAROV SENSO V1

\$119⁹⁵ reg. \$167.85

Playing Style: Offense, Speed & Spin

Overall Rating: Speed: 95 Spin: 92

Blade: DONIC Ovtcharov Senso V1 (flared handle)

Rubber: Acuda S1 Turbo (Max sponge)

The Donic Ovtcharov Senso V1 blade comes assembled with Acuda S1 Turbo rubber. Designed for high speed smashes and topspin, this blade produces unbelievable power with a fantastic feel. We combined this blade with the high precision Acuda S1 Turbo rubber. This rubber was an immediate worldwide success from its original debut on the market. It is designed for accuracy at high speeds, and is the ideal rubber for skilled offensive players to gain the advantage in topspin v. topspin rallies. Together, this paddle is recommended for the offensive player that demands high speed and precision to put pressure on their opponent.

Item: ZZSDOV1296

DONIC BAUM ESPRIT

\$124⁹⁵ reg. \$175.85

Playing Style: Modern Offensive Spin

Overall Rating: Speed: 91 Spin: 96

Blade: DONIC Baum Esprit (flared handle)

Rubber: DONIC Bluefire M2 (Max sponge)

The Donic Baum Esprit comes assembled with Bluefire M2 rubber. The Baum Esprit is the blade used by European star Patrick Baum. Constructed with aramid/carbon and high quality wood plies ensures maximum speed and ball control in any playing situation. The Donic Bluefire M2 rubber is unbelievably fast with a characteristically high arc that enables maximum spin on topspin shots. This combination of blade and rubber is ideal for a wide range of offensive styles that put an emphasis on spin.

Playing Style:
Power Allround & Spin

JUIC STELLAN BENGTTSSON ALPHA

\$129⁹⁵ reg. \$188.85

Playing Style : Power Allround & Spin

Overall Rating: Speed 85 Spin 91

Blade: JUIC Stellar Bengtsson Alpha (flared or penhold)

JUIC Nano Spin II (Max sponge)

The Juic Stellar Bengtsson Alpha blade comes assembled with Juic Nano Spin II rubber. The Stellar Bengtsson Alpha blade is designed and used by world-renowned coach and former World Champion Stellan Bengtsson ("71"). It is fast allround in speed, medium in weight, with 5 wood and 2 carbokev (carbon/kevlar) plies that give it very little vibration and a fantastic huge sweet spot. The Nano Spin II rubber gives excellent spin and enhanced speed to bring a new dimension to the spin attack game. This combination is recommended for the power allround player that utilizes high levels of spin. Shakehand Item: ZZSJBEA299 / Penhold Item: ZZPJBEA299

JUIC LIGHT OFFENSE III

\$94⁹⁵ reg. \$121.85

Playing Style : Balanced Allround Control

Overall Rating: Speed 84 Spin 71

Blade: JUIC Light Offense III (flared handle)

JUIC Scramble 21 Ultima EX (Max sponge)

The Juic Light Offense III blade comes assembled with Scramble 21 Ultima EX rubber. The blade is lighter than average and allows for a versatile game that combines loops, counter-drives and blocks. The Scramble 21 Ultima EX rubber offers a combination of softness and power, allowing for more flexible play. Together, this blade and rubber combination makes an ideal paddle for the balanced allround player focused on continuing long rallies. This combo is especially recommended for players selecting their first custom paddle. Item: ZZSJLI3297

Playing Style:
Offense Loop & Drive

XIOM STRADIVARIUS

\$149⁹⁵ reg. \$217.85

Playing Style: Offense Loop & Drive

Overall Rating: Speed: 93 Spin 96

Blade: XIOM Stradivarius (flared or penhold)

Rubber: XIOM Sigma II Pro (Max sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Xiom Stradivarius blade comes assembled with Xiom Sigma II Pro rubber. The Stradivarius blade has two plies of Aramid Carbon (mix of vibration-absorbing soft Aramid and highly elastic carbon) to boost speed while creating a solid, stable feeling on contact. The Sigma II Pro is the choice for close to the table play! Very exact, hyper-spinning ball trajectory is made by combining new IMB technology and the world dominating black Carbo Sponge. The ball winds up quicker and aggressively lower on the opponent's court, while starting out comfortably higher. This combination is best for skilled offensive play with topspin from all distances from the table.

Shakehand Item: ZZSXSTV299 / Penhold Item: ZZPXSTVC299

XIOM ALLROUND S

\$99⁹⁵ reg. \$118.85

Playing Style: Allround Spin & Control

Overall Rating: Speed: 78 Spin: 90

Blade: Xiom Allround S (flared handle)

Rubber: Xiom Vega Europe (2.0 sponge)

The Xiom Allround S blade comes assembled with Vega Europe rubber. The Allround S blade is a classic allround blade with lowered and controlled speed that provides the opportunity to manage and direct a game. Solid and clear feel connects the ball with the player's senses. The Vega Europe rubber is equipped with Xiom's "Carbo Sponge" and "Hyper Elasto" topsheet that have combined to create a rubber with innovative spin performance as well as the largest "safe zone" or sweet spot to minimize mistakes. This combination is best for traditional allround players and those looking for their first competition paddle. Item: ZZSXALS297

Playing Style:
Allround Offense

YASAKA MA LIN EXTRA OFFENSIVE

\$99⁹⁵ reg. \$127.85

Playing Style: Allround Offense

Overall Rating: Speed: 85 Spin: 80

Blade: YASAKA Ma Lin Extra Offensive (flared or penhold) Rubber: YASAKA Mark V (Max sponge)

The Yasaka Ma Lin Extra Offensive blade comes assembled with Yasaka Mark V rubber. The Ma Lin Extra Offensive is the blade used by 2008 Olympic Gold Medalist Ma Lin. It has a large sweet spot and excellent speed performance in attacks. Also excels in the important blocking play. The Mark V rubber is a classic allround offensive rubber and is still one of our top-selling rubber sheets because of its versatility and performance. This combination is suited to employ a variety of offensive spin shots while maintaining excellent control. Recommended for a wide variety of allround to offensive players focused on controlled shots. Shakehand Item: ZZSYMAE299 / Penhold Item: ZZPYMAEC299

Prices subject to change without notice

See PaddlePalace.com for latest SPECIALS

TIBHAR

TIBHAR SAMSONOV FORCE PRO

\$124⁹⁵ reg. \$173.85

Playing Style: Aggressive Offense

Overall Rating: Speed: 96 Spin: 96

Blade: TIBHAR Samsonov Force Pro (flared handle)

Rubber: TIBHAR Evolution MX-P (2.1)

The Tibhar Samsonov Force Pro blade comes assembled with Tibhar Evolution MX-P rubber. The Samsonov Force Pro is the new blade of the multiple European and World Cup Champion, Vladimir Samsonov. Its powerful seven ply wood construction provides varied speed reserves and excellent ball control to put your adversary under pressure. It is combined with the dynamic Tibhar Evolution MX-P rubber. Evolution MX-P makes no concessions in speed and spin, and with the perfectly adjusted pimple geometry, it allows for more flexibility and extra energy conferred to attacking balls. This combination is recommended to the offensive player that wants to excel in the aggressive topspin game.

Item: ZZSTSAF298

TIBHAR SAMSONOV ALPHA

\$99⁹⁵ reg. \$124.85

Playing Style: Offense Speed & Drive

Overall Rating: Speed: 79 Spin: 82

Blade: TIBHAR Samsonov Alpha (flared handle)

Rubber: TIBHAR Rapid (Max sponge)

The Tibhar Samsonov Alpha blade comes assembled with Rapid rubber. This combination is ideal for the attacking player looking for good speed and touch, with enough grip to generate good spin on serves and topspin on drives. The Samsonov Alpha uses classic 5-ply construction with a strong middle layer to create a balance between power and control. Rapid rubber combines an elastic top sheet with a softer sponge, giving good speed and spin without giving up touch and control.

Item: ZZSTSAM292

TIBHAR BLACK CARBON

\$99⁹⁵ reg. \$166.85

Playing Style: Aggressive Offense

Overall Rating: Speed: 90 Spin: 76

Blade: TIBHAR Black Carbon (flared handle)

Rubber: TIBHAR Rapid D.TecS Soft (Max)

The Tibhar Black Carbon blade comes assembled with Tibhar Rapid D.TecS Soft rubber. This Pro Special is built for speed! The Black Carbon is a stiff blade constructed with a unique carbon concept that offers extreme acceleration. The Rapid D.TecS Soft rubber unleashes its full speed potential when combined with this blade. This combination is recommended for speed oriented offensive players.

4-STAR SERIES ★★★★★

\$43⁹⁵◀ **Delta – SPECIAL**

Reg. \$54.95. Ideal for offensive minded players who want that extra touch and control when attacking and counter-attacking. ACS technology and WRB system included. Evo smooth rubber with 2.0mm sponge thickness. Anatomic handle. Speed: OFF Item: DSDEW

◀ **Tube Advance – SPECIAL**

Reg. \$69.95. Serious players can now experience much greater speed and spin in their game, without sacrificing control. Thanks to the Nano Composite Technology (NCT) in this paddle. ACS technology allows very high speed to be combined with maximum springiness/elasticity in an ultralight rubber with outstanding control. Includes WRB System. Pre-assembled with S4 smooth rubber, 2.0 mm sponge. Flared handle. Speed: OFF Item: DSTUA

◀ **Tube Perform – \$64.95**

Ideal for offensive minded players who want that extra touch and control when attacking and counterattacking. The ACS technology allows very high speed to be combined with maximum springiness/elasticity in an ultralight rubber with outstanding control. Includes WRB System. Pre-assembled with S4 smooth rubber, 2.0 mm sponge. Flared handle. Speed: OFF Item: DSTUP

◀ **Tube Vortex – \$68.95**

The ultimate combination of ACS & Tube technologies offer increased speed, spin and control. The Stiga Tube bats are manufactured using a technology where the middle veneer has "micro-channels" milled lengthwise in the middle ply of the bat, filled with materials to achieve the bat's desired characteristics. Pre-assembled with S4 smooth rubber, 2.0 mm sponge. Anatomic handle. Speed: OFF Item: DSTUV

◀ **Fire Vortex – \$59.95 [pictured]**

The ultimate combination of two revolutionary technologies; ACS and TUBE, offering you increased speed, spin and control. Assembled with ITTF-approved S4 smooth rubber with 2.0mm sponge. Flared Handle. Speed: OFF Item: DSFRV

◀ **Infinity – \$46.95**

Infinity with ACS technology suits the player who wants very high speed combined with maximum elasticity and control with ultra light rubber sheet and bat. Assembled with Evo smooth rubber with 2.0mm sponge. Flared handle. Speed: OFF Item: DSINF

◀ **Polaris – \$58.95**

Serious players can now experience much greater speed and spin in their game without sacrificing any control thanks to the Nano Composite Technology (NCT) used in the Polaris. Assembled with ITTF-approved Evo smooth rubber with 2.0mm sponge. Flared Handle. Speed: OFF Item: DSPLR

◀ **Pollux – \$51.95 [pictured]**

Greater speed + spin without sacrificing control, thanks to the Nano Composite Technology (NCT). Evo smooth rubber with 2.0mm sponge thickness. Flared handle. Speed: OFF Item: DSPOL

◀ **Procyon – \$57.95**

ACS (Air-Capsule System) and TUBE technologies contribute to the increased speed, spin, and control of this bat. Evo smooth rubber with 2.0mm sponge thickness. Flared handle. Speed: OFF Item: DSPRC

◀ **Propus – SPECIAL [pictured]**

Reg. \$47.95. Ideal for offensive minded players who want that extra touch and control when attacking and counter-attacking. Evo smooth rubber with 2.0mm sponge thickness. Anatomic handle. Speed: OFF Item: DSPRO

\$38⁹⁵

3-STAR SERIES ★★★

◀ **CarboPro Oversize – \$35.95**

Ultra-thin, non-solid carbon layers between each veneer for increased power, touch and feel without hindering the natural movement and resiliency of the wood veneers. Pre-assembled with Doer smooth rubber, 2.0 mm sponge. Flared handle. Speed: OFF- Item: DSCPO

◀ **Crystal Advance – \$51.95**

Reg. \$51.95. Perfect for the powerful varied offense player who wants unrivalled levels of power and feeling in their game. The ACS technology allows very high speed to be combined with maximum springiness/elasticity in an ultralight rubber with outstanding control. Pre-assembled with S3 smooth rubber, 2.0 mm sponge. Flared handle. Speed: OFF- Item: DSCTA

◀ **Crystal Perform – \$42.95**

Stylishly designed and perfectly balanced for determined attacking players wanting precise power. The WRB system accelerates the blade face for faster returns, more power and extra sensitivity of touch. Pre-assembled with S3 smooth rubber, 2.0 mm sponge. Flared handle. Speed: OFF- Item: DSCTP

◀ **Crystal Vortex – SPECIAL**

Reg. \$51.95. The ACS technology allows very high speed to be combined with maximum springiness/elasticity in an ultra light rubber with outstanding control. "Micro--channels" are milled lengthwise in the middle ply of the bat and filled with materials to obtain the bat's desired characteristics. Pre-assembled with S3 smooth rubber, 2.0 mm sponge. Anatomic handle. Speed: OFF- Item: DSCTV

◀ **Aggressive – SPECIAL**

Reg. \$30.95. Aggressive gives the feeling of absolute control under pressure, which is required for a successful speed oriented attack game. Includes the Stiga WRB system. Assembled with ITTF-approved Triumph smooth rubber. Flared handle. Speed: OFF- Item: DSAGE

◀ **Feel Perform – \$42.95**

The result of more than 60 years of research and development! Stylish design, perfect balance for determined attacking players wanting precise power. ITTF-approved S3 smooth rubber with 2.0mm sponge. Anatomic Handle. Speed: OFF- Item: DSFLP

◀ **Merope – \$39.95**

Features ACS and TUBE technologies for high speed springiness/elasticity. Ultra light rubber with outstanding control. Future smooth rubber with 2.0mm sponge thickness. Anatomic handle. Speed: OFF- Item: DSMER

◀ **Matar – SPECIAL**

Reg. \$31.95. Stylishly designed and perfectly balanced for determined attacking players wanting precise power. Triumph smooth rubber with 2.0mm sponge thickness. Flared handle. Speed: OFF- Item: DSMAT

\$25⁹⁵◀ **Pure Color Advance – \$29.95**

Comes in four colors: Blue, Green, Pink, and Yellow! The rubber color is the same on both sides. Great for offensive-minded players who want unrivalled levels of power and feeling in their game. Just choose your color and explore the opportunities of the Stiga table tennis world. Pre-assembled with Stiga 3-Star smooth rubber, 2.0 mm sponge. Flared handle. Speed: OFF- Item: DSPUR

Nimatsu SPECIALS

Spinfighter II & Scorpion II are comfortable, attractive, and ITTF-approved! Smooth inverted rubber + 2.0 sponge boost recreational play to a higher level. The Scorpion is faster and spinnier and the Spinfighter has good speed and spin with more control.

ABOUT PRE-ASSEMBLED PADDLES

Paddles in this department are pre-assembled at the factory and are designed for players who are newer to the sport, or who primarily play recreationally. The characteristics and prices are well-suited for developing players in schools, homes, and recreation centers. The Speed Ratings in this department are on a different scale from the speed ratings in the blade and rubber departments, and are intended only for comparison with other pre-assembled recreational paddles. The pre-assembled paddles are generally slower, impart less spin, and have more control than the pro gear. Choose the pre-assembled paddles with thicker sponge for more speed and spin.

ABOUT BLADE SELECTION AND COMBO SPECIALS

Combo Specials

Combo Specials are a great bargain for professional blades with rubber. We offer a selection of the most popular blades as Combo Specials. The price includes everything you need for a complete paddle: blade and two sheets of rubber. Penhold Combo Specials include penhold blade and either one or two rubbers, as indicated. Assembly (cutting and gluing the rubber to the blade) by our expert staff is free, or you can choose to receive it unassembled. We apply free edge tape, and shipping is free to USA for all Combo Specials. Rubber options include all rubbers from STIGA, NITTAKU, TIBHAR, JUIC, DR NEUBAUER, DONIC, YASAKA, HALLMARK and XIOM. NO EXTRA charge for any rubber with current price under \$50. Over \$50 there is an extra charge per sheet (see chart).

Pro Specials

Pro Specials include a specific combination of a professional blade and two rubbers pre-assembled at Paddle Palace. See pages 4-7 for details.

Blade Selection Guide

■ Blade style

Shakehand and Penhold are the two basic blade types. If you hold the paddle like you are shaking hands, then you should choose a Shakehand blade. Over 90% of the blades we sell are Shakehand style. If you hold your paddle like you would hold a pen or chopsticks, then you should choose a Penhold blade. There are two styles of penhold blades: Chinese and Japanese. Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than the shakehand. Japanese-style penhold handles have a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more square in shape than the Chinese-style, but it can vary from roundish to squarish, so check the image. (See the Penhold Blade section on pages 48 to 54).

■ Handle style

Handle style is a personal decision – shape and size that feels best in your hand is what you should use. For shakehand players, flared handles are the most popular, followed by anatomic and straight. The code for flared is FL, straight is ST, anatomic is AN, and conic is CO. STIGA offers two sizes of flared handles, Flared-Large (aka Legend) and Flared-Small (aka Master). The codes for these are FL (lg) and FL (sm). The DONIC Dotec blades have a unique cork handle that is designed for either a left-hander or right-hander. The code is LEFT and RIGHT. NITTAKU offers a few blades with a unique ergonomic handle, ERGO, which is comfortable for using with both a shakehand or penhold grip. Penhold blades are available in either Chinese-style or Japanese-style. Chinese-style is the most popular (C) and are suitable for one or two rubbers on the blade. Some Japanese-style penholds are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

■ Speed

The CLASS speed ratings of the blades range from the fastest (OFF+) to the slowest (DEF-). OFF means offensive, ALL means allaround, and DEF means defensive). In general, offensive-style players prefer blades ranging from OFF+ to ALL+. Allround players prefer blades ranging from OFF- to ALL-. Defensive players prefer ALL to DEF- blades.

Besides CLASS ratings, Paddle Palace has a universal number rating system for speed and control so that blades from all the various brands can be compared on the same scale. In basic terms, the faster the speed rating, the farther the ball bounces off of the blade, given an equal amount of force. Keep in mind that generally the faster the blade, the more skill it takes to control it. Also, the rubber applied to the blade makes a huge difference in the speed and control of the paddle. A player's skill level, playing style, rubber used, and interaction of those factors, impact the amount of speed and control that a player experiences. Therefore, the speed and control ratings are only a general tool for choosing a blade.

■ Weight

Most blades weigh between 70 and 100 grams before rubber is applied. An average weight is around 86 grams. Some players feel that a heavier blade provides more power but other players would disagree. Some players feel that a lighter blade is quicker, but again, there are varying opinions on this. Remember: power and quickness are not just functions of the blade, but mainly the skills of the player. Like handle style, ideal blade weight is the weight that feels best. Note: individual blade weight may vary slightly.

■ Plies

The number of plies (wood layers) of a blade normally ranges from one to seven, with five being the most common. Over 70% of players use an all-wood blade. There are many blades on the market that add thin plies of materials such as carbon, glass fibre, titanium or kevlar to an otherwise all-wood blade. These non-wood plies may add speed or a different feel to a blade. Some players feel that mixed-ply blades offer a larger sweet spot, and/or possibly result in added control. With or without non-wood plies, every blade has a unique feel, and only by experimenting will you discover what works best for you. We indicate the number and composition of the plies: W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid.

ALL+ 80 77 Blade \$40.95

STIGA®

Continued

CC SERIES (Crystal Carbo)

Developed in close cooperation with members of the Chinese National team, the CC Series has focused on the importance of the trajectory of the ball. With a longer trajectory you can push your opponent away from the table and take control of rallies and the game. The CC5 and CC7 blades were developed to meet those demands. Both blades have carbon layers inside, along with STIGA's famous NCT and Crystal treatment on the surface.

CC5

A very unique blade that balances control with long trajectory and power. This blade is for the control minded player who still wants to have power when striking the ball. Handle FL(lg), FL(sm), AN, ST / Wt 96 gm / Plies 5W, 2C / Item SSCC5

OFF 89 62 Blade \$132.95

CC7

A more powerful blade than the CC5, the CC7 is recommended for highly skilled attackers with excellent technique. Outstanding when you are playing back off the table and getting into topspin rallies. With CC7 you can feel the long trajectory in your topspin strokes and gain control over the game. If you like to play topspin against topspin, then this is the blade for you. Handle FL(lg), FL(sm), AN, ST / Wt 99 gm / Plies 5W, 2C / Item SSCC7

OFF+ 94 58 Blade \$148.95

OPTIMUM

Optimum Sync

Designed with the ideal mix of speed and control. Experienced players get needed lethal attacking shots, and defensive and counter loops and smashes. Handle FL(lg), FL(sm), AN, ST / Wt 88 gm / Plies 5W / Item SSOPTN

OFF- 88 71 Blade \$61.95

Optimum PLUS

Crystal Technology + Offensive Classic wood in a very popular 5-ply blade. Same outer plies as the Offensive Classic, but faster and lighter. The Crystal Technology process hardens the blade surface to increase speed. Amazing crystalline appearance of blade! You get extra zip on all your shots. Handle FL(lg), FL(sm), AN, ST / Wt 80 gm / Plies 5W / Item SSOPPN

OFF 90 68 Blade \$64.95

Offensive CR

The STIGA-sponsored Chinese National Table Tennis Team specifically asked STIGA to produce this blade. It is fast and perfect for attack play. CR system provides speed + the STIGA touch. FL(lg), FL(sm), AN, ST / Plies 5W / Wt 81 / Item SSOFFCN

OFF- 85 71 Blade \$51.95

Offensive CR WRB

The STIGA-sponsored Chinese National Table Tennis Team specifically asked STIGA to produce this blade. It is fast and perfect for attack play. CR System helps maintain "Stiga touch" despite increased speed. WRB creates a lighter blade w/hollow handle. FL(lg), FL(sm), AN, ST / Plies 5W / Wt 78 gm / Item SSOFFCW

NITTAKU BLADES COMPARISON CHART

page 43

TENALY ERGONOMIC HANDLE

The word "Tenaly" means "it becomes the hand." Innovative handle has an ergonomic design to make the blade an extension of the player's natural angle of the wrist, hand and forearm to the head of the blade. The handle is comfortable and effective for the shakehand or penhold grip.

**Tenaly Feruku**

The unique ergonomic handle can be gripped either as shakehand or penhold-style. This is a powerful blade combining Japanese cypress wood with the speed of Kevlar. Although constructed of hard wood, it also has good elasticity. Three plies wood and two plies Kevlar for a heavenly feel for the offensive player. Handle Ergo FL / Wt 82 / Plies 3W, 2K / Item SNTF

PRO

Look for this sign for blades that are available as PRO SPECIALS. Details on pages 4-7.

Blue Feeling

This "made in Sweden" high tech 5-ply allround blade has a specially created Ayous outer ply - suitably colored and glued with special procedures, allowed to dry for a long time and pressed under heavy pressure. The result is a sensational feel and unique design - a blue grain in the ply! A slightly thicker inner ply, fairly hard Limba plies and the specially treated outer ply results in a blade with outstanding control and sufficient speed for an attacking player. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDBLU

ALL+ 80 75 Blade \$62.95**NEW****JAN-OVE WALDNER:**

blade: DONIC Waldner Senso Carbon

rubber: DONIC Bluefire JP 01 Turbo + Acuda S1

Olympic Gold Medalist; 6 x World Champion (2 singles, 4 team); 11 x European Champion (1 singles, 3 doubles, 7 team)

WORLD CHAMPION 89

New DONIC blade series

Top workmanship, made in Germany! The new World Champion 89 blade series is exceptional. It celebrates the 25th anniversary of Sweden winning the World Championships Team title in Dortmund in 1989 (in a historic 5-0 final win against China). These blades are in honor of the superstar legends Jan-Ove Waldner, Jorgen Persson, and Mikael Appelgren. Hand-crafted and employing modern precision and technical know-how, all three models incorporate an Italian Spruce ply which is over 200 years old, combined with a 3mm strong center veneer of Kiri (and for the Appelgren ALL+ model, a layer of Ayous), plus a new Carbonfleece Zylon (CFZ) webbing, exclusive for DONIC. A specially developed drying procedure reduces the moisture content, resulting in stability and lightness, and each blade is subjected to a special cold press for 24 hours. And the unique 3D-technology and more recent bio technology ensures that the handle is in perfect shape.

NEW**Persson****World Champion 89**

The fastest of the new World Champion 89 blades. For players requiring a harder blade with high speed. Handle FL, ST / Wt 85 gm / Plies 5W, 2Z-C / Item SDPWC

OFF+ 97 62 Blade \$135.95**NEW****Waldner****World Champion 89**

\$124⁹⁵

See Page 5

Baum Espirit**PRO**

The blade of European star, Patrick Baum. Aramid-Carbon fiber in combination with high quality wood plies ensure a precise ball return and outstanding offensive quality to the blade. Very fast, but the blade design maximizes ball control in every playing situation. It is particularly suited for counter top-spinning and for touch play.

Handle FL, ST / Wt 89 / Plies 5W, 2C / Item SDBES

OFF 89 61 Blade \$65.95**Ovtcharov Carbospeed**

Very fast carbon blade with great stiffness and durability. High class Hinoki outer ply. Recommended for all out attackers with hard top-spins who prefer to counter-attack.

Handle FL, ST / Wt 85 / Plies 3W, 2C / Item SD0VP

OFF+ 95 55 Blade \$79.95**Waldner Legend Carbon**

The Donic Waldner Legend Carbon is a fast and extremely light offensive blade. Having a larger "sweet spot" ensures premium control. The blade has been designed with great care. The choice of wood plies - Hinoki outer ply in combination with carbon layers and a soft inner ply provide stiffness for good topspin. Especially effective for players that like to dominate close to the table. Handle FL, ST / Wt. 85 / Plies 5W, 2C / Item SDWLC

OFF 93 66 Blade \$78.95**Persson Seven**

The Persson Seven blade was developed especially for modern, dynamic top spin players. This 7-ply blade (Limba-Ayous-combination) has good feel and is very apt at producing spin. It also offers excellent control when hard top spins are required. Handle: FL, ST / Wt: 90 / Plies 7W / Item SDPE7

OFF- 88 67 Blade \$52.95

DOTECH TECHNOLOGY

The DONIC Dotec System is the wood technology without awkward edges. Since the human hand does not have hard edges, DONIC wanted to develop a smooth blade without sharp edges to ensure a completely smooth transition between blade and handle. The DONIC Dotec system is the technology that provides a blade with a perfectly smooth handle – a joy to grip. Choose between Right-Handed and Left-Handed versions.

DONIC continues to build on many years of success of its DOTECH series with three newest Ovtcharov blades: Off, All+ and All. Ovtcharov Dotec blades incorporate the brand new CBF technology. Vulcanized artificial plies have been carefully glued and put together with top quality plies to ensure extremely good feel and precise return of the ball.

Ovtcharov Dotec OFF

The fastest in the Ovtcharov Dotec series. It is really fast but has excellent control. Best suited for attackers and allround players with power who like to loop or counter-attack close or away from the table. Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODO

OFF- 88 67 Blade \$78.95

Ovtcharov Dotec ALL+

Slightly less powerful and little softer than the Ovtcharov Dotec OFF version. This blade has fantastic control but is still quite fast. Suitable for allround players with power and spin who require maximum control when under pressure.

Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODP

ALL+ 81 73 Blade \$76.95

Ovtcharov Dotec ALL

The easiest blade to control from the Ovtcharov Dotec series. Top control and a particularly good feel guarantee the best possible allround qualities. Especially recommended for allround players who like to block and chop in defensive situations.

Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODA

ALL 78 75 Blade \$73.95

Persson Dotec OFF

Great offensive blade for players of every ability, with DONIC Dotec technology. Super versatility with top speed + fantastic feel in every playing situation. Covering of legendary Japanese Hinoki wood, with Dotec-Balsa and Koto plies. Available in LEFT- or RIGHT-handed version. Handle LEFT, RIGHT / Wt 75 gm / Plies 7W / Item SDPDO

OFF- 91 67 Blade \$78.95

Waldner Dotec Carbon

A 4mm core of Balsa surrounded by carbon and Limba plies give this Dotec blade enormous potential for speed, quick topspin and smashes while maintaining remarkable control. Handle LEFT, RIGHT / Wt 85 gm / Plies 5W, 2C / Item SDWDC

OFF 93 66 Blade \$92.95

Waldner Dotec AR

Limba/Balsa combination produced by DONIC Dotec Technology, results in a perfect, fast, all round blade. Amazing touch! Available in LEFT-handed or RIGHT-handed version. Handle LEFT, RIGHT / Wt 70 gm / Plies 7W / Item SDWDA

ALL+ 81 74 Blade \$72.95

Appelgren Dotec Control

The last word in control and accuracy! Easy control and good feel. Ideal for those who want more ball control without loss of speed necessary for attack. DOTECH fiber is placed between a limba cover and an ayous inner ply. Middle core consists of a DOTECH balsa layer. Handle LEFT, RIGHT / Wt 70 gm / Plies 7W / Item SDADC

ALL+ 79 76 Blade \$65.95

Wang Xi Dotec Control Plus

Fine touch and precise placement for the defensive player! Provides not only control but reserves of speed to enable positive all-round players to go on the attack. Ideal for players who value control but not at the loss of attack play. This blade is available with a straight handle, making it easier for defenders to "twiddle" their racket. Handle LEFT, RIGHT, ST / Wt 80 / Plies 7W / Item SDXDP

ALL- 69 83 Blade \$69.95

EPOX: Each blade a high quality original

COMBO SPECIAL
with 2 rubbers

\$121⁹⁵

Item XSDETO

Item XSDEAL

EpoX Powerallround COMBO SPECIAL

Fast allround, light weight blade, featuring a well-balanced speed and control. Great for all playing strategies. The rigid veneer gives necessary speed for an attacking game. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDEAL

ALL+ 85 72 Blade \$56.95

COMBO SPECIAL
with 2 rubbers

\$121⁹⁵

Item XSDECO

EpoX Control COMBO SPECIAL

Comfortable player-friendly blade with thin Finition outer veneers. Outstanding control without unpleasant vibration. Used with medium to relatively hard rubbers, this blade is also great for attack play. Handle FL, AN, ST / Wt 80 gm / Plies 5W / Item SDECO

ALL 82 74 Blade \$56.95

EpoX Carbotec

Ideal blade for attack play with spin/speed variation. Soft carbon fibre, between Kiri and Ayous veneers gives an elastic, lively blade with good feel. Somewhat softer and easier to control than the EpoX Powercarbon. Handle FL, AN, ST / Wt 85 gm / Plies 5W, 2C / Item SDECA

OFF 93 67 Blade \$65.95

EpoX Powercarbon

High speed, aggressive blade of excellent design and quality. Soft carbon layer is between Finition and Ayous layers. More dynamic and stiff when compared to the EpoX Carbotec. Handle FL, AN, ST / Wt 90 gm / Plies 5W, 2C / Item SDEPO

OFF+ 96 62 Blade \$65.95

DONIC

Continued

EXCLUSIVE BLADES**Persson Exclusive OFF**

Unbeatable value. The fastest of the Exclusive blades, it provides great power for effective fast topspin and hard smashes. In addition, it provides first class control accommodating all variations of spin. Especially recommended for hard-hitting attackers. Handle FL, AN, ST / Wt 85 / Plies 5W / Item SDPEO

OFF- 80 73 Blade \$33.95**Waldner Exclusive AR+****PRO**

The power of an offensive blade with the ball feeling of an allround blade. Recommended for offensively oriented all-round players who operate with variable topspin close to the table and from half-distance, without losing control. Handle FL, AN, ST / Wt 85 / Plies 5W / Item SDWEP

ALL+ 76 74 Blade \$32.95**Appelgren Exclusive AR**

Highly recommended for all-round players who value control when blocking but especially wish to incorporate variations of spin into their play. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SDAEA

ALL- 65 85 Blade \$32.95

PRO SPECIAL with
DONIC Vario
Rubber

\$79⁹⁵

See Page 5

DONIC BURN SERIES

Thermic Burn Technology! A thermal treatment of the veneers results in extremely high stability, similar to features of high-quality tropical woods. Blades are exposed to 200 degrees centigrade for 24 hours to harden the wood and remove humidity. The resulting playing characteristics of these blades are unique.

Burn OFF

Stiff and fast with excellent control and an outstanding sweet spot. It is not too heavy even used with heavy and hard rubbers. Handle FL, AN, ST / Wt 90 gm / Plies 5W / Item SDBUO

OFF 94 65 Blade \$49.95**Burn OFF-**

More controllable than the Burn OFF blade. In harmony with the thinner middle ply it is slightly more elastic. With softer rubbers imparts slightly more spin than the OFF version. Beautiful blade, excellent sweet spot. Handle: FL, AN, ST / Wt: 85 gm / Plies: 5W / Item: SDBUM

OFF- 89 68 Blade \$49.95**Burn AR+**

Priority for this blade series is ease of control and feel. The thinner Kiri center ply offers great control, and at 80 gms, it is relatively light. Use with harder attacking rubbers for fantastic speed or use softer rubbers for greater spin. Handle: FL, AN, ST / Wt: 80 gm / Plies: 5W / Item: SDBUA

ALL+ 81 73 Blade \$49.95**JÖRGEN PERSSON:**

blade: DONIC Persson Seven

rubber: DONIC Bluefire JP 01 Turbo / DONIC Bluefire M2

5 x World Champion [1 singles, 4 team]

9 x European Champion [1 singles, 2 doubles, 6 team]

Waldner Senso Carbon

Perfect for attack and aggressive allround play. Two high-tec Carbon layers with time-proven Swedish allround construction result in an ideal balance of speed+control. With Senso V1 hollow handle technology. Elastic component gives you the essential touch. Handle FL, AN, ST / Wt 85 gm / Plies 5W, 2C / Item SDWSC

OFF- 86 70 Blade \$59.95**Waldner Senso Ultra Carbon**

A legendary blade, improved in collaboration with J.O. Waldner, the greatest table tennis player of all time. Faster than Waldner Carbon, this is light with impressive ball control and feel. Hard Carbon plies give increased speed. Inner/outer veneers of varied hardness for superb touch! Handle FL, AN, ST / Wt 80 gms / Plies 5W, 2C / Item SDWUC

OFF 89 70 Blade \$60.95**Waldner Black Devil CB**

The Champion's blade! Outstanding for attack! Advanced technology + revolutionary 7-ply design: as exuberant as the playing style of the Master. Carbon, soft Balsa core + Koto plies = super control, power and speed with an enlarged sweet spot. Handle FL, AN, ST / Wt 80 gm / Plies 5W, 2C / Item SDWBD

OFF+ 96 59 Blade \$89.95**Waldner Diablo Senso**

Two plies of glass fibre with wood provide stability, larger sweet spot, more rigidity and speed, but with the good feel of a wood blade. Senso hollowed-out handle. Handle FL, AN, ST / Wt 85 gm / Plies 3W, 2G / Item SDWDB

OFF- 88 64 Blade \$57.95**Waldner Dicon**

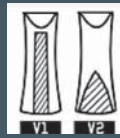

DICON stands for DIrect CONtrol. Parts of the handle are removed with a milling tool, providing direct contact between the player's hand, arm, and blade to improve feel of power and speed, giving you more control. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDWDI

OFF- 87 66 Blade \$48.95

DONIC SENSO V1 and V2:

The V1 hollow space (see sketch) leads to more speed, with identical control to the original blade. The V2 hollow space increases the control with identical speed.

V1 = optimum speed V2 = optimum control

**Ovtcharov Senso V2**

This power allround blade has a mahogany outer ply, softer than hard mahogany outer ply of the Ovtcharov Senso V1. This solid blade has a perfect combination of specially chosen medium-hard plies which ensure a high degree of control. Recommended for the player who especially values control but still requires power and speed when attacking.

Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDOV2

OFF- 88 70 Blade \$58.95

Ovtcharov Soft Carbon V1

Offense with feeling! Based on best-selling Ovtcharov Senso V1 and Waldner Senso Carbon, this carbon blade has relatively soft feel on contact. Walnut outer-veneers provide speed+hardness for attack. Med.-hard Scandinavian pine mid-veneer results in high tension dynamics+power. Fast, offensive blade, but with feel + ball control. Thin carbon mid-layers and Abachi middle veneer. Senso handle creates great feel. Handle FL,AN,ST/Wt 90 gm / Plies 5W,2C/Item SDOVS

OFF- 84 67 Blade \$74.95

Ovtcharov Senso V1 PRO

Fantastic feel and power. 7-ply blade with a hard walnut outer designed for high speed smash and topspin. Inner plies are medium hard and medium soft veneers. Gluing technology results in added rigidity. Handle FL,AN,ST / Wt 90 gms / Plies 7W / Item SDOV1

OFF+ 95 64 Blade \$67.95

Cayman

Great all-round blade with good feel! Lightweight, high rigidity and excellent control. Hard outer plies are especially suitable for players using short or long pips. Amazing control, with no loss of speed. Handle FL, AN, ST / Wt 70 gm / Plies 5W / Item SDCAY

ALL+ 80 76 Blade \$52.95

Defplay Senso

Awesome for versatile defense! World's most successful veneer combo (5-ply allround) has two dampening, elastic outer plies (Gabon and Anegre). Vibration/speed of blade is reduced by increasing blade size by 3 mm. Unbelievable control for defense + fantastic offensive acceleration. FL, AN, ST / Wt 85 gm / Plies 5W / Item SDDEF

DEF+ 63 94 Blade \$49.95

Alligator Combi

The main feature of this blade is the difference in speed between forehand and backhand sides. The 5-ply ALL+/DEF+ blade creates perfect harmony between playing styles. Soft Balsa core makes the blade light and relatively stiff. Amazing possibilities with anti and long pips rubbers. Handle: FL, ST / Wt: 80 gm / Plies: 5W / Item: SDALG

ALL+/DEF+ 76/66 75/90 Blade \$52.95

Baum Carrera Senso

Hard, thick 7-ply offensive blade. Great for aggressive player like World Jr Champ Patrick Baum: fast topspin from both wings, hard smashes, power flips + blocks. Handle FL, AN, ST / Wt 90 gm / Plies 7W / Item SDBCA

OFF+ 98 58 Blade \$52.95

Baum SawTec Off

Fast blade for powerful attack, developed especially for World Jr Champ Patrick Baum. Comfortable handle w/DONIC Cork Covered System. Dynamic 5-ply Ayous blade for speed/power. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDBSA

OFF 91 64 Blade \$48.95

Dima Sawtec AR

Ovtcharov's extreme adaptability at the table inspired this combination of woods for every stroke: flick, push, block, topspin, loop, smash. Excellent control+speed, with DONIC Cork-Covered handle. Handle FL / Wt 85 gm / Plies 5W / Item SDDSA

ALL+ 83 74 Blade \$48.95

ALL 76 74 Blade \$29.95

TIBHAR:
Equipment Sponsor for Texas
Wesleyan Table Tennis

THEY'RE #1

The Texas Wesleyan University table tennis team faced one of its toughest challenges at the 2014 TMS College Table Tennis National Championships.

However, the Rams were up to the task extending their streak to 11 consecutive national championships. The Rams first became eligible to play for the team championship in 2004, and they have never been defeated. The 2014 team title along with the win in men's doubles gives the Rams a total of 55 championships since the program's inception in 2001.

ZHANG AT TTWC IN TOKYO

For the second year in a row, Texas Wesleyan University's Yahao Zhang represented the United States as a member of Team USA.

CARBON + KEVLAR IN A STUNNINGLY VERSATILE BLADE

Stellan Bengtsson α PRO

This is the blade designed and used by former World Champion Stellan Bengtsson ('71), a world-renowned coach and one of the most highly respected players in table tennis. The blade is an ALL+ allround blade, medium weight, fast allround in speed, with 5 plies wood and two layers of carbon/kevlar. It has very little vibration and a fantastic huge sweet spot. Excellent blade for virtually all players. To have success in table tennis at any level, you need a blade that gives you amazing touch and consistent performance. This blade by Stellan Bengtsson delivers! Handle FL, ST / Wt: 85 gm / Plies: 5W, 2C/K / Item SJBEC

ALL+ 82 76 Blade \$78.95

BALSA + CARBON WITH OUTSTANDING FEEL!

Stellan Bengtsson Balsa-C COMBO SPECIAL

Made with a thick balsa core and two layers of carbon, this blade is 10mm thick and lightweight. It's fast with great feeling and touch. Stellan Bengtsson, former World Champ and full-time coach, said, "My Balsa-C blade is very fast but I can still feel the ball. The ball gets a great arc and I can create good spin. Unlike some balsa blades, the feeling is very solid. Blocking is fast and with great control. The light weight makes it easy to have fast arm speed and it is good in the changes from BH to FH. I am very proud to have my name on this racket. Good job, JUIC!" Handle FL, AN, ST / Wt 75 / Plies 5W, 2C / Item SJBEC

XIOM®

SHAKEHAND BLADES FROM XIOM

New paradigm defines Hayabusa optimizing controversial properties to make the unprecedented table tennis weapon!

Hayabusa Z

The Xiom Hayabusa Z blade is constructed with a harmonious synergy of wood and composite material. Zephylium not only improves ball speed, but defines the vibration better. Sharp and clear vibrations of Hayabusa Z upgrades the control phase of your game. Spin loading was also eased by a new unique construction of layers. Wood-like flexibility of Hayabusa Z makes the ball contact feel very natural and solid. Well balanced power and top spin control of Z make the player keep up with a longer continuous rally. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZ

OFF- 88 65 Blade \$164.95

Hayabusa Zi

Hayabusa Zi is constructed with a creative synergy of wood and composite material. Zephylium in new construction makes Hayabusa Zi feel natural yet sharper than all wood blades. Leveraged spin loading and increased ball energy are made easily by the unique construction inside. Flexible, yet solid contact with the ball to generate heavy spins identifies Zi as the new European power-blade. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZI

OFF- 90 64 Blade \$164.95

Hayabusa Z+

The Hayabusa Z+ blade is constructed using a superb synergy of wood and composite material. Hayabusa Z+ has restructured wood and composite layers to create extra synergies, while maintaining the original woody character. Zephylium tuned with other layers provides sensibly sharp feel at ball contact. Unique feel properties improve the control phase of your game and eventually your opportunities to win. Powerful spin dynamics from the unique offensive construction of Z+ are intimidating to opponents. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZP

OFF- 92 63 Blade \$164.95

Hayabusa ZX

Xiom's Hayabusa ZX is constructed with a powerful synergy of wood and composite material. Zephylium carbon character in the third layer makes Hayabusa ZX feel sensibly sharp, yet unbelievably softer than other composite blades. Flexibility was kept by the re-construction of the inside layers, regardless of non-wood material. This allows for continuous top spins with extra power. The control phase of your game improves along with your winning opportunities.

Handle FL, ST / Wt 85 gms / Plies 5W, 2Z/C / Item SXHZX

OFF- 94 62 Blade \$164.95

Hayabusa ZXi

The Hayabusa ZXi is constructed with an amazing synergy of wood and composite material. Revolutionary Zephylium Carbon placed towards the center of the blade makes ZXi feel more solid, but very genuine. Spin loading is leveraged and easily performed due to this new construction. Accurate and powerful ball control makes the player keep up and win in longer rallies. The control phase of your game will improve along with the winning opportunities.

Handle FL, ST / Wt 85 gms / Plies 5W, 2Z/C / Item SXHZXi

Stradivarius

PRO

Two plies of Aramid Carbon (a mixture of vibration-absorbing soft Aramid and highly elastic Carbon), provides ideal performance for professional offensive players. The blade catches the ball deeply with minimal residual vibration after impact. Results are a combination of exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure.

Handle FL, ST / Wt 85 gms / Plies 5W, 2A/C / Item SXSTV

OFF 91 64 Blade \$99.95

available as
PENHOLD

Zetro Quad

This is the blade for topspin. Zylon fiber is directly placed under the top layers to increase the ability to grab the ball. Soft carbon fiber under the middle layers adjusts the overall performance, and the top layer of selected Kiso Hinoki wood guarantees comfortable feel. Making heavy topspin is effortless, and even secure. Players can take the initiative in the game with effective preparatory topspin attack, and keep the initiative with continuous topspin from any distance. Handle FL, ST / Wt 92 gms / Plies 5W, 2C, 2Z / Item SXZEQ

OFF 93 63 Blade \$114.95

V1

Hard, fast, lightweight carbon blade with a thickness of only 5.4 mm, which allows sufficient deformation required by modern aggressive top-spin players. Special hard wood on the surface and "Energy Carbon" directly under the surface, results in a combination of high speed and compact feel. Both close-to-table topspin and hard smash are very easy. Excellent for precise ball placement with blocks. Stability and security of V1 even gives players the advantage in topspin vs. topspin. Handle FL, ST / Wt 85 gms / Plies 5W, 2C / Item SXV1Q

OFF- 88 65 Blade \$84.95

available as
PENHOLD

V1 Quad

High-tech blade provides both super power and precise control. Utilizes advanced "Quad" technology. Two layers of "Energy Carbon" with very high energy transfer efficiency are used directly under the hard surface woods. Another two layers of soft carbon are used inside for adjusting the balance and performance. Lightweight, with extremely large sweet spot and unique feel allowing for very precise control, as well as superb power. Handle FL, ST / Wt 88 gms / Plies 5W, 2C, 2Z / Item SXV1Q

OFF+ 95 62 Blade \$109.95

Axelo

Named for "acceleration". Top layer is Kiso Hinoki wood, which provides a very high level of energy efficiency as well as a comfortable feel. Newly developed Energy Carbon is inserted under this layer, which also provides very high energy efficiency. Overall thickness is about 7.5mm, which makes this a very powerful blade. Amazing speed, but also very good for top-spin or passive blocking. Strong topspin from any distance is the most important advantage.

Handle FL, ST / Wt 92 gms / Plies 3W, 2C / Item SXAXE

OFF+ 97 59 Blade \$94.95

Strato

Newly developed Energy Carbon layers for a new level of performance and feel. Improved efficiency of energy transfer for more powerful strokes. Kiso Hinoki wood for the outer layers provides a very comfortable and mild feel. Improved control, and excellent for all-round play though it is very fast blade. Topspin is more stable than players expect, and it draws a very sharp trajectory with good control. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXSTR

OFF+ 97 60 Blade \$94.95

Ignito

The blade for passionate and aggressive table tennis. Ideal weapon for aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put a lot of pressure on the opponent. Light in weight, it needs less energy to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. Recommended for players migrating from all-wood offensive blades. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXIGN

OFF 94 61 Blade \$94.95

available as
PENHOLD

Allround S

PRO

Xiom Allround S is a classic allround blade of European style construction. Lower and controlled speed provides the opportunity to manage the game against your opponent. Slightly bigger and thinner face combines well with soft /max sponges. Solid and clear feel connects the ball with the player's senses. Perfect for the traditional allround player. Handle FL, ST / Wt 85 gms / Plies 5W / Item SXALS

CLASS **SPEED** **CONTROL**

*XIOM BLADES COMPARISON CHART
page 42*

Offensive S

Perfect for speedy drives with great speed performance and excellent control from both forehand and backhand. Soft touch at contact offers amazing ball control. Excellent for both modern offensive players with higher/speedy hits and also traditional style players with lower/controlled hits.

Handle FL, ST / Wt 87 gms / Plies 5W / Item SX0FS

OFF- **82** **74** Blade \$49.95

Extreme S

Piercing speed and destructive power in this classic offensive 7-ply all wood blade. Special layer construction is focused on providing very sharp and delicate control for top-spin drives and defensive blocks. Superb fit for both mid-distance power play and close to the net speed play.

Handle FL, ST / Wt 92 gms / Plies 7W / Item SXEXS

OFF+ **95** **61** Blade \$54.95

Solo

Unique 7-ply blade developed for continuous topspin or all-round strategic play. Though it has a 7-ply construction it is soft, mild, balanced, and full of stability. The linear relationship between impact strength and the level of rebound provides ideal predictability with exceptional stability. Every technique of table tennis is so easy with Solo. Topspin is quite easy and full of rotation. Hard smash is very safe and full of speed. Block is secure and full of variation.

Handle FL, ST / Wt 91 gms / Plies 7W / Item SXSOL

OFF- **84** **67** Blade \$59.95

Acro

All-round blade with natural vibration and clear sound, with enhanced speed for power all-round players of the new era. Based on traditional all-round construction, the center layer is divided into two layers, and overall thickness is enlarged to 5.8 mm. The result is a very unique 6-ply construction.. Faster than traditional 5-ply all-round blades, but still soft and mild. The sound upon impact is very high and clear.

Handle FL, ST / Wt 85 gms / Plies 6W / Item SXACR

ALL+ **78** **76** Blade \$64.95

Fuga

Recommended for aggressive players whose strategy is close-to-table top-spin. Everything is optimized for hitting the ball on the rise from the bounce. Hard wood was selected as the material for the thin outer layer for sharp and compact feel but also has overall flexibility and stability. Aggressive close-to-table top-spin is very secure and effective. Players will be able to dominate a fast game as well as every technique in table tennis with ease.

Handle FL, ST / Wt 81 gms / Plies 5W / Item SXFUG

ALL+ **81** **74** Blade \$54.95

Aria

One of the most powerful all-wood 5-ply blades, recommended for skilled players. Excellent for all-round power play from close to mid to far distance from the table. Thick, medium soft wood outer layer provides a neutral feel and the second layer provides clear feel and optimal balance. Overall thickness is 6.4mm. Hard and fast, but able to catch the ball softly and release it with great control, especially when players attack with topspin.

Handle FL, ST / Wt 84 gms / Plies 5W / Item SXARI

OFF- **86** **68** Blade \$64.95

Aria Lite

Lighter weight version of the Aria. Thickness is 5.8 mm for optimal stability and aggressive topspin strategy. Great for powerful close-to-table topspin. Weight is reduced and control is significantly enhanced. Allows for easy stroke right off the bounce, and for heavy and sharp topspin. Optimized performance for aggressive, close-to-table play. Recommended for aggressive topspin players and for the modern all-round strategic game.

Handle FL, ST / Wt 80 gms / Plies 5W / Item SXARL

State of the art! A never seen before 17 extremely thin layers of wood plies, yet it weighs only 90 grams. Another powerful weapon you can depend on. FL,AN,ST / Wt 90 gms / Plies 17W / Item SYDYN

OFF+ 96 55 Blade \$79.95

Synergy

Powerhouse design of 11 plies of wood might feel heavy but Balsa inner plies and thin outer plies = only 82 grams. Very fast. Handle FL, AN, ST / Wt 82 gm / Plies 9W, 2S / Item SYSYN

OFF- 89 63 Blade \$69.95

Allround Plus

Awesome for allround play with more power. Two hard veneers with a light middle veneer give added speed. Unique gluing process in Yasaka's Swedish blade factory guarantees control. Handle FL,AN,ST / Wt 88 gms / Plies 5W / Item SYALP

ALL+ 81 67 Blade \$47.95

Yasaka Balsa

Strong outer veneer with inner Balsa = light weight powerful blade, with excellent control for allround game! Handle FL,AN,ST / Wt 69gm / Plies 5W / Item SYBAL

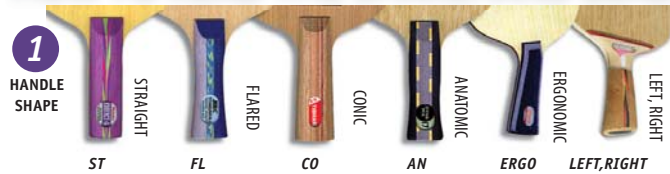

OFF 89 61 Blade \$47.95

Balsa +

For those who love low weight and special feeling. If you find traditional Balsa blades too slow, Yasaka has an answer by combining the best Balsa with Scandinavian Pine for more speed, but light weight. FL,AN,ST / Wt 68 gms / Plies 5W / Item SYBAP

OFF 91 59 Blade \$49.95

HOW TO READ THE SHAKEHAND BLADES CHART

- 1** HANDLE SHAPE
- 2** PLY [Number of layers or plies] W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon
- 3** THICKNESS [Thickness of blade, shown in millimeters.]

Paddle Palace is happy to assemble new blades with rubber at no extra charge upon request. One rubber sheet will cover one side of a blade. Rubber comes in red and black. No returns on custom-made paddles.

Turn to page 14 for Blade Selection Guide

- 4** BLADE MEASUREMENTS: LENGTH/WIDTH/HANDLE LENGTH
The length, height, and width of the blade and handle length are shown in centimeters.
- 5** WEIGHT: The average weight of each blade is indicated in grams. Individual weights may vary.
- 6** CLASS: OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. The rubber sheet that is applied to the blade will naturally affect the speed of the paddle.
- 7** SPEED: The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.
- 8** CONTROL: The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

\$6.95 for 3 balls
\$13.50 for 6 balls
\$25.95 for 12 balls

HOW TO READ THE PENHOLD CHART

- 1 Handle** C=Chinese style. J-1=Japanese style designed for one rubber. J-2=Japanese style designed for either one or two rubbers. Ergo FL = Ergonomic.
- 2 PLY** [Refers to number of layers or plies]
W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon
- 3 THICKNESS** [Thickness of blade, shown in millimeters.]
- 4 BLADE MEAS.: LENGTH / WIDTH**
The length [height] and width of the blade are shown in centimeters.
- 5 WEIGHT:** The average weight of each blade is indicated in grams. Individual weights may vary.

1
Handle
Shapes

- 6 CLASS:** OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. Rubber sheets that are applied will affect the speed of the paddle.
- 7 SPEED:** The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.
- 8 CONTROL:** The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

STIGA PENHOLDS COMPARISON CHART page 48

ABOUT PENHOLD BLADES

There are two main styles of penhold blades: Chinese and Japanese. The Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than a shakehand handle. The Japanese-style penhold has a handle with a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more squarish in shape than the Chinese-style penhold, but it can vary from roundish to squarish, so check the image. Penhold-style blades are used by fewer than 10% of players in North America, although the popularity in Asia is 20% to 40%, with the younger players favoring the shakehand style.

All Chinese-style penhold blades (C) are suitable for putting either one or two rubbers on the blade. Some Japanese-style penhold blades are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

See the Blade Selection Guide on page 14 for information about choosing Blades and Combo Specials, and see page 48-49 for the Penhold Blades Comparison Chart.

Infinity VPS V

Diamond Touch technology gives outer veneers extra hardness and the surface an incredibly smooth finish; combined with VPS (Veneer Precision System) the result is an offensive, light blade with outstanding solid touch and feeling. You can master the key elements in today's modern game: aggressive returns to help you gain the upper hand early on, and the possibility to follow up with powerful, aggressive topspins. Developed with top players from the Chinese National Team, the Infinity VPS V suits the offensive minded player with powerful topspins. Handle C / Wt 77gm / Plies 5W / Blade \$74.95 / Item PSINF5

OFF 88 65

Defensive NCT

Powerful blade for the strong defensive player. Includes the unique Stiga NCT coating. You can play a very controlled game and also a powerful attacking game as a defender. With this blade you will have the most versatile and advanced defensive blade in your hand, developed for the new modern defense game.

Stradivarius

Two plies of Aramid+highly elastic Carbon (vibration-absorbing soft Aramid+highly elastic Carbon) makes this blade ideal for professional offence play. Ball goes deep in blade with little vibration after impact. Exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure. Handle Chinese / Wt 81 gms / Plies 5W, 2C / Blade \$99.95 / Item PXSTVC

OFF 91 64

V1

Hard, fast, lightweight carbon blade with a thickness of only 5.4 mm, allowing sufficient deformation required by modern aggressive top-spin players. Special hard wood on the surface and "Energy Carbon" directly under the surface, results in high speed and compact feel. Both close-to-table topspin and hard smash are very easy.

Precise ball placement with blocks. Stability of V1 even gives players the advantage in topspin vs. topspin. Handle Chinese / Wt 82 gms / Plies 5W, 2C / Blade \$84.95 / Item PXV1CC

OFF- 88 65

Ignito

For passionate, aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put pressure on the opponent. Lightweight makes it easier to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. For players migrating from all-wood offensive blades.

Handle Chinese / Wt 84 gms / Plies 3W, 2C / Blade \$94.95 / Item PXIGNC

OFF 94 61

ABOUT RUBBER: HOW TO CHOOSE

About Rubber

Rubber sheets come as a square in a sealed package. The rubber is custom-assembled to a blade after the player makes their blade and rubber choices. Paddle Palace will assemble rubber to the blade as a free service upon request. One rubber sheet covers one side of a blade, so shakehand blades require two rubbers. ITTF regulations require red rubber on one side and black on the other.

4 Main Rubber Types

Smooth, Short Pips, Long Pips, and Anti-Topspin.

■ **Smooth:** Most players in the modern game of table tennis use smooth rubber, also called "inverted" rubber. The surface of the rubber is smooth with a layer of sponge underneath. Smooth rubber provides the most spin and is used by over 85% of tournament players. Hitters, loopers, all-around players and defensive players all use smooth inverted rubber.

■ **Short Pips**, also called "pimples" rubber, has a bumpy surface and usually has a layer of sponge underneath. It is used by players who do not execute a great deal of spin in their game. Some close-to-the-table hitters, all-around players, and defensive players use short pips. Short pips often provide more control for players who have difficulty playing against spin. "Hard rubber" is the term for short pips rubber with no sponge, and it is used primarily for the old-fashioned "Classic" or "Hardbat" play.

■ **Long Pips** rubber has extra-long pips that reverse the spin of the opponent. The unpredictability of the spin from long pips can give the long pips player an advantage over the opponent who has not learned to read the spin. It is difficult to play offensively with long pips, so most players who use long pips only use it on one side.

■ **Anti-Topspin** rubber has a smooth surface and does not generate much spin or speed. Anti rubber neutralizes the spin of the opponent. Most players who use anti, block with it on one side and use a different rubber on the other.

Choosing Rubber

■ **Speed vs. Spin:** With so many rubber sheets, how do you choose? The Paddle Palace Rubber Ratings are a good place to start. Look at the speed and spin ratings of the rubber and match one to your playing style. Offensive players who use topspin, drive, loop, and smash usually prefer rubber with a high speed rating, while defensive players who primarily use underspin, chop, push, and block usually prefer slower rubber. Loopers and choppers prefer rubber with a high spin rating. The faster or spinnier a rubber is, the harder it is to control. Rubber that is spinny also is more affected by the opponents' spin.

■ **Sponge Thickness** affects the speed of the rubber. Thicker sponge = speed and somewhat more spin. Thinner sponge = more control. Thicker sponge adds weight to the paddle and gives a more cushioned feeling. Thinner sponge is lighter and gives a woodier feeling. Offensive players prefer 1.8 to 2.5mm. Allround players prefer 1.5 to 2.0mm. Defensive players prefer OX (no sponge) to 1.6mm. Loopers prefer thicker sponge. Choppers prefer thinner sponge. Developing players who need more control should choose a sponge that is at the thinner end of the range that fits their playing style.

Rubber Ratings

The rubbers are assigned ratings for Speed, Spin, & Control on a scale of 10 to 99. The higher the rating, the higher that attribute. Paddle Palace ratings use a universal scale which differs from the manufacturers' ratings so that the rubbers from all the brands can be compared. Ratings are intended only as a tool for helping to select rubber. Naturally, speed, spin, and control are all factors that are greatly affected by an individual player's skill, strokes, playing style, and blade.

Each issue of our Paddle Palace catalog includes a comparison chart of all the rubbers so you can see them at a glance. If you go to PaddlePalace.com, you can click on "Chart View" for a comparison chart that is interactive. You can view by specific categories or brands, and click on columns to numerically order the ratings for each attribute. We also have charts online for blades, tables, and paddles.

Is Your Rubber Legal?

The USATT and ITTF have several regulations to determine if a rubber sheet is legal to use in sanctioned competitions. To be legal, a rubber sheet must meet all of the following conditions:

Each side of the blade used for striking the ball must be covered with ITTF approved rubber, either pimples rubber (long pips or short pips), or inverted rubber (smooth or anti-spin). A list of ITTF-Approved rubbers is published on the ITTF (International Table Tennis Federation) website at www.ittf.com. If a rubber is ITTF-Approved, then it is also approved for USATT sanctioned events.

The rubber on one side of the blade must be red and the other side must be black. If you only use one side of the blade for striking the ball, you do not need to have that side covered with rubber. For example, some penhold players only hit with one side of the blade and they only put rubber on one side. In this case, the unused side must be colored the opposite color (either red or black) from the side with rubber. Many penhold players use a "paint sheet" on their blade to comply with this rule. However, if you hit the ball with the side that does not have rubber, you lose the point!

Rubber sheets must extend up to, but not beyond, the limits of the blade face, except that the part nearest the handle and gripped by the fingers may be left uncovered or covered with any material. The rubber (and all layers of the blade) must be continuous and of even thickness throughout. The surface must be matte (not shiny). Slight deviations from continuity of surface or uniformity of color due to accidental damage or wear may be allowed provided that they do not significantly change the characteristics of the surface.

Pimples rubber (pips out) must have the pimples evenly distributed over its surface at a density of not less than 10 per cm² and not more than 30 per cm². The length of the pips must be uniform and no longer than 2mm.

Inverted (smooth) rubber may have a total thickness no more than 4mm, including sponge and rubber together. The rubber layer (not including sponge) may have a thickness no more than 2mm. There is no maximum thickness stipulated for the sponge thickness alone.

Rubber sheets may not have any physical, chemical or other treatment applied that affects the characteristics of the rubber or sponge. This means no more speed glue! Speed glue and other elements such as baby oil that expand the sponge, or sticky solvents used on the surface of the rubber, change the characteristics of the rubber and make it illegal for use in USATT and ITTF sanctioned events.

Confused by all the regulations? Don't be uncertain. If you buy rubber at Paddle Palace you know it is legal! Paddle Palace only carries rubbers approved by the USATT and ITTF.

- Official Rules of Table Tennis
- ITTF Racket Testing Video

The ITTF Racket Testing Video shows an official performing and explaining the step-by-step racket testing for an international competition. He checks for ITTF rubber approval then does the four tests for Flatness, Thickness, VOC gas, and Gloss.

BUILDING WORLD CHAMPIONS SINCE 1944

POWER IS IN THE AIR

STIGA Airoc utilizes STIGA's new OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the same spin/speed proportions they have always enjoyed. The key to this evolutionary advancement is the delicate balance between the size of the air pockets within the sponge and the elasticity of the top sheet. STIGA's engineers tested many different pips designs and tensions to achieve the perfect rubber for the attacking player. Poly Ball Optimized!

AIROC M
Medium sponge version. Airoc M increases the catapult effect without changing the spin ratio. Sponge 1.7, 1.9, Max. Item: RSARM Speed: 98, Spin: 97, Control: 67, Price: \$54.95

AIROC S
Soft sponge version. Airoc S is designed to expand shot selection and feel for control players. Sponge 1.7, 1.9, Max. Item: RSARS Speed: 94, Spin: 98, Control: 68, Price: \$54.95

PRO With STIGA Allround Classic blade as part of a professional blade/rubber PRO SPECIAL. See page 4

Mendo Energy

The Stiga research laboratory and the World's leading players have together developed Power-Soft-Rubber for absolute world class performance. Special Mendo Energy sponge creates maximum friction on the ball. Sponge 1.8, 2.0, MAX. Item RSMEE

68 75 86 \$29.95

**Mendo MP**

High-tech rubber that revolutionizes touch and sets new standards in transforming energy. Faster than conventional rubbers but with excellent touch and control. Sponge 2.0, MAX. Item RSMEP

78 77 81 \$32.95

**Magna**

Magna is erupting on the market! Stiga ACS system increases speed and spin without sacrificing control. Smooth inverted rubber gives more spin in serves & returns. You dominate in topspin vs topspin rallies, and get better spin control in all situations. Sponge 2.0, MAX. Item RSMAG

74 91 78 \$44.95

NEOS RUBBERS

STIGA's innovative Air-Capsule System has been applied to the top sheet, creating a more responsive rubber sheet with more tension. The results of this new technology - Mega Tension - are amazing! The "molecule-walls" are thinner than ordinary top sheets, creating more tension without increasing the weight of the rubber, causing quicker rubber recovery.

**Neos**

STIGA Neos, with Mega Tension Technology gives you extra speed. Approx. 10% lighter than a regular rubber sheet. Sponge: 2.0, MAX. Item: RSNEO

67 75 86 \$35.95

**Neos Sound**

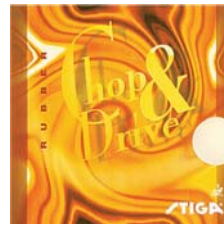

STIGA Neos Sound is ultra light for extra speed. Approximately 15% lighter than a regular rubber sheet. Sponge: 2.0, MAX. Item: RSNES

66 78 85 \$35.95

**Neos Tacky**

STIGA Neos Tacky gives you offensive tacky spin. Approximately 10% lighter than a regular rubber sheet. Sponge: 1.8, 2.0, MAX. Item: RSNET

58 96 82 \$36.95

**Chop and Drive**

Great ball control. Its unique sponge absorbs the ball, thus increasing the contact time that the ball is on the bat. This creates a "can't miss" feeling for the player. Sponge 1.1, 1.5, 1.8. Item RSCHO

55 88 86 \$29.95

**China Extreme**

One of the World's foremost rubbers for maximum spin. With macromolecules and optimized pimple structure STIGA has developed one of the best tacky rubbers for competition play. Sponge 2.1. Item RSCHI

56 83 87 \$27.95

**J.M.S. Evo 1**

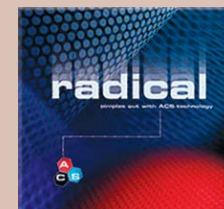

An exceptional allround rubber for players wanting to develop their game. Evo 1 guarantees ease in learning all modern offensive strokes. Evo 1 is suited for a powerful attacking style of play with a focus on control. From the J.M. Saive signature series. Sponge 2.0 Black. Item RSSE1

53 52 96 \$17.95

SHORT PIPS RUBBER**Royal**

STIGA's fastest pips-out rubber. Built for speed! Nano Composite technology in a medium sponge. NC's mixing technique creates 50-100 nanometer sized grains, producing stronger, tighter bonds for greater dynamic effect. You get great spin with the control you need. If you want to finish the point fast, Royal will deliver with its explosive power and sting! Sponge 1.8, 2.0. Item RSROY

82 53 83 \$35.95

**Radical**

ACS Technology is now available for pips out players! Combines the shock absorption of ACS sponge for control and extra ACS power for smashes and attacks. Great for passive and active blocking, and power in counter and smashes. Extra thin sticky surface w/very elastic base. Sponge 2.0, MAX. Item RSRAD

78 53 85 \$32.95

**Clippa**

Clippa is an offensive world class pips out rubber. Clippa's pips-out surface rubber is combined with a hard sponge. Ideal for fast, attacking play near to the table.

Sponge 2.0. Item RSCLI

75 51 87 \$29.95

LONG PIPS RUBBER**Destroyer**

A revolutionary long pimple rubber that has been developed by the World's leading players. Destroyer has exceptional unique long pimple characteristics that are soft and specially shaped to get a maximum response from individual techniques. Sponge OX, 1.0, 1.5. Item RSDS

53 61 86 \$24.95

MAX CATAPULT MAX ARC

bluefire

BLUEFIRE JP 01 TURBO • JP 01 • JP 02 • JP 03

THE CONTINUATION OF A SUCCESS STORY

This is a new type of pimped-in rubber in combination with the proven, dynamic blue sponge but with a somewhat finer pored structure. This lends the rubber sensational feel, with maximum catapult and a very high arc of the ball. The very grippy, taut but elastic top surface rubber produces maximum spin when top-spinning and offers fantastic control due to increased contact on the bat.

Bluefire JP 01 TURBO **NEW**

High end rubber sheet at highest level. Small changes to the structure of the sponge combined with a new pimple formation ensure that this Turbo has enhanced dynamic and spin qualities. Same sponge hardness as JP 01 (47.5°). Recommended for offensive players who value good control.

Sponge 1.8, 2.0, Max. Item RDBLJT

97 98 67 **\$56.95**

Bluefire JP 01

A very consistent rubber which is suitable for most players. The quickest and hardest sponge version (47.5°), especially recommended for close to the table attacking players as well as those who prefer to play away from the table.

Sponge 1.8, 2.0, Max. Item RDBLJ1

97 97 67 **\$54.95**

Bluefire JP 02 **NEW**

This rubber with open-pored sponge, in the medium hardness range (45°), produces a perfect combination of spin, speed and control. Ideally suited for attackers and powerful allround players who require all these qualities in one rubber.

Sponge 1.8, 2.0, Max. Item RDBLJ2

95 97 68 **\$54.95**

Bluefire JP 03

Extremely grippy, taut, though elastic top surface rubber is combined with a softer sponge (42.5°). Ensures outstanding feeling with maximum control. Recommended for attackers as well as power-allround players who require maximum control to return the ball under pressure in any situation.

Sponge 1.8, 2.0, Max. Item RDBLJ3

94 98 68 **\$54.95**

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

MAX CATAPULT MAX ARC

bluefire

BLUEFIRE M 1 TURBO • M1 • M 2 • M 3

THE BLUE MIRACLE

A new high-tech generation of rubbers in the proven Formula FD3-technology has been developed as a result of the perfect combination of the large pored blue sponge with an extremely spinny top surface rubber.

The top rubber with its small, long pimpled-in structure lends the rubber the best possible flexibility and sensational feeling. Above all, the Bluefire is unbelievably dynamic with a characteristic high arc when top-spinning that enables maximum spin and increased speed.

Bluefire M1 TURBO

High-end rubber sheet at highest level. Small changes to the structure of the sponge combined with a new pimple formation ensure that this Turbo has enhanced dynamic and spin qualities. Top surface rubber offers extra spin. Slightly harder sponge (50°). Recommended for powerful attackers and offensive players.

Sponge 1.8, 2.0, Max Item RDBMT

98 98 66 \$56.95

Bluefire M1

With a medium hard sponge, very direct, highly dynamic, extremely spinny. Recommended for top players or players who practice a lot and prefer to use harder rubbers.

Sponge 1.8, 2.0, Max Item RDBM1

98 96 66 \$54.95

Available with DONIC Baum Esprit blade as part of a professional blade/rubber PRO SPECIAL. See page 5

Bluefire M2

With its medium sponge, it combines the perfect balance between speed, catapult effect, and feel. In combination with fast, stiffer blades, it presents its optimum potential. Recommended for players who like to play with medium hard rubbers and attach high importance to spin and speed with optimum feeling.

Sponge 1.8, 2.0, Max Item RDBM2

95 97 68 \$54.95

Bluefire M3

Combined with a soft, dynamic sponge. Perfect adjustment of the soft version has resulted in precise feel, excellent spin, and distinctive sound. Recommended for players who prefer soft rubbers with perfect control and good speed. Also for aggressive all-round players.

Sponge 1.8, 2.0, Max Item RDBM3

93 98 70 \$54.95

TUNED TO PERFECTION

Continued

COPPA Formula High Speed**Coppa**

For aggressive offensive play with topspin, counter topspin and block, & winning points with hard strokes. High-elastic, spinny surface with soft, dynamic sponge = outstanding control. One of Donic's best-selling rubbers. Used by J.O. Waldner and Jörgen Persson to win the World Champs titles in men's singles. Sponge 2.1, MAX. Item RDCOP

74 75 83 \$37.95

Coppa Tenero

Well liked soft-sponge version of the bestseller World Champion rubber, COPPA. Coppa Tenero has the same outstanding spin abilities. Due to its soft sponge it grants an absolute ball control with a slightly reduced speed. Excellent ball feeling. Sponge 2.1, MAX. Item RDCOT

74 88 79 \$44.95

TRACTION MS**Traction MS Soft**

Softer version, intended for spin/control. Great as a backhand rubber for top players. Compared to harder Traction MS Pro, TRACTION MS SOFT is somewhat more flexible. This rubber offers outstanding control, with a pleasant elasticity, yet it is very spinny. The sponge color is yellow. Sponge 2.1. Item RDTRS

88 96 71 \$56.95

Traction MS Pro

The harder alternative for top class players. Taut top rubber surface and relatively hard sponge guarantee steep penetration and length with all top spin strokes. Ideal for aggressive serves and returns due to the grippy top surface of the rubber. It also gives sufficient control for more defensive strokes. Sponge color is pink. Sponge 2.1. Item RDTRP

90 95 70 \$66.95

VARIO SERIES**Vario Sound**

Unique sound system! Soft sponge and very elastic top surface rubber gives a distinctive loud sound when top-spinning. This rubber is the softest of the three Japanese Vario rubbers and is very spinny, with a high ball arc and fast topspin. Great for attack that combines stiff blade with soft rubbers, or for allround game of spin+control when striking the ball. Sponge 2.0, MAX. Item RDVAO

76 86 79 \$49.95

Vario Big Slam

Perfect feeling with fantastic sound! First Vario rubber to be made in Germany, with world-famous Formula Donic technology with built-in speed glue effect for the modern game. Soft, 35 degree sponge gives perfect feeling for controlled all around play, with a tendency to an offensive game. Ideal for spin/rotation players who prefer soft rubbers with a fantastic sound when hitting the ball. Sponge 2.0, MAX. Item RDVAR

74 86 85 \$41.95

DONIC Vario is available with DONIC Waldner Exclusiv AR+ blade as part of a professional blade/rubber PRO SPECIAL. See page 5

Vario PRO

One of the best selling rubbers world-wide. Semi hard sponge, high grip, outstanding spin elasticity, high speed, good control. As its name indicates, this rubber is recommended for all modern playing strategies. Sponge 2.0, MAX. Item RDVAR

72 82 79 \$32.95

DIMA OVTCHAROV:

blade: DONIC Dima Original Senso Carbon
rubber: DONIC Bluefire M1 Turbo
2013 European Champion
2012 Olympic Bronze Medalist w/Germany
3x World Team Championships Silver Medalist

ACUDA Formula High Spin

DONIC Acuda S1 Turbo is available with DONIC Ovtcharov Senso V1 blade as part of a professional blade/rubber PRO SPECIAL. See page 5

Acuda S1 Turbo

Spinny, accurate, top class rubber for performance attack. Built-in speed glue effect enhances speed and acceleration. A precision rubber for accuracy at high speeds. Despite its speed, it has perfect feel-like earlier speed glue days. Good length when playing fast loops. Sponge 1.8, 2.0, MAX. Item RDAC1

97 96 67 \$49.95

Acuda S1

Close to or away from the table it is possible to play "loop-loop" as in the days of speed-glued rubbers. Despite a medium-hard sponge, ACUDA S1 is easily controllable and great feel, even in an awkward situation. Basic character: spin-focused, high precision fast rubber. Play style: aggressive, first ball attack, close to the table. Sponge 1.8, 2.0, MAX. Item RDACU

96 93 69 \$49.95

Acuda S2

Ideal for attacking players who have used soft rubbers with speed glue. Spin-optimized and fast, with medium-soft, large-pored sponge, and precise feel. You get speed and a uniquely loud sound. Great for close-to- and away from- the table for topspin/topspin duels. Great for power allrounders and attacking players. Sponge 1.8, 2.0, MAX. Item RDAC2

93 95 69 \$49.95

Acuda S3

Acuda S3 is spin-optimized, fast, paired with perfect sound. The very soft sponge increases feel and sound, and offers sufficient speed for powerful spin and a positive block game. Unique sound! Recommended for players with an allround style who require excellent control. Sponge 1.8, 2.0, MAX. Item RDAC3

90 97 70 \$49.95

**Baracuda Big Slam**

Now even more vicious: more sound & control due to softer sponge. Built-in speed glue effect produces fantastic spin. Ball leaves blade in a higher arc, with increased rotation to stabilize the flight and increase speed and placement even for top players. Topsheet minimizes abrasion for more playing hours. Sponge 1.8, 2.0, MAX. Item RDBAB

87	97	71	\$43.95
----	----	----	---------

**Baracuda**

Built-in speed glue effect produces fantastic spin. When the ball leaves the blade, higher arc results in increased spin + rotation. The ball is stabilized, fast and accurate. Top rubber surface is more durable than similar rubbers and less prone to damage. Sponge 2.0, MAX. Item RDBAR

89	96	70	\$43.95
----	----	----	---------

DESTO SERIES

These rubber sheets have **DONIC FORMULA** technology with strengthened inbuilt speed glue effect. Fast + spinny. DESTO F1 has even more speed. Improved durability.

Desto F3 Big Slam

Loud sound, without speed glue! Distinctive sound is permanently incorporated into BigSlam, which is softer but not slower than the popular DESTO F3. Amazing ball control with the same effect as optimum speed glue. For players who used speed glue and value sound and ball control qualities rather than maximum speed. Sponge 2.0, MAX. Item RDDFB

75	86	79	\$39.95
----	----	----	---------

**Desto F1**

The fastest rubber from the DESTO Formula series! More speed and spin due to built-in speed glueing effect! A high-tech weapon for well-trained players of ability, who want more speed. Good sound, softness, plus speed and spin. Sponge 2.0, MAX. Item RDDF1

90	84	74	\$39.95
----	----	----	---------

**Desto F2**

The bridge between F3 and F1, giving great control at high speed. F2 is soft, has a good feel and the full sound of speed glue. It produces more speed than traditional spin elastic rubber. Slower than F1.

Sponge 2.0, MAX. Item RDDF2

84	86	76	\$39.95
----	----	----	---------

**Desto F3**

Built-in speed glue effect, with same speed but more control. Desto F3 is somewhat faster than a traditional spin elastic rubber. Soft, dynamic, w/excellent control, and great sound of speed glue. Speed glue must not be used. Sponge 2.0, MAX. Item RDDF3

76	87	78	\$39.95
----	----	----	---------

**Liga Plus**

Combines the tried and tested Liga top sheet with a new more flexible sponge. This combination guarantees even more playing fun with relatively high grip and spin. The rubber with the perfect price-performance ratio.

Sponge 2.0 Item RDLIP

56	52	95	\$24.95
----	----	----	---------

**Slice 40**

Smooth rubber with a sophisticated pips-in design, with a soft rubber surface tuned for defensive strategies. Quicker than the standard version Slice rubber. It offers more chop possibilities and more trickiness when defending with the 40 mm ball. Great control, but very good offensive characteristics for top-spin and counter attacks. Sponge 1.2, 1.5. Item RDSLI

52	79	90	\$42.95
----	----	----	---------

**Akkadi Taichi**

Very grippy top surface for maximum spin, and rotation.

Used by many world top ranked Asian players on forehand. Special black sponge makes this harder and stiffer than the red version. Red Akkadi Taichi is more elastic with even better bounce of the ball. This black version is recommended for the forehand. Great for serve and the first top spin in the rally. Sponge 1.5, 1.8, 2.0. Item RDAKK

78	89	77	\$29.95
----	----	----	---------

SHORT PIPS RUBBER**Baxter D-25**

Short pips-out rubber with Spin-Control-System! Do you have problems controlling your opponent's serve or problems controlling your backhand? Do you have problems returning heavy topspins? The Donic Baxter rubber masters easily every kind of topspin and underspin variation. With 25% speed moderation for the safe and controlled pips-out player. Sponge 1.9. Item RDBAD

61	62	88	\$42.95
----	----	----	---------

**Baxter F1-A**

Fast short pips-out rubber. The typical softness of the sponge gives a superb feeling for the ball. Baxter F1-A masters ball control in slow rallies, yet gives explosive power for fast strokes. This is the result of the integrated molecular tension of Formula Donic technology. Sponge 2.0. Item RDBAF

91	62	77	\$44.95
----	----	----	---------

LONG PIPS RUBBER**Piranja Tec**

The technic defense long pips rubber for classical defenders. Formula DONIC technology was introduced into a long pimped rubber, resulting in an exceptional long pips rubber which is soft, very elastic, with excellent gripping qualities. Enables the player to impart far more backspin against topspin than has been possible with other current rubber technology. The pimples are faster but easier to control because of their inbuilt "speed glue" effect, ensuring more accurate blocking, counter attacking and

variations of spin. The best weapon for the technically gifted classic defender, particularly effective when paired with modern sponge rubber on the other side.

Sponge OX, 1.2. Item RDPIR

65	75	77	\$45.95
----	----	----	---------

ANTI TOPSPIN RUBBER**Alligator Anti**

This is anti-loop rubber that is very troublesome for the opponent—it has a bite! The taut anti-spin top sheet and the hard sponge ensure that the ball is returned with speed, therefore putting the opponent under pressure. It enables using effective variations and dropping the ball short with good touch. The opponent's shots can be returned short or long with this effective weapon. Attack and counter-attack are easily possible. Sponge 1.0, 1.5. Item RDALL

59	86	\$39.95
----	----	---------

SPEED CONTROL

**Anti Classic**

The elastic anti-spin top surface and the soft sponge make this the classic among anti-spin rubbers. Great for defenders who play with variety as well as allround players who attack close to the table. The outstanding control is apparent in all playing situations. Made in Japan.

Sponge 1.5, 2.0. Item RDANC

FASTARC TECHNOLOGY RUBBER

Fastarc is "Fast" with an "Arc". This is the new technology rubber for players who desire high speed balls, ideal arc, and powerful topspin, and touch for all strokes of your game.

WANG LIQIN:

3-Time World Champion and was ranked #1 for 25 consecutive months.

Zalt SPECIAL

Features Nittaku's new technology "Z9 sponge" combined with high grade natural rubber top sheet with special (inward) pimple shape. Excellent spin and wonderful balance of sensitive ball control and touch. ZALT is recom-

mended for a wide range of players who use powerful top spin as well as well-balanced defensive play. Sponge 1.8, 2.0 Item RNZAL

85 83 76 \$39.95

Galze SPECIAL

AC (Active Charge) Technology is incorporated in this rubber made from high-quality natural rubber. This is the basis for the outstanding grip performance and speed performance while maintaining delicate ball touch. Sponge 1.8, 2.0 Item RNLZ

98 94 70 \$54.95

Fastarc C-1

The Nittaku Fastarc C-1 rubber is "Fast" with an "Arc"! It is the ingenious creation from Nittaku combining a "tension spin" topsheet with a "soft strong sponge". It takes the best attributes from earlier Fastarc rubbers: G-1 and S-1 and utilizes them to make the new Fastarc C-1. This combination creates incredible grip and speed to allow players to create artistic shots.

Sponge thickness 1.8, 2.0. Item RNFC1

97 97 67 \$54.95

Fastarc G-1

This is the "Grip First" version of Fastarc. It features a Tension Spin top sheet and Strong Sponge. Ideal new technology rubber for players who desire high speed balls, ideal arc, powerful topspin, and touch for all strokes of your game. Sponge thickness 1.9, 2.1. Item RNFG1

96 97 67 \$54.95

Available with NITTAKU Flame Carbon blade as part of a professional blade/rubber PRO SPECIAL. See page 5

PRO

Fastarc S-1

This is the "Speed First" version of Fastarc. It features a Tension Speed top sheet and Soft Strong Sponge. This rubber is high spec quality, but it is also suitable for a broad range of high level players. It is great for high speed balls, ideal arc, powerful topspin, and excellent touch for all strokes of your game. Sponge thickness 1.4, 1.8, 2.0. Item RNFS1

97 96 70 \$44.95

Made in
Germany

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

FLYATT HARD and FLYATT SOFT

Available with NITTAKU Flyatt Carbon blade as part of a professional blade/rubber PRO SPECIAL. See page 7

Flyatt Hard **PRO**

Harder sponge version of Flyatt. Produced from high grade natural rubber with the help of advanced high polymer Active Charge Technology. You will enjoy outstanding spin and speed with ideal ball trajectory. Harder sponge for excellent power play. Sponge 1.8, 2.0 Item RNFLH

97 93 68 \$45.95

Flyatt Soft

Softer sponge version of Flyatt. Produced from high grade natural rubber with the help of advanced high polymer Active Charge Technology. You will enjoy outstanding spin and speed with ideal ball trajectory. Softer sponge for excellent feel and balance. Sponge 1.8, 2.0 Item RNFLS

95 96 69 \$45.95

NODIAS and MORISTO

Moristo 2000 NX

The Tension of Speed Glue!

Top-sheet and sponge has the latest special technology, keep the tension inside as if speed glue were applied. Super elastic top-sheet and sponge puts the ball deep into the rubber on attack, then springs with outstanding spin and speed, + control. Sponge 2.2. Item RNMNX

89 91 72 \$49.95

Moristo RS

Tension with control and performance!

Great built-in tension factor with Moristo RS Rubbers. Powerful offense with the best feeling of invincibility. You will forget that speed glue ever existed! Available with hard version and soft version sponge.

Moristo RS Soft

Sponge thickness 2.0, 2.2. Item RNMRS

87 89 74 \$46.95

Moristo RS Hard

Sponge thickness 2.0, 2.2. Item RNMHR

88 86 74 \$46.95

Moristo DF

PRO

AMAZING FEELING! For defensive and allround play. Super elastic topsheet and sponge. Ball goes deep into sponge for a great spring effect, but with slower speed it also provides a "hang effect" with excellent control. Sponge 1.3, 1.5, 1.9. Item RNMDD

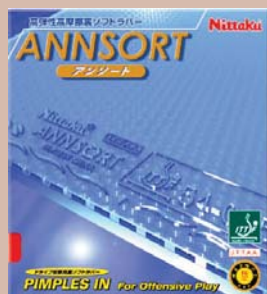

69 93 79 \$37.95

Nodias

Powerful topspin and Pin-Point Control! Careful mix of natural rubbers in the topsheet, results in superior "bite" (or "grab") feeling. Even in counter attack, the rubber grabs the ball firmly with control. Combined with highly elastic sponge, you get powerful topspin, slow shots, and pin-point control in a variety of shots. Sponge 2.0, 2.2. Item RNNOD

80 81 79 \$38.95

Annsort

Unique combination of a China-made topsheet and Japanese sponge provides the player excellent spin and control. Ideal for the at-the-table technique player who uses quick drives. Sponge 1.9, 2.1. Item RNANN

80 72 82 \$35.95

Retora

This easy to handle rubber is especially recommended for the player who emphasizes control in their game. Quality rubber, and quality performance. Sponge 1.8, 2.0 Item RNRTR

69 74 86 \$26.95

RENANOS

\$39⁹⁵

Renanos Bright Hard SPECIAL

The latest technology to keep Nittaku players at the top of the game! New IE, "Integrated Energy", allows for outstanding Power, Speed, Grip, and Elasticity. IE combines natural and synthetic rubber for a highly elastic top sheet and increased power. Speed glue ban has left players demanding more power and speed without loss of stability and touch. Experience the feeling of IE -- Don't settle for less! Sponge 1.9, 2.1. Item RNRBH

93 93 70 \$47.95
\$39⁹⁵

Renanos Bright Soft SPECIAL

The latest "IE" Integrated Energy technology as Renanos Bright Hard, but with softer sponge for maximum control and spin. Sponge 1.9, 2.1. Item RNRBS

91 95 70 \$47.95

Renanos Hold

Very spinny high-quality rubber. Enables a topspin shot with severe spin, and excellent speed for fast topspin play. With a well-executed loop, the ball drops quickly as it crosses the net then leaps forward when landing on the table. Sponge 1.9, 2.1. Item RNRHO

94 96 68 \$49.95

Renanos Hard & Renanos Soft

Very fast offensive rubber made from a good balance of synthetic and natural rubber, so it can grip the ball firmly for great spin and make a powerful shot without speed glue. Made with "Active-Tuning" technology for increasing the speed performance of the sponge. Renanos will satisfy you whether you use speed glue or not. Available in hard or soft sponge.

Renanos Hard Sponge 2.0, 2.2. Item RNREH

92 92 71 \$42.95

Renanos Soft Sponge 2.0, 2.2. Item RNRES

90 94 71 \$42.95

Refoma

Maximizes the characteristics of Natural Rubber! Special time-intensive rubber production process maximizes the unique great feeling and high elasticity of natural rubber. You maintain control while producing fatal power shots - topspin, blocking and short chopping. Sponge 1.9, 2.1. Item RNREF

90 95 76 \$43.95

NARUCROSS

**NEW
LOWER
PRICES!**

Narucross EX Hard

Narucross "cross system" PLUS the Narucross "tension" in its maximum form! Maximum tension = maximum power and performance without speed glue. EX Hard version is speedier than EX Soft with good spin. Sponge thickness 1.9, 2.1. Item RNNXH

88 92 72 \$49.95

Narucross EX Soft

Narucross "cross system" with "tension" to the MAX = maximum power and performance without speed glue. Soft version is very spinny with more control. Available in sponge thickness 1.9 and 2.1. Item RNNXS

86 94 72 \$49.95

Narucross GS Hard

Narucross GS Soft

Narucross GS Super Soft

Narucross GS

Spinniest of all the Narucross series rubbers. Designed with "Max Tension Technology" for maximum tension in the topsheet and sponge. Superb balance of spin and speed makes this the choice of top players. Recommended for powerful and offensive game.

NARUCROSS GS is available in three sponge choices: HARD, SOFT, and SUPER SOFT.

HARD sponge is faster and favored by the quick, powerful, driving players.

SOFT sponge has the most equal balance of speed and spin, and is favored by powerful driving and spin players.

SUPER SOFT sponge has good spin with outstanding touch and control.

Hard sponge is cream colored. Soft and Super Soft sponge are yellow in color.

Available in Sponge thickness 1.9 & 2.1.

Narucross GS Hard Item RNNGH

90 93 71 \$52.95

 Olympic Bronze medalist 2004; 16 x Winner on the ITTF Pro Tour

HAMMOND**Hammond Pro Alpha**
Choice of Champions!

This is the magic rubber you have been waiting for!!!
 Extremely fast and spinny, with amazing feel. You get more power than other rubber on the market and it has fantastic control. Ver soft power sponge combined with top rubber of maximum elasticity. Sponge 1.9, 2.1. Item RNHAP

87 80 77 \$37.95

**Hammond X**

If you prefer spinny rubbers, you will love HAMMOND X.
 Based on HAMMOND, with "integrated Energy (ID)", but with "nano-composite," where the chemical component, ground up to nano level, is compounded to enhance the characteristics of each component. Hammond X sponge is 70% synthetic to maximize the spring effect. Sponge 1.9, 2.1. Item RNHAX

89 72 79 \$42.95

**Hammond**

Extremely soft but fast rubber sheet with a maximum spin. Very fast but with outstanding control. Made in Japan with the finest production methods. Hammond is well-liked by top players for fast play: smash, attack and topspin. With the right sponge this is the ideal rubber sheet for all offensive and allround players. Sponge 1.9, 2.1. Item RNHAM

78 78 81 \$37.95

**Hammond Pro Beta****New Horizons in Speed Performance!**

This Beta version of Hammond Pro has the latest IE (Integrated Energy) technology, enabling new horizons in speed performance. Also outstanding for hitting topspin from any distance from the table. Hammond Pro Beta is the must-have rubber for the most enthusiastic table tennis players. Sponge 1.9, 2.1 Item RNHAB

93 86 72 \$48.95

LONG PIPS RUBBER**Wallest**

Everything you ever wanted in a long pips rubber. Excellent spin reversal and control.

Wallest One

Everything you ever wanted in a long pips rubber. Excellent spin reversal and control. Wallest One is the no-sponge version of Wallest, resulting in less speed and more control.

Wallest: Sponge 1.0, 1.2. Item RNWLL

61 62 88 \$34.95

Wallest One: No Sponge. Item RNWLO

43 62 95 \$34.95

**Moristo LP**

2 Versions
 Moristo LP & Moristo LP One [No Sponge]

The tremendous elasticity of this rubber produces fantastic control and the amazing unexpected wobble-effect!

Moristo LP: Sponge 1.0, 1.3. Item RNMOLP

61 68 81 \$39.95

Moristo LP ONE: No Sponge. Item RNMOL

42 71 86 \$39.95

**Screw Soft & Screw One**

Master of Deception!
 Legal and ready to go with the ultimate in long-pips deception. Reverses the opponents' spin, and gives you excellent control for your defense.

PRO

Available with TIBHAR Force Pro blade
as part of a professional blade/rubber
PRO SPECIAL. See page 7

Evolution MX-P SPECIAL

The fastest and most dynamic rubber of the EVOLUTION rubber family. Perfect adjustment of the pips geometry gives more flexibility and energy on attack. MX-P is well-adapted to any player's game in terms of speed and spin. The ball/bat contact time of the MX-P is a little bit longer than the reference time, thus conferring much more sensation. Chosen by topspin players willing to feel the necessary pressure of their strokes at the table and at half distance. Sponge 1.7, 1.9, 2.1 Item RTEVM

98 96 67 ~~\$56.95~~

Evolution EL-P SPECIAL

The most elastic rubber of the EVOLUTION rubber series. EL-P with its medium sponge perfectly fits in between the harder MX-P and the softer FX-P. The selected pimple geometry of the elastic EL-P does not even come close to the other EVOLUTION versions in terms of Spin and speed. Very precise and powerful strokes can be realised at half distance or at the table. Evolution EL-P: chosen by most of the Topspin players for whom the MX version is too hard and the FX version too soft, however putting the emphasis on rotation and power! Sponge 1.7, 1.9, 2.1 Item RTEVE

96 97 67 ~~\$56.95~~

Evolution FX-P SPECIAL

The most flexible and soft version of the EVOLUTION rubber family. This rubber confers a lot of sensation and control in any playing situation. FX-P is a high-performing rubber proven by the enormous sound resulting from topspin strokes. The rubber surface is rich in spins and soft sponge with high catapult effect. You get the power necessary for a variable topspin game. The player who likes to attack near the table and is not willing to concede any ball while playing a risky game will enjoy the fine tuning of the rubber surface with the soft sponge of the EVOLUTION FX-P. Sponge 1.7, 1.9, 2.1 Item RTEVF

94 98 68 ~~\$56.95~~

AURUS: INTEGRATED SPEED GLUE EFFECT

Aurus SPECIAL

For the ambitious player striving to play topspin strokes in any situation. Ultra soft rubber surface provides outstanding spin and playing sensation, allowing a secure and aggressive game. The integrated SPI (Speedglue-Effect-Inside) technology confers an extreme catapult reaction to the ball. Sponge 1.9, 2.1. Item RTAUR

96 89 70 ~~\$49.95~~

Aurus Soft SPECIAL

Softer version of Aurus, offering better control with a high ball rebound. An energy-loaded rubber ideal for spin-rich strokes and secured topspins with good control. Very well adapted to each game level for an optimal performance. Sponge 1.9, 2.1. Item RTAUS

92 94 70 ~~\$49.95~~

Aurus Sound SPECIAL

The softest version of Aurus produces a great sound and pure playing pleasure. Balanced playing sensation of the soft sponge and the elastic rubber surface were adapted to players who want to use energy-loaded strokes with greater accuracy. Sponge 1.9, 2.1. Item RTAUS

89 96 70 ~~\$49.95~~

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

TIBHAR Q SERIES RUBBERS

**1Q Sound**

Features a soft and elastic rubber surface, and an extraordinary sound when striking the ball. This soft version of the TIBHAR 1Q has more playing sensation and control. Aggressiveness and sound are the main characteristics of this rubber. This is the ideal weapon to execute attacking and balanced strokes. Sponge 1.9, 2.1. Item RT1QS

96	96	68	\$58.95
----	----	----	---------

OPTRA TECHNOLOGY (Optimized Trajectory - Optimized Ball Curve) plus **SPI ADVANCED** (Speed Effect Inside) guarantees you maximum performance from these excellent rubber sheets.

**5Q Sound**

The proven and highly flexible rubber surface of the TIBHAR 5Q was reworked, and the 5Q Sound offers approximately 15% more spin, and a sound that is very close to the sound of speed glued rubber. Combined with a softer sponge, it confers an extraordinary playing sensation fitting perfectly into a topspin game. Controlled, spin-friendly strokes, without a big speed loss, are the main characteristics. Sponge 1.9, 2.1. Item RT5QS

93	97	68	\$58.95
----	----	----	---------

**5Q**

The softer version of the Q-rubber-family, 5Q has a medium-hard sponge that transfers lots of rotation to the topspin and counter-topspin shots at mid-distance. The rubber surface is full of sensation, supported by the SPI-Advanced-Technology, and giving a wonderful sound and a good handling. The newly conceived rubber surface allows lots of rotation and provides the necessary security when playing the large pallet of spins. Sponge 1.9, 2.1 Item RT5Q

96	97	70	\$58.95
----	----	----	---------

**1Q XD**

This new version of 1Q possesses a higher potential of penetration. The adhering rubber surface and the harder sponge confer even more energy to the strokes from topspin players making no concession. Supported by SPI-Advanced-Technology, 1Q XD is the ideal rubber for the professional players able to execute good arm and wrist acceleration for fast and aggressive play. Excellent balance for passive and aggressive adversarial strokes, resulting in outstanding precision at high speed! Sponge 1.9, 2.1 Item RT1QX

99	92	68	\$58.95
----	----	----	---------

**1Q**

Thanks to SPI Technology Optimization, 1Q has the greatest speed glue effect of all, resulting in a fast, dynamic rubber with a high ball curve. Robust rubber surface enables an explosive game rich in spins. The basic principle of OPTRA technology (Optimized Trajectory - Optimized ball curve) was also improved for longer trajectories although ball curve is very high. Opponents will have a hard time controlling and returning the ball, putting you at the edge of your potential without passing your limits! Sponge 1.9, 2.1 Item RT1Q

98	90	69	\$58.95
----	----	----	---------

UNBEATABLE IN SPEED

**Nianmor**

Perfect for the mid-distance offensive game, with topspin and counter topspin strokes. Thanks to a mix of natural and synthetic caoutchouc in the sponge composition + a new arrangement of pips, Nianmor offers highest standards of Japanese rubber technology, giving you topspin strokes with high catapult level + speed and rotation. Best suited for the new offensive game! Sponge 2.0, Max. Item RTNMM

97	86	71	\$54.95
----	----	----	---------

RPS
RED POWER SPONGE
TECHNOLOGY

**Grip-S Europe**

High performance rubber with high catapult effect and dynamic speed. Under extreme strokes the ball contact onto the stable and adhering rubber surface is unequalled in opening up new possibilities. Revolutionary RPS (Red Power Sponge) Technology enables energy transfer with optimal effect on the speed of the ball bounce and trajectory. With GRIP-S Europe you are best equipped for a variety-rich serve and return game. Sponge 2.0, Max. Item RTGRE

91	93	71	\$54.95
----	----	----	---------

**Grip-S Europe Soft**

This softer RPS sponge version of the Grip-S confers more sensation and flexibility than the Grip-S Europe. The RPS technology is synonymous with pure playing pleasure--efficient energy transfer means optimal balance between speed and ball curve. GRIP-S Europe Soft is conceived for the player favoring a mid-distance game, allowing dynamic topspins, good control, and lots of spin rotation. Sponge 2.0, Max. Item RTGRS

85	98	72	\$54.95
----	----	----	---------

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

TIBHAR®

SINUS RUBBERS

Sinus Alpha

Softer sponge than Sinus provides even better control. Not as fast as its harder twin but with unequaled precision on fast topspins and blocking balls. Balls have longer, evenly curved trajectory, for more pressure on the opponent. For players looking for dependability + acceleration. Sponge 2.0, Max. Item RTSIA

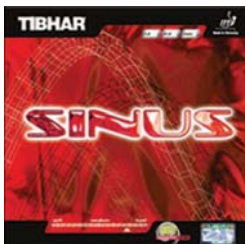

88	82	79	\$54.95
----	----	----	---------

Sinus Sound

The "loud" variety of the SINUS series. Great sound with ball contact + amazing speed glue effect! Pronounced ball curve forgives mistakes. Integrated speed-glue-effect sponge is softer than Sinus or Sinus Alpha. You get great game sensation, optimal contact, and maximum spin + speed, even during slow topspin exchanges. Sponge 2.0, Max. Item RTSIS

83	84	78	\$54.95
----	----	----	---------

Sinus

NO LIMITS! Developed for high-performance with harder sponge for powerful play. Unsurpassable, with tremendous ball speed. Great rotation during topspin, service and short exchanges. Also provides the ever popular fresh-glue sound. Sponge 2.0, Max. Item RTSIN

91	79	83	\$54.95
----	----	----	---------

NIMBUS RUBBER

Nimbus Sound

Thanks to the new SPI technology, the playing sensation and sound are highly emphasized. The extremely soft sponge gives this rubber an extraordinary sound and high spin. It also gives players high potential for flexibility in stroke play. Especially designed for players who look for more than just speed in a rubber. You get extreme spin rotation which improves delivery of strong offensive stroke play. Sponge 1.8, 2.0, MAX. Item RTNIO.

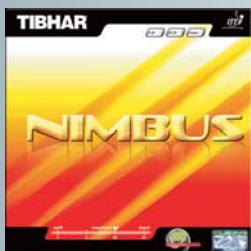

75	81	83	\$45.95
----	----	----	---------

Nimbus Soft

The soft version of Nimbus will definitely impress players who like very soft offensive rubbers. Nimbus Soft with its 37.5 degree sponge hardness has exceedingly perceptive ball control and was developed in such a way that, even in extreme playing situations it provides a large margin for technical error. Sponge 1.8, 2.0, MAX. Item RTNIS

79	78	84	\$45.95
----	----	----	---------

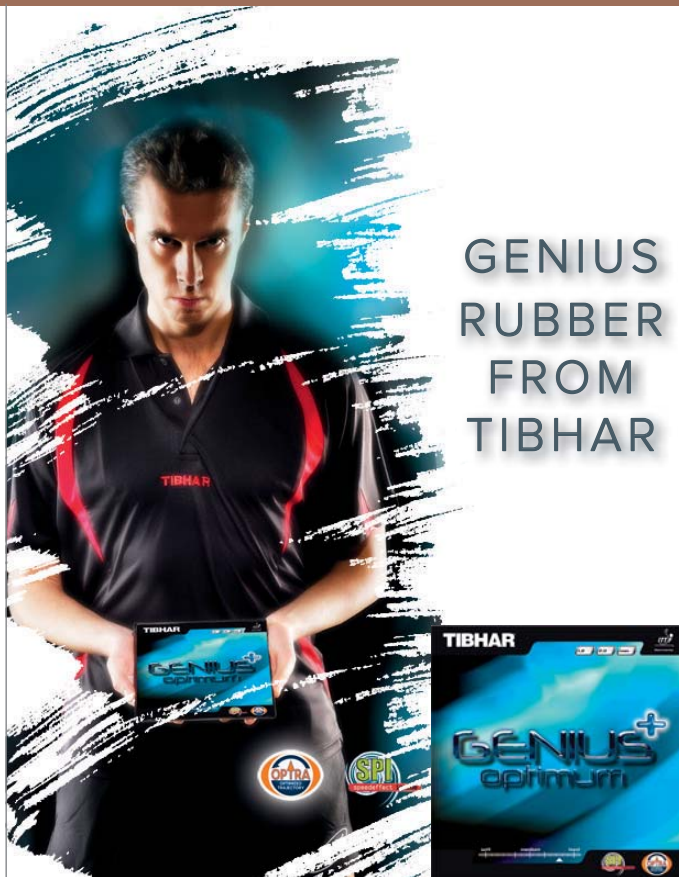

Nimbus

No need for speed glue! NIMBUS -SPI includes TIBHAR's newly developed 'speedglue integrated configuration' giving you all the essential factors of speedglued rubber. Incredible spin-speed dynamic plus typical sound and ball contact feeling. With a 45 degree sponge hardness it is not only the hardest Nimbus rubber, but also the fastest. Sponge 2.0, Max. Item RTNIM.

84	78	79	\$45.95
----	----	----	---------

MORE SMOOTH RUBBER

GENIUS RUBBER FROM TIBHAR

Genius+ Optimum

A premium rubber with Optra and Speed Effect Inside Technologies. The pimple structure is a little bit different and smaller than that of Genius, thus conferring more rotation and an unbelievable dynamic for the topspin game.

Sponge 1.8, 2.0, Max. Item RTGOP

94	91	70	\$49.95
----	----	----	---------

Genius+ Optimum Sound

Soft version of Genius+ Optimum. Extremely strong catapult effect paired with a light playing sensation. Energy-loaded sponge and rubber surface offers an optimal mixture of dynamism, playing sensation, sound and control. Sponge 1.8, 2.0, Max. Item RTGOS

91	93	71	\$49.95
----	----	----	---------

Genius Sound

Softer and reworked version of Genius. Ideal for a very dynamic game, and allowing a brand new variety of strokes at mid-distance. The combination of newly developed sponge and spin-rich surface give you a rubber rich in sensation, with great sound, fast and full of spin. Sponge 1.8, 2.0, Max. Item RTGES

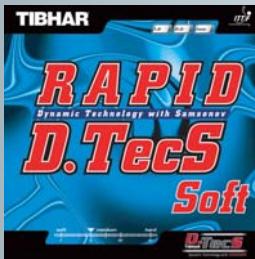

89	95	71	\$49.95
----	----	----	---------

Genius

Rich in spin for the offensive game!

Obviously focused on spin--and more spin in this case also signifies more speed. More spin also means that the angle of the ball rebound is more upright, conferring a bow-formed ball curve, giving more precision to your strokes and putting your adversary under pressure. Sponge 1.8, 2.0, Max. Item RTGEN

91	87	73	\$49.95
----	----	----	---------

Available with TIBHAR Black Carbon blade as part of a professional blade/rubber PRO SPECIAL. See page 4

Rapid DTecS Soft

PRO

Dynamic Technology! SOFT version is even more advanced than the normal D.TecS rubber. The sound is fantastic and the speed is extreme, even without speed glue. Sponge Max. Item RTRADS

80 76 80 \$44.95

Available with TIBHAR Samsonov Alpha blade as part of a professional blade/rubber PRO SPECIAL. See page 4

Rapid

PRO

Vladimir Samsonov helped develop this rubber. Soft sponge+very elastic rubber provide speed, spin and lots of ball feeling with optimum control. Sponge 1.8, 2.0, Max. Item RTRAP

69 58 91 \$35.95

Legend

An extremely adhering surface, which when combined with a very soft sponge allows this high quality Chinese rubber to play more like its European counterparts. This then makes it the ideal rubber for players looking to produce much rotation and benefit from feeling. Sponge 2.0, MAX Item RTLEG

61 58 94 \$27.95

Super Defense 40

The best super defense! Developed expressly for defense with pimple geometry and extremely thin smooth rubber surface, plus special sponge. Definitive ball control allows you to cut the ball spin with extra spin. Item RTDEF. Sponge 0.5, 0.9, 1.3, 1.5, 1.7, 1.9.

62 92 83 \$46.95

Super Defense 40 Soft

The soft version of Super Defense 40 offers even better control with excellent spin variations. Effective for close-to-table strategies. Put your adversary under pressure, applying even more tactical force in Allround defensive play. Sponge 1.3, 1.6. Item RTDES

60 95 84 \$46.95

Volcano

A high quality Allround attacking rubber at a competitive price. But do not let the excellent price mislead you! Volcano is top-notch with its superior adhering surface and typical "characteristics" of rubbers made in Germany. Sponge 2.0, MAX. Item RTVOL

 XIOM RUBBER COMPARISON CHART
 page 82

New Rubber from XIOM

Phased dynamics in the energy transfer between a ball and a rubber determines the rubber performance. Traditionally phased physical dynamics has been developed to produce the maximized spin and speed easily at lower swing speed. But the table tennis professionals can deliver solid contacts to the ball at higher swing speed. Their energy can be transferred more efficiently and precisely with the new dynamics, specially phased for the professional play. OMEGA V focuses on the new dynamic mechanism for top professionals. Solid clicking, energy-charged repulse, and precise energy transfer allows the advantageous edge in small and big shots of the professional game. Experience the new dynamics and Win with us.

NEW

Omega V Pro

- New Power Dynamics for Professional Swing Speed
 - Energized Ball Flight and Rebound
 - Extra Precision for Passive and Offensive Shots
- Sponge 2.0, Max. Item: RX05P

----	----	----	---------

OMEGA SERIES

**Omega IV Pro**

- Extra playing properties by new carbo sponge & top layer
- Additional clicking feel for sharper control
- Extra spins with new chemical composition

Historic evolution towards full "speed-glue" aggression. Based on 'Hyper Elasto' technology, the top sheet matched with an upgraded Carbo Sponge offers extraordinary playing properties. Feel at ball contact fully assimilates the clicking sensation generated by speed glues. New chemical composition plus built-in tension makes the ball trajectory higher for more spin. You can return the ball fiercely after the bounce, as if launched from speed-glued rubber. Sponge 2.0, Max. Item: RX04P

92	92	71	\$49.95
----	----	----	---------

**Omega IV Asia**

- For dynamic power-spin attackers.
- Powered by extra-hard new Carbo sponge
- Extra spin by new constructions and built-in tension.

Extreme power with extra spins in deadly aggression. Grippy top sheet with hard Carbo Sponge and fully built-in speed-glue effect creates amazing power-spin performance. Players with higher swing speed will benefit most from this rubber. Omega IV Asia returns the ball aggressively and low with extra spin. Extra precision and superb consistency from solid construction also benefits high-speed players. Sponge 2.0, Max. Item: RX04A

94	90	71	\$49.95
----	----	----	---------

**Omega IV Europe**

- For technical style keen on balanced aggression
- Deeper and longer ball dragging at the surface
- Extra power spins from high-density carbo sponge
- Newly integrated dynamics for reliable control

Newly integrated dynamics and perfect hardness for reliable control. Hyper Elasto technology rubber upgraded by new chemical composition and new Carbo Sponge. Solid ball-capturing at the surface and perfectly matching sponge hardness promote extra spins and control at ball contact. Higher ball arc makes bigger window over the net. Aggressive launch and clicking sensation at ball contact reflects maximized built-in tension simulating full speed-glue effect. Sponge 2.0, Max. Item: RX04U

90	94	71	\$49.95
----	----	----	---------

**Omega IV Elite**

- Designed for modern allround pros
 - Longer ball dragging at contact with softer feel
 - Very precise and consistent control
 - Higher ball trajectory with extra spin performance
- Balanced towards full "speed-glue" feel. New top sheet matched with upgraded soft Carbo Sponge offers amazing spin and extra feel. At ball contact you get soft and solid clicking sensation generated by speed glues. Bigger window over the net with high spinning trajectory. Deeper and longer ball dragging at the rubber surface promotes extra control at impact. Extra spin capability, precision, and consistency benefit modern allround professionals. Sponge 2.0, Max. Item: RX04E

86	96	71	\$49.95
----	----	----	---------

**Musa**

"The name Musa stands for warrior. A warrior doesn't always concentrate on attack, but controls the situation in hand and acts to win. Musa is engineered to give players the ability to attack vigorously with the ability to pinpoint where the ball should land on the opponent's side. With new "Physi Elasto" technology, players can experience excellent spin and control while maintaining high speed play. Dynamic play due to Musa will bring out the warrior inside of you. Experience the rubber that you've never experienced before."

Sponge Max. Item: RXMUS

VEGA SERIES

**Vega Japan**

- **True Innovation - Hyper Elasto IMB technology for Vega**
 - **Super Dynamics - Engineered by Black Carbo Sponge**
 - **New Era, New Shape - Celebrating Vega's "Win Fit" design**
- Vega Japan from Xiom: Technology drives the new world of table tennis. Internal Mechanic Boost of Hyper Elasto IMB generation opens the new opportunity for Vega users. Tuned to make more spin energy easier, Vega Japan makes the power-charged spin and allows for flexible control. Service return and topspin attacks are far more accurate and consistent to give real-life advantages in your game. Energized spin also drops the ball quicker and lower at the opponent's court. Specially constructed Carbo sponge synchronizes perfectly with the energy mechanism of Vega Japan. Ball capturing at the contact is very solid, yet also superbly comfortable. Sponge 2.0, Max. Item: RXVGP

90 90 72 \$46.95

SIGMA II SERIES

XIOM Sigma II Pro Rubber is available with the XIOM Stradivarius blade as part of a professional blade/rubber PRO SPECIAL. See page 6

**Sigma II Pro****PRO**

- **IMB Generation for the modern close-to-table style**
 - **Winning trajectory with extra-energized spin**
 - **Hyper dynamics of the world-dominating Carbo Sponge**
- The close-to-table strategy initiated and matured by Chinese players is changing the professional playing style all over the world. Advantages of the close-to-table strategy vary from the aggressive service return to overall tactical efficiency. Sigma II Pro is the rubber of choice for close to the table play! Internal Mechanic Boost (IMB) of Hyper Elasto technology is advanced for close to the table play. Dynamics of Sigma II Pro is designed to deliver higher energy on the spinning ball. The ball winds up quicker and aggressively lower on the opponent's court while starting out comfortably higher. Very exact and hyper-spinning ball trajectory is made by the combination of new IMB technology and the world dominating black Carbo Sponge. Sponge 2.0, Max. Item: RXS2P

97 96 67 \$58.95

**Sigma II Europe**

- **Pro-made Tour version of IMB generation**
 - **Winning trajectory with extra-energized spin**
 - **Hyper dynamics of the world-dominating Carbo Sponge**
- Sigma II Europe delivers the real results for tour professionals. Tour professional version of Internal Mechanical Boost (IMB) makes you control the magnitude of spin energy easier and better. Developed by and made for tour professionals, Sigma II Europe also shapes the ball trajectory easier than any other rubber. High level players will realize the well-controlled short balls and the accurate ball path that increases the real winning probability. You get far more energy on the spin with IMB technology, resulting in balls that are quicker and aggressively lower at the opponent's court, while it can start comfortably higher. Dynamics of the black Carbo Sponge also boost this energy mechanism to create the real advantages for tour professionals. Sponge 2.0, Max. Item: RXS2U

95 98 67 \$58.95

**Vega China**

- **Max built-in tension by German Tensor Bios technology**
- Vega China from Xiom: The combination of sticky surface top sheet with extremely hard sponge has been a key weapon for China to dominate the modern table tennis world. But the uncomfortable truth is that unhealthy external chemicals like speed glue are required to balance out the proper elasticity from these hard rubbers. With world renowned Tensor Bios technology, the hard sponge on Vega China has been softened to reach the proper elasticity. Sponge 2.0, Max. Item: RXVGC

85 94 72 \$44.95

**Vega Pro**

- **Professional Spin Weapon**
 - **Innovatively enlarged attack window over the net**
 - **New Black Carbo sponge to generate more power**
- Extreme topspin performance is realized by the mixture of Hyper-Elasto and Carbo Sponge technologies. The top sheet of "Hyper Elasto" technology is natural rubber for extraordinary grip and spin. The black "Carbo Sponge" puts maximum energy into the ball. Pips are densely arranged for a harder, more direct feel. The ball draws a higher, sharply curved arc that enlarges the 'safe zone' above the net. Precise response lets you lead the game. Sponge 2.0, Max. Item: RXVGP.

88 90 73 \$38.95

**Vega Asia**

- **Spin Weapon with upgraded speed**
 - **Higher success rate with "big window" over the net**
 - **Black Carbo sponge generates more power**
- Faster, more balanced version in the Vega series. New "Hyper Elasto" top layer of natural rubber provides superb spin. Unique "Carbo Sponge" provides the most energy efficiency. Pips on Vega Asia have a special structure to create more trampoline effect and feeling at impact. Softer than the Vega Pro, with more speed and balance. It also has a bigger safe zone (window) above the net, for topspin attack. Great balance between speed, spin, and control. Sponge 2.0, Max. Item: RXVGA.

90 88 73 \$36.95

XIOM Vega Europe Rubber is available with the XIOM Allround S blade as part of a professional blade/rubber PRO SPECIAL. See page 6

**Vega Europe****PRO**

- **Safer Spin Attack with upgraded control**
 - **More chances and fewer miss-shots with "big window"**
 - **Black Carbo sponge generates more power**
- Softest of the Vega series, with a soft version of the "Carbo Sponge" for an exciting feel, plus same level of energy efficiency as the harder Vega Pro and Asia. The "Hyper Elasto" top layer of natural rubber has a special pip structure for great trampoline effect. Special sponge and top layer give great control, and spin performance. Large safe zone (window) above the net for accurate topspin attack. Perfect for modern European play style, with controlled topspin. Sponge 2.0, Max. Item: RXVGU.

86 92 73 \$36.95

**Vega Elite**

- **Super balance for all levels of players**
 - **Spin, speed, control, and softness**
 - **Dynamic sound for pure pleasure of table tennis**
- Soft version of the "Carbo Sponge" gives soft, exciting feel, and the same level of energy as the harder Vega Pro and Asia. New "Hyper Elasto" top layer of natural rubber has a special pip structure for great trampoline effect and dwelling time. Special sponge and top layer endows Vega Elite with mighty control, as well as spin. Largest safe zone (window) above the net for accurate topspin attack. Loud metallic sound at contact helps you adjust the shot. For modern European style of play with continuous, controlled topspin on both sides. Sponge 2.0, Max. Item: RXVGE.

84 84 76 \$36.95

NANO SPIN RUBBERS ALL ON SPECIAL!!

\$49.95

NANO Spin II+S SPECIAL

NanoSpin II+S utilizes the same Nano Spin II topsheet as the original in combination with a softer sponge to create even greater spin on the ball. Featured characteristics of this rubber are the ball grip, control, and width of sweet spot. With Nano Spin II+S, you get an amazing feel as if the rubber is an extension of the hand. Sharp topspins and surprising services are a breeze. NanoSpin II+S is a great weapon for the player seeking the best ball feeling! Sponge 1.8, 2.0, MAX. Item RJNSS

91 93 71 **\$54.95**

\$49.95

NANO Spin +Flex SPECIAL

The grippy topsheet and soft-flexible tension sponge of the Nano Spin + Flex rubber combine to give the idealistic arc to the topspin ball. Based on the original Juic Nano Spin rubber, the new +Flex version utilizes greater flexibility between sponge and topsheet to boost speed and spin performance. Its light weight allows for higher swing speeds and greater ball rotation to be created. This rubber is recommended for the player with allround-aggressive play. Sponge 1.8, 2.0, MAX. Item RJNAF

92 92 71 **\$54.95**

\$49.95

Available with JUIC Stellan Bengtsson Alpha blade as part of a professional blade/rubber PRO SPECIAL. See page 6

NANO Spin II SPECIAL

The newest rubber from Juic, Nano Spin II gives you more power and sound. Excellent spin and enhanced speed brings a new dimension to the spin attack game. Sponge 1.8, 2.0, MAX. Item RJNS2

93 91 71 **\$54.95**

\$49.95

NANO Spin SPECIAL

Special JUIC Technology offers speedy play with tacky rubbers that tend to be most effective when serving or chopping, but Nano Spin enables outstanding all-round and offensive play close to and far from the table. Spin, speed and control: If you need the best of them all, Nano Spin is the rubber you are looking for! Sponge 1.8, 2.0, MAX. Item RJNAS

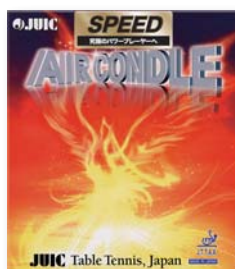

90 90 72 **\$54.95**

"I really love the new rubber Nano Spin II. In my opinion the best Juic rubber so far. Good spin, good control and a great sound that makes a very good feeling. Congratulations. Good job."

-- Stellan Bengtsson, former Men's Singles World Champion.

AIR CONDLE

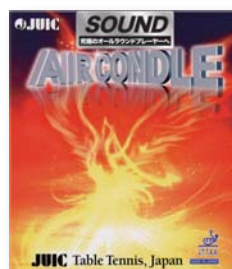

+ SPIN
+ CONTROL
+ POWER
+ DURABILITY

Air Condle Speed

The highest offensive performance rubber of the Air Condle Series. The topsheet provides outstanding grip with speed, and the offensive tension sponge transfers the player's power completely to the ball, while allowing the player to be in control of the opponent and of the game itself. Sponge 2.0, MAX. Item RJAIS

96 88 71 **\$49.95**

Air Condle Sound

The most versatile rubber of the Air Condle Series. Special sponge gives a loud crack sound as it creates heavy spin and ball speed. With precision and softness, it gives outstanding feeling and control. It's the ideal rubber for players with an allround game. With Air Condle Sound the sound you hear is the sound of victory! Sponge 2.0, MAX. Item RJAI0

91 96 70 **\$49.95**

Air Condle

The perfect balance of spin, control, power, and durability. Maximum tension in both the topsheet and sponge makes this an excellent choice for the offensive power and finesse player.

Sponge 2.0, MAX. Item RJAIR

DR. NEUBAUER

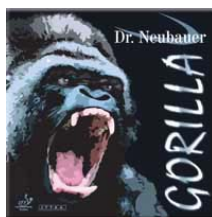

ANTI TOPSPIN RUBBER

New Gorilla

Gorilla with a slow dampening sponge = better control, while producing good spin reversal in blocking spinny topspin balls. The 1.2mm sponge is the slowest and most effective for short close-to-table blocking, and 1.5 and 1.8mm sponge give a decisive disruptive effect for blocking but with better attack with aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8 (PINK color). Item RUGON

SPEED **42** CONTROL **92** \$52.95

Gorilla

- Outstanding playing characteristics for blocking and chopping.
- Excellent disruptive effect with good control.
- Enables a versatile game using aggressive pushing and lifting.

This rubber enables highly effective blocking, even against strong topspin, and offers a disruptive effect because the ball can be returned short or long over the net, with the ball staying low after the bounce, making it hard for an opponent to keep looping the ball. Good control on return of serve, either passively or aggressively. GORILLA is perfect for a versatile game of aggressive pushing and lifting, whether against chopped or counter-attacked balls. The best disruptive effect is created when using it with 0.6mm sponge. Sponge 0.6, 1.0 (CREAM color) Item RUGOR

SPEED **49** CONTROL **90** \$49.95

Grizzly ABS Sponge

Slower than the original version, topsheet produces good spin reversal on topspin balls with a lot of rotation. The ball bounces very low on the other side of the table. A.B.S. has a dampening effect to reduce rubber speed but with remarkable control. Sponge 1.2, 1.5, 1.8 (PEACH color). Item RUGRN

● **Please note:** Packaging for original and new versions of Grizzly are the same. The sponges are different colors – original sponge is white, new A.B.S. sponge is peach.

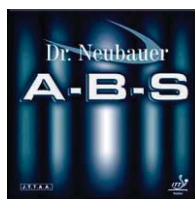

SPEED **44** CONTROL **91** \$48.95

Grizzly

Innovative anti-spin rubber, adapted to an allround game. Offers good control and great disruptive effect and is also effective for classical defence by providing very good control and backspin variation. Even strong topspin shots can be returned with a flat flight path and a maximum of backspin. It is also effective for control and placing of service returns. Sponge: 1.0, 1.6, 2.0 (WHITE color). Item RUGRI.

SPEED **53** CONTROL **88** \$48.95

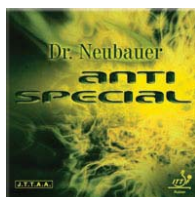

A.B.S.

Control + good spin reversal!

For close to the table blocking. Distinctly slower than Gorilla and Grizzly and offers much better control. Very good spin reversal and attacking possibilities through aggressive pushing and lifting, especially against chop

shots. Sponge 1.2, 1.5, 1.8 Item RUABS

SPEED **36** CONTROL **95** \$48.95

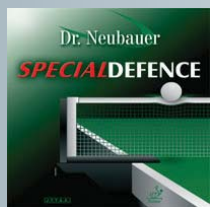

Anti Special

Slower than Dr Neubauer's Gorilla and Grizzly, but with better control. Great for spin reversal for an effective blocking game close to the table. Provides good attack through aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8. Item RUANT

SPEED **40** CONTROL **93** \$48.95

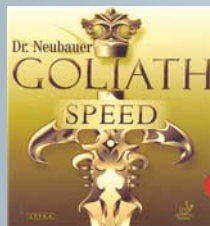

SMOOTH RUBBER

Special Defence

High friction surface without being sticky. Effective in combination with pips or anti-spin rubber. Sponge 1.0, 1.2, 1.5. Item RUSPE

79 92 86 \$42.95

Goliath Speed

Speed glue effect without speed glue, for an extremely dynamic attacking game. Harder sponge allows more speed for attacks. Sponge 1.5, 1.8, 2.1. Item RUGOL

DR NEUBAUER RUBBER COMPARISON CHART
page 83 & 84

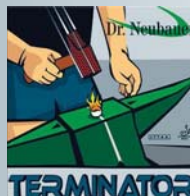

SHORT PIPS RUBBER

Killer

Combines short and medium pip rubbers for the best characteristics of both rubber types. Very good attack possibilities for modern game close to the table. Excellent for fast counter-attack and strong hitting. More disruptive than other short pip rubbers with very low bounce. Excellent control and "feel". Sponge 1.5, 1.8, 2.0, Max. Item RUKIL

85 62 79 \$44.95

Terminator

Different from all other short pips rubbers. Available exclusively with fabric reinforcement (no sponge) underneath to produce a disruptive float ball while blocking passively. The ball bounces low and drops on aggressive blocks. Enables dynamic, efficient play against chops. Also produces fast "dummy loop". Great for allround game. Sponge OX. Item RUTRM

58 64 90 \$49.95

Diamant [Half-Long Pips]

A multi-purpose weapon for serve return, block, attack and defense. Also great against chops: any backspin can be smashed for winner points. Sponge 1.2, 1.5, 1.8, 2.1 Item RUDIA

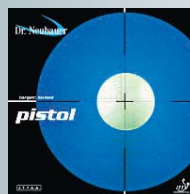

70 59 86 \$44.95

Leopard [Short Pips]

This rubber will be a real challenge for your opponents. Blocking with topspin or smash produces disturbing returns with the ball dropping and wobbling. A supreme weapon for block, counter-attack, and provides very good control for all blocking and attacking strokes. Sponge 1.0, 1.5, 2.0. Item RULEO

61 61 88 \$39.95

Pistol [Short Pips]

Fast, powerful, dynamic for fast attack – especially straight hitting and fast looping. Enormous speed with a disturbing "flat" effect. Sponge 1.0, 1.6, 2.0. Item RUPIS

95 68 73 \$39.95

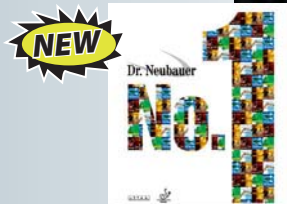

Tornado Ultra [Short Pips]

Big spin/speed and tactically dynamic for blocking and counter-attack. Creates wobbling balls. Sponge 1.5, 2.0. Item RUTOR

94 55 78 \$37.95

HERBERT NEUBAUER plays with the Dr. Neubauer Matador blade and uses Dr. Neubauer Killer on forehand and Number 1 rubber on backhand side.

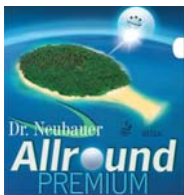

Number 1 **NEW LONG PIPS RUBBER**

New rubber formula with vertical pimple alignment. Softer pimples enable you to reduce the speed of the game while blocking passively. Provides fantastic control at all levels. Very efficient for putting pressure on your opponent, and highly versatile for producing long pimple attacking shots with ease. Sponge OX, 0.6, 1.0 Item: RUN01

52 45 94 **\$42.95**

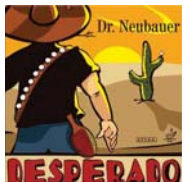

LONG PIPS RUBBER

Allround Premium

The extraordinary Allround Weapon. Probably the first disruptive long pips rubber that enables aggressive blocking and even hitting and counter-looping against topspin shots. Excels at passive shots with very low bounce. Great for classical defense with spin and control. Both heavy chopped balls and float balls can be performed interchangeably. Unusual pimple geometry with vertical distribution. Sponge OX, 0.6, 1.0, 1.3 Item RUALL

55 85 85 **\$42.95**

Desperado

Long pips rubber from another dimension! Both versions without sponge (OX) and with sponge (0.6, 1.0mm) are very effective for chop-blocking close-to-table – passive or aggressive blocks against topspin with push-blocking technique where ball is “pushed down” while holding the bat at a closed angle. OX version is best for close-to-the-table block. Versions with sponge are better for action attacks and floating balls. Sponge OX, 0.6, 1.0 Item RUDES

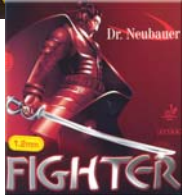

56 38 95 **\$44.95**

Inferno Classic

Long pips rubber with friction, offering great disruption for surprise attack. Enables dangerous returns both through passive/active blocking (“chop-blocking”) with a very low bounce on the other side of the table. Good control and surprising attack through aggressive pushing and lifting, and also through classical defense since the rubber produces a lot of backspin. Sponge OX, 0.6, 1.0 Item RUINC

56 40 93 **\$46.95**

Fighter

Innovative rubber composition provides excellent control with good attacking possibilities through aggressive pushing and counter-attacking at the table. Sponge OX, 1.2 Item RUFIG

57 42 91 **\$38.95**

Boomerang Classic

Defence weapon! This long pips rubber is great for classic defense, and provides lots of backspin and disruption. Sponge: OX, 0.6, 1.0 Item RUBOC

55 46 91 **\$42.95**

Monster Classic

Monster Classic: Long pips with friction for an aggressive game close to the table. Special pimple geometry, rubber formula and sponge enables effective blocking and counter-attacking. Sponge: 1.0, 1.6, 2.0 Item RUMOC

59 51 88 **\$42.95**

HALLMARK

RUBBER RATINGS KEY

SPEED **SPIN** **CONTROL** **PRICE**

HALLMARK RUBBER COMPARISON CHART
page 83 & 84

Friction Special 2 [Long Pips]

This long pimple rubber has full friction but still gives a good level of disruption to the flight of the ball and is slower than other long pips rubbers. Ideal for defensive players and for combination bat players who block with their backhand. Sponge OX. Item RHFR2

45 59 89 **\$54.95**

Phoenix [Long Pips]

Designed for close-to-table play against topspin. Special rubber formulation and geometry + Hallmark super anti sponge = high level of control. Returns are low over the net with some spin reversal obtained. Spin serves can be returned with ease and push and float balls can be attacked aggressively without problem with some spin generated from the rubber. Sponge: OX, 1.0, 2.0. Item RHPHO

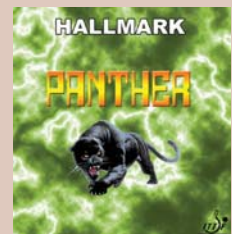

53 69 83 **\$46.95**

Power Spin [Smooth]

This smooth inverted rubber produces very high levels of spin. The 2.0mm version is faster and better for top spin, 1.0 gives good control when chopping away from the table but still produces high level of back spin!!!! Sponge 1.0, 1.5, 2.0. Item RHPOW

87 74 79 **\$42.95**

Panther [Medium Pips]

Medium pips rubber. Get the tricky advantage of long pips and the offensive potential of short pips rolled into one rubber. Relatively wide pips. Slightly improved control and slightly reduced effect when compared to Half Long. Sponge OX, 1.0, 1.5, 2.0. Item RH PAN

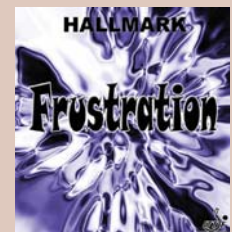

61 55 90 **\$36.95**

Magic Pips [Short Pips]

The 2.0mm version produces great top spin + excellent control for close to the table hitting and blocking. The 1.0mm produces less rotation but great blocking against topspin. Sponge OX, 1.0, 1.5, 2.0. Item RHMAG

78 61 82 **\$36.95**

Frustration [Long Pips]

A long pips rubber with a slightly sticky surface, it actually produces some rotations of the ball. Sponge OX, 1.0, 1.5, 2.0. Item RHFRU

54 71 82 **\$54.95**

MA LIN

blade: YASAKA Ma Lin Carbon

rubber: YASAKA Rakza7

Olympic Gold Medalist - Singles, Doubles and Team

RAKZA 9

Improved speed characteristics! The surface rubber of Rakza 9 has a newly developed formula/rubber combination on surface rubber, and a new sponge made of a more homogenous material with larger pores. Rakza 9 is the fastest of Yasaka's Hybrid Energy rubbers and is suitable for technical offensive players, using both high speed and spin to win the point. Sponge 1.8, 2.0, Max Item RYRA9

95 93 71 \$52.95

RAKZA 7

Natural rubber gum in the top sheet dramatically improves grip and spin. Top sheet is combined with the new Power Sponge to produce Yasaka's newest Hybrid Energy rubber. When you hit the ball hard, the rubber grips the ball so you can place the ball accurately, both in direction and length. Serve and short returns are sharp and easy to control. Natural gum also improves durability. A winning combination! Sponge: 1.8, 2.0, MAX Item: RYRA9

93 94 70 \$52.95

RAKZA 7 SOFT

Yasaka Rakza 7 Soft uses the same top sheet as Rakza 7, but with softer sponge, giving the rubber more sound and built-in speed glue effect plus increased control. After hitting a topspin shot, the curve of the ball is slightly higher, giving little bit bigger margins in the game. In the short return play, the ball feel is better. Sponge: 1.8, 2.0, MAX Item: RYRAS

88 96 71 \$52.95

Mark V is available with YASAKA Ma Lin Extra Offensive blade as part of a professional blade/rubber PRO SPECIAL combination. See page 6

Mark V:

PRO

Used by 2008 Olympic Gold Medalist Ma Lin

A Best Selling Rubber from Yasaka! Many championships have been won with Mark V, which represents the absolute highest quality of rubber production. For the aggressive player who masters the modern, fast technique close to the table, Mark V gives unique possibilities. Sponge: 1.0, 1.5, 1.8, 2.0, MAX. Item: RYMKV

79 79 80 \$37.95

Mark V XS

Newest rubber sheet from Yasaka: Mark V XS. This highest quality rubber is ideal for the aggressive player who masters the modern, fast technique close to the table. Sponge: 2.0, MAX. Item: RYMKX

81 79 79 \$45.95

Mark V M2

Made for Maximum Speed. Based on the incomparable technical features of Mark V, but with slightly harder sponge. Gives the ball sharp spin and ultimate speed. Sponge: 2.0, MAX. Item: RYMKM

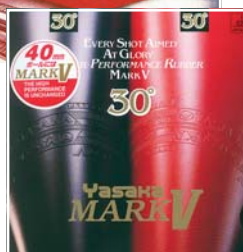

92 74 77 \$39.95

Mark V GPS

Same quality surface rubber as Mark V with softer sponge, giving more "feeling" and "control". Sponge: 1.8, 2.0, MAX. Item: RYMKG

69 84 82 \$37.95

Mark V 30

Double glue absorption, improved spring capacity due to maintaining the sponge hardness levels at 30 degrees. Sponge: 2.0, MAX. Item: RYMK3

68 82 83 \$37.95

Mark V HPS & Mark V HPS Soft

Outstanding top-of-the-range fast rubber has all the characteristics required for advanced offensive play. The HPS (Hybrid Power Sponge) technology is the result of the newest advances in Japanese rubber technology. It provides improved dynamics in the sponge, and more speed and spin, without higher weight.

MARK V HPS has a medium-hard sponge, suitable for aggressive play close to the table. Sponge: 2.0, MAX. Item: RYMKH

83 83 77 \$47.95

Mark V HPS SOFT has a slightly softer sponge than the regular Mark V HPS, suitable for offensive allround players. Sponge: 2.0, MAX. Item: RYMK3

81 89 76 \$47.95

**Fusion**

Three different synthetic rubbers are mixed with natural rubber, each with unique characteristics for speed, spin and durability—"Energy Fusion Rubber". Fusion contains synthetic rubber for speed glue effect - very elastic feeling and strong sound! Sponge: 2.0, MAX. Item: RYFUS

83 82 78 \$38.95

V-Stage

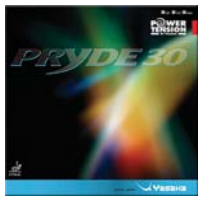

For players looking for powerful spin and speed. V-Stage is produced by simultaneously vulcanizing high-friction coefficient rubber to improve spring and high elasticity. Sponge: 2.0, MAX. Item: RYVST

89 85 74 \$52.95

**Pryde 30**

Maximum sound and spin! Pryde 30 is a new, softer sponge version of Yasaka Pryde. Combines the built in speed glue effect of Yasaka's Power Tension technology with an elastic sponge for maximum sound and spin, with great built-in speed-glue effect, plus more control for greater variation in offensive play. Sponge: 2.0, Max Item: RYPR3

84 89 75 \$49.95

**Pryde 40**

Feel the speed, recognize the sound! Pryde 40 is a superb new rubber from Yasaka using the latest technology. Newly developed medium-soft sponge creates better speed and bigger sound for a fast attacking game. Power Tension rubber does what traditional rubbers and other tension rubber cannot do: gives you outstanding performance without the need for speed glue. It's the perfect mix of speed, spin, sound and feeling. You will love it! Sponge: 2.0, Max Item: RYPR4

91 87 73 \$49.95

**Pryde**

Delivering the devastating energy of POWER TENSION! Yasaka's powerful reply to the speed glue ban. The characteristic speed and touch of speed glue - without speed glue. You feel the powerful speed and you'll recognize the sound! Sponge: 2.0, MAX. Item: RYPRY

97 85 71 \$49.95

**X-Tend HS**

The Spin Machine! No speed glue needed! STS (Spin-Tension-System) technology by Yasaka gives 2/3 of the tension energy to spin and 1/3 to speed. Topsheet and sponge have been completely re-designed to deliver high-power speed with easy handling-- just what the players asked for. Do NOT apply speed glue, as it will destroy the rubber. Xtend HS is made to be fast without speed glue. Sponge: 2.0, MAX Item: RYXTH

84 83 77 \$43.95

**X-Tend**

The Spin Machine! No speed glue needed! "Tension increase" gives you 2/3 more spin and 50% more speed. Sponge: 2.0, MAX. Item: RYXTE

82 85 77 \$43.95

LONG PIPS & ANTI TOPSPIN RUBBERS

Anti Power [Anti] Sponge: 2.0. Item: RYANT

SPEED 61 CONTROL 85 \$32.95

Phantom Infinity [Long Pips]

Regulation length long soft pips: Deadly weapon for any defen-

sive player. Neutralize opponent's spin and use the effect of the spin to benefit your own returns. Design of the top of the pips aid attack.

0011 Sponge: 1.0. Item: RYPH1

49 58 88 \$32.95

0012 No sponge. Item: RYPH2

42 65 88 \$32.95

**On the Cover: Lily Zhang**

Outstanding Performance at WTTC and looking forward to Youth Olympic Games

USA's star, Lily Zhang, had outstanding wins in the USA matches against the top teams in the world in the Championship Division of the World TT Championships in Tokyo in May, 2014.

Lily won seven of her nine matches, defeating Szandra Pergel and Georgina Pota in the USA-Hungary match, Miao Miao in the Australia match, Alexandra Privalova and Viktoria Pavlovich in the Belarus match, and Andrea Todorovic and Ana-Maria Erdelji in the Serbia match. Her two defeats were against Yuka Ishigaki of Japan and Chen Szu-Yu of Chinese Taipei.

Lily is USA's best hope for winning an Olympic Medal in Table Tennis. She is gearing up for the Youth Olympic Games taking place in Nanjing, China in August, 2014. Lily is currently ranked #5 in the World for youth under 18. In fact, she is the only player outside of Asia to be ranked in the top ten. Athletes aged from 15 to 18 from around the world compete every four years in YOG. A maximum of one male and one female can represent each country. Krishnateja Avvari, who trains with Lily at the STIGA ICC in Milpitas, CA, will be the USA male representative.

To prepare for a peak performance at the YOG, Lily is spending the summer in Asia, training in China and competing in world-class tournaments. At the 2014 ITTF World Tour Korea Open - Super Series she was silver medalist for the Under 21 Women's Singles event. At the time of publication she is in Japan competing at the Japan Open. When she returns, she will attend UC Berkeley for her freshman year.

Lily, good luck at the YOG!

Please go to our PaddlePalace.com Blog for up-to-date info on Lily Zhang and more!

HOW TO READ THE RUBBER CHART

The Rubber Comparison Chart lists Smooth Rubber on pages 82-83. Short Pips, Long Pips, and Anti-Topspin Rubbers are on page 84. For more info on rubber types and how to choose rubber, see page 55.

Sponge Thickness is shown in millimeters. The measurement includes only the sponge (not the topsheet). Often the manufacturer indicates "MAX" for the thickest sponge available for a rubber. MAX thickness can vary from brand to brand, but usually means the sponge thickness is approximately 2.3 to 2.5mm. Often MAX means sponge and topsheet together measure 4.0mm, since this is the maximum thickness

allowed under ITTF regulations. All rubber sheets at Paddle Palace are produced with ITTF legal sponge thickness.

Speed/Spin/Control Ratings are on a scale of 10 to 99, with the higher the rating, the higher that attribute. These ratings use a universal scale which differs from manufacturers' ratings so that the rubbers from all the brands can be compared. Ratings are meant only as a tool to help select rubber. Naturally, speed, spin, and control are affected by a player's skill, strokes, and playing style.

Rubber sheets are available in red and black unless otherwise indicated. One rubber covers one side of a blade. Paddle Palace will apply rubber to the blade at no extra charge upon request. ●

PADDLE PALACE H2W TOUCH PRO ROBOT

The Most Versatile High-Tech Robot + Easy to Use!

Spin Indicator!

Spin Indicator panel on the robot shows you the spin for each ball before it shoots.

The Paddle Palace H2W Touch Pro Robot is a very versatile and user-friendly high-tech robot. The new LCD Touch Screen makes operation and programming of all functions of the robot very easy! Get started in seconds using one of the 30 built-in ball sequences with just a few touches on the screen. Making your own custom sequences is also simple, as the Touch Screen walks you step by step through the setup. You can save up to nine of your own favorite custom sequences, and you can easily modify the 30 built-in sequences. Whether you use built-in sequences or your own custom sequences, start-up is easy every time you play.

The new Spin Indicator Panel located just below the shooting head on the robot shows you the spin for each ball before it shoots. This makes playing with the robot more like playing with a human partner, as you can visually anticipate the spins on the upcoming balls.

The H2W Touch Pro Robot has two throw wheels with independently programmed motors, allowing a great variety and degree of spins, including topspin, underspin, sidespin, and no-spin. Plus the robot can seamlessly shoot consecutive shots with different spins. There are 22 possible landing spots on the table including short and long balls, making possible any combination of spins and landing spots you choose. The H2W Touch Pro Robot is designed for the player who wants a high-quality long-lasting robot that is easy to use, yet offers the sophisticated technology for practicing the ideal training patterns to take your game to the next level. Item OPVH2

\$1795⁹⁵

*** Includes Shipping**

H2W Touch Pro Robot includes:

- Net Collection & Ball Recycling System
- Free 120 Nittaku training balls
- Free Robot Training DVD
- Free Shipping to contiguous USA
- 30-day money-back Guarantee
- One year limited Warranty

Paddle Palace

ROBOTS FROM PADDLE PALACE
at affordable prices!

Paddle Palace A32W Pro

The Paddle Palace A32W Pro has many outstanding advanced robot features, but is offered at a very affordable price! Unlike other robots in this price range, it has two throw wheels controlled by two independent motors. This gives you great control over setting the variety and degree of spins including topspin, under-spin, sidespin and no-spin. It includes an automatic ball recycle and net collection system. It has multiple oscillation options, and has convenient robot controls on the player's side of the table. The A32W Pro is high quality, sturdy, reliable. It comes ready to play with virtually no assembly required, and it rolls from storage to table for very quick setup/take-down. Item OPVA3

- Two throw wheels, for multiple spin options
- Multiple Oscillation Options
- Very durable, made with high quality materials
- Ball Recycling and Net Collection System
- Rolls easily from table for easy storage
- No-Jam, easy-feed engineering

Go to PaddlePalace.com for more details
and the owner's manuals.

Paddle Palace Table Top Pro

The Paddle Palace Table Top Pro is an affordable and quality robot that delivers strong and consistent topspin, underspin, and sidespin shots. It is simple to use and is jam free. The frequency and speed of the shots are controlled by convenient robot controls on the player's side of the table. It can be set to hit one spot on the table, and it also has multiple oscillation options, both controlled and random. It can be set to shoot serves or rally shots. It can be placed on any location on the table, or it can be set on a stand behind the table (stand not included). A ball collection net is available for an extra charge. The Paddle Palace Table Top Pro is the easiest robot to set up and use that we have ever seen! Item OPVTT

\$499⁹⁵

*Includes Shipping

- Versatile, shoots from any location on the table
- Outstanding topspin, underspin, sidespin
- Multiple Oscillation Options
- Set for serves or rallies
- Easiest robot to set up and use
- Net not included. Nets available. See p. 96

FREE shipping to contiguous USA!
FREE 48 Nittaku Top Balls

Paddle Palace

S4W Pro Robot

Taking Robot Technology to the Next Level

The Paddle Palace S4W Pro has two heads, each with two throw wheels. Both heads, and the four throw wheels, are all independently programmable, allowing you great flexibility in designing playing patterns and practice options. You can program a seamless combination of topspin and underspin (or side-spin or no-spin) shots in the same play sequence. The S4W Pro comes with an easy to use, comprehensive control box that is conveniently located at the player's end of the table. This heavy duty robot is ready to use right out of the box - for club or home.

You can use either one or both heads to produce their desired practice patterns. Use the single head to set up a specific serve or volley, or employ both heads to alternate seamlessly between types of spin, short and long balls, strong and weak balls, or high and low balls. Plus, you choose the landing spots, as well as the speed and throw frequency. Another advantage is you can set up one head to reproduce a realistic serve that hits the robot side of the table first, then complete the sequence with volleys from the 2nd head. The S4W is easy to use, yet provides the sophisticated technology and flexible programming to be your ultimate training machine. Item OPVS4

\$1499⁹⁵

*** Includes Shipping**

PADDLE PALACE S4W ROBOT INCLUDES:

- Free 120 Nittaku Super Training Balls
- Free Ball Pick-up Net
- Free Robot Training DVD
- Free shipping to contiguous USA
- 30-day money-back Guarantee
- One year limited Warranty

See PaddlePalace.com for details and owner's manual.

Throw Wheels – One, Two, or Four?

Robots with one throw wheel can shoot topspin, underspin, and sidespin. With two throw wheels, the two independently controlled motors make it possible for independent spin and speed settings. This results in a great range of spin options – light to heavy topspin, underspin, or sidespin – or no spin shots. Four throw wheels provides the greatest versatility of all, including serve and volley in the same training sequence.

Oscillation - Random (R), Controlled (C), Programmable (P)

Controlled Oscillation means you can set the robot to hit alternately only to the two widest points in the angle range, plus you can set the width of the angle. With Random Oscillation, the robot hits to the inner angles as well as the

widest angles. With Random Oscillation, where the ball lands depends on the frequency and speed settings you have chosen. Programmable Oscillation is the most versatile. It achieves everything Controlled and Random Oscillation does, plus you can program sequences of your choice for where the ball lands!

LCD Touch Screen

The LCD Touch Screen is a very easy and intuitive menu-based interface to control all functions of the robot.

Serve & Volley Sequences

The Robot can be set to serve and volley in the same sequence. So, for example, you can set a sequence to begin with a serve, then

shoot volleys to specific landing spots with spins of your choice for a realistic training pattern.

Topspin/Underspin Sequence

The robot can shoot topspin shots and underspin shots (and other spins) in consecutive shots in the same sequence.

Spin Indicator

The Spin Indicator is located just under the shooting head. Before the ball shoots, it shows you the spin type on next shot: topspin, underspin, right-sidespin, left-sidespin, right-side/topspin, left-side/topspin, right-side/underspin, left-side/underspin, or no-spin/deadball.

Each product comes with a 30 day money-back guarantee, 1 year warranty and free 5 year service policy.

FOR CURRENT PRICING AND SPECIALS, GO TO PADDLEPALACE.COM

Paddle Palace always offers the latest NEWGY web specials and offers.

Newgy Robots are affordable robots that provide hours of table tennis fun for the whole family. All Newgy Robots have one throw wheel, and they can throw topspin, sidespin, and underspin. They throw one spin at a time. The robots can oscillate to different landing spots (except for the Robo-Pong 540)

\$899*

Newgy Robo-Pong 2050

Newgy's top robot has digital technology for easy, precise regulation of ball speed, wait time, and landing location. Normal Mode gives you simple manual control over each function, while in Drill Mode you can run any of 64 drills stored on the controller. Use PC Mode to create and save drills using a simple interface, then run those drills direct from your PC. Setup Mode makes it easy to calibrate motors to a set standard and select your desired language. Intelligent design also allows selection for right-handers and left-handers alike. Item: ON5

Package Includes:

- Ball Thrower (w/Oscillation)
- Recycling Net System
- Side Net Extenders
- Rubber Tips Packet
- Full Size Digital Control Box
- Transformer
- Connector Cable
- Owner's Manual
- Set-up DVD
- 48 Orange 40mm Robo-Balls
- Training Book

\$599*

Newgy Robo-Pong 1050

Identical to the Robo-Pong 2050 except it does not have the Recycling Net System. Purchase a Ball Catch Net (sold separately) for ball capture and manual recycling. Or later on, upgrade to full 2050 capabilities with the Newgy Recycling Net Upgrade Kit. The 1050 Ball Bucket holds 200 balls for several minutes of non-stop play. Position the robot anywhere on top of table or mount it back from the table in the optional Robo-Caddy (sold separately) to get a variety of angles and trajectories. Item: ON1050

\$399*

Newgy Robo-Pong 1040

Includes all features of Robo-Pong 540 plus it includes oscillation and more powerful speed and frequency controls. Bucket Extender expands ball capacity for longer continuous play. Item: ON1040

\$699*

Newgy Robo-Pong 2040

Includes recycling net and ball recycle system for non-stop action. Can oscillate back and forth or set it to shoot to one landing spot. Can shoot topspin, under-spin, and sidespin. Shoots one spin at a time. You can set the frequency, speed, and oscillation. Item: ON4

\$249*

Newgy Robo-Pong 540

Ideal for the budget-minded recreational player. Lower speed and frequency ranges and static delivery accommodate untrained strokes. Set on top of table and twist base to change trajectory. Improved bucket design ensures reliable ball feed. Item: ON540

The Ultimate in Table Design and Performance!

Designed and engineered to combine a true tournament playing experience with the most efficient and user friendly chassis design ever produced by Stiga. The table ships 100% fully assembled from the factory. Commercial grade pistons engage when both opening and closing the table, which make this heavy-duty table feel almost weightless. Due to this innovative design, the table can be converted between play and storage position by only one person with minimal effort in less than 3 seconds. When in play position the table is rock solid from surface to ground and the 1" top surface is all you would expect from a flagship Stiga table that is ITTF approved. When placed into storage position, the table is extremely compact at only 22" wide and the machine grade 5" ball bearing casters make it effortless to move to about. Includes a tournament grade Premium VM net and post set. Size: 62 x 60 x 22 in folded position. Item: TEPC1

OPTIMUM 30

The Stiga Optimum 30 sets a new standard for consistency and design in table tennis tables. With a 30 millimeter (1.2 inch) top, the thickest in the sport and 20% thicker than its closest competitor, the Optimum 30 has the most even and consistent bounce of any table. ITTF approved and made in Germany, this table represents the pinnacle of current table tennis tables.

The playing surface of the Optimum 30 is coated with a special varnish for the ideal amount of friction and the truest bounce. The edge and center lines are silk screened for even placement and professional appearance. The undercarriage features a 2.4 inch steel apron and 2.4 inch by 1.6 inch steel legs with levelers. The table separates into two halves, each with their own set of four 4 inch casters for easy movement and the two halves allow compact storage as well as use in playback position. The Optimum 30 also comes with a high-quality Stiga VM net set. Size: 61" x 60" x 26" in folded position. Item: TEOP3

EXPERT ROLLER

Play on the table used by World Champions!

The world-class Stiga Expert Roller table is the table of choice for many U.S. and international tournaments, including the World Championships and the U.S. Open. It features a solid 2 1/4" wood frame and professional 1" thick top. The 2 1/2" x 1 1/2" steel legs self-fold to make storage a snap. Heavy-duty 4" casters. Table is an attractive navy blue color. Size: 73" x 60" x 28 in folded position. Item: TEEXP

Table of choice for world-class tournaments

Yahao Zhang, USA Team member, and Emil Santos clinched the Team Title with a men's doubles win over MC.

TWU Battles to Win 11th Consecutive Title at 2014 Collegiate National Championships

By Josh Lacy

In 2002, a small school from Fort Worth, TX, showed up at the Collegiate Table Tennis National Championships. Being from what was perceived as a weak South Region, Texas Wesleyan University (TWU) was not yet eligible to compete for the team title, but the Rams swept all the championship titles, and the landscape of collegiate table tennis was forever changed. TWU has raised the bar for college table tennis in the US, and evidenced by their 11th consecutive team championship this season, the rest of the country is still playing catchup. With TWU at the forefront, competition in the NCTTA has greatly improved, with several programs knocking at the door. However, the Rams have continued to have an answer and have continued to prove themselves as one of the greatest dynasties in the history of college athletics.

Last year, the Rams made history with their tenth consecutive title, surpassing University of North Carolina Women's Soccer and University of Iowa Men's wrestling, both of whom had streaks of nine consecutive NCAA national championships. Now TWU is closing in on some other impressive marks: the University of Arkansas Men's Track & Field (12), Trinity University Men's Squash (13), and Methodist University Women's Golf (15). Note: none of these streaks are active currently.

"We are very lucky and happy to be supported by Paddle Palace and Tibhar," commented Head Coach Jasna Rather. "Paddle Palace and Tibhar recognized early on how great and competitive college table tennis could be and have been great supporters for many years now. This team is so special for many reasons," Rather continued. "We have great friendships, great communication between players and coaches, and a great sense of loyalty for our school and our team. I think players appreciate that the coaches show interest in their school progress and follow their progress in each class. After all, students are here to complete their education. TWU is a great spot for a serious student-athlete who wants to continue to play at a high level and get a good education."

The program has produced national champions, national team members, and even a few Olympians including Rather herself who won a bronze medal for the former Yugoslavia in 1988 and has been a member of Team USA, along with fellow members Eric Owens, Jim Butler, Mark Hazinski, and Yahao Zhang, Croatian Ines Perhoc, and Dominican Emil Santos, just to name a few.

The Rams entered the 2014 National Championships as top seed, but the margin with second seeded Mississippi College (MC) was very narrow. MC had served notice in the singles competition that they were a force to be reckoned with. The men's singles final was an all MC affair with Cheng Li defeating his teammate Yichi Zhang. In men's doubles, the Rams and Choctaws had battled it out with each program putting two teams in the final four. TWU's second ranked duo Zhedi Bai and Razvan Cretu defeated MC's second ranked combo of Junyu Xiao and Zesheng Huang for the title. The two titans met again in the final of the team competition and the contest lived up to the billing. The match was tied 2-2 entering men's doubles which would decide the title. Team USA member Yahao Zhang and 2013 men's singles champion Emil Santos took to the table for TWU against Li and Zhang and the Rams came away with a thrilling victory.

The Rams first became eligible to play for the team championship in 2004, and they have never been defeated in Collegiate Nationals. The 2014 team title, along with the win in men's doubles, gives TWU a total of 55 championships since the program's inception. Programs like Mississippi College and Lindenwood University have pushed TWU to the brink recently, but the challengers will have to continue to try to match Texas Wesleyan's level of play in hopes of knocking off the champs, and that is a very good thing for the NCTTA. ●

TIBHAR®

COMPETITION TABLES OF THE NEWEST GENERATION!

Tibhar Smash 28/R

Outstanding World Championship Quality!

The Smash 28/R is the table used at the 2007 World Championships, as well as the 1998 and 2002 European Championships. A 1.1" (28 mm) thick top with a 2 1/2" edge rail ensures consistent play and stability. The 2 1/2" x 1 1/2" steel legs are height adjustable for leveling the table. Each table half can be folded and moved individually, rolling on 4" wheels, making transportation and storage very easy. Measures 68" x 60" x 30" in folded position. Item: TTSMR

See PaddlePalace.com for latest SPECIALS

ABOUT PURCHASING YOUR TABLE

Table Top

Look for tables with thicker tops. Thicker tops give a more consistent bounce and are less likely to warp after years of use. The Paddle Palace recommends table tops of 3/4 inches or more.

Net Set

Some tables have net posts permanently attached to the frame. These make setup and takedown a little quicker but may not be as adjustable or sturdy as separate net posts. Table price includes net set.

Frame

Look for tables that have larger, sturdier legs and support frames. Sturdier frames contribute to a more consistent ball bounce and also help prevent top warpage. If you set up and store your table regularly, a larger frame increases durability.

Wheels

Larger and stronger wheels are important particularly if you set up and store your table frequently.

Table Shipment

Tables are shipped directly from the manufacturer by freight line. Delivery generally takes 2-3 weeks from the date of order. The delivery person will need assistance in unloading your table and will leave table at the curbside. Some tables require some assembly.

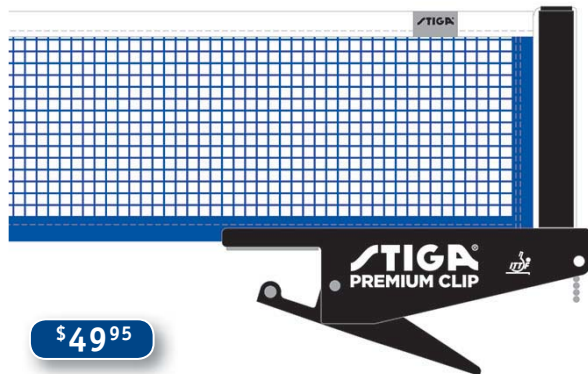

Shipping Charge:

Price includes shipping!

Some locations incur extra shipping charges. In that case, Paddle Palace will contact you before processing the order.

VOC-FREE WATER-BASED GLUE

These Water-Based glues contain no VOC's, are legal under the new ITTF regulations, and can be sent by air shipping methods. All water-based glues must be kept at room temperature. When water-based glues freeze, they harden and are no longer usable.

**Paddle Palace EZ PRO Glue**

Easy to use, Easy to remove!

Used and recommended by Paddle Palace!

This water-based glue is VOC-free and legal under ITTF regulations. This is the glue used at Paddle Palace for the gluing of all our custom paddles and we love it!

Paddle Palace EZ Pro Glue is superior in how easily it is removed when changing your rubber. Any glue residue on the blade or rubber easily peels off. No shipping restrictions. Made in USA. Item: GPEZ.

Includes glue applicator kit with a reusable clip and 20 sponges.

4 oz/118 ml **\$14⁹⁵**

8 oz/236 ml **\$22⁹⁵**

**Nittaku Finezip**

Water-based glue. VOC-free and legal under the new ITTF regulations. Apply Finezip to both blade and rubber, dries in about 5 minutes, then apply rubber to blade. Can be sent by air shipment. Available in 50ml or 100ml plastic tube. Item: GNZIP

50ml **\$16⁹⁵**

100ml **\$24⁹⁵**

**Tibhar Clue Glue**

Water-based glue with no VOC's, according to the ITTF standards. Integrated brush on cap for easy application. Quick drying phase (5 - 10 minutes) . Easy removal of the rubber off the blade and easy removal of glue remains. Item: GTCLU

150 ml **\$34⁹⁵**

Tibhar Clean Fix

Water-based, VOC-free, according to ITTF guidelines. Easily applied to blade and rubber thanks to sponge applicator. Relatively fluid glue requiring a drying period of about 5 minutes depending on the environment. Recommended to apply one layer on both blade and rubber. Item: GTFIX

25g bottle w/sponge applicator **\$9⁹⁵**

**Stiga Attach Power Glue**

Water-based glue, formulated to eliminate glue buildup. Very adhesive, so one application is all that is needed. Available in 50 and 100 ml. Item: GSATT

Table Tennis Tactics for Thinkers
LATEST TITLE FROM Larry Hodges
240 pages

Learn table tennis tactics from USATT Certified National Coach and Hall of Famer Larry Hodges. Includes tactics against different styles, grips, and surfaces as well as tactical and strategic thinking. The book opens with this: "Tactics isn't about finding complex strategies to defeat an opponent. Tactics is about sifting through all the zillions of possible tactics and finding a few simple ones that work." The book then explores the tactical and strategic development needed to have the specific tactical tools needed in any given match - your "tactical toolbox." Price \$17.95 Item: MMBT

SERVE AND RETURN TRAINING FOR TABLE TENNIS: PART #1*By Dynamic Table Tennis*

\$43.95 2 hours, 20 minutes Item: VMDP51

Brian Pace (USATT Certified Coach), has created the most extensive video for the most complex skill in table tennis, which is the serve and serve return. This first video focuses on the classic forehand high-toss serve, which creates six different types of spin. Then this concept is flipped on its head, and video takes you through how to identify these types of spin, as well as how to return it.

SERVE AND RETURN TRAINING FOR TABLE TENNIS: PART #2*By Dynamic Table Tennis*

\$43.95 1 hour, 55 minutes Item: VMDP52

Join Brian Pace (USATT Certified Coach), for the second video of Serve & Serve Return Training, which covers the following:

- Forehand Reversed Spin Serve & Return
- Backhand Serve & Return
- Tomahawk Serve & Return
- Left-Handed Serve & Return
- Hybrid Return – Bananas Return
- Maximizing Serve – Serving to Pips

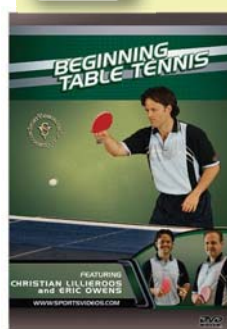

\$24.95

PRO TABLE TENNIS
SERVE RECEIVES

By Alpha. \$29.95. Item: VADSR.

Serve receive is the most difficult part of competitive table tennis. This dvd shows over 250 examples of service returns executed by some of the best players in the world. The most popular options for receiving specific serves are included. The DVD is organized according to the type of service that is to be returned, whether long, short, underspin or topspin, to the forehand or the backhand. Alpha Productions shows the serve and the receive and how the point plays out. Then the sequence is repeated in slow and stop motion, occasionally employing graphics to illustrate the spin, and then it is played once more at regular speed. Commentary points out some of the significant factors for each receive. Item: VADSR

\$29.95

PRO TABLE TENNIS
SERVES

By Alpha. \$29.95. Item: VADSE.

Program features 29 players and 140 serves! Alpha Productions has captured the serves of some of the world's best players during practice. This program clearly shows each detail in their movement and reveals the secrets of the contact.

Covers serves of all styles - shakehand, penhold, righthanders, lefties -- organized in the basic categories of underspin, topspin and no spin, with a special mention if the side spin component becomes significant. Each serve is presented at full speed, half speed and a extra-slow "analysis speed". On some serves, the use of a super slow motion camera reveals even more detail of motion. Item: VADSE

[illegible]

Q & A: The New Plastic “Poly” Ball

1) What is the new ball rule?

The International Table Tennis Federation (ITTF) passed a resolution that all ITTF events after July 1, 2014, must use non-celluloid plastic balls. This deadline has a few exceptions; for example, the upcoming Youth Olympic Games taking place in Nanjing, China, August 16-28, 2014, is using a celluloid ball.

2) Are celluloid balls no longer legal?

Celluloid balls continue to be legal for the sport of table tennis. The ITTF continues to approve celluloid balls. All the of the 3-star balls available at Paddle Palace are legal for tournament play.

3) Which tournaments are affected by the ITTF resolution?

ITTF Sanctioned tournaments only are included in the resolution. This includes the World Championships, the ITTF World Tour, ITTF Junior Circuit, and ITTF sanctioned continental events.

4) Are USA tournaments required to use the new ball?

No. Domestic tournaments can choose to use any approved ball, either celluloid or non-celluloid.

5) Why did ITTF make this resolution for a new plastic ball?

Celluloid is a plastic, but it is a flammable material that has restrictive international shipping and storing regulations. Celluloid was once a widely used industrial plastic, but it is no longer a common material. Table tennis balls are one of the last products on the market still made with celluloid.

6) Have table tennis balls always been made of celluloid?

No. Non-celluloid plastic balls were used in competition decades ago. And for many years, low quality recreational plastic balls have been available. But the new ITTF approved competition grade balls are a big improvement over the “toy” balls, and they also have been improved since the first prototypes were produced over a year ago.

7) Will there be more than one kind of poly ball?

Paddle Palace will have two new models of Nittaku 3-star poly balls. One Nittaku ball is made in China and one is made by Nittaku in Japan. The Made in China ball is the Nittaku 3* SHA 40+ ball and the Made in Japan ball is the Nittaku 3* PREMIUM 40+ ball. The Nittaku Premium 40+ ball is made with a premium poly material that is exclusive to Nittaku. It is more durable than previous table tennis balls, and it has very consistent roundness and hardness.

8) When are the new poly balls available?

Everybody is excited to try out the new balls! The Nittaku SHA 40+ ball will be in stock at Paddle Palace by the time of publication. At first, the supply will be limited. The Nittaku PREMIUM 40+ balls are projected to be available October 2014.

9) What color is the new ball?

At this time, only white balls are being produced and have ITTF approval. Eventually, the new plastic balls will be available in both white and orange.

10) Will celluloid balls continue to be available?

Paddle Palace will stock celluloid balls as long as they are available. The ball manufacturers advise that they will stop making celluloid balls in the future; the timing depends on material availability and market demand. Paddle Palace will have celluloid balls for at least another year.

11) How does the new ball play? How does this change the game?

These are the million dollar questions!

Please go to our PaddlePalace.com Blog for up-to-date articles and reviews on the poly ball!

Please join & follow us @

Nittaku®

Leading the New Evolution of Balls

★★★ Premium 40+

For over half a century, NITTAKU has been the leader in producing high quality table tennis balls.
