PADDLE PALACE PRO SPECIALS

What is a Paddle Palace Pro Special?

Paddle Palace has created brilliant blade+rubber combinations with an emphasis on perfectly matching your playing style – and for a super special price! All of these blade/rubber combinations are popular with tournament-caliber players and are well-suited to a wide range of playing styles. Each Pro Special paddle is custom pre-assembled with smooth, inverted ITTF-approved rubber, with red on one side and black on the other.

STIGA®

STIGA CARBO 7.6 WRB

\$144⁹⁵ reg. \$187.85

Playing Style: Offensive Speed & Spin

Overall Rating: Speed: 93 Spin: 91

Blade: STIGA Carbo 7.6 WRB (flared master or penhold)

Rubber: STIGA Calibra LT (Max sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Carbo 7.6 WRB blade is assembled with Calibra LT rubber. The Carbo 7.6 WRB has six plies of carbon combined with seven plies of wood, giving it amazing speed potential and consistency. It is optimized for speed and gives the player greater distance and a longer trajectory on all their shots. This combination is perfect for the topspin player who is comfortable away from the table and is looking for greater range. Shakehand Item: ZZSSCA7302 | Penhold Item: ZZPSCA7W302

STIGA CLIPPER CLASSIC

\$129⁹⁵ reg. \$179.85

Playing Style: Modern Offense

Overall Rating: Speed: 93 Spin: 97

Blade: STIGA Clipper Classic (flared legend or penhold)

Rubber: STIGA Airoc Astro M (Max sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Clipper Classic blade comes assembled with Stiga Airoc Astro M rubber. The Clipper Classic blade is famous throughout the world for its combination of speed and feeling. It is particularly appreciated by players who want extra power behind their strokes. The Airoc Astro M rubber utilizes Stiga's new OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the same spin/speed proportions with the new poly ball that they have always enjoyed. This combination is recommended for the aggressive offensive player to excel in the new poly ball era. Shakehand Item: ZZSSCLIN302 | Penhold Item: ZZPSCCLIN302

STIGA ALLROUND CLASSIC

\$79⁹⁵ reg. \$96.85

Playing Style: Classic Allround

Overall Rating: Speed: 72 Spin: 75

Blade: STIGA Allround Classic (flared legend)

Rubber: STIGA Mendo Energy (Max sponge)

The Stiga Allround Classic blade comes assembled with Stiga Mendo Energy rubber. The Allround Classic blade is definitely a classic! A perfect balance between speed, weight, and feel lies behind the Allround Classic's enormous popularity among allround and introductory players. The Mendo Energy rubber has been developed in cooperation with world leading players to develop a Power-Soft rubber that creates maximum friction on the ball. Together this combination is ideal for all allround players, and especially recommended for those looking for their first competition paddle. Item: ZZSSALCN299

Playing Style:
Offensive Speed & Spin

Playing Style:
Modern Offense

Playing Style:
Classic Allround

DONIC

Playing Style:
Modern Offensive Spin

DONIC OVTCHAROV ORIGINAL SENSO CARBON

\$129⁹⁵ reg. \$179.85

Playing Style: Modern Offensive Spin

Overall Rating: Speed: 92 Spin: 97

Blade: DONIC Ovtcharov Original Senso Carbon (flared handle)

Rubber: DONIC Bluefire JP 02 (Max sponge)

The Donic Ovtcharov Original Senso Carbon blade comes assembled with Donic Bluefire JP 02 rubber. This blade is the original blade used by the reigning European Champion! Donic used their expertise to create a blade that perfectly suits Dima's attacking style. Donic Bluefire JP 02 rubber is the perfect combination with this blade, matching equal speed with maximum catapult and high arcing ball flight. This combination is ideal for a wide range of offensive players that value obtaining top speed and spin when attacking, while retaining superb control when under pressure.

Item: ZZSDOV0303

Playing Style:
Aggressive Offense

DONIC OVTCHAROV CARBOSPEED

\$129⁹⁵ reg. \$174.85

Playing Style: Aggressive Offense

Overall Rating: Speed: 96 Spin: 98

Blade: DONIC Ovtcharov Carbospeed (flared handle)

Rubber: Bluefire M1 Turbo (Max sponge)

The Donic Ovtcharov Carbospeed blade comes assembled with Donic Bluefire M1 Turbo rubber. Playing with this paddle is an attacker's dream! The Ovtcharov Carbospeed is a very fast carbon blade with great stiffness and durability. The Bluefire M1 Turbo is the most explosive rubber yet! A new sponge structure combined with a new spin-elastic top sheet ensures enhanced dynamic spin qualities. This paddle is recommended for all out attacking players with hard top-spins. Item: ZZSDOV303

Playing Style:
Allround Spin

NEW

DONIC PERSSON POWER ALLROUND

\$85⁹⁵ reg. \$113.85

Playing Style: Allround Spin

Overall Rating: Speed: 76 Spin: 87

Blade: DONIC Persson Power Allround (flared handle)

Rubber: DONIC Desto F4 (2.0 sponge)

The Donic Persson Power Allround blade comes assembled with Donic Desto F4 rubber. The Persson Power Allround blade has aggressive allround characteristics while retaining excellent ball control. The Donic Desto F4 rubber combines the control of classic rubbers with the dynamics of modern generation rubbers. The result is an allround paddle that can adapt to any situation and player's style. From loop to block to drive, this paddle allows easy transition and is ideal for those who seek clever placement and variation in their play.

Item: ZZSDPP0304

TIBHAR

Playing Style:
Aggressive Offense

TIBHAR SAMSONOV FORCE PRO

\$129⁹⁵ reg. \$165.85

Playing Style: Aggressive Offense

Overall Rating: Speed: 96 Spin: 96

Blade: TIBHAR Samsonov Force Pro (flared handle)

Rubber: TIBHAR Evolution MX-P (Max sponge)

The Tibhar Samsonov Force Pro blade comes assembled with Tibhar Evolution MX-P rubber. The Samsonov Force Pro is the new blade of the multiple European and World Cup Champion, Vladimir Samsonov. Its powerful seven ply wood construction provides varied speed reserves and excellent ball control to put your adversary under pressure. It is combined with the dynamic Tibhar Evolution MX-P rubber. Evolution MX-P makes no concessions in speed and spin, and with the perfectly adjusted pimple geometry, it allows for more flexibility and extra energy conferred to attacking balls. This combination is recommended to the offensive player that wants to excel in the aggressive topspin game.

Item: ZZSTSAF298

Playing Style:
Controlled Offense

TIBHAR STRATUS POWER WOOD

\$119⁹⁵ reg. \$148.85

Playing Style: Controlled Offense

Overall Rating: Speed: 89 Spin: 93

Blade: TIBHAR Stratus Power Wood (flared handle)

Rubber: TIBHAR Genius+Optimum Sound (Max sponge)

The Tibhar Stratus Power Wood blade comes assembled with Tibhar Genius + Optimum Sound rubber. The Stratus Power Wood blade distinguishes itself by an unlimited flexibility. From the hard flip to a precise topspin with lots of rotation, you will be able to realize the whole range of stroke play for the offensive game! The Genius+ Optimum Sound rubber has an extremely strong catapult effect paired with a light playing sensation. You'll be able to feel the energy transfer from your bat to the ball. This combination is ideal for the player looking for a consistent offensive paddle with incredible feeling.

Item: ZZSTSPW301

Playing Style:
Defense with Spin

TIBHAR DEFENSE PLUS

\$104⁹⁵ reg. \$138.85

Playing Style: Defense with Spin

Overall Rating: Speed: 60 Spin: 92

Blade: TIBHAR Defense Plus (straight handle)

Rubber: TIBHAR Super Defense 40 (1.7 sponge)

The Tibhar Defense Plus blade comes assembled with Tibhar Super Defense 40 rubber. This combination was specially designed for the modern defensive game. The Defense Plus blade makes chopping easy by delivering braking effect when with defensive spin. The Super Defense 40 rubber gives defensive players definitive ball control allowing the player to cut the ball spin with extra spin. The resulting combination is the optimum choice for defensive chopping players.

Item: ZZSTDEP301

PADDLE PALACE PRO SPECIALS

CONTINUED FROM PAGE 5

XIOM

Playing Style:
Offense Loop & Drive

XIOM STRADIVARIUS

\$159⁹⁵ reg. \$209.85

Playing Style: Offense Loop & Drive

Overall Rating: Speed: 94 Spin 96

Blade: XIOM Stradivarius (flared)

Rubber: XIOM Omega V Pro (Max sponge)

The Xiom Stradivarius blade comes assembled with Xiom Omega V Pro rubber. The Stradivarius blade has two plies of Aramid Carbon (mix of vibration-absorbing soft Aramid and highly elastic carbon) to boost speed while creating a solid, stable feeling on contact. The Omega V Pro rubber maximizes spin and speed at higher swing speed for top players and professionals. Solid clicking, energy-charged repulse, and precise energy transfer allows the advantageous edge in small and big shots. This combination is best suited for the high level offensive player.

Item: ZZSXSTV301

Playing Style:
Allround Spin & Control

XIOM ALLROUND S

\$109⁹⁵ reg. \$134.85

Playing Style: Allround Spin & Control

Overall Rating: Speed: 78 Spin: 90

Blade: Xiom Allround S (flared handle)

Rubber: Xiom Vega Europe (2.0 sponge)

The Xiom Allround S blade comes assembled with Vega Europe rubber. The Allround S blade is a classic allround blade with lowered and controlled speed that provides the opportunity to manage and direct a game. Solid and clear feel connects the ball with the player's senses. The Vega Europe rubber is equipped with Xiom's "Carbo Sponge" and "Hyper Elasto" topsheet that have combined to create a rubber with innovative spin performance as well as the largest "safe zone" or sweet spot to minimize mistakes. This combination is best for traditional allround players and those looking for their first competition paddle.

Item: ZZSXALS297

JUIC

Playing Style:
Power Allround

JUIC PRO ALPHA

\$124⁹⁵ reg. \$178.85

Playing Style: Power Allround

Overall Rating: Speed: 86 Spin: 91

Blade: JUIC Pro Alpha (flared handle)

Rubber: JUIC NanoSpin II (Max sponge)

The Juic Pro Alpha blade comes assembled with Juic NanoSpin II rubber. The Juic Pro Alpha blade is an ALL+ allround blade, medium in weight, fast allround in speed. With 5-wood and 2- carbon/kevlar plies, it has very little vibration and a fantastic huge sweet spot. The Nano Spin II gives you excellent spin and enhanced speed to bring a new dimension to the spin attack game. This combination is recommended for the power allround player that utilizes high levels of spin. Item: ZZSJPR303

Yasaka

Playing Style:
Allround Offense

YASAKA MA LIN EXTRA OFFENSIVE

\$99⁹⁵ reg. \$127.85

Playing Style: Allround Offense

Overall Rating: Speed: 85 Spin: 80

Blade: YASAKA Ma Lin Extra Offensive (flared or penhold)

Rubber: YASAKA Mark V (Max sponge)

The Yasaka Ma Lin Extra Offensive blade comes assembled with Yasaka Mark V rubber. The Ma Lin Extra Offensive is the blade used by 2008 Olympic Gold Medalist Ma Lin. It has a large sweet spot and excellent speed performance in attacks. Also excels in the important blocking play. The Mark V rubber is a classic allround offensive rubber and is still one of our top-selling rubber sheets because of its versatility and performance. This combination is suited to employ a variety of offensive spin shots while maintaining excellent control. Recommended for a wide variety of allround to offensive players focused on controlled shots.

Shakehand Item: ZZSYMAE299 / Penhold Item: ZZPYMAEC299

Nittaku®

Playing Style:
Allround Control

NITTAKU RISING

\$94⁹⁵ reg. \$120.85

Playing Style: Allround Control

Overall Rating: Speed: 81 Spin: 81

Blade: NITTAKU Rising (flared handle)

Rubber: NITTAKU Nodias (2.0 sponge)

The Nittaku Rising blade comes assembled with Nittaku Nodias rubber. The Rising blade is a light-weight, medium speed allround blade. Its amazing control and feel on ball contact makes it well suited for a wide variety of playing styles. The Nodias rubber is produced with a precise mixture of natural rubber gum and results in giving superior grab and ideal balance between speed, spin, and pin-point control. This combination is excellent for a wide range of allround players that require a paddle that reacts in any situation.

Item: ZZSNRIS301

Playing Style:
Offensive Drive

NITTAKU FLYATT CARBON

\$132⁹⁵ reg. \$176.85

Playing Style: Offensive Drive

Overall Rating: Speed: 87 Spin: 94

Blade: NITTAKU Flyatt Carbon (flared handle)

Rubber: NITTAKU Flyatt Soft (2.0 sponge)

The Nittaku Flyatt Carbon blade comes assembled with Nittaku Flyatt Soft rubber. The Nittaku Flyatt Carbon blade is a versatile offensive blade. It is thin, light-weight, and loaded with 2 plies of thin carbon to secure its speed and power performance. Combined with Flyatt Soft rubber, produced with high grade natural rubber and "Active Charge Technology" to create outstanding speed and spin with an ideal ball trajectory. This combination is the choice for the driving offensive player.

Item: ZZSNFLY301

Playing Style:
Aggressive Offense

NITTAKU FLAME CARBON

\$142⁹⁵ reg. \$189.95

Playing Style: Aggressive Offense

Overall Rating: Speed: 96 Spin: 96

Blade: NITTAKU Flame Carbon (flared handle)

Rubber: NITTAKU Fastarc S-1 (2.0 sponge)

The Nittaku Flame Carbon blade comes assembled with Fastarc S-1 rubber. The Flame Carbon blade has been developed using Nittaku's "burning wood" technology, which hardens the outer wood ply and increases speed. Add two plies of kevlar/carbon, and the result is a blade optimized for speed. We combined this blade with the popular Fastarc S-1 rubber - favored for its amazing spin capabilities. This rubber utilizes a grippy topsheet and soft tension sponge for explosive spin + power. Recommended for the offensive player that demands high speed and spin to put pressure on their opponent.

Item: ZZSNFLC297

We have assigned an overall speed and spin rating for each combination. These ratings take into consideration the combined characteristics of the blade, rubber, and sponge thickness. The ratings are intended as a tool only for comparing these particular blade/rubber combinations. Choose the combination that is best for your game, and enjoy a great savings!

ABOUT PRE-ASSEMBLED PADDLES

Paddles in this department are pre-assembled at the factory and are designed for players who are newer to the sport, or who primarily play recreationally. The characteristics and prices are well-suited for developing players in schools, homes, and recreation centers. The Speed Ratings in this department are on a different scale from the speed ratings in the blade and rubber departments, and are intended only for comparison with other pre-assembled recreational paddles. The pre-assembled paddles are generally slower, impart less spin, and have more control than the pro gear. Choose the pre-assembled paddles with thicker sponge for more speed and spin.

**ABOUT
BLADE
SELECTION
AND COMBO
SPECIALS**

Combo Specials

Combo Specials are a great bargain for professional blades with rubber. We offer a selection of the most popular blades as Combo Specials. The price includes everything you need for a complete paddle: blade and two sheets of rubber. Penhold Combo Specials include penhold blade and either one or two rubbers, as indicated. Assembly (cutting and gluing the rubber to the blade) by our expert staff is free, or you can choose to receive it unassembled. We apply free edge tape, and shipping is free to USA for all Combo Specials. Rubber options include all rubbers from STIGA, NITTAKU, TIBHAR, JUIC, ANDRO, DR NEUBAUER, DONIC, DHS, YASAKA, HALLMARK and XIOM. No extra charge for any rubber with current price under \$50. Over \$50 there is an extra charge per sheet.

Pro Specials

Pro Specials include a specific combination of a professional blade and two rubbers pre-assembled at Paddle Palace. See pages 4-7 for details.

Blade Selection Guide

■ **Blade style**

Shakehand and Penhold are the two basic blade types. If you hold the paddle like you are shaking hands, then you should choose a Shakehand blade. Over 90% of the blades we sell are Shakehand style. If you hold your paddle like you would hold a pen or chopsticks, then you should choose a Penhold blade. There are two styles of penhold blades: Chinese and Japanese. Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than the shakehand. Japanese-style penhold handles have a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more square in shape than the Chinese-style, but it can vary from roundish to squarish, so check the image. (See the Penhold Blade section on pages 55 to 63).

■ **Handle style**

Handle style is a personal decision – shape and size that feels best in your hand is what you should use. For shakehand players, flared handles are the most popular, followed by anatomic and straight. The code for flared is FL, straight is ST, anatomic is AN, and conic is CO. STIGA offers two sizes of flared handles, Flared-Large (aka Legend) and Flared-Small (aka Master). The codes for these are FL (lg) and FL (sm). The DONIC Dotec blades have a unique cork handle that is designed for either a left-hander or right-hander. The code is LEFT and RIGHT. NITTAKU offers a few blades with a unique ergonomic handle, ERGO, which is comfortable for using with both a shakehand or penhold grip. Penhold blades are available in either Chinese-style or Japanese-style. Chinese-style is the most popular (C) and are suitable for one or two rubbers on the blade. Some Japanese-style penholds are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

■ **Speed**

The CLASS speed ratings of the blades range from the fastest (OFF+) to the slowest (DEF-). OFF means offensive, ALL means allaround, and DEF means defensive). In general, offensive-style players prefer blades ranging from OFF+ to ALL-. Allround players prefer blades ranging from OFF- to ALL-. Defensive players prefer ALL to DEF- blades.

Besides CLASS ratings, Paddle Palace has a universal number rating system for speed and control so that blades from all the various brands can be compared on the same scale. In basic terms, the faster the speed rating, the farther the ball bounces off of the blade, given an equal amount of force. Keep in mind that generally the faster the blade, the more skill it takes to control it. Also, the rubber applied to the blade makes a huge difference in the speed and control of the paddle. A player's skill level, playing style, rubber used, and interaction of those factors, impact the amount of speed and control that a player experiences. Therefore, the speed and control ratings are only a general tool for choosing a blade.

■ **Weight**

Most blades weigh between 70 and 100 grams before rubber is applied. An average weight is around 86 grams. Some players feel that a heavier blade provides more power but other players would disagree. Some players feel that a lighter blade is quicker, but again, there are varying opinions on this. Remember: power and quickness are not just functions of the blade, but mainly the skills of the player. Like handle style, ideal blade weight is the weight that feels best. Note: individual blade weight may vary slightly.

■ **Plies**

The number of plies (wood layers) of a blade normally ranges from one to seven, with five being the most common. Over 70% of players use an all-wood blade. There are many blades on the market that add thin plies of materials such as carbon, glass fibre, titanium or kevlar to an otherwise all-wood blade. These non-wood plies may add speed or a different feel to a blade. Some players feel that mixed-ply blades offer a larger sweet spot, and/or possibly result in added control. With or without non-wood plies, every blade has a unique feel, and only by experimenting will you discover what works best for you. We indicate the number and composition of the plies: W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid.

◀ **BLADE HANDLE COMPARISON CHART KEY**

FL = Flared = FL AN = Anatomic ST = Straight
J-1, J-2 = Penhold Japanese-style C = Penhold Chinese Style

NEWEST STIGA BLADES

The Carbonado 45 and Carbonado 90 blades are constructed with thinner TeXtreme® 64 gram per m² carbon fiber, providing exceptional control and wood feel. These two new additions to the Carbonado family are built with the same expert processes and quality materials as the original Carbonado 145 and 190, with one difference – the Carbonado 45 and 90 contain 64 gram per m² carbon fiber while the original Carbonado 145 and 190 contain 100 gram per m² carbon fiber. Choose Carbonado 45 and 90 for top quality, expert craftsmanship, and outstanding performance, along with increased control and wood feel!

CARBONADO 45

- Constructed with Carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control.
- Wide personalized sweet spot.

Handle FL(Ig), FL(sm,AN,ST) / Wt 90 / Plies 5W,2C / Item SSC45

OFF+ 93 63 Blade \$189.95

ETERNITY VPS V

- Offensive 5-ply blade built to suit today's modern game.
- Special temperature treated middle veneers (VPS) reduce vibrations and give great stability.
- Surface has extra hardness and smooth finish thanks to the Diamond Touch technology.
- Developed in close collaboration with the Chinese National Team.

Handle FL(Ig), FL(sm,AN,ST) / Wt 90 / Plies 5W / Item SSETRN

OFF 90 64 Blade \$89.95

CARBONADO 90

- Constructed with Carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- The longer and flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes.
- High personalized sweet spot.

Handle FL(Ig), FL(sm,AN,ST) / Wt 90 / Plies 5W,2C / Item SSC45

STIGA BLADES COMPARISON CHART page 48

PRO Look for this sign for blades that are available as PRO SPECIALS. Details on pages 4-7.

For the new Carbonado blades STIGA has taken carbon blade manufacturing to a new level by using a made in Sweden carbon technology known as TeXtreme®. The blades are built with five layers of wood and two layers of lightweight TeXtreme® Spread Tow Carbon fibers. This unique and patented carbon is the first of its kind and has never before been experienced in Table Tennis.

The special TeXtreme® Spread Tow Carbon is flexible in only one direction, either flexural or torsional, making it possible in the manufacturing process to adjust and improve the ball trajectory and speed to accommodate playing style. The two layers of carbon are applied in a 45 degree angle or a 90 degree angle.

The Carbonado blades offer the player a personalized Sweet Spot. The Carbonado 190 with flexural bendability gives a higher Sweet Spot.

CARBONADO

THE DIFFERENCE IS IN THE ANGLES

Carbonado 190

Constructed with carbon layers in a 90 degree angle with flexural bendability, giving the blade a stiff feel with great stability and high speed. The longer and flatter trajectory makes it an excellent choice for players who want to dominate play with high speed strokes. The Carbonado 190 with flexural bendability gives a higher Sweet Spot. Handle FL(lg), FL(sm), AN,ST / Wt 90 / Plies 5W,2C / Item SSC190

OFF+ 98 60 Blade \$179.95

Carbonado 145

Constructed with carbon layers in a 45 degree angle with torsional bendability, giving the blade more flexibility and increased stiffness. The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control. The Carbonado 145 with torsional bendability gives a wider Sweet Spot. Handle FL(lg), FL(sm), AN,ST / Wt 90 / Plies 5W,2C / Item SSC145

OFF+ 98 60 Blade \$199.95

CC SERIES (Crystal Carbo)

Developed in close cooperation with members of the Chinese National team, the CC Series is focused on the importance of ball trajectory. Longer trajectory lets you push your opponent away from the table and take control of rallies and the game. The CC5 and CC7 were developed to meet those demands. Both blades have carbon layers inside, with STIGA's famous NCT and Crystal treatment on the surface.

CC5

A unique blade that balances control with long trajectory and power. This blade is for the control minded player who still wants to have power when striking the ball. Handle FL (lg), FL (sm), AN, ST / Wt 96 gm / Plies 5W, 2C / Item SSSCC5

OFF 89 62 Blade \$132.95

CC7

A more powerful blade than the CC5, the CC7 is recommended for highly skilled attackers with excellent technique. Outstanding when you are playing back off the table and getting into topspin rallies. With CC7 you can feel the long trajectory in your topspin strokes and gain control over the game. If you like to play topspin against topspin, then this is the blade for you. Handle FL (lg), FL (sm), AN, ST / Wt 99 gm / Plies 5W, 2C / Item SSSCC7

OFF+ 94 58 Blade \$148.95

Clipper CC

The Clipper CC is a unique and powerful weapon created by combining the 21st century technique, Crystal Carbo, with a new secret carbon powder! This 7-ply blade has carbon powder between all layers, for a total of 6 carbon powder layers. This makes this blade very powerful. The unique Crystal surface gives you extra zip on all your shots. Handle FL (lg), FL (sm), AN, ST / Wt 92 gm / Plies 7W, 6C / Item SSSCLCC

OFF 94 61 Blade \$124.95

OPTIMUM

Optimum Sync

Designed with the ideal mix of speed and control. Experienced players get needed lethal attacking shots, and defensive and counter loops and smashes. Handle FL (lg), FL (sm), AN, ST / Wt 88 gm / Plies 5W / Item SSSOPTN

OFF- 88 71 Blade \$61.95

Optimum PLUS

Crystal Technology + Offensive Classic wood in a very popular 5-ply blade. Same outer plies as the Offensive Classic, but faster and lighter. The Crystal Technology process hardens the blade surface to increase speed. Amazing crystalline appearance of blade! You get extra zip on all your shots. Handle FL (lg), FL (sm), AN, ST / Wt 80 gm / Plies 5W / Item SSSOPPN

TENALY ERGONOMIC HANDLE

The word "Tenaly" means "it becomes the hand." Innovative handle has an ergonomic design to make the blade an extension of the player's natural angle of the wrist, hand and forearm to the head of the blade. The handle is comfortable and effective for the shakehand or penhold grip.

Tenaly Feruku

Unique ergonomic handle can be gripped as shakehand or penhold-style. A powerful blade combining 3 plies Japanese cypress wood with the speed of 2 plies Kevlar. Although constructed of hard wood, it has good elasticity. Handle Ergo FL / Wt 82 / Plies 3W, 2K / Item SNTEF

Dr. Neubauer

Our goal is to provide our customers with the best products in terms of quality and playing characteristics. All products promoted with our name have been extensively tested and approved by Dr Herbert Neubauer personally. Our team wishes you success and fun at our favorite sport.

World Champion Carbon

Enhanced version of the World Champion blade
Two additional layers of carbon fiber make this blade stiffer, producing even more powerful, precise topspin. Control remains high because of a special heat treatment. And the blade still provides a soft "feeling" despite use of carbon. Stability is gained by the use of fiber material, making this a formidable weapon for attacking with fast pimple-out rubbers and for blocking with slow, long pips or Anti-Spin rubbers. The new preferred choice for a modern attacking game with any kind of rubber!

Handle FL, AN, ST / Wt 80 / Plies 5W,2C / Item SUWCC

OFF- 92 65 Blade \$74.95

Barricade

Maximum Defense, Excellent Control!

For short blocking close-to-table and safe yet dangerous chopping. For all rubber types. Attack by looping or hitting to confuse your opponent. Effective for passive /active strokes. FL,AN,ST / Wgt 58 gm / Plies 7W / Item SUBAR

DEF+ 65 88 Blade \$63.95

High Technology Plus

Offense + Excellent Control!

For all strokes. Gluing technique+Balsa handle, gives great ball feeling. Effective attack with long pips through push/lift and counter-attack, with safe returns on block. Super acceleration. FL, AN, ST / Wt. 65 gm / Plies 5W / Item SUHIP

ALL+ 89 64 Blade \$89.95

Firewall Plus

Similar to Firewall, but no weight shakers.

Modified plywood composition enables dynamic offense w/smooth or short pips rubber. Balsa core for speed on hit/loop. Good feel. High spin reversal + fast attack w/ long pips. FL,AN,ST / Wt. 65 gm / Plies 5W / Item SUFIP

ALL 79 73 Blade \$68.95

Bulldog

Fast allround blade - light, with control for all shots.

Long pips or anti-spin rubbers slow ball for short shots. Short pips produce deadly shots while straight hitting. With fast inverted rubber, you get a powerful topspin weapon. Handle: FL,AN,ST/ Wt: 68 gms / Plies: 7W / Item: SUBUL

ALL+ 87 69 Blade \$63.95

Kung Fu

Allround blade for the combination player.

Great for anti-spin and pips-out rubbers. Softer, better control than Dr Neubauer's Gladiator, but just as effective, and can be used for powerful attacks. Handle FL,AN,ST / Wt 85 gms / Plies 7W / Item SUKUN

ALL 76 74 Blade \$77.95

Matador

For use with pips-out or anti-spin rubbers If you want a fast blade, with high control and disruptive effect, special plywood composition provides astounding power for a modern attack. Rigid but with "touch" for the ball and good control for all strokes. Handle FL,AN,ST/Wt 88/ Plies 7W/ Item SUMAT

OFF- 90 68 Blade \$64.95

Jackpot

The ultimate weapon for pips-out/ Anti-Spin rubbers!

Perfectly balanced plywood composition and new lamination procedure ensure excellent results when used with pips-out and Anti-Spin rubbers. Both the spin reversal obtained while blocking with frictionless Anti-Spin rubbers and the wobbly ball produced by long pips set a new benchmark: The speed of the ball can be reduced considerably, ensuring maximum effectiveness. Jackpot does not consist of balsa yet offers formidable control, plus it provides good attack possibilities with reversed rubbers so that an active and highly disruptive game can be produced with any type of pips-out and Anti-Spin rubber on the other side. Handle FL, AN, ST / Wt 82 / Plies 5W / Item SUJKP

ALL 82 76 Blade \$74.95

Hercules

Unique wood composition

Legendary Kiso-Hinoki wood + new type of artificial fiber. Great match for any pips-out and Anti-Spin rubber. Excellent for highly disruptive balls while blocking close-to-table. Great control, excellent feeling, for strong hitting and fast looping. Handle FL,AN,ST/Wt 85 gm / Plies 5W / Item SUHRC

ALL 82 77 Blade \$151.95

Phenomenon

Symbiosis of disruptive effect and control!

Highly disruptive effect with pips-out or Anti-Spin rubbers. Very low bounce for block of attacks. Excellent control + feeling, plus speed for attack or counter-attack. Handle FL,AN,ST/Wt 78 gm / Plies 7W / Item SUPHN

ALL 80 79 Blade \$74.95

World Champion

Fast OFF- for Dynamic Attack!

For attack hitting/looping (topspin), close-to-table or mid-distance and for combination players w/pips out or anti-spin rubbers. Special heat treatment gives soft feeling+control. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SUWOR

OFF- 86 71 Blade \$69.95

Titan

"Combination" blade - fast forehand speed on backhand.

Disruptive effect w/long pips or anti-spin rubber. Dynamic attack w/pips-out or smooth rubber. Control + feeling. FL,AN,ST/Wt: 65 gms / Plies: 7W / Item: SUTIA

ALL+/ALL- 80/66 69/85

Blade \$177.95

Combination Effect

Different speeds on the two sides of the blade using unique wood composition. Low rebound on one side slows the ball, allowing short return shot with a maximum spin reversal on block. FL,AN,ST / Wt. 70 gm / Plies 6W / Item SUCOM

ALL+/ALL- 79/66 70/84

Blade \$179.95

Special

The magical blade yet improved!

Maximum effects and very short blocking w/long pips. Excellent touch due to Balsa wood handle. Easy, effective counter-attack, push and lift w/long pips. Thick 7-ply blade w/large handle. FL,AN,ST / Wt. 68 gm / Plies 7W / Item SUSPE

See Page 5

Ovtcharov Original Senso Carbon

Used by Dima Ovtcharov, European Champion. A unique new ply formation maximizes the sweetspot. Two separate Ayous layers are treated and glued at high temperature pressure, then cooled before the next stage. This forms the core. These plies are surrounded by two carbon plies for stability and hardness. Senso handle design allows for precise return of ball. Dima Ovtcharov commented, "This blade was a huge help to me on my way to the world's elite. DONIC's 'know-how' and the Swedish blade technicians have created a blade precisely to suit my game. As a result of their expertise I can develop top speeds when attacking but am able to retain super control when under pressure. This blade was made for me!" Handle FL / Wt 90 / Plies 6W, 2C / Item SDOVO

OFF	90	70	Blade \$79.95

Paddle Palace: Sole North American Distributor for DONIC

DOTEC TECHNOLOGY

The DONIC Dotec System is the wood technology without awkward edges. Since the human hand does not have hard edges, DONIC wanted to develop a smooth blade without sharp edges to ensure a completely smooth transition between blade and handle. The DONIC Dotec system is the technology that provides a blade with a perfectly smooth handle – a joy to grip. Choose between Right-Handed and Left-Handed versions.

DONIC continues to build on many years of success of its DOTEC series with three newest Ovtcharov blades: Off, All+ and All. Ovtcharov Dotec blades incorporate the brand new CBF technology. Vulcanized artificial plies have been carefully glued and put together with top quality plies to ensure extremely good feel and precise return of the ball.

Ovtcharov Dotec OFF

The fastest in the Ovtcharov Dotec series. It is really fast but has excellent control. Best suited for attackers and allround players with power who like to loop or counter-attack close or away from the table. Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODO

OFF- 88 67 Blade \$72.95

Ovtcharov Dotec ALL+

Slightly less powerful and little softer than the Ovtcharov Dotec OFF version. This blade has fantastic control but is still quite fast. Suitable for allround players with power and spin who require maximum control when under pressure. Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODP

ALL+ 81 73 Blade \$72.95

Ovtcharov Dotec ALL

The easiest blade to control from the Ovtcharov Dotec series. Top control and a particularly good feel guarantee the best possible allround qualities. Especially recommended for allround players who like to block and chop in defensive situations. Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODA

ALL 78 75 Blade \$72.95

Persson Dotec OFF

Great offensive blade for players of every ability, with DONIC Dotec technology. Super versatility with top speed + fantastic feel in every playing situation. Covering of legendary Japanese Hinoki wood, with Dotec-Balsa and Koto plies. Available in LEFT- or RIGHT-handed version. Handle LEFT, RIGHT / Wt 75 gm / Plies 7W / Item SDPDO

OFF- 91 67 Blade \$78.95

Waldner Dotec Carbon

A 4mm core of Balsa surrounded by carbon and Limba plies give this Dotec blade enormous potential for speed, quick topspin and smashes while maintaining remarkable control. Handle LEFT, RIGHT / Wt 85 gm / Plies 5W,2C / Item SDWDC

OFF 93 66 Blade \$92.95

Waldner Dotec AR

Limba/Balsa combination produced by DONIC Dotec Technology, results in a perfect, fast, all round blade. Amazing touch! Available in LEFT-handed or RIGHT-handed version. Handle LEFT, RIGHT / Wt 70 gm / Plies 7W / Item SDWDA

ALL+ 81 74 Blade \$72.95

Appelgren Dotec Control

The last word in control and accuracy! Easy control and good feel. Ideal for those who want more ball control without loss of speed necessary for attack. DOTEC fiber is placed between a limba cover and an ayous inner ply. Middle core consists of a DOTEC balsa layer. Handle LEFT, RIGHT / Wt 70 gm / Plies 7W / Item SDADC

ALL+ 79 76 Blade \$65.95

Wang Xi Dotec Control Plus

Fine touch and precise placement for the defensive player! Provides not only control but reserves of speed to enable positive all-round players to go on the attack. Ideal for players who value control but not at the loss of attack play. This blade is available with a straight handle, making it easier for defenders to "twiddle" their racket. Handle LEFT, RIGHT, ST / Wt 80 / Plies 7W / Item SDXDP

ALL- 69 83 Blade \$71.95

COMBO SPECIAL
with 2 rubbers**\$124⁹⁵**

Item XSDWSC

**Waldner Senso Carbon****COMBO SPECIAL**

Perfect for attack and aggressive allround play. Two high-tec Carbon layers with time-proven Swedish allround construction result in an ideal balance of speed+control. With Senso V1 hollow handle technology. Elastic component gives you the essential touch. Handle FL, AN, ST / Wt 85 gm / Plies 5W, 2C / Item SDWSC

OFF- 86 70 Blade \$59.95**Waldner Senso Ultra Carbon**

Legendary blade, improved in collaboration with the great J.O. Waldner. Faster than Waldner Carbon and light with impressive ball control and feel. Hard Carbon plies increase speed. Inner/outer veneers of varied hardness for superb touch! Handle FL, AN, ST / Wt 80 gms / Plies 5W, 2C / Item SDWUC

OFF 89 70 Blade \$60.95**Waldner Legend Carbon**

A fast, extremely light offensive blade with a larger "sweet spot" for premium control. Blade has been designed with great care. The choice of wood plies - Hinoki outer ply in combination with carbon layers and a soft inner ply provide stiffness for good topspin. Especially effective for players who like to dominate close to the table. Handle FL, ST / Wt. 85 / Plies 5W, 2C / Item SDWLC

OFF 93 66 Blade \$74.95**Persson Seven**

Developed especially for modern, dynamic top spin players. This 7-ply blade (Limba-Ayous-combination) has good feel and is very apt at producing spin. It also offers excellent control when hard top spins are required. Handle: FL, ST / Wt: 90 / Plies 7W / Item SDPE7

OFF- 88 67 Blade \$49.95PRO SPECIAL with
DONIC Bluefire M1 Turbo
Rubber**\$129⁹⁵**

See Page 5

**Ovtcharov Carbospeed PRO**

Very fast carbon blade with great stiffness and durability. High class Hinoki outer ply. Recommended for all out attackers with hard top-spins who prefer to counter-attack. Handle FL, ST / Wt 85 / Plies 3W, 2C / Item SDOVP

OFF+ 95 55 Blade \$74.95**Baum Espirit**

The blade of European star, Patrick Baum. Aramid-Carbon fiber in combination with high quality wood plies ensure a precise ball return and outstanding offensive quality to the blade. Very fast, but the blade design maximizes ball control in every playing situation. It is particularly suited for counter top-spinning and for touch play. Handle FL, ST / Wt 89 / Plies 5W, 2C / Item SDBES

OFF 89 61 Blade \$65.95**DONIC SENSO V1 and V2:**

The V1 hollow space (see sketch) leads to more speed, with identical control to the original blade. The V2 hollow space increases the control with identical speed.

V1 = optimum speed

V2 = optimum control

**Ovtcharov Senso V2**

This power allround blade has a mahogany outer ply, softer than the mahogany outer ply of the Ovtcharov Senso V1. A solid blade with perfect combination of specially chosen medium-hard plies, ensuring a high degree of control. Recommended for those who value control but still require power and speed when attacking. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDOV2

OFF- 88 70 Blade \$58.95COMBO SPECIAL
with 2 rubbers**\$123⁹⁵**

Item XSDOV1

Ovtcharov Senso V1**COMBO SPECIAL**

Fantastic feel and power. 7-ply blade with a hard walnut outer designed for high speed smash and topspin. Inner plies are medium hard and medium soft veneers. Gluing technology results in added rigidity. Handle FL, AN, ST / Wt 90 gms / Plies 7W / Item SDOV1

OFF+ 95 64 Blade \$58.95**Waldner Allplay**

Dark natural wood handle incorporates the well known "Waldner Design". Classic Swedish blade - best seller world-wide. Best ball control, speed, flexible for all playing situations. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDWAL

ALL 72 84 Blade \$37.95**Waldner Senso V1 & V2**

Well-rounded speed. Classic Swedish construction with speed and fantastic control. Perfection for all offensive and aggressive allround players.

EXCLUSIVE BLADES

Persson Exclusive OFF

Unbeatable value. The fastest of the Exclusive blades, with great power for effective fast topspin and hard smash. Plus, it provides first class control with all types of spin. Recommended for hard-hitting attackers. Handle FL, AN, ST / Wt 85 / Plies 5W / Item SDPEO

OFF- 80 73 Blade \$32.95

Waldner Exclusive AR+

Offensive power with ball feeling of an allround blade. For offensively oriented all-round players who use variable topspin close to the table and half-distance, with no loss of control. Handle FL, AN, ST / Wt 85 / Plies 5W / Item SDWEP

ALL+ 76 74 Blade \$32.95

Appelgren Exclusive AR

Highly recommended for all-round players who value control when blocking but especially wish to incorporate variations of spin into their play. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SDAEA

ALL- 65 85 Blade \$31.95

Waldner Black Devil CB

A Champion's blade! Outstanding for attack! Advanced technology + revolutionary 7-ply design: as exuberant as the playing style of the Master. Carbon, soft Balsa core + Koto plies = super control, power + speed with an enlarged sweet spot. Handle FL, AN, ST / Wt 80 gm / Plies 5W, 2C / Item SDWBD

OFF+ 96 59 Blade \$86.95

Waldner Diablo Senso

Two plies of glass fibre with wood provide stability, larger sweet spot, more rigidity and speed, but with the good feel of a wood blade. Senso hollowed-out handle. Handle FL, AN, ST / Wt 85 gm / Plies 3W, 2G / Item SDWDB

OFF- 88 64 Blade \$57.95

Waldner Dicon

DICON stands for **D**irect **C**ontrol. Parts of the handle are removed with a milling tool, providing direct contact between the player's hand, arm, and blade to improve feel of power and speed, giving you more control. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDWDI

OFF- 87 66 Blade \$43.95

DONIC BURN SERIES

Thermal treatment of the veneers results in extremely high stability, similar to features of high-quality tropical woods. Exposure to 200 degrees centigrade for 24 hours hardens and dries the wood, resulting in unique playing characteristics.

Burn OFF

Stiff and fast with excellent control and an outstanding sweet spot. It is not top heavy even used with heavy and hard rubbers. Handle FL, AN, ST / Wt 90 gm / Plies 5W / Item SDBUO

OFF 94 65 Blade \$49.95

Burn OFF-

More controllable than the Burn OFF blade. In harmony with the thinner middle ply it is slightly more elastic. With softer rubbers imparts slightly more spin than the OFF version. Beautiful blade, excellent sweet spot. Handle: FL, AN, ST / Wt: 85 gm / Plies: 5W / Item: SDBUM

OFF- 89 68 Blade \$49.95

Burn AR+

Aim for this blade is ease of control and feel. The thinner Kiri center ply offers great control, and at 80 gms, it is relatively light. Use with harder attacking rubbers for fantastic speed or use softer rubbers for greater spin. Handle: FL, AN, ST / Wt: 80 gm / Plies: 5W / Item: SDBUA

ALL+ 81 73 Blade \$49.95

Blue Feeling

"Made in Sweden" high tech 5-ply allround blade has a special Ayous outer ply, colored and glued with special procedures, dried for a long time and pressed under heavy pressure. The result is sensational feel and unique design - a blue grain in the ply! Thicker inner ply, fairly hard Limba plies and specially treated outer ply results in outstanding control and speed for attack. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDBLU

ALL+ 80 75 Blade \$59.95

Dima Sawtec AR

Ovtcharov's extreme adaptability at the table inspired this combination of woods for every stroke: flick, push, block, topspin, loop, smash. Excellent control+speed, with DONIC Cork-Covered handle. Handle FL / Wt 85 gm / Plies 5W / Item SDDSA

ALL+ 83 74 Blade \$48.95

Baum Carrera Senso

Hard, thick 7-ply offensive blade. Great for aggressive player like World Jr Champ Patrick Baum: fast topspin from both wings, hard smashes, power flips + blocks. Handle FL, AN, ST / Wt 90 gm / Plies 7W / Item SDBCA

OFF+ 98 58 Blade \$52.95

COMBO SPECIAL with 2 rubbers \$114.95 Item XSDDEF

Defplay Senso COMBO SPECIAL

Awesome for versatile defense! World's most successful veneer combo (5-ply allround) has two dampening, elastic outer plies (Gabon and Anegre). Vibration/speed of blade is reduced by increasing blade size by 3mm. Unbelievable control for defense + fantastic offensive acceleration. FL, AN, ST / Wt 85 gm / Plies 5W / Item SDDEF

DEF+ 63 94 Blade \$49.95

Cayman

Great all-round blade with good feel! Lightweight, high rigidity and excellent control. Hard outer plies are especially suitable for players using short or long pips. Amazing control, with no loss of speed. Handle FL, AN, ST / Wt 70 gm / Plies 5W / Item SDCAY

ALL+ 80 76 Blade \$52.95

Alligator Combi

The main feature of this blade is the difference in speed between forehand and backhand sides. The 5-ply ALL+/DEF+ blade creates perfect harmony between playing styles. Soft Balsa core makes the blade light and relatively stiff. Amazing possibilities with anti and long pips rubbers. Handle: FL, ST / Wt: 80 gm / Plies: 5W / Item: SDALG

ALL+/DEF+ 76/66 75/90 Blade \$52.95

TIBHAR®

Paddle Palace:

Sole North American Distributor for TIBHAR

VS Unlimited

Large sweet spot and extra control for the offensive game. The combination of high-tech synthetic fibers, low vibration, carbon fiber and its optimal transfer of energy, is perfect for a variable spin attack and topspin game from half distance. Optimal transfer of energy of your own strokes on the ball, and the possibility to counter the offensive strokes of your opponent's with your own offensive strokes. Good balance between hardness and sensation for an offensive game. Handle FL, AN, ST / Wt 87 / Plies 5W, 2C-K / Item STVSU

OFF+ 96 68 Blade \$179.95

SAMSONOV

CCA 7

Named after the initials of the World Doubles Champion, Chen Chien-An, the CCA7 blade has high potential for acceleration and speed. Although being a very fast blade, the serve remains soft. CCA7 gives a lot of feeling and is very spin friendly. Enables strong topspins at the table and at half distance. The Chen Chien-An playing style corresponds to powerful topspins and a backhand full of touch. Very suitable for a fast game with spin. Handle FL, AN, ST / Wt 88 / Plies 7W / Item STCA7

OFF 91 71 Blade \$99.95

CCA Unlimited

The oversized sweet spot offers the necessary amount of control for the offensive game. The fast acceleration potential of this wood is the result of the balanced combination of its carbon fibers with catapult friendly layers, even when playing a topspin game at half distance from the table, without losing the necessary stability when playing counter and block. Excellent for the offensive game with the perfect balance between hardness and sensation. Handle FL, AN, ST / Wt 88 / Plies 5W, 2C/K / Item STCAU

OFF+ 96 67 Blade \$189.95

Ronin CB **COMBO SPECIAL**

Fast and offensive, the ideal weapon for the uncompromising attack! Tibhar's new technology in the handle - S.AM (Sensory Amplifier) - gives the player intensity of feeling and instinctive response for improved shot selection and touch. The two outside soft veneers guarantee both sensation and acceleration; the carbon fibers give the right amount of balance, and the Ayous centre veneer guarantees everything required for a direct and offensive game. Handle FL, AN, ST / Wt 87 / Plies 3W, 2C / Item STROC

OFF+ 97 61 Blade \$89.95

Ronin 6

Designed for a variable and offensive spin rich game. Designed for a variable and offensive top spin game both at the table or at half distance. The integrated foam inlay in the handle makes this blade very special. Ball vibrations are more keenly felt in the player's hand which optimizes his response to the opponent's strokes and improves feel and anticipation. Handle FL, AN, ST / Wt 85 / Plies 6W / Item STRO6

OFF 95 73 Blade \$59.95

Balsa Allround 50

Focus is on both control and ball sensation. Allows both a controlled topspin game, or block and counter shots at the table in complete comfort. The 5.0 mm thick Balsa core is the basis for an optimal balance between speed and control. Handle FL, AN, ST / Wt 73 / Plies 5W / Item STBFA

ALL 74 78 Blade \$54.95

Balsa Fibretec 75

Extra light blade, perfectly suited to aggressive offensive rallies. The 7.5 mm thick Balsa core provides high speed and an enormous potency. The two layers of fibreglass increase the stability and allow you to play, thanks to the greater sweet spot, fast attacking topspin strokes. Handle FL, AN, ST / Wt 73 / Plies 3W, 2G / Item STBFC

OFF 92 64 Blade \$54.95

Balsa Fibre OFF 60

Designed for players who like to play an offensive game but at the same time want to place very precise shots. Compared to the Fibretec 75 it has more control for your passive game. It is extra light with good speed potential and is very sensation friendly. The fibreglass layers confer high stability and increase the sweet spot. Handle FL, AN, ST / Wt 73 / Plies 5W, 2G / Item STBFO

SGS BLADES

These fantastic blades from TIBHAR feature the newest technological breakthrough TIBHAR'S SGS [Super Grip System] with unique foam rubber insert in the handle for super control and ball feeling.

Samsonov Alpha SGS

Fine 5-ply wood meant for the diversified and attacking offensive allrounder. It offers extraordinary ball control and optimal speed potential. If you focus on precision, this blade is made for you. Handle FL, AN, ST / Wt 85 / Plies 5W / Item STSSG

OFF- 86 69 Blade \$54.95

Samsonov Carbon SGS

If you place speed and aggressiveness in your game above everything else, then this blade is made for you. Soft-fast Ayous layers, combined with 2 additional carbon layers results in this fabulous and fast blade with the SGS grip that gives good feedback while maintaining control; at ball contact, the blade will not feel too stiff. Handle FL, AN, ST / Wt 89 / Plies 7W, 2C / Item STSCS

OFF+ 98 56 Blade \$89.95

IV-L SGS

Includes newly developed comfort grip system, SGS (Sponge-Grip-System). This blade, an update to TIBHAR's classic IV-L blade, retains the classic composition of specially selected Ayous layers. Developed in cooperation with world class players, this racket shape, adapted to the grip shape, increases control and acceleration. The player gets excellent feel and feedback. Handle FL, AN, ST / Wt 88 / Plies 4W / Item STILS

ALL 80 72 Blade \$49.95

IV-S SGS

Updates TIBHAR's classic IV-S blade construction using Ayous outer layers with the new Sponge-Grip-System (SGS) design. The racket shape is optimized to work in tandem with the grip shape to permit full use of your offensive potential without having to give up the unique soft, but fast, playing sensation. Handle FL, AN, ST / Wt 88 / Plies 5W / Item STISS

ALL+ 88 69 Blade \$49.95

Balsa SGS

The perfect mix between lightness and offensiveness, conferring an extraordinary ball rebound and direction. It is the ideal blade for playing a counter and offensive game at the table with very precise topspin strokes. The SGS-System provides the requested comfort and confers a good balance between speed and control. Handle FL, AN, ST / Wt 75 / Plies 5W / Item STBAS

available as Penhold Blades

NEW BLADE!

NEW

Sweden EK Carbon

Same "5 + 2 layers" construction as all other Yasaka carbon blades. Outer veneers are made by oak wood, grown in Scandinavia. The oak wood is hard and improves the blades stiffness and speed. In addition this lacquered blade has an elegant look. Produced in the famous table tennis factory in Tranås, Sweden. Handle FL, AN, ST / Wt 89 / Plies 5W,2C / Item SYEKC

OFF 96 67 Blade \$69.95

COMBO SPECIAL
with 2 rubbers

\$114.95

Item XSYBBL

Battle Balsa *COMBO SPECIAL*

Produced in the famous blade factory in Tranås, Sweden. Many players appreciate blades made with balsa material because of the low weight, but also because of the special feel in the ball touch. However, some players find traditional balsa blades too slow. In the Battle Balsa, Yasaka has combined the best balsa-quality with Scandinavian pine to produce a faster blade, but still with a low weight. The special feeling of a "self playing blade" is of course still there! Handle FL, AN, ST / Wt 75 / Plies 5W / Item SYBBL

OFF- 86 68 Blade \$49.95

COMBO SPECIAL
with 2 rubbers

\$137.95

Item XSYMAC

Ma Lin Carbon *COMBO SPECIAL*

Used by Olympic Gold Medalist Ma Lin (penhold), who appreciates the powerful blocking and looping of this blade. There is little vibration, thanks to the high quality of wood in combination with carbon. Handle FL,AN,ST / Wt 85 grams / Plies 5W,2C / Item SYMAC

OFF 95 60 Blade \$72.95

COMBO SPECIAL
with 2 rubbers

\$137.95

Item XSYMAS

Ma Lin Soft Carbon *COMBO SPECIAL*

A softer feel than the Ma Lin Carbon. One of the best control carbon blades on the table tennis market. Large sweet spot supports consistent shots. Great for block, loop, counter, touch. Handle FL,AN,ST / Wt 83 grams / Plies 5W,2C / Item SYMAS

OFF- 88 68 Blade \$72.95

Ma Lin Extra Offensive

Used by 2008 Gold Medalist Ma Lin! (Penhold version) Excellent speed performance in attacks as well as in the important blocking play. Large sweet spot. Surface is lacquered at factory to improve speed and durability. Handle FL,AN,ST / Wt 84 grams / Plies 5W / Item SYMAE

OFF 89 67 Blade \$51.95

MATTIAS KARLSSON:

blade: YASAKA Sweden EK Carbon
rubber: FH - YASAKA Rakza PO / BH - YASAKA Rakza X

Bronze medalist in European
Championships, Doubles

Goiabao 5

The word GOIABAO means "nice wood" – a very suitable name for this elegant blade with top level playing characteristics. This is a fast 5-ply blade with a hard outer veneer and a relatively thick middle veneer. The second veneer is hand selected Scandinavian pine. Surface is lacquered.

Handle FL, AN, ST / Wt 86 / Plies 5W / Item SYGOI

OFF 94 66 Blade \$51.95

Sweden Defensive

Produced in the famous table tennis factory in Tranås, Sweden. Most defensive players are looking for optimal soft touch of the ball combined with exceptional feeling and control. This blade is designed to meet that demand. Fractionally softer outer veneers and a slightly enlarged head in comparison to traditional blades gives the Sweden Defensive its unique characteristics.

Handle FL, AN, ST / Wt 80 / Plies 5W / Item SYSDF

DEF 63 90 Blade \$47.95

LIGNA

FINEST INSTRUMENTS

Once you have a LIGNA blade in your hands, you won't let it go. Finest sawing veneers, which are actually used for creating violins, provide a distinctive character to these handmade premium blades.

Ligna F.R. OFF

- Noble and exceptionally clean processed wood lying comfortably in the hand right from the start.
- Carbon liner under the outer veneer gives direct and undisturbed playing feel, and ensures impulse response.
- LIGNA F.R. has a slightly harder touch compared to LIGNA OFF because of the carbon layer positioning.
- Ideal for spin-oriented attack players who want to score points from any distance with modern offensive strokes

Handle FL, ST / Wt 85 / Plies 5W, 2F / Item SALRF

OFF 90 65 Blade \$155.95

Ligna Tour OFF+

- Solid timber with good blend of control, ball feeling and speed with balanced touch
- Perfect balance for simple and quick handling
- Nobly processed and with exceptional, trouble-free feel for the ball due to high quality outer spruce veneer

Handle FL, ST / Wt 85 / Plies 5W / Item SALTO

OFF+ 95 62 Blade \$129.95

WANOKIWAMI

HANDCRAFTED IN JAPAN

Samurai's first choice! There is no blade having more honest Japanese craftsmanship, more passion for quality, and with such a classy finish.

Wanokiwami AO

- Pure wood feeling! Clearly grounded edges, ergonomically adjusted thumb pad, 100% uniform thick veneers, impressive craftsmanship.
- The 4.2 mm thick core veneer provides a high flexural strength and a direct and straightforward ball feedback. Pleasant hard impact feeling.
- Two thinner outer and inner plies enable controlled, well-dosed strokes. Handle FL, ST / Wt 86 / Plies 5W / Item SAWAO

OFF 90 68 Blade \$162.95

Ligna ALL+

- The most controllable in the LIGNA series.
- Very lightweight allround blade with exceptional feeling being reminiscent of the playing feel of former legendary allround blades.
- The first choice for players of all levels with controlled offensive play and game overview

ALL+ 84 72 Blade \$125.95

Ligna OFF

- Direct and straight forward touch by an outer veneer of fine spruce, which is usually used for violins.
- The carbon layer between core and middle ply adds extra pressure behind each stroke and avoids disturbing vibrations.
- A well-measured pace, the noble processing and the relatively high ball bounce support the spin-oriented offensive play. Handle FL, ST / Wt 85 / Plies 5W, 2F / Item SALOF

OFF 91 64 Blade \$139.95

Ligna OFF+

- The fastest blade of the exclusive andro LIGNA series
- The slightly thicker Ayouse core and spruce outer veneer provide more power to your strokes.
- The fast basic tempo becomes even more dangerous by the high trajectory produced by spruce outer veneers.
- The offensive prodigy for forceful, aggressive topspin play. Handle FL, ST / Wt 85 / Plies 5W / Item SALOP

OFF+ 96 62 Blade \$144.95

Wanokiwami Midori

- A defensive blade in a class of its own! The impressive craftsmanship ensures excellent feeling

- Slightly thicker core veneer (responsible for the moderate pace) and two extremely thin mid- and top-veneers (for maximum ball feeling and control)

- The premium defensive blade from the country where even nowadays defense table tennis enjoys a very high status

Handle FL, ST / Wt 86 / Plies 5W / Item SAWMD

DEF 68 90 Blade \$162.95

FLAXONITE

NATURAL POWER AND RESPONSE

You want a blade with artificial fiber inside, having a typical hard feedback, while also having the sensitive feeling of natural blades at the same time? Then the innovative Natural Fiber Composite Technology will surely convince you! FLAXONITE – absolutely direct, but provided with an extremely sensitive feedback.

Flaxonite Driver

- A focus on speed and offense. Thicker veneers increase the basic speed of this blade.
- The mixture of Kiri (core veneer), Ayous and Koto (outer veneers) ensures an optimal balance of speed, control and feel.
- The natural fiber fleece below the outer veneer with harder impact provides more pressure and power for all strokes.

Handle FL, AN, ST / Wt 88 / Plies 5W, 2F / Item SAFDO
OFF 92 65 Blade \$60.95

Flaxonite Cruiser **COMBO SPECIAL**

- The FLAXONITE model with focus on outstanding control values, due to thinner outer-plyes that perfectly forward the momentum of ball touch.
- The core veneer Kiri ensures a moderate but easy to activate ground speed.
- The natural fiber fleece directly under the outer veneer leads to a harder, carbon-like strike

Handle FL, AN, ST / Wt 80 / Plies 5W, 2F / Item SAFA
ALL+ 84 70 Blade \$60.95

COMBO SPECIAL with 2 rubbers
\$125.95
 Item XSAFCA

TREIBER

DRIVEN BY TECHNOLOGY

Every TREIBER model is based on a different premium artificial fiber, giving every blade a unique individual character

Treiber Q **COMBO SPECIAL**

- Classic carbon blade construction with synthetic fiber directly under the Koto outer ply. Hard impact feel, huge optimum hitting zone, no energy loss.
- Perfectly suits modern, aggressive topspin play.
- Great for players seeking more pace with new plastic balls.
- Fastest of all TREIBER blades – extraordinary!

Handle FL, AN, ST / Wt 88 / Plies 5W, 2C/F / Item SATRQ
OFF 96 61 Blade \$77.95

Treiber Z

- Stands out because of its unusual structure: under the high-quality Hinoki wood outer ply lies an intermediate layer of high-quality Z-Fiber.
- High speed and high, very direct ball bounce is a distinguishing highlight feature.

Handle FL, ST / Wt 88 / Plies 5W, 2C/F / Item SATRZ
OFF 93 63 Blade \$122.95

Treiber H

- The H-fiber is set around the core veneer (Inner), whereby the typical hard carbon impact is slightly less.
- The artificial fiber blade with focus on control! Great for service and return play.
- The most sensitive of all TREIBER blades.

Handle FL, AN, ST / Wt 90 / Plies 5W, 2C/F / Item SATRH
OFF 88 65 Blade \$77.95

Treiber K

- Traditional construction of a synthetic fiber wood with K-fiber directly under the outer ply. Direct but controlled feel when hitting the ball. No vibrations.
- Best possible balance between speed and control. No loss of control, neither in passive nor in offensive strokes.

Handle FL, AN, ST / Wt 90 / Plies 5W, 2C/F / Item SATRK
OFF 95 62 Blade \$88.95

COMBO SPECIAL with 2 rubbers
\$142.95
 Item XSATRQ

SUPER CORE CARBON LIGHT

ZERO GRAVITY

andro SUPER CORE CARBON LIGHT blades consist of a Balsa core covered by intermediate Carbon layers. Carbon feeling in combination with an incredibly low weight!

Super Core Carbon Light ALL+

- Equipped with more control by a thinner balsa core with less speed.
- Provides benefits in passive playing situations and in the service-return play.

Handle FL, AN, ST / Wt 70 / Plies 3W, 2C / Item SACLA
ALL+ 81 74 Blade \$66.95

Super Core Carbon Light OFF

- The Super Core Carbon Light blade with focus on speed.
- The hard, carbon typical impact brings advantages in the aggressive, spin-oriented game and for topspin against backspin.

Handle FL, AN, ST / Wt 70 / Plies 3W, 2C / Item SACLO
OFF 90 70 Blade \$66.95

Super Core Carbon Light OFF+

- Specially developed for offensive players who prefer strong, aggressive play.
- Despite the very offensive character this blade has a lot of control.
- Excellent for active and fast back strategy.

Handle FL, AN, ST / Wt 70 / Plies 3W, 2C / Item SACLP

CS V

PURE PERFORMANCE

These blades with a classic construction provide a pure and direct playing feel.

CS5 Carbon OFF++

- The ultimate continuation of the CS5 blade line. Solidly designed, finely processed, and equipped with immense power.
- Three wooden veneers (Kiri core and Hinoki outer plies) and two carbon layers guarantee no loss of power.
- Hinoki outer ply acts as a catapult for a higher ball curve. The perfect blade for speed-freaks!

Handle FL, AN, ST / Wt 88 / Plies 3W,2C / Item SAC5C

OFF+ 98 58 Blade \$76.95

CS5 OFF

- Kiri core, Ayous intermediate layers and Koto outer veneers. Classic structure of five layer blades.
- Provided with slightly more vigorous effect compared to CS5 OFF.
- Recommended for straightforward attack play close to the table

Handle FL, AN, ST / Wt 82 / Plies 5W / Item SAC5O

OFF 88 75 Blade \$38.95

CS5 ALL+

- Solid Kiri wood core, encased by acacia and fineline veneers.
- Rock-solid allround blade with good control. Well suited for technique training.
- Good mix of pace and ball feel. For safe and error-free allround play.

Handle FL, AN, ST / Wt 82 / Plies 5W / Item SAC5A

ALL+ 82 75 Blade \$38.95

CORE 7

TAKE SEVEN

Thanks to its seven ply construction the andro CORE 7 blades support you in every situation with relatively hard feedback accompanied by minimal vibrations.

CS7 Tour

- The key to the noticeable power is the layer of Limba outer wood.
- Core and intermediate plies in different thicknesses are perfectly matched together.
- Created for players who play consistently and put pressure on the opponent with topspin strokes.

Handle FL, AN, ST / Wt 90 / Plies 7W / Item SAC7T

OFF 92 67 Blade \$57.95

CS7 Velocity

- Pure speed + penetrating power for unconditional offense, provided by five Ayous-plies surrounded by two rigid Hinoki-plies.
- The core of more elastic Ayous wood permits dangerous top-spin strokes from half-distance.
- For absolute offensive players with good technique willing to take risks.

Handle FL, AN, ST / Wt 90 / Plies 7W / Item SAC7V

OFF+ 94 65 Blade \$57.95

BORN FOR DEFENSE

Low speed, thin plywood combination, oversized blade, huge control – these are the parameters describing andro defensive blades

Fibercomp

- Two intermediate fiberglass plies under the outer veneers ensure high bounce and an exceptional feel.
- Slightly higher basic tempo (by Kiri core veneer) for occasional topspin play and changeovers to attack.
- The blade for defenders prone to occasional allround play.

Handle FL, ST / Wt 85 / Plies 7W, 2G / Item SAFCD

DEF 64 87 Blade \$60.95

Defcon

- The ultimate blade for the modern defender with focus on effective counter-attacks.
- A carbon fiber amplifies the Ayous core veneer, resulting in less vibration and more straight-forward power for targeted attacks.
- Thin and sensitive Ayous layers provide maximum ball feeling and high control.

Handle FL, ST / Wt 78 / Plies 7W, 2C / Item SADFC

DEF 62 88 Blade \$65.95

SABINE WINTER

SABINE WINTER

blade: FLAXONITE DRIVER / rubber: RASANT (FH) / RASANT GRIP (BH)

• 2 x European Team Champion

SUPER CORE CELL

SMOOTH ENERGY

The SUPER CORE CELL handle technology reduces vibrations and helps to build up power for your own rebound. A plus in control and feeling is included!

Super Core Cell OFF

- Same construction as SUPER CORE CELL OFF, but with a slightly harder intermediate veneer.
- Solid foundation for more power in all strokes.
- Hard touch when hitting the ball and pleasant balance of control and speed at the same time.
- The CELL-blade for the powerful, point-in-offensive with topspin from any position.

Handle FL, AN, ST / Wt 80 / Plies 5W / Item SASOF

OFF 86 67 Blade \$47.95

Super Core Cell ALL

- Maximum error tolerance to compensate inaccuracies in movement. Perfect for technical training and basic stroke techniques.
- Large blade surface (156 x 153 mm) and high control, also recommended for modern defenders.
- The control freak among andro SUPER CORE CELL blades.

Handle FL, AN, ST / Wt 80 / Plies 5W / Item SASAL

SHAKEHAND BLADES FROM XIOM

Paddle Palace: Sole North American Distributor for XIOM

Omega Blades

Omega and Vega Blades are MADE WITH JOINTLESS® WOOD VENEERS – trademarked by XIOM Corp. Many blades are constructed by fabricating together pieces of wood. The OMEGA and VEGA blades are made of wood plies that are all one piece.

Omega Tour

Offensive 7-ply blade, notable for good dwell time, and recommended for a mix of allround topspin and aggressive spin and smash. Made with JOINTLESS® one piece veneer without material - saving joint fabricated structure, trademarked by XIOM. Handle FL, ST / Wt 88 / Plies 7W / Item SXOMT

OFF- 87 66 Blade \$159.95

Omega Pro

Offensive 7-ply blade constructed with centuries grown natural rosewood veneers with high density for power and superb vibration. JOINTLESS® one piece veneer without material - saving joint fabricated structure, trademarked by XIOM. Handle FL, ST / Wt 98 / Plies 7W / Item SXOMP

OFF 93 64 Blade \$139.95

Omega Euro

Constructed with 7-ply all natural JOINTLESS® wood veneers -- 4 layers Jointless black ebony and 3 layers Jointless natural wood. Fast offensive blade recommended for a mix of allround topspin and aggressive spin and smash. Handle FL, ST / Wt 97 / Plies 7W / Item SXOMU

OFF 92 65 Blade \$119.95

Vega Blades - Zephylium + X-Carbon

Vega Tour

Good dwell time, solid feel, excellent when paired with medium to hard sponge rubber. Constructed with ZEPHYLIUM® - thermoset liquid crystalline polyoxazole fiber and X-CARBON® - carbon graphite fiber for table tennis plywood. All wood veneers are JOINTLESS® one piece veneers without material - saving joint. Handle FL, ST / Wt 87 / Plies 5W, 2Z-C / Item SXVGT

OFF 90 65 Blade \$179.95

Vega Europe

Offensive blade made with 5-plywood and 2-ply Zephylium/X-Carbon construction. The Zephylium allows for maximum spin and control, and the X-Carbon allows for maximum catapult effect. Each veneer is made of single piece wood; they are not jointed from two to one. This gives better feeling and vibration to the player. A T-foil rubber protection sheet is included, for maintenance of rubber and blade. Handle FL, ST / Wt 90 / Plies 5W, 2 Z/C / Item SXVGU

OFF- 89 65 Blade \$139.95

Vega Pro

Offensive speed with good feel, made with five ply wood and 2 composite Zephylium /X Carbon layers. This new era blade has good feel and is offensive in speed. It is sensitive to the new plastic ball and is ready to enhance your game. Made with jointless wood veneers, which is a first for the table tennis industry. This adds extra stability and consistency. The carbon plies are thin, reducing weight without reducing power or touch. Comes with removable T-Foil plastic layer to protect the top layer from scratching during packaging or transit. T-Foil layer can then be used to protect the rubber sheet after assembly. Handle FL, ST / Wt 88 / Plies 5W, 2 Z/C / Item SXVGP

OFF 91 64 Blade \$159.95

Stradivarius PRO

Two plies of Aramid Carbon (a mixture of vibration-absorbing soft Aramid and highly elastic Carbon), provides ideal performance for professional offensive players. The blade catches the ball deeply with minimal residual vibration after impact. Results are a combination of exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure. Handle FL, ST / Wt 85 gms / Plies 5W, 2A/C / Item SXSTV

OFF 91 64 Blade \$99.95

PRO SPECIAL with XIOM OMEGA V PRO Rubber

\$159.95

See Page 6

XIOM®

SHAKEHAND BLADES FROM XIOM

Continued

Zetro Quad

This is the blade for topspin. Zylon fiber is directly placed under the top layers to increase the ability to grab the ball. Soft carbon fiber under the middle layers adjusts the overall performance, and the top layer of selected Kiso Hinoki wood guarantees comfortable feel. Making heavy topspin is effortless, and even secure. Players can take the initiative in the game with effective preparatory topspin attack, and keep the initiative with continuous topspin from any distance. Handle FL, ST / Wt 92 gms / Plies 5W, 2C, 2Z / Item SXZEQ

OFF 93 63 Blade \$114.95

V1

Hard, fast, lightweight carbon blade with a thickness of only 5.4 mm, which allows sufficient deformation required by modern aggressive top-spin players. Special hard wood on the surface and "Energy Carbon" directly under the surface, results in a combination of high speed and compact feel. Both close-to-table topspin and hard smash are very easy. Excellent for precise ball placement with blocks. Stability and security of V1 even gives players the advantage in topspin vs. topspin. Handle FL, ST / Wt 85 gms / Plies 5W, 2C / Item SXVIC

OFF- 88 65 Blade \$84.95

V1 Quad

High-tech blade provides both super power and precise control. Utilizes advanced "Quad" technology. Two layers of "Energy Carbon" with very high energy transfer efficiency are used directly under the hard surface woods. Another two layers of soft carbon are used inside for adjusting the balance and performance. Lightweight, with extremely large sweet spot and unique feel allowing for very precise control, as well as superb power. Handle FL, ST / Wt 88 gms / Plies 5W, 2C, 2Z / Item SXV1Q

OFF+ 95 62 Blade \$109.95

Axelo

Named for "acceleration". Top layer is Kiso Hinoki wood, which provides a very high level of energy efficiency as well as a comfortable feel. Newly developed Energy Carbon is inserted under this layer, which also provides very high energy efficiency. Overall thickness is about 7.5mm, which makes this a very powerful blade. Amazing speed, but also very good for top-spin or passive blocking. Strong topspin from any distance is the most important advantage.

Handle FL, ST / Wt 92 gms / Plies 3W, 2C / Item SXAXE

OFF+ 97 59 Blade \$94.95

Strato

Newly developed Energy Carbon layers for a new level of performance and feel. Improved efficiency of energy transfer for more powerful strokes. Kiso Hinoki wood for the outer layers provides a very comfortable and mild feel. Improved control, and excellent for all-round play though it is very fast blade. Topspin is more stable than players expect, and it draws a very sharp trajectory with good control. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXSTR

OFF+ 97 60 Blade \$94.95

Ignito

The blade for passionate and aggressive table tennis. Ideal weapon for aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put a lot of pressure on the opponent. Light in weight, it needs less energy to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. Recommended for players migrating from all-wood offensive blades. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXIGN

OFF 94 61 Blade \$94.95

Xiom Blades Comparison Chart page 51

Aria

One of the most powerful all-wood 5-ply blades, recommended for skilled players. Excellent for all-round power play from close to mid to far distance from the table. Thick, medium soft wood outer layer provides a neutral feel and the second layer provides clear feel and optimal balance. Overall thickness is 6.4mm. Hard and fast, but able to catch the ball softly and release it with great control, especially when players attack with topspin.
Handle FL, ST / Wt 84 gms / Plies 5W / Item SXARI

OFF- 86 68 **Blade \$64.95**

Aria Lite

Lighter weight version of the Aria. Thickness is 5.8 mm for optimal stability and aggressive topspin strategy. Great for powerful close-to-table topspin. Weight is reduced and control is significantly enhanced. Allows for easy stroke right off the bounce, and for heavy and sharp topspin. Optimized performance for aggressive, close-to-table play. Recommended for aggressive topspin players and for the modern all-round strategic game.
Handle FL, ST / Wt 80 gms / Plies 5W / Item SXARL

OFF- 82 74 **Blade \$54.95**

Solo

Unique 7-ply blade developed for continuous topspin or all-round strategic play. Though it has a 7-ply construction it is soft, mild, balanced, and full of stability. The linear relationship between impact strength and the level of rebound provides ideal predictability with exceptional stability. Every technique of table tennis is so easy with Solo. Topspin is quite easy and full of rotation. Hard smash is very safe and full of speed. Block is secure and full of variation.
Handle FL, ST / Wt 91 gms / Plies 7W / Item SXSOL

OFF- 84 67 **Blade \$64.95**

Fuga

Recommended for aggressive players whose strategy is close-to-table top-spin. Everything is optimized for hitting the ball on the rise from the bounce. Hard wood was selected as the material for the thin outer layer for sharp and compact feel but also has overall flexibility and stability. Aggressive close-to-table top-spin is very secure and effective. Players will be able to dominate a fast game as well as every technique in table tennis with ease.
Handle FL, ST / Wt 81 gms / Plies 5W / Item SXFUG

ALL+ 81 74 **Blade \$54.95**

Hayabusa Z

The Xiom Hayabusa Z blade is constructed with a harmonious synergy of wood and composite material. Zephylium not only improves ball speed, but defines the vibration better. Sharp and clear vibrations of Hayabusa Z upgrades the control phase of your game. Spin loading was also eased by a new unique construction of layers. Wood-like flexibility of Hayabusa Z makes the ball contact feel very natural and solid. Well balanced power and top spin control of Z make the player keep up with a longer continuous rally. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZ

OFF- 88 65 **Blade \$164.95**

Hayabusa Zi

Hayabusa Zi is constructed with a creative synergy of wood and composite material. Zephylium in new construction makes Hayabusa Zi feel natural yet sharper than all wood blades. Leveraged spin loading and increased ball energy are made easily by the unique construction inside. Flexible, yet solid contact with the ball to generate heavy spins identifies Zi as the new European power-blade. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZI

OFF- 90 64 **Blade \$164.95**

Hayabusa Z+

The Hayabusa Z+ blade is constructed using a superb synergy of wood and composite material. Hayabusa Z+ has restructured wood and composite layers to create extra synergies, while maintaining the original woody character. Zephylium tuned with other layers provides sensibly sharp feel at ball contact. Unique feel properties improve the control phase of your game and eventually your opportunities to win. Powerful spin dynamics from the unique offensive construction of Z+ are intimidating to opponents. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZP

OFF 92 63 **Blade \$164.95**

Hayabusa ZX

Xiom's Hayabusa ZX is constructed with a powerful synergy of wood and composite material. Zephylium carbon character in the third layer makes Hayabusa ZX feel sensibly sharp, yet unbelievably softer than other composite blades. Flexibility was kept by the re-construction of the inside layers, regardless of non-wood material. This allows for continuous top spins with extra power. The control phase of your game improves along with your winning opportunities. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z/C / Item SXHZX

* Extra charge for each rubber priced over \$50
 Up to \$50 = no extra charge
 (\$50 - \$55) = \$10
 (\$55 - \$60) = \$15
 (\$60 - \$65) = \$20

HOW TO READ THE SHAKEHAND BLADES CHART

Turn to page 15 for Blade Selection Guide

2 PLY [Number of layers or plies] W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon

3 THICKNESS [Thickness of blade, shown in millimeters.]

Paddle Palace is happy to assemble new blades with rubber at no extra charge upon request. One rubber sheet will cover one side of a blade. Rubber comes in red and black. No returns on custom-made paddles.

4 BLADE MEASUREMENTS: LENGTH/WIDTH/HANDLE LENGTH
The length, height, and width of the blade and handle length are shown in centimeters.

5 WEIGHT: The average weight of each blade is indicated in grams. Individual weights may vary.

6 CLASS: OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. The rubber sheet that is applied to the blade will naturally affect the speed of the paddle.

7 SPEED: The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.

8 CONTROL: The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

ABOUT PENHOLD BLADES

THERE ARE two main styles of penhold blades: Chinese and Japanese. The Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than a shakehand handle. The Japanese-style penhold has a handle with a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more squarish in shape than the Chinese-style penhold, but it can vary from roundish to squarish, so check the image. Penhold-style blades are used by fewer than 10% of players in North America, although the popularity in Asia is 20% to

40%, with the younger players favoring the shakehand style.

All Chinese-style penhold blades (C) are suitable for putting either one or two rubbers on the blade. Some Japanese-style penhold blades are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

See the Blade Selection Guide on page 15 for information about choosing Blades and Combo Specials, and see page 61-63 for the Penhold Blades Comparison Chart. •

MORE PENHOLDS ON NEXT PAGE ►►

PENHOLD BLADES

Penhold Combo Specials are offered with either 1 or 2 rubber sheets. See page 15 for details.

Pro Alpha

Best Seller! This allround ALL+ blade is medium in weight, fast allround in speed, with 5 plies wood and two layers of carbokev (carbon/kevlar). Very little vibration and a fantastic huge sweet spot. Excellent blade for virtually all players. Handle C / Wt 82 / Plies 5W, 2C-K / Item PJPRA

ALL+ 82 76 Blade \$78.95

COMBO SPECIAL

\$135.95

Item XPJLICJ2 with 2 rubbers

Light-Carbo COMBO SPECIAL

Light-weight Japanese-style carbon penhold for two-sided play! Designed with a Japanese-style cork grip that is the same on both sides, so that rubber can be applied to either one side or two sides. Rounded head is shaped like most Chinese-style blades, but the grip has protrusions like the Japanese-style penhold. Two plies carbon, three plies wood. At 63 grams, the blade is light, and rated ALL+ for speed. Excellent choice for the experienced allround player looking for great versatility in a blade. Handle J-2 / Wt 75 gm / Plies 5W, 2C / Item PJLICJ

ALL+ 81 75 Blade \$70.95

COMBO SPECIAL

\$134.95

Item XPJISC2 with 2 rubbers

Iseki Carbon COMBO SPECIAL

Chinese-style Iseki Carbon penhold is an allround blade with 2 plies wood and 2 plies carbon. Very consistent bounce, stable well-balanced feel, and large sweet spot result in control and power for allround and offensive play. Medium weight + super performance. Handle C/Wt 84gm/Plies 5W, 2C / Item PJISC

ALL+ 80 79 Blade \$69.95

Titanium J Offense

Unique on the market! Outstanding Japanese-style blade with offensive wood with flecks of metal titanium between the wood plies. Great feel + touch for offensive play. Handle J-1 / Wt 70 gm / Plies 5W, 2T / Item PJTIOJ

OFF 95 58 Blade \$97.95

Fracta

Soft Feel and Special Touch for Allround and Offensive Game. Item PJFRA

ALL+ 79 76 Blade \$69.95

Stellan Bengtsson Balsa-C

Thick balsa core and 2 layers of carbon. This blade is 10mm thick and lightweight. Fast, great feeling and touch. Former World Champ Coach Stellan Bengtsson said, "My Balsa-C blade is very fast but I can still feel the ball. The ball gets a great arc and I can create good spin. Unlike some balsa blades, it feels solid - fast blocking with great control." Handle C / Wt 72 gms / Item PJBEC

OFF- 88 69 Blade \$93.95

Stellan Bengtsson Alpha

Chinese-style penhold version of the blade designed and used by former World Champion Stellan Bengtsson ("71"), world-renowned coach and highly respected player. This is an ALL+ allround blade, medium weight,

fast allround in speed, with 5 plies wood/2 layers of carbokev (carbon/kevlar). Very little vibration + huge sweet spot. Excellent for any player. Handle C / Wt 82 gms / Plies 5W, 2C / Item PJBEA

ALL+ 82 76 Blade \$78.95

Hinoki Carbon III

Chinese-style penhold blade combines the power and large sweet spot of carbon with the superior touch and feel of Hinoki cypress outer plies to create a fast, stable blade with the flexibility needed to generate superior ball rotation. Handle C / Wt 81 / Plies 3W, 2C / Item PJH3C

OFF 95 62 Blade \$69.95

COMBO SPECIAL COMBO SPECIAL

\$179.95

Item XPJHINJ1 with 1 rubber

Seiha Special Hinoki

Japanese-style penhold blade with one ply of Hinoki. Blade \$149.95 / Item PJHIN

OFF+ 98 56

Blade \$149.95

STIGA®
PENHOLD BLADES

See pages 16-20 for fuller descriptions of STIGA blades.

CARBONADO

Carbonado 90

Built with the same expert processes and quality materials as the original Carbonado 145 and 190, with one difference - the Carbonado 90 contains 64 gram per m2 carbon fiber, while the original Carbonado 145 and 190 contain 100 gram per m2 carbon fiber. Top quality, expert craftsmanship, and outstanding performance, along with increased control and wood feel! Carbon layers are at a 90 degree angle, providing flexural bendability which gives the blade a stiff feel with great stability and high speed. The longer, flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes. High personalized sweet spot. Handle C / Wt 90 / Plies 5W, 2C / Item PSC90

OFF+ 93 63 Blade \$169.95

Carbonado 145

Constructed with carbon layers in a 45 degree angle with torsional bendability, giving the blade more flexibility and stiffness. The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control. The Carbonado 145 with torsional bendability gives a wider Sweet Spot. Handle C / Wt 87 gm / Plies 5W,2C / Item PSC145

OFF+ 98 60 Blade \$199.95

Carbonado 190

Constructed with carbon layers in a 90 degree angle with flexural bendability, giving the blade a stiff feel with great stability and high speed. The longer and flatter trajectory makes it an excellent choice for players who want to dominate play with high speed strokes. The Carbonado 190 with flexural bendability gives a higher Sweet Spot. Handle C / Wt 87 gm / Plies 5W,2C / Item PSC145

OFF+ 98 60 Blade \$179.95

Eternity VPS V

Offensive 5-ply Chinese-style penhold blade has special temperature treated middle veneers (VPS) which reduce vibration and give great stability. Diamond Touch Technology provides surface with extra hardness and smooth finish. Developed in close collaboration with the Chinese National Team. Handle C / Wt 90 / Plies 5W / Item PSETRN

OFF 90 64 Blade \$89.95

Clipper Classic

PRO

Outstanding fast blade for powerful play. Clipper wood is used by many Asian world-class players. Handle C / Wt 88 gm / Plies 7W / Item PSLIN

OFF 88 68 Blade \$69.95

HOW TO READ THE PENHOLD CHART

- Handle** C=Chinese style. J-1 = Japanese style designed for one rubber. J-2 = Japanese style designed for either one or two rubbers. Ergo FL = Ergonomic.
- PLY** [Refers to number of layers or plies]
W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon
- THICKNESS** [Thickness of blade, shown in millimeters.]
- BLADE MEAS.: LENGTH / WIDTH**
The length [height] and width of the blade are shown in centimeters.
- WEIGHT:** The average weight of each blade is indicated in grams. Individual weights may vary.

- CLASS:** OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. Rubber sheets that are applied will affect the speed of the paddle.
- SPEED:** The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.
- CONTROL:** The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

Paddle Palace

TABLE TENNIS

ELEVATE YOUR GAME

PADDLE PALACE

PADDLE PALACE CLUB GRAND OPENING

As lifetime players and lovers of table tennis, Paddle Palace is thrilled open a modern, professional, full-time table tennis center. Paddle Palace Club opened on October 1, 2016!

The first thing visitors say when they walk into the club is, WOW!

Paddle Palace Club, a 7000 SF facility, features red ITTF sports flooring, 12 (or more) new ITTF approved tables, high 24-foot ceilings with new ITTF quality LED lighting, large restrooms, beautiful 800 SF viewing balcony, and a lounge area and catering kitchen. Plus PPC is open 7 days per week, 12 hours per day!

A very exciting thing Paddle Palace Club offers is full-time professional coaching! We are thrilled to bring in Mr. Jiwei Xia as the PPC full-time Head Coach. Jiwei is originally from China, was a member of the Beijing Men's Team, a scholarship student/player in Japan, a coach of the Japan National Team, a coach in China, and a coach in USA. PPC is also extremely fortunate to have part-time coaching from US National Team Coach Sean O'Neill, a 4-time US Champion and a 2-Time Olympian. In the first six weeks that Paddle Palace Club was open, besides Sean O'Neill and Jiwei Xia, we also had outstanding Visiting Pros Samson Dubina and Anastasiia Rybka come to PPC to conduct private lessons and clinics.

Paddle Palace Club currently offers three leagues and five classes per week. When we are fully underway with full-time coach Jiwei Xia and staff, we will offer daily coaching and classes, both private and group lessons, as well as more leagues, tournaments, clinics, and special events. A big priority at PPC is Junior Development. We are laying the groundwork for an expansion of after school programs and summer camps. PPC is a place where players at all levels and ages come to learn and have fun playing table tennis.

You are invited to visit Paddle Palace Club when you are in the Portland, Oregon, area. Please check our PPC website and Facebook page for more information and updates regarding coaching and programs. We'll see you on the table!

Ryan Hoarfrost of Paddle Palace plays Jiwei Xia at the PPC Grand Opening.

Coach Sean O'Neill and students at one of our PPC juniors classes.

OUR DOORS ARE OPEN!

PADDLE PALACE CLUB INFO:

 Facebook: facebook.com/paddlepalaceclub
 Phone: 503-549-6292
 Email: club@paddlepalace.com
 Address: 12230 SW Main St, Portland, OR 97223

- Open Full Time: 7 days a week, 12 hours a day
- ITTF Approved Sports Flooring
- 12-14 ITTF Approved Tables
- High 24-foot ceilings
- LED Lighting meets ITTF regulations
- Viewing balcony
- Lounge and catering kitchen
- Paddle Palace high-end Robot
- Professional Coaching
- Classes, Private Lessons, Clinics, Leagues, Drop-In Play, Corporate Events, Junior Programs

PPC Grand Opening Exhibition Match between Sean O'Neill and Jiwei Xia.

Samson Dubina (r) conducted lessons and clinics at PPC, then teamed up with Ryan Hoarfrost (l) to win Open Doubles at the 2016 STIGA Portland Open.

View from our balcony on a practice night.

Anastasiia Rybka, a popular Visiting Pro at PPC, conducted private lessons and a clinic.

Our staff gives a warm welcome to PPC members and guests.

Samson Dubina playing a league match with PPC member Jung Kim, a former member of the Korean Women's Team.

ABOUT RUBBER

How To Choose

Rubber sheets come as a square in a sealed package. The rubber is custom-assembled to a blade after the player makes their blade and rubber choices. Paddle Palace will assemble rubber to the blade as a free service upon request. One rubber sheet covers one side of a blade, so shakehand blades require two rubbers. ITTF regulations require red rubber on one side and black on the other.

4 Main Rubber Types – Smooth, Short Pips, Long Pips, and Anti-Topspin

■ **Smooth:** Most players use smooth rubber, also called “inverted” rubber. The surface is smooth with a layer of sponge underneath. Smooth rubber provides the most spin and is used by over 85% of tournament players. Hitters, loopers, all-around players and defensive players all use smooth inverted rubber.

■ **Short Pips**, or “pimpled” rubber, has a bumpy surface and usually has a layer of sponge underneath. It is used by players who do not execute a great deal of spin in their game. Some close-to-the-table hitters, all-around players, and defensive players use short pips. Short pips often provide more control for players who have difficulty playing against spin. “Hard rubber” is the term for short pips rubber with no sponge, used primarily for “Classic” or “Hardbat” play.

■ **Long Pips** rubber has extra-long pips that reverse the spin of the opponent. The unpredictability of the spin from long pips can give the long pips player an advantage over the opponent who has not learned to read the spin. It is difficult to play offensively with long pips, so most players who use long pips only use it on one side.

■ **Anti-Topspin** rubber has a smooth surface and does not generate much spin or speed. Anti rubber neutralizes the spin of the opponent. Most players who use anti, block with it on one side and use a different rubber on the other.

Choosing Rubber

■ **Speed vs. Spin:** With so many rubber sheets, how do you choose? The Paddle Palace Rubber Ratings are a good place to start. Look at the speed and spin ratings of the rubber and match one to your playing style. Offensive players who use topspin, drive, loop, and smash usually prefer rubber with a high speed rating, while defensive players who primarily use underspin, chop, push, and block usually prefer slower rubber. Loopers and choppers prefer rubber with a high spin rating. The faster or spinnier a rubber is, the harder it is to control. Rubber that is spinny also is more affected by the opponents’ spin.

■ **Sponge Thickness** affects the speed of the rubber. Thicker sponge = speed and somewhat more spin. Thinner sponge = more control. Thicker sponge adds weight to the paddle and gives a more cushioned feeling. Thinner sponge is lighter and gives a woodier feeling. Offensive players prefer 1.8 to 2.5mm. Allround players prefer 1.5 to 2.0mm. Defensive players prefer OX (no sponge) to 1.6mm. Loopers prefer thicker sponge. Choppers prefer thinner sponge. Developing players who need more control should choose a thinner sponge that fits their playing style.

Rubber Ratings

Rubbers are assigned ratings for Speed, Spin, & Control on a scale of 10 to 99. The higher the rating, the higher that attribute. Paddle Palace ratings use a universal scale which differs from the manufacturers’ ratings so that rubbers from all brands can be compared. Ratings are intended only as a tool for helping to select rubber. Naturally, speed, spin, and control are greatly affected by an individual player’s skill, strokes, playing style, and blade.

Each Paddle Palace catalog includes a comparison chart of all the rubbers so you can see them at a glance. Go to PaddlePalace.com and click on “Chart View” for an interactive comparison chart. You can view by categories or brands, and click on columns to numerically order the ratings for each attribute. We also have charts online for blades, tables, and paddles.

Is Your Rubber Legal?

The USATT and ITTF have several regulations to determine if a rubber sheet is legal to use in sanctioned competitions. To be legal, a rubber sheet must meet all of the following conditions:

Each side of the blade used for striking the ball must be covered with ITTF approved rubber, either pimpled rubber (long pips or short pips), or inverted rubber (smooth or anti-spin). A list of ITTF-Approved rubbers is published on the ITTF (International Table Tennis Federation) website at www.ittf.com. If a rubber is ITTF-Approved, then it is also approved for USATT sanctioned events.

The rubber on one side of the blade must be red and the other side must be black. If you only use one side of the blade for striking the ball, you do not need rubber on the other side. For example, some penhold players only hit with one side of the blade and they only put rubber on one side. In this case, the unused side must be colored the opposite color (either red or black) from the side with rubber. Many penhold players use a “paint sheet” on their blade to comply with this rule. However, if you hit the ball with the side that does not have rubber, you lose the point!

Rubber sheets must extend up to, but not beyond, the limits of the blade face, except that the part nearest the handle and gripped by the fingers may be left uncovered or covered with any material. The rubber (and all layers of the blade) must be continuous and of even thickness throughout. The surface must be matte (not shiny). Slight deviations from continuity of surface or uniformity of color due to accidental damage or wear may be allowed provided that they do not significantly change the characteristics of the surface.

Pimpled rubber (pips out) must have the pimples evenly distributed over its surface at a density of not less than 10 per cm² and not more than 30 per cm². Length of the pips must be uniform and no longer than 2mm.

Inverted (smooth) rubber may have a total thickness no more than 4mm, including sponge and rubber together. The rubber layer (not including sponge) may have a thickness no more than 2mm. There is no maximum thickness stipulated for the sponge thickness alone.

Rubber sheets may not have any physical, chemical or other treatment applied that affects the characteristics of the rubber or sponge. This means no more speed glue! Speed glue and elements such as baby oil that expand the sponge, or sticky solvents used on the surface of the rubber, change the characteristics of the rubber and make it illegal for use in USATT and ITTF sanctioned events.

Confused by all the regulations? Don’t be uncertain. If you buy rubber at **Paddle Palace** you know it is legal! Paddle Palace only carries USATT and ITTF approved rubbers.

Go to PaddlePalace.com to our News section for more info including:

- Official Rules of Table Tennis
- ITTF Racket Testing Video

The ITTF Racket Testing Video shows an official performing and explaining the step-by-step racket testing for an international competition. He checks for ITTF rubber approval then does the four tests for Flatness, Thickness, VOC gas, and Gloss.

Taking Care of Your Table Tennis Rubber

Table tennis rubber is one of the biggest investments players make in the sport. A new sheet of rubber, right out of the package, is beautiful and clean and fresh. As soon as you play with it – in no time at all – dirt, oil, dust, grime, nicks, and dead spots find their way onto your originally pristine rubber. Without proper cleaning and care, your rubber will get old quickly. So it is a good idea, both performance-wise and budget-wise, to do everything you can to prolong the life of your rubber.

Clean your rubber!

Dirty rubber will cause the surface to be less tacky and spinny. It will also play inconsistently due to the surface of some areas being different from others. This results in a lack of touch. When you see players breathe on the racket and wipe it with their hands, usually it is because they have noticed their rubber has a deader spot, or they are ensuring against it. Although in a pinch it is tempting to clean your rubber in this way, it is not recommended! The less you touch the surface of your rubber with your fingers, the longer it will last.

It is best to use a cleaner that is specifically made for table tennis rubber. People sometimes ask if it is ok to use household detergent. We advise against this, because these often have chemical elements that can leave unwanted residue on your rubber, can cause it to deteriorate it too quickly, and/or it can have solvents that will fail a racket test.

Using plain water is a safe option. However, water will not remove some oils from your rubber. It does not give the desired back-to-newer-condition that rubber cleaner does.

Spray one or two sprays of cleaner on one rubber, then wipe it with a sponge or lint-free cloth. Most kitchen sponges won't do because they leave bits of sponge on your rubber, and many towels are too abrasive or leave pieces of lint. For this reason, we recommend a table tennis sponge. Players here like the Nittaku Clean Sponge because it is good quality, small, dense, and has just the right amount of absorbency. It also comes in a clear soft plastic case that keeps it clean between uses. Many people like bigger, fluffier sponges like the Tibhar Combi Sponge. Use one side of a sponge to spread the cleaner on the rubber, and the other side to wipe off excess cleaner in long straight strokes.

When should you clean your rubber? Always clean it at the end of each playing session. Also clean it any time it seems dirty or you notice decreased or inconsistent performance.

Cover your rubber in plastic!

As soon as you open a new rubber sheet, when it is no longer covered in the plastic package, it starts to lose its newness. Even new and unused paddles will deteriorate over time. When rubber is covered in plastic, it stays new much longer. The plastic protects the rubber surface from air and elements, and keeps it from inadvertently rubbing up against anything, including your paddle case.

Our favorite plastic covering is adhesive rubber protectors, like the Nittaku Adhesive Rubber Protector, or Donic Formula Protection Sheets, or DHS Adhesive Rubber Protectors. We like adhesive protection sheets because they actually stick to the rubber. No air gets to the rubber and the sheet stays on. Protection sheets come in squares. You can cut it to fit the size of your rubber, or cut it slightly bigger than your rubber, or leave it in squares as long as it fits in your paddle case.

Keep your paddle in a case!

After you clean your rubber and cover it in plastic, then put it in a paddle case. Cases provide padding and protection, they keep the paddle out of direct sunlight, and they help keep it clean. The best case is one that is roomy enough to insert and remove your paddle without the rubber being rubbed against the case. We also recommend using a case with an opening that allows you to insert and remove the paddle by the handle so that it is not necessary to touch the rubber.

Keep your paddle at room temperature and away from sunlight. Do not leave rubber sheets or your paddle in a hot car.

Use edge tape!

Edge tape around the edge of your paddle makes a significant difference in the number of nicks and splits on your blade edge and it helps keep your rubber edges from chipping. Our pros at Paddle Palace prefer edge tape that covers some or all of the rubber in addition to the blade edge.

Eventually you will need to change your rubber or get a new paddle. But if you take care of it, your rubber will last a whole lot longer!

DONIC
TUNED TO PERFECTION

bluefire

MAX CATAPULT

MAX ARC

NEW

Bluefire Big Slam

For all those who loved and have never forgotten the sound of the old speed glue times, there is now the new Bluefire Big Slam. This extremely soft blue sponge produces more sound - it really rocks! Added to this is the high grade grippy and spiny top surface rubber of the Bluefire series: The perfect combination! Sponge 1.8, 2.0, Max Item: RDBMB

94 98 72 \$49.95

BLUEFIRE JP 01 TURBO • JP 01 O JP 02 O JP 03

Bluefire JP 01 TURBO

High end rubber sheet at highest level. Small changes to the structure of the sponge combined with a new pimple formation ensure that this Turbo has enhanced dynamic and spin qualities. Same sponge hardness as JP 01 (47.5°). Recommended for offensive players who value good control. Sponge 1.8, 2.0, Max. Item RDBLJT

97 98 67 \$49.95

Bluefire JP 01

A very consistent rubber which is suitable for most players. The quickest and hardest sponge version (47.5°), especially recommended for close to the table attacking players as well as those who prefer to play away from the table. Sponge 1.8, 2.0, Max. Item RDBLJ1

97 97 67 \$49.95

Available with DONIC Ovtcharov Original Senso Carbon blade as a PRO SPECIAL. See page 5

Bluefire JP 02

This rubber with open-pored sponge, in the medium hardness range (45°), produces a perfect combination of spin, speed and control. Ideally suited for attackers and powerful allround players who require all these qualities in one rubber. Sponge 1.8, 2.0, Max. Item RDBLJ2

95 97 68 \$49.95

Bluefire JP 03

Extremely grippy, taut, though elastic top surface rubber is combined with softer sponge (42.5°). Ensures outstanding feel with maximum control. Great for attackers as well as power-allround players who require maximum control to return the ball under pressure in any situation. Sponge 1.8, 2.0, Max. Item RDBLJ3

94 98 68 \$49.95

BLUEFIRE M 1 TURBO • M1 • M 2 • M 3

Available with DONIC Ovtcharov Carbonspeed blade as a PRO SPECIAL. See page 5

Bluefire M1 TURBO

Highest level high-end rubber sheet. Small changes to sponge structure plus new pips formation enhances dynamic and spin qualities. Top surface offers extra spin. Slightly harder sponge (50°). Great for powerful attackers and offensive players. Sponge 1.8, 2.0, Max Item RDBMT

98 98 66 \$49.95

Bluefire M1

With a medium hard sponge, very direct, highly dynamic, extremely spiny. Recommended for top players or players who practice a lot and prefer to use harder rubbers.

Sponge 1.8, 2.0, Max Item RDBM1

98 96 67 \$49.95

Bluefire M2

With its medium sponge, it combines the perfect balance between speed, catapult effect, and feel. In combination with fast, stiffer blades, it presents its optimum potential. Recommended for players who like to play with medium hard rubbers and attach high importance to spin and speed with optimum feeling. Sponge 1.8, 2.0, Max Item RDBM2

95 97 68 \$49.95

Bluefire M3

Combined with a soft, dynamic sponge. Perfect adjustment of the soft version has resulted in precise feel, excellent spin, and distinctive sound. Recommended for players who prefer soft rubbers with perfect control and good speed. Also for aggressive all-round players. Sponge 1.8, 2.0, Max Item RDBM3

93 98 70 \$49.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

MORE DONIC RUBBER ON NEXT PAGE ►►

ACUDA BLUE

Acuda Blue P1 Turbo

A packet of strength for the uncompromising attacker who expects optimum speed and power combined with an easy feel. An impressive result of the most modern technology, it offers greater speed while retaining its legendary control. All is made possible by a unique new pimple formation. The P1 Turbo is the most dynamic and hardest rubber from the Acuda series. Since the distance between the pimples is wider and the pimples themselves are smaller, the rubber actually plays softer.

Sponge 1.8, 2.0, Max Item: RDAPT

97 98 72 \$49.95

The new Acuda Blue rubber P1 Turbo, as well as P1, P2, P3, are a pleasure to play with, a rubber to be at ease with. It has the latest in sponge technology – the blue sponge with medium sized pores is softer than previous sponges, despite having a higher degree of hardness. Grippy smooth surface and new inner pimple geometry, extra space in between the inner longer pimples. Ball return is excellent, with maximum control and satisfying sound, and fine touch.

Acuda Blue P1

Medium hard, the dynamic attacking version for the offensive game.

Sponge 1.8, 2.0, Max Item: RDAP1

96 96 72 \$49.95

Acuda Blue P2

Medium soft, all-round attacking version, the gold standard of an all-round rubber.

Sponge 1.8, 2.0, Max Item: RDAP2

93 97 73 \$49.95

Acuda Blue P3

Super soft, excellent control with satisfying sound, for all-round players.

Sponge 1.8, 2.0, Max Item: RDAP3

91 98 74 \$49.95

ACUDA Formula High Spin

Acuda S1 Turbo

Spiny, accurate, top class rubber for performance attack. Built-in speed glue effect enhances speed and acceleration. A precision rubber for accuracy at high speeds. Despite its speed, it has perfect feel-like earlier speed glue days. Good length when playing fast loops. Sponge 1.8, 2.0, MAX. Item RDACT

97 96 67 \$46.95

Acuda S1

Close to or away from the table it is possible to play "loop-loop" as in the days of speed-glued rubbers. Despite a medium-hard sponge, ACUDA S1 is easily controllable and great feel, even in an awkward situation. Basic character: spin-focused, high precision fast rubber. Play style: aggressive, first ball attack, close to the table. Sponge 1.8, 2.0, MAX. Item RDACU

96 93 69 \$46.95

Acuda S2

Ideal for attacking players who have used soft rubbers with speed glue. Spin-optimized and fast, with medium-soft, large-pored sponge, and precise feel. You get speed and a uniquely loud sound. Great for close-to- and away from- the table for topspin/topspin duels. Great for power allrounders and attacking players. Sponge 1.8, 2.0, MAX. Item RDAC2

93 95 69 \$46.95

Acuda S3

Acuda S3 is spin-optimized, fast, paired with perfect sound. The very soft sponge increases feel and sound, and offers sufficient speed for powerful spin and a positive block game. Unique sound! Recommended for players with an allround style who require excellent control. Sponge 1.8, 2.0, MAX. Item RDAC3

90 97 70 \$46.95

Baracuda Big Slam

Now even more vicious: more sound & control due to softer sponge. Built-in speed glue effect produces fantastic spin. Ball leaves blade in a higher arc, with increased rotation to stabilize the flight and increase speed and placement even for top players. Topsheet minimizes abrasion for more playing hours. Sponge 1.8, 2.0, MAX. Item RDBAB

87 97 71 \$43.95

Baracuda

Built-in speed glue effect produces fantastic spin. When the ball leaves the blade, higher arc results in increased spin + rotation. The ball is stabilized, fast and accurate. Top rubber surface is more durable than similar rubbers and less prone to damage. Sponge 2.0, MAX. Item RDBAR

89 96 70 \$43.95

DESTO SERIES

Available with DONIC Bluefeeling blade as a PRO SPECIAL. See page 5

PRO

Desto F4

The perfect introduction to Formula DONIC, for ambitious players who want to change to rubbers with inbuilt speed glue effect. Great for those who seek clever placement and variation in their play and not just brute force. Provides an introduction to the fascination of FORMULA DONIC (inbuilt speed glue effect) - for the improving ambitious player. The soft sponge, with slightly reduced speed glue effect, combines the control of classic rubbers with the dynamic of the modern generation of rubbers.
Sponge 2.0, Max Item: RDDF4

70 87 82 \$36.95

**Desto F1 Plus**

First class update (FD3 Generation) of Donic's best selling, much loved Desto F1, highly regarded in Asia, with inbuilt speed glue effect. The slightly harder and speed optimized sponge ensures more dynamic play, while retaining its fine playing qualities of a slightly flatter ball arc, plus an increased playing life (Lifetime PLUS).

- Lifetime PLUS: The number of possible playing hours will be advanced by about 50%.
- Catapult PLUS: The catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions.
- Tension PLUS: Improved inner tension implies the feeling of even more "speed glue" energy.

Sponge 2.0, Max Item: RDDFP

90 88 73 \$39.95

These rubber sheets have DONIC FORMULA technology with strengthened inbuilt speed glue effect. Fast + spinny. DESTO F1 has even more speed. Improved durability.

Desto F3 Big Slam

Loud sound, without speed glue! Distinctive sound is permanently incorporated into BigSlam, which is softer but not slower than the popular DESTO F3. Amazing ball control with the same effect as optimum speed glue. For players who used speed glue and value sound and ball control qualities rather than maximum speed. Sponge 2.0, MAX. Item RDDFB

75 86 79 \$37.95

**Desto F1**

The fastest rubber from the DESTO Formula series! More speed and spin due to built-in speed glueing effect! A high-tech weapon for well-trained players of ability, who want more speed. Good sound, softness, plus speed and spin. Sponge 2.0, MAX. Item RDDF1

90 84 74 \$37.95

**Desto F2**

The bridge between F3 and F1, giving great control at high speed. F2 is soft, has a good feel and the full sound of speed glue. It produces more speed than traditional spin elastic rubber. Slower than F1.

Sponge 2.0, MAX. Item RDDF2

84 86 76 \$37.95

**Desto F3**

Built-in speed glue effect, with same speed but more control. Desto F3 is somewhat faster than a traditional spin elastic rubber. Soft, dynamic, w/excellent control, and great sound of speed glue. Speed glue must not be used. Sponge 2.0, MAX. Item RDDF3

76 87 78 \$37.95

Prices subject to change without notice

PERSSON

**JÖRGEN PERSSON:**

blade: DONIC Persson Seven
rubber: DONIC Bluefire JP01 Turbo / Bluefire M2

- 5 x World Champion
- 9 x European Champion

VARIO SERIES

**Vario Sound**

Unique sound system! Soft sponge and very elastic top surface rubber gives a distinctive loud sound when top-spinning. This rubber is the softest of the three Japanese Vario rubbers and is very spinny, with a high ball arc and fast topspin. Great for attack that combines stiff blade with soft rubbers, or for allround game of spin+control when striking the ball. Sponge 2.0, MAX. Item RDVAO

76 86 79 \$49.95

**Vario Big Slam**

Perfect feeling with fantastic sound! First Vario rubber to be made in Germany, with world-famous Formula Donic technology with built-in speed glue effect for the modern game. Soft, 35 degree sponge gives perfect feeling for controlled all around play, with a tendency to an offensive game. Ideal for spin/rotation players who prefer soft rubbers with a fantastic sound when hitting the ball. Sponge 2.0, Max. Item RDVAB

74 86 85 \$41.95

**Vario**

One of the best selling rubbers world-wide. Semi hard sponge, high grip, outstanding spin elasticity, high speed, good control. As its name indicates, this rubber is recommended for all modern playing strategies. Sponge 2.0, MAX. Item RDVAR

72 82 79 \$32.95

See PaddlePalace.com for latest SPECIALS

TRACTION SERIES

Traction MS Soft

Softer version, intended for spin/control. Great as a backhand rubber for top players. Compared to harder Traction MS Pro, MS Soft is somewhat more flexible. This rubber offers outstanding control, with a pleasant elasticity, yet it is very spinny. The sponge color is yellow. Sponge 2.1. Item RDTRS

88 96 71 \$56.95

Traction MS Pro

The harder alternative for top class players. Taut top rubber surface and relatively hard sponge guarantee steep penetration and length with all top spin strokes. Ideal for aggressive serves and returns due to grippy top surface. Sufficient control for more defensive strokes. Sponge color is pink. Sponge 2.1. Item RDTRP

90 95 70 \$66.95

Traction III

Chinese know-how + European quality! Mid-hard sponge, developed with newest Macro-Cell Technology, ensures maximum catapult and speed. Very spinny, elastic top sheet is specially designed for the the new plastic ball 40+. The perfect combination of rubber and sponge ensures optimum high performance rubber. Traction III is especially designed for offensive topspin players acting close to the table as well as from half distance. Sponge 2.1 Item: RDTR3

93 96 69 \$49.95

Traction II

DONIC's successor to MS Soft and MS Pro rubbers, a Chinese rubber specifically produced to fit European requirements. The result: Top acceleration and excellent bounce off the blade, and it is very spinny. Particularly suitable for topspin players who like to play close as well as away from the table. A perfect combination of a grippy top surface, ensuring speed, together with a medium hard, super-elastic sponge. Sponge 2.1 Item: RDTR2

92 96 69 \$52.95

Liga Plus

Combines the tried and tested Liga top sheet with a new more flexible sponge. This combination guarantees even more playing fun with relatively high grip and spin. The rubber with the perfect price-performance ratio.

Sponge 2.0 Item RDLIP

56 52 95 \$24.95

Slice 40

Smooth rubber with a sophisticated pips-in design, with a soft rubber surface tuned for defensive strategies. Quicker than the standard version Slice rubber. It offers more chop possibilities and more trickiness when defending with the 40 mm ball. Great control, but very good offensive characteristics for top-spin and counter attacks. Sponge 1.2, 1.5. Item RDSL1

52 79 90 \$42.95

SHORT PIPS RUBBER

Baxter F1-A

Fast short pips-out rubber. The typical softness of the sponge gives a superb feeling for the ball. Baxter F1-A masters ball control in slow rallies, yet gives explosive power for fast strokes. This is the result of the integrated molecular tension of Formula Donic technology. Sponge 2.0. Item RDBAF

91 62 77 \$44.95

LONG PIPS RUBBER

Piranja Tec

The technic defense long pips rubber for classical defenders. Formula DONIC technology was introduced into a long pimped rubber, resulting in an exceptional long pips rubber which is soft, very elastic, with excellent gripping qualities. Enables the player to impart far more backspin against topspin than has been possible with other current rubber technology. The pimples are faster but easier to control because of their inbuilt "speed glue" effect, ensuring more accurate blocking, counter attacking and variations of spin.

The best weapon for the technically gifted classic defender, particularly effective when paired with modern sponge rubber on the other side.

Sponge OX, 1.2. Item RDPIR

65 75 77 \$45.95

COPPA Formula High Speed

Coppa

For aggressive offensive play with topspin, counter topspin and block, & winning points with hard strokes. High-elastic, spinny surface with soft, dynamic sponge = outstanding control. One of Donic's best-selling rubbers. Used by J.O. Waldner and Jörgen Persson to win the World Champs titles in men's singles. Sponge 2.1, MAX. Item RDCOP

74 75 83 \$37.95

Coppa Tenero

Well liked soft-sponge version of the bestseller World Champion rubber, COPPA. Coppa Tenero has the same outstanding spin abilities. Due to its soft sponge it grants an absolute ball control with a slightly reduced speed. Excellent ball feeling. Sponge 2.1, MAX. Item RDCOT

74 88 79 \$44.95

Akkadi Taichi

Very grippy top surface for maximum spin, and rotation. Used by many world top ranked Asian players on forehand. Special black sponge makes this harder and stiffer than the red version. Red Akkadi Taichi is more elastic with even better bounce of the ball. This black version is recommended for the forehand. Great for serve and the first top spin in the rally. Sponge 1.5, 1.8, 2.0. Item RDAKK

78 89 77 \$29.95

ANTI TOPSPIN RUBBER

Alligator Anti

This is anti-loop rubber that is very troublesome for the opponent—it has a bite! The taut anti-spin top sheet and the hard sponge ensure that the ball is returned with speed, therefore putting the opponent under pressure. It enables using effective variations and dropping the ball short with good touch. The opponent's shots can be returned short or long with this effective weapon. Attack and counter-attack are easily possible. Sponge 1.0, 1.5. Item RDALL

59 86 \$39.95

SPEED CONTROL

Anti Classic

The elastic anti-spin top surface and the soft sponge make this the classic among anti-spin rubbers. Great for defenders who play with variety as well as allround players who attack close to the table. The outstanding control is apparent in all playing situations. Made in Japan. Sponge 1.5, 2.0. Item RDANC

42 92 \$44.95

SPEED CONTROL

TIBHAR®

THIS IS THE NEW AGE EVOLUTION RUBBER FROM TIBHAR

Evolution EL-S

High grip PRO top sheet, elastic medium-hard sponge, extremely high speed and maximum spin. The EL-S combines the enormous spin values of the MX-S with a completely new rubber surface and the power of the MX-P. The EL-S gives sensational touch despite enormous dynamism and high spin values. Excelling at topspin, the EL-S offers high rotation and power in all game situations. Sponge 1.7, 1.9, 2.1 Item: RTEVL

97 99 66 \$52.95

Evolution FX-S

High grip PRO top sheet, flexible medium sponge, medium-high speed and maximum spin. FX-S is the 'little brother' of the EL-S. The FX-S has the enormous spin values of MX-S and the power of the MX-P combined with a newly designed rubber surface. The sponge of the FX-S is softer than the sponge of the EL-S, so that the FX-S, in combination with a personalized pimple geometry, is more elastic which generates 'Flexible Spin'. The FX-S is much softer than MX-P and MX-S, but slightly harder than the FX-P. FX-S significantly distinguishes itself from the medium rubbers EL-P and EL-S. Sponge 1.7, 1.9, 2.1 Item: RTEVX

95 99 67 \$52.95

EVOLUTION MX-S: chosen by most TIBHAR Bundesliga and National Players!

Evolution MX-S

This spin-oriented dynamic version of the EVOLUTION rubber series has a much longer bat/ball contact time, thanks to specially developed pips geometry of the rubber surface. Players who use a more physical body action, with acceleration of arm and wrist, can activate the great potential of the MX-S. At the table or at half distance, this rubber realizes an even and consistent outstanding performance. Sponge 1.7, 1.9, 2.1 Item RTEVS

97 99 67 \$52.95

PRO Available with TIBHAR Force Pro blade as part of a blade/rubber PRO SPECIAL. See page 5

Evolution MX-P

Fastest, most dynamic of the EVOLUTION rubbers. Perfect adjustment of pips geometry gives more flexibility and energy on attack. Well-adapted to any game in terms of speed/spin. Ball/bat contact time is a little bit longer than the reference time, thus conferring much more sensation. Chosen by topspin players willing to feel the necessary pressure of their strokes at the table and at half distance. Sponge 1.7, 1.9, 2.1 Item RTEVM

98 96 67 \$52.95

Evolution EL-P

The most elastic rubber of the EVOLUTION series. EL-P with its medium sponge perfectly fits in between the harder MX-P and the softer FX-P. The selected pimple geometry of the elastic EL-P does not even come close to the other Evolution versions in terms of Spin and speed. Very precise and powerful strokes can be realised at half distance or at the table. Evolution EL-P: chosen by most of the Topspin players for whom the MX version is too hard and the FX version too soft, however putting the emphasis on rotation and power! Sponge 1.7, 1.9, 2.1 Item RTEVE

96 97 67 \$52.95

Evolution FX-P

The most flexible, soft version of the EVOLUTION rubber family, FX-P confers a lot of sensation and control in any situation. FX-P is a high-performing rubber proven by the enormous sound resulting from topspin strokes. The rubber surface is rich in spins and soft sponge with high catapult effect. You get the power necessary for a variable topspin game. The player who likes to attack near the table and is not willing to concede any ball while playing a risky game will enjoy the fine tuning of the rubber surface with the soft sponge. Sponge 1.7, 1.9, 2.1 Item RTEVF

94 98 68 \$52.95

NIMBUS DELTA & DELTA V FROM TIBHAR

ON SPECIAL \$44.95

The new Delta rubbers are the result of Tibhar's decision to produce a new generation of rubbers that focus the three fundamental characteristics of the highly successful NIMBUS rubber family: speed, playing sensation, and control. Compared to the original NIMBUS ranges, both of the new versions – Delta V and Delta S – have new pip orientation providing more dynamic and extreme catapult reaction to the ball.

Delta S

More feeling and playing sensation, for the player striving to play a spinner game. Sponge 1.8, 2.0, Max Item: RTNDS

88 90 72 \$49.95

Delta V

For speed -- the player's first choice if he privileges a fast game. Sponge 1.8, 2.0, Max Item: RTNDV

90 87 71 \$49.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

Prices subject to change without notice

MORE TIBHAR RUBBER ON NEXT PAGE ►►

Q SERIES

OPTRA TECHNOLOGY (Optimized Trajectory - Optimized Ball Curve) plus SPI ADVANCED (Speed Effect Inside) guarantees maximum performance from these excellent rubber sheets.

5Q VIP

Many years of research & development were required to conceive a revolutionary surface with a new rubber mixture allowing optimization of ball contact and energy transfer in any type of exchange. However, the most remarkable point about this rubber is the sponge. The combination of open pores with an extremely elastic, but still tensioned rubber mixture, results in an explosive sponge simultaneously conferring power and playing sensation in all your strokes. Sponge 1.9, 2.1. Item: RT5QV

97 97 67 \$54.95

5Q Sound

The proven and highly flexible rubber surface of the TIBHAR 5Q was reworked, and the 5Q Sound offers approximately 15% more spin, and a sound that is very close to the sound of speed glued rubber. Combined with a softer sponge, it confers an extraordinary playing sensation fitting perfectly into a topspin game. Controlled, spin-friendly strokes, without a big speed loss, are the main characteristics. Sponge 1.9, 2.1. Item RT5QS

93 97 68 \$54.95

5Q

The softer version of the Q-rubber-family, 5Q has a medium-hard sponge that transfers lots of rotation to the topspin and counter-topspin shots at mid-distance. The rubber surface is full of sensation, supported by the SPI-Advanced-Technology, and giving a wonderful sound and a good handling. The newly conceived rubber surface allows lots of rotation and provides the necessary security when playing the large pallet of spins. Sponge 1.9, 2.1 Item RT5Q

96 97 70 \$54.95

NIMBUS RUBBER

Nimbus Sound

Thanks to the new SPI technology, the playing sensation and sound are highly emphasized. The extremely soft sponge gives this rubber an extraordinary sound and high spin. It also gives players high potential for flexibility in stroke play. Especially designed for players who look for more than just speed in a rubber. You get extreme spin rotation which improves delivery of strong offensive stroke play. Sponge 2.0, MAX. Item RTNIO.

75 81 83 \$45.95

Nimbus Soft

The soft version of Nimbus will definitely impress players who like very soft offensive rubbers. Nimbus Soft with its 37.5 degree sponge hardness has exceedingly perceptive ball control and was developed in such a way that, even in extreme playing situations it provides a large margin for technical error. Sponge 2.0, MAX. Item RTNIS

79 78 84 \$45.95

Nimbus

No need for speed glue! NIMBUS -SPI includes TIBHAR's newly developed 'speedglue integrated configuration' giving you all the essential factors of speedglued rubber. Incredible spin-speed dynamic plus typical sound and ball contact feeling. With a 45 degree sponge hardness it is not only the hardest Nimbus rubber, but also the fastest. Sponge 2.0, Max. Item RTNIM.

84 78 79 \$45.95

SC0ZS

BERNADETTE SZOCS:
blade: TIBHAR Texo OFF
rubber: TIBHAR Evolution MX-P/Evolution EL-P
Romanian National Team

1Q SPECIAL

Thanks to SPI Technology Optimization, 1Q has the greatest speed glue effect of all, resulting in a fast, dynamic rubber with a high ball curve. Robust rubber surface enables an explosive game rich in spins. The basic principle of OPTRA technology (Optimized Trajectory - Optimized ball curve) was also improved for longer trajectories although ball curve is very high. Opponents will have a hard time controlling and returning the ball, putting you at the edge of your potential without passing your limits! Sponge 1.9, 2.1 Item RT1Q

98 90 69 \$58.95

QUANTUM FROM TIBHAR

The Quantum rubbers put the focus on catapult response at the precise moment of bat/ball contact. Quantum and Quantum S will also allow you to keep the dynamics of your strokes even after switching over to plastic balls. The composition of the sponge produces fantastic playing sensation and a totally regular ball trajectory. Your strokes will be loaded with just the right amount of energy thanks to the perfect pips/rubber partnership.

Quantum

Choose Quantum for a fast game. Sponge 1.8, 2.0, Max Item: RTQUA

96 95 72 \$56.95

Quantum S

Choose Quantum S for more control and sensation. Sponge 1.8, 2.0, Max Item: RTQUS

94 97 73 \$56.95

MORE SMOOTH RUBBER

AURUS

Aurus

For the ambitious player striving to play topspin strokes in any situation. Ultra soft rubber surface provides outstanding spin and playing sensation, allowing a secure and aggressive game. The integrated SPI (Speedglue-Effect-Inside) technology confers an extreme catapult reaction to the ball. Sponge 1.9, 2.1. Item RTAUR

96 89 70 \$44.95

Aurus Soft

Softer version of Aurus, offering better control with a high ball rebound. An energy-loaded rubber ideal for spin-rich strokes and secured topspins with good control. Very well adapted to each game level for an optimal performance. Sponge 1.9, 2.1. Item RTAUS

92 94 70 \$44.95

Aurus Sound

The softest version of Aurus produces a great sound and pure playing pleasure. Balanced playing sensation of the soft sponge and the elastic rubber surface were adapted to players who want to use energy-loaded strokes with greater accuracy. Sponge 1.9, 2.1. Item RTAUS

89 96 70 \$44.95

DRINKHALL

GENIUS RUBBER

Genius+ Optimum

A premium rubber with Optra and Speed Effect Inside Technologies. The pimple structure is a little bit different and smaller than that of Genius, thus conferring more rotation and an unbelievable dynamic for the topspin game.

Sponge 2.0, Max. Item RTGOP

94 91 70 \$46.95

Available with TIBHAR Stratus Power Wood blade as part of a professional blade/rubber PRO SPECIAL. See page 5

PRO

Genius+ Optimum Sound

Soft version of Genius+ Optimum. Extremely strong catapult effect paired with a light playing sensation. Energy-loaded sponge and rubber surface offers an optimal mixture of dynamism, playing sensation, sound and control. Sponge 1.8, 2.0, Max. Item RTGOS

91 93 71 \$46.95

Genius Sound

Softer and reworked version of Genius. Ideal for a very dynamic game, and allowing a brand new variety of strokes at mid-distance. The combination of newly developed sponge and spin-rich surface give you a rubber rich in sensation, with great sound, fast and full of spin. Sponge 1.8, 2.0, Max. Item RTGES

89 95 71 \$46.95

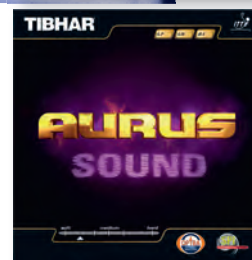

Genius

Rich in spin for the offensive game!

Obviously focused on spin--and more spin in this case also signifies more speed. More spin also means that the angle of the ball rebound is more upright, conferring a bow-formed ball curve, giving more precision to your strokes and putting your adversary under pressure. Sponge 1.8, 2.0, Max. Item RTGEN

91 87 73 \$46.95

SINUS RUBBERS

Sinus Alpha

Softer sponge than Sinus provides even better control. Not as fast as its harder twin but with unequalled precision on fast topspins and blocking balls. Balls have longer, evenly curved trajectory, for more pressure on the opponent. For players looking for dependability + acceleration. Sponge 2.0, Max. Item RTSIA

88 82 79 \$49.95

Sinus Sound

The "loud" variety of the SINUS series. Great sound with ball contact + amazing speed glue effect! Pronounced ball curve forgives mistakes. Integrated speed-glue-effect sponge is softer than Sinus or Sinus Alpha. You get great game sensation, optimal contact, and maximum spin + speed, even during slow topspin exchanges. Sponge 2.0, Max. Item RTSIS

83 84 78 \$49.95

Sinus

NO LIMITS! Developed for high-performance with harder sponge for powerful play. Unsurpassable, with tremendous ball speed. Great rotation during topspin, service and short exchanges. Also provides the ever popular fresh-glue sound. Sponge 2.0, Max. Item RTSIN

91 79 83 \$49.95

Rapid DTecS Soft
Dynamic Technology! SOFT version is even more advanced than the normal D.TecS rubber. The sound is fantastic and the speed is extreme, even without speed glue. Sponge Max. Item RTRADS

80 76 80 \$44.95

Rapid
Vladimir Samsonov helped develop this rubber. Soft sponge+very elastic rubber provide speed, spin and lots of ball feeling with optimum control. Sponge 1.8, 2.0, Max. Item RTRAP

69 58 91 \$35.95

Available with TIBHAR Defense Plus blade as part of a professional blade/ rubber PRO SPECIAL. See page 5

Super Defense 40
The best super defense! Developed expressly for defense with pimple geometry and extremely thin smooth rubber surface, plus special sponge. Definitive ball control allows you to cut the ball spin with extra spin. Item RTDEF. Sponge 0.5, 0.9, 1.3, 1.5, 1.7, 1.9.

62 92 83 \$46.95

Super Defense 40 Soft
The soft version of Super Defense 40 offers even better control with excellent spin variations. Effective for close-to-table strategies. Put your adversary under pressure, applying even more tactical force in Allround defensive play. Sponge 1.3, 1.6. Item RTDES

60 95 84 \$46.95

Legend
An extremely adhering surface, which when combined with a very soft sponge allows this high quality Chinese rubber to play more like its European counterparts. This then makes it the ideal rubber for players looking to produce much rotation and benefit from feeling. Sponge 2.0, MAX Item RTLEG

61 58 94 \$27.95

Volcano
A high quality Allround attacking rubber at a competitive price. But do not let the excellent price mislead you! Volcano is top-notch with its superior adhering surface and typical "characteristics" of rubbers made in Germany. Sponge 2.0, MAX. Item RTVOL

84 65 84 \$23.95

UNBEATABLE IN SPEED!

Nianmor
Perfect for the mid-distance offensive game, with topspin + counter topspin strokes. Mix of natural and synthetic caoutchouc in the sponge plus a new arrangement of pips, offers highest standards of Japanese rubber technology and gives you topspin with high catapult level + speed and rotation. Great for the new offensive game! Sponge 2.0, Max. Item RTNNM

97 86 71 \$51.95

LONG PIPS RUBBER

Grass Defense
The wave of the longest (and legal) Japanese long pips is similar to waving grass in the wind. The Defense version has a soft sponge and is easy to play with.

GRASS DEFENSE 1.0 or OX [no sponge] Item RTGRDE

54 61 86 \$41.95

Grass D.TecS
D.TecS effect integrated into classical long pips rubber. You get new ways to cut the ball and counter destabilizing strokes. Softer pips provide amazing control plus speed to destabilize the opponent with nervous aggressive shots during attacks. Sponge 1.2, 1.6, OX [no sponge]. Item RTGRDT

56 67 83 \$44.95

SHORT PIPS RUBBER

Speedy Soft
Broad, short pips for highest speed on counter attack or block at the table. Soft sponge gives maximum ball control, without affecting the popular "naps effect." Sponge 1.0, 1.5, 2.0. Item RTSSD

89 58 79 \$39.95

Speedy Soft D.TecS
D.TecS (Dynamic Technology with Samsonov) results in more speed and more danger for your opponent on block or counter balls! Sponge 1.5, 2.0. Item RTSSD

91 53 80 \$41.95

ANTI TOPSPIN RUBBER

Ellen Defense & Ellen Offense

ELLEN DEFENSE—Soft sponge for defense players sensitive to topspin. Has a distinct braking effect, to give unsurpassable ball control. Sponge 1.5, 2.0. Item RTELD

SPEED 51 CONTROL 89 \$29.95

ELLEN OFFENSE—Hard sponge for active anti game. Very strong against opponents' spin, w/ distinct braking effect, resulting in unsurpassable ball control. Sponge 1.5, 2.0. Item RTELO

SPEED 64 CONTROL 84 \$29.95

STIGA®

BUILDING WORLD CHAMPIONS SINCE 1944

GENESIS M & GENESIS S

The new STIGA Genesis combines the best of the major table tennis cultures into one rubber. It has a potent synthesis of Japanese/STIGA developed OCS technology, Swedish knowledge, and a new spin elastic top sheet made in China. Members of the Chinese and Swedish national teams collaborated to create the ultimate balance between east and west. The new top sheet is sustainably developed to increase the durability and lifetime of the rubber. The Oxygen Capsule System in the sponge generates an intense catapult effect and speed.

Genesis S

With soft sponge, provides a high sound with incredible spin.

Sponge 2.0, Max Item: RSGSS

94 98 68 \$44.95

Genesis M

With medium sponge, provides tremendous hitting power and maximum speed.

Sponge 2.0, Max Item: RSGSM

99 98 66 \$44.95

POLY BALL
OPTIMIZED

AIROC WITH OCS OXYGEN CAPSULE SYSTEM

ASTRONOMICAL AMOUNTS OF SPEED!

In Airoc Astro, STIGA has multiplied the amount of microscopic air bubbles (Oxygen Capsule System) in the sponge, creating more intense catapult effect and speed. The new topsheet transfers energy between sponge and ball, giving precision and power to every stroke. Developed with members of the Chinese National Team for the new Poly Ball.

Available with STIGA Clipper Classic blade as part of a blade/rubber PRO SPECIAL. See page 4

AIROC ASTRO S

Soft sponge version. Sponge 1.7, 1.9, 2.1 Item: RSAAS

96 98 67 \$54.95

AIROC M & AIROC S POWER IS IN THE AIR

STIGA Airoc utilizes STIGA's new OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the same spin/speed proportions they have always enjoyed. The key to this evolutionary advancement is the delicate balance between the size of the air pockets within the sponge and the elasticity of the top sheet. STIGA's engineers tested many different pips designs and tensions to achieve the perfect rubber for the attacking player. Poly Ball Optimized!

AIROC M

Medium sponge version. Airoc M increases the catapult effect without changing the spin ratio. Sponge 1.7, 1.9, 2.1. Item: RSARM

98 97 67 \$54.95

AIROC S

Soft sponge version. Airoc S is designed to expand shot selection and feel for control players. Sponge 1.7, 1.9, 2.1. Item: RSARS

Tactics: Devastate the Short Pips Attacker

The short pips smasher is often described as one of the scariest opponents in the game, unless you use the proper tactics! You give a weak push – bang! It gets smashed at 90mph! You give a weak loop – bang! It gets smashed at 90mph! You block the smash and it goes into the bottom of the net! Wow, how frustrating!

Before I jump into the tactics, I want to first give you an explanation on spin in regards to short pips. When both you and your opponent are using normal, grippy inverted rubber and rallying backspin to backspin, the rubber grabs the ball and changes the rotation in order to maintain backspin. The grippiness of the rubber is what allows the spin to maintain backspin back and forth. When playing against short pips, it is very important to know what type of rubber they are using, the grippiness of the pips, length of the pips, width of the pips, the thickness of the sponge (if any), and hardness of the sponge. Remember, if you and your opponent are both using grippy inverted rubber and you push at 50 rotations per second backspin, when he pushes back, his grippy rubber grabs the ball, changes the rotation, and gives 50 rotations per second backspin back to you. With short pips, the grippier the short pips and thicker the sponge, the more the short pips will act like inverted. Keep in mind that a thicker sponge gives more spin – hardbat (short pips without sponge) has very little spin, 1.3mm sponge has more spin, and 2.0mm sponge has even more spin. With the spinniest short pips available, your 50 rotations per second backspin push may actually come back with 45 rotations per second backspin. With the least grippy short pips on the market, your 50 rotations per second backspin push may actually come back with 20 rotations per second topspin! It also makes a difference of the skill level of your opponent. At the beginning of a match, you may not know your opponent, but you need to know his equipment. Ask to inspect his racket, (he is obligated to let you see it). Using the ball, test the friction and the bounce.

So how are you going to form tactics if there are so many different types of short pips out there? We are going to go middle-of-the-road, assuming that your opponent is using a somewhat grippy short pips with very thin sponge. For the sake of this article, when you push with 50 rotations per second backspin and your opponent pushes back, it comes back with 5 rotations per second backspin. We are also going to assume that this short pips smasher is playing with the shakehand grip and using both backhand and forehand fairly equally.

As I mentioned in the first paragraph, the short pips smasher might be scary to play against. When he smashes, most of the energy on the swing is transferred to ball speed instead of ball spin. This is why the ball often comes faster, flatter, and louder. With a thinner sponge and using the smash touch, your opponent hits deeper into the wood giving it a louder “crack” sound when making contact with the ball. No need to fear, it may look scary, but there are plenty of weaknesses. Lacking in spin, your opponent is not likely to be able to play nearly as consistently as you can. Instead of landing 80% of his attacks, maybe he will only land 70% of his attacks. Not only will he be less consistent on powerful attacks, but he must be more selective by picking and choosing only higher balls to attack. Instead of your focus being to keep every ball short, your focus should be on keeping the ball low. The short pips smasher will likely have a tough time with low pushes and low loops because the pips don't give much arc. With the 6” net in the way, it is difficult to smash a very low ball with pips.

TACTICS

- **#1 Adjustment:** If you can watch your opponent in a previous match, that is ideal. If not, you can begin your adjustments by inspecting his racket prior to the start of the match and testing to see how the ball reacts to his racket with counter driving, looping, and blocking during your two minute warmup. Realize that you will need to make adjustments to your stroke, positioning, and timing when playing against short pips.

- **#2 Angle:** The one main adjustment to your game will be racket angle. Typically it will need to be slightly more closed when pushing, slightly more closed when looping against the push, slightly more open when looping against the block, and slightly more open when blocking an attack. Why? Because there is typically less spin on the ball.

- **#3 Positioning and Timing:** This is the toughest part. Imagine that you loop first against a short pips block, should you stay close or back up slightly? It depends! Short pips give the most depth variation in table tennis when blocking. When popping the ball with a quick block, it will be a very fast deep block, and you will need to back up a bit. When relaxing the grip and deadening the block, it will be a very short, almost two-bounce type of block, and you will need to move forward. So how in the world do you know which one is coming? It is based on two main things, the quality of your opening loop (speed, spin, height, depth) and the action of your opponent's block. If you see him take a big backswing and forcefully approach the ball, you need to quickly step back while staying on your toes leaning forward. If you see him take no backswing and pull back or to the side at the point of contact, the block will likely be dead and very slow. Just remember, if you prefer to loop the ball at the top of the bounce, this will require much better in-and-out movement from you.

- **#3 Height:** As I mentioned earlier, I must remind you to keep the balls low. Keep it low! Keep it low! This is one of the main keys!

- **#4 Depth:** Deep pushes, blocks, and loops are most effective against a short pips smasher if they are in the last 6” of the table. Typically, short pips players stay very close to the table and are looking to smash down and forward on the ball. If the ball hits in the last 6” of your opponent's side, it will cause him/her to hit the ball on the rise, forcing him to hit it into the net.

- **#5 Percentages:** Without spin, your opponent will likely have lower percentage shots when attacking. How can you decrease the percentages even lower -- by hitting quality shots! By tricking him on the placement, giving quick pushes, and giving spinny lower deep loops you will be able to decrease his percentages. The next time a short pips smasher blasts every ball past you and starts off 6-0 in the first game, then just step back, take a deep breath, and ask yourself, “Is my ball quality good enough? Am I just returning the ball and allowing him to smash? Can I be trickier? Can I vary the depth of my short and long pushes better? Can I loop wider? Can I flip more to the transition point? Can I block lower?” You will often find that your opponent is ON FIRE because your ball is weak!

- **#6 Counterattack:** If your serve and serve return are very good quality, it is likely that your opponent will need to give a gentle attack when faced with your deep push, deep serve, or half-long serve. This is really an ideal time to counterattack. His opening likely has less spin, making this a much easier shot for you.

- **#7 Practice:** Before playing this guy in your next tournament, try to find a short pips player and to practice with for 20 minutes before your match. Make necessary adjustments in your game and you will dominate against all the short pips smashers.

Please Note:

There are 30 different distinct styles in table tennis. Keep in mind that some styles overlap. In order to get the full picture of beating a short pips smasher, I suggest that you also read my articles on beating combo players, beating the blockers, beating hardbat players, beating the penholders, beating girls, beating 1-sided players, and beating long pips blockers. When you read multiple tactics articles, you will begin to develop a fuller picture on the correct tactics that you should use.

Sole Distributor for JUIC

CHARISMA

NEW SPONGE TECHNOLOGY

999 Elite Charisma

Fantastic spin and greater speed than other tacky rubber sheets. The new Charisma catapult sponge combined with the classic tacky 999 Elite topsheet enhances both speed and spin characteristics. Retains original spin characteristics longer, and is lighter in weight. The JUIC 999 Elite rubbers are all 100% made in Japan. Sponge 1.8, 2.0, Max Item: RJ9EC

88 94 71 \$39.95

Nano Spin Charisma

The latest development of the special Juic technology that allows speedy play with tacky rubbers. New Charisma catapult sponge, developed for the 40+ plastic ball, is combined with the tacky

Nano Spin topsheet. Tacky rubbers tend to be most effective in their characteristics when serving or chopping, but Nano Spin Charisma also enables outstanding allround and offensive play both close to and far from the table. Sponge 1.8, 2.0, Max Item: RJNAC

93 95 70 \$49.95

Nano Spin II Charisma

More power and sound! The new Charisma catapult sponge, developed for the 40+ plastic ball, provides excellent spin and enhanced speed, bringing a new

dimension to the spin attack game. Sponge 1.8, 2.0, Max Item: RJNSC

96 96 70 \$49.95

JUIC Nano Spin II is available with the JUIC Pro Alpha blade as part of a professional blade/rubber PRO SPECIAL. See page 6

PRO

NANO Spin II

Juic's Nano Technology gives Nano Spin II more power and sound for your game. Excellent spin and enhanced speed brings a new dimension to the spin attack game. Sponge 1.8, 2.0, MAX. Item RJNS2

93 91 71 \$49.95

NANO SPIN RUBBERS

NANO Spin II+S

Same Nano Spin II topsheet as the original, but with a softer sponge for even greater ball spin. Features of this rubber are the ball grip, control, and width of sweet spot. You get an amazing feel as if the rubber is an extension of the hand. Sharp topspins and surprising services are a breeze. NanoSpinII+S is a great weapon for the player seeking the best ball feeling! Sponge 1.8, 2.0, MAX. Item RJNS5

91 93 71 \$49.95

NANO Spin +Flex

Grippy topsheet and soft-flexible tension sponge combine to give the ideal arc for topspin. Based on original Juic Nano Spin, the new +Flex version utilizes greater flexibility between sponge and topsheet to boost speed and spin. Light weight allows for higher swing speeds and greater ball rotation. Great for the player with allround-aggressive play. Sponge 1.8, 2.0, MAX. Item RJNAF

92 92 71 \$49.95

NANO Spin

Special JUIC Technology offers speedy play with tacky rubbers that tend to be most effective when serving or chopping, but Nano Spin enables outstanding allround and offensive play close to and far from the table. Spin, speed and control: If you need the best of them all, Nano Spin is the rubber you are looking for! Sponge 1.8, 2.0, MAX. Item RJNAS

90 90 72 \$49.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

SHORT PIPS RUBBER

PATISUMA

BEST PIPS-OUT RUBBER FOR SPIN AND BLOCK!!

NEW

Patisuma Top Speed

Powered by Top speed sponge. With the poly rule changes, pips-out players are seeking a rubber that has the great spin/rotation of the Patisuma rubber along with speed which creates difficulty for the opponent to block or counter attack. This rubber delivers!

Sponge 2.0, MAX Item: RJPTS

96 74 70 \$35.95

Patisuma II

Patisuma II is offered as a faster, quicker version with a harder sponge than Patisuma (but still relatively soft). High-friction material and perfect allocation of pips give superb spin. This is the rubber of choice for offensive-minded spin-minded pips players who want exceptional quickness, with outstanding <knuckle> ball when blocking, and powerful topspin ball and sharp smash. Sponge 2.0. Item RJPA2

91 74 73 \$35.95

SPINSPIEL RUBBERS

SpinSpiel

A very popular world-wide. Sticky adhesive on the smooth inverted topsheet gives explosive spin, power drives, and stable control. Very tacky and spinny. For power players who need lots of spin, w/ medium-fast speed. Sponge 1.0, 1.5, 2.0, MAX. Item RJSSP

69 86 81 \$35.95

SpinSpiel SV

Great for even more tacky spin. Softer sponge results in slower speed, more contro. Sponge 2.0, MAX. Item RJSSS

64 89 82 \$35.95

T+ RUBBER = POWER+SPIN

The general characteristics of the new plastic ball are 1) less deformation of the ball at impact, and 2) less spin. With the classic approach, the spin factor is mostly highlighted to the rubber sheet. But with the change of the ball material, it is now critical to analyze the spin factor with a total topsheet and sponge approach. This is what JUIC has done with the T+ rubber.

The Juic T+, with its elasticity and softness, withholds the new ball at the impact, and spins and stabilizes the stroke with the arch of the ball. This speedy-allround power rubber leads the way into the plastic ball table tennis of the future.

JUIC T+ FV

The "Flex Version" with softer sponge for the power spin player. Sponge 2.0, Max. Item: RJTFV

95 91 71 \$54.95

JUIC T+ PV

The "Power Version" with harder sponge for the power player. Sponge 2.0, Max. Item: RJTFV

97 89 71 \$54.95

ANTI TOPSPIN RUBBER

Neo Anti

Designed to kill the spin of your opponent's ball, and with its dead, slow speed gives incredible control. Elastic surface with special sponge gives added tricky spin when ball is hit hard. Sponge 1.0, 1.5, 2.0. Item RJNEO

57 87 \$36.95

RASANT RUBBER

Rasant Powergrip

The RASANT with the hardest sponge (50°) and the most power. Optimized rubber top-sheet keeps a safe ball contact also in strokes with difficult angles. Offensive rubber that generates a lot of power and rotation based on a fast swing. For ambitious and technical-educated players with a high level.

Sponge 1.7, 1.9, 2.1 Item: RARPG

98	97	67	\$52.95
----	----	----	---------

Rasant Turbo

Medium-hard sponge (47.5°) for massive offensive strokes. Perfect for the close-to-table and uncompromising player, due to the lower arc. The hardness of the rubber requires a fast swing to tap the full potential. Perfect choice for high-level players who play close-to-table with aggressive top-spins.

Sponge 1.7, 1.9, 2.1 Item: RARPS

96	96	68	\$52.95
----	----	----	---------

Rasant Grip

Medium-hard sponge (45°) and with the newest top-sheet technology. Optimized rubber top-sheet keeps a safe ball contact also in strokes and difficult angles. The medium-hard sponge is easy to handle. Players with a medium or fast swing can activate the enormous power of this rubber. Recommended for advanced and technical-educated top-spin players with a medium or high level.

Sponge 1.7, 1.9, 2.1 Item: RARGP

94	97	68	\$52.95
----	----	----	---------

Rasant

Medium-hard sponge (45°) with a focus on control and a high arc. Easy to handle within a short time. Perfect combination of the medium sponge and the top-sheet with maximum grip. The result is great control. The all-rounder: good control for your passive game, strong catapult-effect for powerful strokes. Suitable for spin-oriented players of all levels.

Sponge 1.7, 1.9, 2.1 Item: RARNT

93	94	70	\$52.95
----	----	----	---------

Rasant Powersponge

Soft sponge (40°) with great control and easy to handle. The spiny RASANT top-sheet offers endless options for the variable and controlled top-spin game. The soft sponge with strong catapult effect is perfect for players with slow or medium swing acceleration. Recommended for players with a high level who prefer softer rubbers, and as well as for players of lower and mid leagues that prefer control and enjoy their game.

Sponge 1.7, 1.9, 2.1 Item: RARPS

90	96	70	\$52.95
----	----	----	---------

Rasant Beat

Soft sponge (37.5°). The beatbox within the RASANT rubber series. The ultra-soft sponge increases the contact time between ball and rubber and evens minor technical mistakes in the stroke. Result: Fewer mistakes and better control. RASANT top-sheet for a lot of spin. Extreme sound and good control are the perfect package for players of all levels.

Sponge 1.7, 1.9, 2.1 Item: RARBE

88	98	70	\$52.95
----	----	----	---------

Impuls Powersponge

Spin and control! The coarse cellular sponge keeps the ball, extending the contact time and balancing inaccuracies. The plentiful power for offensive shots is the result of a strong catapult-effect and a tight top-sheet. For players of all levels who like a soft rubber for their precise and spinny game. Sponge 1.8, 2.0, 2.2. Item: RAIPP

82	86	76	\$47.95
----	----	----	---------

Impuls Speed

The SPEED version of the successful andro IMPULS series. It explodes with its extreme soft sponge at ball contact. It absorbs the speed while blocking your opponent's shots, but generates a lot of energy in your offensive game. The spiny TENSOR top-sheet makes this rubber a controllable offensive rubber for players of all levels. Sponge 1.8, 2.0, 2.2. Item: RAIPS

81	80	79	\$43.95
----	----	----	---------

Impuls

The basic version of the andro IMPULS series. Maximum control with a perfectly mixed TENSOR effect. The elastic and soft sponge balances inaccuracies during the ball contact and minimizes your mistakes. The energy and the speed potential are close together to avoid loss of control. Allround and easy to handle.

Sponge 1.5, 1.8, 2.1. Item: RAIPP

79	79	80	\$37.95
----	----	----	---------

The andro PLAXON rubber technology stands for target-oriented precision and has its origins in the modern laser industry. The new energy-loaded sponge provides an extreme direct and powerful arc. With PLAXON you are well-prepared for the new plastic ball 40+ and even have maximum control.

Plaxon 525

Maximum power and precision. The hard sponge with its high energy and power pushes the ball directly to the other side of the table. The unique top-sheet catapults the ball with a lot of rotation and power out of your racket. During the contact of rubber and ball, the new top-sheet increases the sweetspot for a perfect hit. For players of every level who play close to the table. Sponge 2.0, Max. Item: RAP52

98 86 71 \$43.95

Plaxon 450

Highly dynamic, speed and control of the ball. The compact medium-hard sponge generates a lot of power for your offensive game and shoots the ball directly to its target. The newly developed top-sheet assures a perfect contact of rubber and ball without any loss of energy or uncertainties. Minimize your mistakes and maximize your positive results. For players of every level. Sponge 2.0, Max. Item: RAP45

92 85 73 \$43.95

Plaxon 400

The highest level of precision: increased control and a precision which is only known by lasers. Continuous speed, even when hitting the ball not in the sweet-spot and soft top-spins caused by the softer medium sponge. Better control due to the new top-sheet's better contact of rubber and ball. The outstanding top-sheet avoids loss of energy as well as imprecision in every stroke. For players of lower and mid leagues. Sponge 2.0, Max. Item: RAP40

88 84 75 \$43.95

Plaxon 350

Extreme soft sponge for maximum fun and great control. Good feedback to blade and hand whilst hitting the ball due to improved combination of sponge and top-sheet. Great feeling and control. Perfect for players who prefer soft rubbers and want to improve their game to the plastic ball. For players of lower and mid leagues. Sponge 2.0, Max. Item: RAP35

Hexer+ SPECIAL

Connects a sponge with the advanced HEXER-technology and a speed-focused top-sheet geometry. The underlying pips geometry takes care of a flat, direct bounce and sends the ball to its target fast. You need less power to generate speed and spin. Time-saving. High dynamic, strong TENSOR-effect. For players who have a huge variety in their shots. Sponge 1.9, 2.1. Item: RAHEP

92 88 72 \$47.95

\$43.95

Hexer Powersponge SPECIAL

Great sound with the very soft sponge of the 4th TENSOR-generation. The soft sponge forgives smaller timing mistakes and increases your control. The underlying pimple geometry is made to give you as much spin as possible. Excellent ball response gives you additional control. For players of all levels who want speed and sound but don't want to lose control. Sponge 1.9, 2.1. Item: RAHPS

84 92 74 \$47.95

Hexer Duro

For players who want strong spin, speed and durability. Top-sheet of 100% natural rubber and a HEXER sponge (medium) gives you a huge choice of shots and makes a great alternative for all players. The grippy top-sheet provides you with a longer contact time of rubber and ball. More control, fewer mistakes, comfortable and economic. For players of all levels who are searching for a consistent and long-lasting rubber. Sponge 1.9, 2.1. Item: RAHDU

86 85 75 \$43.95

Backside 2.0 C

The ultimate choice for defenders. Extreme top-sheet for a controlled game with strong rotation and many variations. Extreme soft sponge to easily handle the offensive strokes of your opponents. For the defensive allrounder. Sponge 1.3, 1.5, 1.7, 1.9. Item: RABKC

66 92 80 \$37.95

SHORT PIPS

Hexer Pips Force

Pimples out with a medium-sponge with the modern HEXER technology. The shape of the pimples gives extra energy and force. The ball will leave the racket more aggressively and with more speed. You can adjust the specification with the 0/90 technology according to your game. Apply at 0 degrees for more speed, 90 degrees for more spin and control. Sponge 1.7, 1.9, 2.1 Item: RAXPF

92/91 64/65 76 \$47.95

Hexer Pips

Sponge of the 4th TENSOR generation combined with an innovative pimple geometry. You can adjust the specifications with the 0/90-technology according to your game: 0 degrees for more speed, 90 degrees for more spin and control. The direction of the pimples makes the difference. The rubber mixture of 100% natural rubber assures a long durability and consistent playing properties. High control values due to a soft sponge. Sponge 1.7, 1.9, 2.1 Item: RAXPI

87/86 64/65 78 \$47.95

Blowfish+

Compared to BLOWFISH, the BLOWFISH+ rubber is equipped with even more power. Hard sponge and an aggressive pimple geometry allow you to play nasty offensive shots. The TENSOR technology gives you a good feeling and a high control value. The medium sponge enables you to play precise blocks and hard shots. For the aggressive offense player. Sponge 1.8, 2.0, Max Item: RABLP

90 60 74 \$43.95

Blowfish

Unlike other traditional pips-out rubbers, Blowfish uses a TENSOR sponge and aggressive pimple arrangement. The advantages of the TENSOR sponge are huge: perfect feeling, strong catapult, high control, and huge variety. The rubber mixture as well as shape and arrangement of the pimples simply make the rubber a dangerous weapon. Soft, fast, and variable. Sponge 1.8, 2.0, Max Item: RABLF

88 62 76 \$43.95

LONG PIPS

Chaos

Long pips produce unpredictable strokes from every distance. The modern defensive player always focuses on an impressive response. Built-in TENSOR technology guarantees safety and backs up the defender in all positions. The ability to create surprisingly slice variations and dangerous, annoying strokes generates unpredictability for your opponent. Sponge OX, 1.2. Item: RACAO

DOUBLE HAPPINESS RUBBER: THE MARK OF TIMELESS QUALITY

Paddle Palace, Sole North American Distributor for DHS

DING NING

SMOOTH RUBBER

Hurricane 3-50 Mid

Hurricane 3-50 Soft

TWO VERSIONS! Mid version has slightly harder sponge than Soft version.

First choice for players who prefer to drive-loop and topspin. It integrates a tacky rubber with elastic sponge. The #50 sponge is receptive to ball contact, while the Hurricane 3 rubber friction grips and holds the ball. Such a combination provides the player with great ball feeling with every shot and suits players who want to exert a fast, stable loop attack. Sponge 2.1.

Hurricane 3-50 Mid - Item RCH35

90 92 73 \$29.95

Hurricane 3-50 Soft - Item RCH35S

89 93 73 \$29.95

Hurricane 3 NEO

Powerful "NEO" sponge and Hurricane 3 rubber with special glutinosity creates stable and high-speed arc to improve player's scoring ability. Hurricane 3 NEO has a high speed and low fast loop, changeable arc, and stronger spin. Sponge 2.15. Item RCH3N

88 92 72 \$21.95

Hurricane 2 NEO

With "NEO" sponge, Hurricane 2 NEO rubber breaks through the speed limit of water-based glue and keeps the speed, spin, and control of former versions. Quick attack, low arc, and strong low fast loop are the characteristics of Hurricane 2 NEO. Sponge 2.15. Item RCH2N

94 93 68 \$21.95

Hurricane 3

Designed for players who mainly adopt a controlled playing style or have relatively weak attack. This rubber can add strength and produce a long arc, which increases ball control and fast attack and loop drive close-to-table. Hurricane 3 has been the choice for almost all of the Chinese players since the 2000 Olympic Games. Exclusive Hurricane 3, with increased tackiness, enhances the spin of 40+ celluloid-free balls. Sponge 2.15. Item RCH3A

86 92 73 \$21.95

Hurricane 2

Hurricane 2, known for decisive blows with outstanding power, can create much higher speed and spin while maintaining stable control. In addition, it generates strong close-to-table offensive power to make the ball fly in a low arc, which frustrates opponent's defenses. Exclusive new Hurricane 2, with increased tackiness, enhances the spin of 40+ celluloid-free balls. Sponge 2.15. Item RCH2A

91 93 68 \$21.95

Hurricane 8 Mid

Hurricane 8 Hard

TWO VERSIONS! Hard version has slightly harder sponge than Mid version.

Hurricane 8 is a new generation of sticky-speed rubber. A new high-density sponge with 'Macro-Cell' and 'High-Elasticity Particle Osmosis' technology helps Hurricane 8 raise the elasticity by 15%. Hurricane 8 provides unique spin, changeable arc, and enhances shot speed significantly, giving a refreshing feeling for offensive players. Hurricane 8 is specially designed to enhance the spin and speed of 40+ celluloid-free balls. Sponge 2.15.

Hurricane 8 Mid - Item RCH8A

92 98 74 \$44.95

Hurricane 8 Hard - Item RCH8H

93 97 74 \$44.95

Skyline TG3 NEO

Continual quick loop performance stands out in Skyline 3 NEO. It has exquisite arc technology and acute ball feeling. The deformation of the "NEO" sponge on ball contact returns to original shape quickly to enhance loop attack. Skyline 3 NEO allows for outstanding style of continual, quick attack without any interspaces. Sponge 2.15. Item RCS3N

88 90 72 \$19.95

Skyline TG2 NEO

The technology in Skyline 2 NEO can create strong and changeful spin by both friction and deformation methods. The ball on impact can penetrate into "NEO" sponge, which transfers the energy to give players power to create more aggressive spin. Sponge 2.15. Item RCS2N

84 95 73 \$19.95

Skyline TG3

Fast, continual, and dense attack is characteristics of Skyline 3. It is made with a new technique to give quicker attacking power with loop drive. The deformation of the sponge on ball contact returns to original shape quickly to ensure continual loop attack. Then your opponent will be under continual attack pressure. Sponge 2.15. Item RCS3A

86 90 74 \$19.95

Skyline TG2

Spin or not, strong or weak, delicate changes are achieved in a flash. Skyline 2 rubber is made by new technique brings fresh experience of loop with quick attack. Colloid with acerbity and glutinosity combined has completely different friction from traditional Chinese rubbers and can create powerful and changeful spin. Power and speed come out continually owing to the unique pimple structure and elastic colloid so that changeful spin is more steady and threatening. Sponge 2.15. Item RCS2A

82 95 73 \$19.95

DING NING:

- Olympic Gold Medalist
- 2 x Women's World Champion 2015, 2011
- 3 x Team Champion 2016, 2014, 2012
- Highest World Rank #1

TinArc 5

Combines great feeling with powerful elastic shots and allows the ball to absorb and penetrate easily, ideal for quick loops with feel, ball handling near the net, or off-court play. The outstanding elastic rubber and thick pimple design enables strong power with minimal effort. Specially designed to enhance the speed of 40+ balls. Sponge 2.1. Item RCT15

96 94 74 \$39.95

TinArc 3

TinArc 3's pimple structure is specially designed for buffering and absorbing energy. This makes the rubber perform excellent in ball control and creates varying spin close to the table and generates power from mid to far distance. TinArc 3 incorporates 'Dual-Extreme' technology in rubber and sponge and is preferred by top players who play with loop and control drives. Sponge 2.1. Item RCT13

87 88 74 \$42.95

TinArc

TinArc incorporates 'Dual-Extreme' technology to create high elasticity in both rubber and sponge. This is combined with a specially designed 'speedy' pimple structure. Shot making has remarkable ball acceleration with a characteristic loud sound. The topsheet provides tackiness and spin when hitting or brushing the ball. Top players who are in pursuit of excellent power and speed, as well as spin will prefer TinArc rubber. Sponge 2.1. Item RCT1N

89 85 71 \$42.95

G555

High elastic rubber designed for backhand. New cementing agent with chemical technology and high elastic sponge. High strength and elasticity satisfies the backhand demands for high speed and strength on the medium-range and long-range distance from table, and makes up for the shortages of the backhand drive. Sponge 2.2 Item: RCG55

55 50 95 \$15.95

G888

The performance of high elasticity and stickiness strengthens spin and speed while strengthening power far from the table so that G888 can be suited for quick-attack with loop and also mediate the relationship of "spin" and "speed". Sponge 2.1 Item: RCG88

58 55 92 \$15.95

PF4

PF4 is suitable for quick-attack with loop drive. It has accompanied many players to win the world championships. Sponge 2.0. Item RCPF4

75 79 80 \$13.95

Skyline 3-60 Mid & Skyline 3-60 Soft

TWO VERSIONS! Mid version has slightly harder sponge than Soft version.

Skyline 3-60 is designed with a unique sponge-rubber combination. It absorbs and responds rapidly on ball contact, providing excellent elasticity and speed. Such dynamic properties make Skyline 3-60 ideal for continuous, high-strength loop attacks with minimal effort. Players will not be limited to one certain type of loop, but have the option of varied loop techniques. Skyline 3-60 is the optimal combination of classic sticky rubber and elastic sponge. Sponge 2.15.

Skyline 3-60 Mid - Item RCS36

86 95 70 \$29.95

Skyline 3-60 Soft - Item RCS36S

85 96 70 \$29.95

SHORT PIPS RUBBER

Dragonow

Special pimple design strengthens the friction of this rubber. It is easy for players to play 'small top-spin skill'. The rubber strengthens control of the ball route. Meanwhile, it has excellence of powerful rebound, high speed with smash sponge. Sponge 1.8, 2.0. Item RCDRA

88 78 74 \$12.95

Sharping

Sharping adopts special clear concave design on the top of pimples, which is contrary to traditional design. The special pimple strengthens friction and sensitivity when touching balls. The colloid has abundant elasticity with soft and flexible sponge. It can express power quickly and reduce wasted energy. This rubber makes the ball route monstrous and can control the point of fall. For offensive play. Sponge 1.8, 2.15. Item RCSHA

92 60 78 \$12.95

LONG PIPS RUBBER

C8

C8 has been called the "Chinese Magic Racket" or "Chinese T.T. Team Secret Weapon" by the world table tennis field. It makes a breaking effect due to its irregular swing of super long pimples. Sponge OX, 1.0, 1.2. Item RCC8A

54 66 76 \$13.95

C7

C7 rubber ensures the player can attack and defend at will. Sponge OX, 1.0, 1.2. Item RCC7A

52 64 78 \$13.95

PUSH YOUR LIMITS RAKZA X + RAKZA X SOFT

The latest of the popular, highly successful RAKZA series of Yasaka rubbers. The top sheet is made of natural rubber, using a new production method to result in a top surface with exceptional grip for phenomenal spin and speed. These qualities reduce the margin for error. The top sheet is then combined with "Power Sponge" – a faster sponge and high grip top sheet enables you to place the ball accurately with a high degree of success. Serves and short returns are both very sharp, similar to Rakza 7 and Rakza 9.

RAKZA X

Medium-hard sponge version.
Sponge 1.8, 2.0, Max Item: RYRAX

94 95 69 \$54.95

RAKZA X SOFT

Soft sponge version.
Sponge 2.0, Max Item: RYRXS

93 96 69 \$54.95

RAKZA 9

Improved speed characteristics! The surface rubber of Rakza 9 has a newly developed formula/rubber combination on surface rubber, and a new sponge made of a more homogenous material with larger pores. Rakza 9 is the fastest of Yasaka's Hybrid Energy rubbers and is suitable for technical offensive players, using both high speed and spin to win the point. Sponge 1.8, 2.0, Max Item RYRA9

95 93 69 \$52.95

RAKZA 7

Natural rubber gum in the top sheet dramatically improves grip and spin. Top sheet is combined with the new Power Sponge to produce Yasaka's newest Hybrid Energy rubber. When you hit the ball hard, the rubber grips the ball so you can place the ball accurately, both in direction and length. Serve and short returns are sharp and easy to control. Natural gum also improves durability. A winning combination! Sponge: 1.8,2.0,MAX Item: RYRAK

93 94 70 \$52.95

RAKZA 7 SOFT

Yasaka Rakza 7 Soft uses the same top sheet as Rakza 7, but with softer sponge, giving the rubber more sound and built-in speed glue effect plus increased control. After hitting a topspin shot, the curve of the ball is slightly higher, giving little bit bigger margins in the game. In the short return play, the ball feel is better. Sponge: 1.8,2.0,MAX Item: RYRAS

88 96 71 \$52.95

MA LIN:

blade: YASAKA Ma Lin Carbon
rubber: YASAKA Rakza 7
Olympic Gold Medalist in Singles,
Doubles, and Team

MA LIN

Rising Dragon

YASAKA has combined the advantages of the Chinese sticky surface with the outstanding qualities of speed and touch from Japanese rubber technology. This highly sticky top sheet creates strong spin with hard tension sponge, working in perfect synergy as it creates outstanding power. The serve and short cut returns are very sharp and easy to control. Sponge 2.0, Max Item: RYRID

89 97 72 \$42.95

Mark V is available with YASAKA Ma Lin Extra Offensive blade as part of a professional blade/rubber PRO SPECIAL combination. See page 6

Mark V PRO

Many championships have been won with Mark V, which represents the absolute highest quality of rubber production. For the aggressive player who masters the modern, fast technique close to the table, Mark V gives unique possibilities. Sponge: 1.0, 1.5, 1.8, 2.0, MAX. Item: RYMKV

79 79 80 \$37.95

Mark V M2

Made for Maximum Speed. Based on the incomparable technical features of Mark V, but with slightly harder sponge. Gives the ball sharp spin and ultimate speed. Sponge: 2.0, MAX. Item: RYMKM

92 74 77 \$39.95

RUBBER RATINGS KEY

SPEED SPIN CONTROL PRICE

YASAKA COMPARISON CHART pages 100-101

Mark V XS

Newest rubber sheet from Yasaka: Mark V XS. This highest quality rubber is ideal for the aggressive player who masters the modern, fast technique close to the table. Sponge: 2.0, MAX. Item: RYMXX

81 79 79 \$45.95

Mark V GPS

Same quality surface rubber as Mark V with softer sponge, giving more "feeling" and "control". Sponge: 1.8, 2.0, MAX. Item: RYMKG

69 84 82 \$37.95

Mark V 30

Double glue absorption, improved spring capacity due to maintaining the sponge hardness levels at 30 degrees. Sponge: 2.0, MAX. Item: RYMK3

68 82 83 \$37.95

Mark V HPS & Mark V HPS Soft

Outstanding top-of-the-range fast rubber has all the characteristics required for advanced offensive play. The HPS (Hybrid Power Sponge) technology is the result of the newest advances in Japanese rubber technology. It provides improved dynamics in the sponge, and more speed and spin, without higher weight.

MARK V HPS has a medium-hard sponge, suitable for aggressive play close to the table. Sponge: 2.0, MAX. Item RYMKH

83 83 77 \$47.95

Mark V HPS SOFT has a slightly softer sponge than the regular Mark V HPS, suitable for offensive allround players. Sponge: 2.0, MAX. Item RYMKS

81 89 76 \$47.95

V-Stage

For players looking for powerful spin and speed. V-Stage is produced by simultaneously vulcanizing high-friction coefficient rubber to improve spring and high elasticity. Sponge: 2.0, MAX. Item: RYVST

89 85 74 \$52.95

X-Tend HS The Spin Machine!

No speed glue needed! STS (Spin-Tension-System) technology by Yasaka gives 2/3 of the tension energy to spin and 1/3 to speed. Topsheet and sponge deliver high-power speed with easy handling-- just what the players asked for. Do NOT apply speed glue, as it will destroy the rubber. Xtend HS is made to be fast without speed glue. Sponge: 2.0, MAX. Item: RYXTH

84 83 77 \$43.95

X-Tend

The Spin Machine! No speed glue needed! "Tension increase" gives you 2/3 more spin and 50% more speed. Sponge: 2.0, MAX. Item: RYXTE

82 85 77 \$43.95

PIPS & ANTI RUBBERS

Rakza PO [Short Pips]

The newly developed top sheet uses mainly natural rubber gum. This improves the level of grip and the power of spin drastically. The top sheet is combined with the new "Power Sponge". The top sheet and "Power Sponge" work in perfect synergy, producing the Hybrid Energy rubber. This short pimples out rubber has increased spin capacity, due to the shape of the pimples geometry and the use of the natural gum in the top sheet. Sponge 2.0, Max. Item: RYRPO

93 70 78 \$52.95

Yasaka A-1 [Short Pips]

Short pips rubber with no sponge. Approved for hardbat play by the USATT Hardbat Advisory Committee. Has a cloth backing for easy glue application. This is a favorite rubber for US classic hardbat players and defensive players. Works well with defensive blades like the Hunter Hawk. Sponge: OX. Item: RYA1

40 40 98 \$19.95

Phantom Infinity [Long Pips]

Regulation length long soft pips: Deadly weapon for any defensive player. Neutralize opponent's spin and use the effect of the spin to benefit your own returns. Design of the top of the pips aid attack.

0011 Sponge: 1.0. Item: RYPH1
49 58 88 \$34.95

0012 No sponge. Item: RYPH2
42 65 88 \$32.95

Anti Power [Anti]

Neutralizes spin, thanks to low friction and the moderating qualities of the outer rubber. Anti Power is best used by offensive combination players, since the sponge is fast compared to other anti rubber. Sponge: 2.0. Item: RYANT

SPEED 61 CONTROL 85 \$32.95

XIOM COMPARISON CHART pages 100-101

OMEGA V SERIES

Made with Dynamic Friction Technology and developed for the new plastic ball. Performance parameters of the plastic vary from the celluloid, which mostly impacts professional players. Dynamic Friction Technology originally adopted from the physics of snow tires makes the unprecedented level of friction for Omega V. Dynamic Friction of the table tennis is different from the normal friction because the rubber in the fast movement should make the proper friction against the also fast moving balls, without the decline of repulsive power. Dynamic Friction rubber grabs the slippery plastic balls far more firm and solid at contact. Control of your ball with Dynamic Friction is simply beyond your expectation. And as a consequence, it increases the spin rotation dramatically - at the same speed. Thanks to the higher friction you can also catch the ball at the extreme angle, which is truly a professional advantage.

XIOM Omega V Pro Rubber is available with the XIOM Stradivarius Shakehand or Penhold blade as part of a blade/rubber PRO SPECIAL. See page 6

----	----	----	---------

VEGA DF SERIES

Evolved from snow tire technology, a Dynamic Friction rubber with higher friction rate in movement against the ball. Dynamic Friction is a result of balancing chemical composition with physical structure for the specific purpose, differing from static friction. New plastic balls are more difficult to catch with the rubber for spin because the harder plastic shell is more slippery, especially when the ball hits the rubber with high speed at extreme angle. VEGA Dynamic Friction series improved the grip on plastic ball while keeping the legacy of XIOM's popular rubber formula.

Vega Asia DF

- Hard sponge version of Vega DF
 - Firm and solid grip on plastic ball
 - Improved Spin Dynamic with plastic ball
- Sponge 1.8, 2.0, Max Item: RXVDA

SIGMA II SERIES

Sigma II Pro

- IMB Generation for modern close-to-table style
 - Winning trajectory with extra-energized spin
 - Hyper dynamics of dominating Carbo Sponge
- The rubber of choice for close to the table play! Designed to deliver higher energy on the spinning ball. The ball winds up quicker and aggressively lower on the opponent's court while starting out comfortably higher. Very exact and hyper-spinning ball trajectory is made by the combination of new IMB technology and the world dominating black Carbo Sponge. Sponge 2.0, Max Item: RXS2P

97	96	67	\$52.95
----	----	----	---------

Sigma II Euro

- Pro-made Tour version of IMB generation
 - Winning trajectory with extra-energized spin
 - Hyper dynamics of the dominating Carbo Sponge
- Tour professional version of Internal Mechanical Boost (IMB) makes you control the amount of spin easier and better. Sigma II Euro also shapes ball trajectory easier than any other rubbers. High level players will realize well-controlled short balls and accurate ball path. IMB technology and black Carbo Sponge give more energy on the spin; ball winds up quickly and aggressively lower at the opponent, while it can start comfortably higher. Sponge 2.0, Max Item: RXS2U

95	98	67	\$52.95
----	----	----	---------

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

VEGA SERIES

Vega Japan

- True Innovation - Hyper Elasto IMB technology
- Super Dynamics - Engined by Black Carbo Sponge
- New Era, New Shape - Vega's "Win Fit" design

Internal Mechanic Boost of Hyper Elasto IMB generation opens the new opportunity for Vega users. Tuned to make more spin energy easier, Vega Japan makes the power-charged spin and allows for flexible control. Ball capturing at the contact is very solid, yet also superbly comfortable. Sponge 2.0, Max. Item: RXVGG

90 90 72 \$44.95

Vega China

- Max built-in tension by German Tensor Bios technology
- Combination of sticky surface top sheet with a softened hard sponge. Composed with world renowned Tensor Bios technology, to reach the proper elasticity. Sponge Max. Item: RXVGC

85 94 72 \$44.95

Vega Asia

- Spin Weapon with upgraded speed
 - Higher success rate with "big window" over the net
 - Black Carbo sponge generates more power
- Unique "Carbo Sponge" provides the most energy efficiency. The pips on Vega Asia have a special structure to create more trampoline effect and feeling at impact. It also has a bigger safe zone (window) above the net, for topspin attack. Sponge 2.0, Max. Item: RXVGA

90 88 73 \$39.95

Vega Pro

- Professional Spin Weapon
 - Innovatively enlarged attack window over the net
 - New Black Carbo sponge to generate more power
- Extreme topspin performance is realized by the mixture of Hyper-Elasto and Carbo Sponge technologies. Pips are densely arranged for a harder, more direct feel. The ball draws a higher, sharply curved arc that enlarges the 'safe zone' above the net. Precise response lets you lead the game. Sponge 2.0, Max. Item: RXVGP

88 90 73 \$41.95

XIOM Vega Europe Rubber is available with the XIOM Allround S blade as part of a professional blade/rubber PRO SPECIAL. See page 6

PRO

Vega Europe

- Safer Spin Attack with upgraded control
 - More chances + fewer misshots with "big window"
 - Black Carbo sponge generates more power
- Softest of the Vega series, for an exciting feel, plus the same level of energy efficiency as the harder Vega Pro and Asia. Special sponge and top layer give great control, and spin performance. Perfect for modern European play style, with controlled topspin. Sponge 1.8, 2.0, Max. Item: RXVGU.

86 92 73 \$39.95

Vega Elite

- Super balance for all levels of players
 - Spin, speed, control, and softness
 - Dynamic sound for pure pleasure of table tennis
- Soft version of the Vega series provides super balance for all levels of players. It provides great stability and dynamic sound for pure pleasure of table tennis. The ball from Vega Elite draws sharper and higher ball-trajectory to create larger safe zone (BIG WINDOW) above the net. Sponge 2.0, Max. Item: RXVGE

84 84 76 \$39.95

OMEGA IV SERIES

Omega IV Asia

- For dynamic power-spin attackers
- Powered by extra-hard new Carbo sponge
- Extra spin by new built-in tension

Extreme power with extra spins in deadly aggression. Grippy top sheet with hard Carbo Sponge creates amazing power-spin performance. Omega IV Asia returns the ball aggressively and low with extra spin. Extra precision and superb consistency from solid construction benefits high-speed players. Sponge 2.0, Max. Item: RXO4A

94 90 71 \$49.95

Omega IV Pro

- Extra playing properties by new carbo sponge
- Additional clicking feel for sharper control
- Extra spins with new chemical composition

Based on 'Hyper Elasto' technology, the top sheet matched with an upgraded Carbo Sponge offers extraordinary playing properties. New chemical composition plus built-in tension makes the ball trajectory higher for more spin. You can return the ball fiercely after the bounce. Sponge 2.0, Max. Item: RXO4P

92 92 71 \$49.95

Omega IV Euro

- For technical style keen on balanced aggression
- Deeper and longer ball dragging at the surface
- Extra power spins from high-density carbo sponge
- Newly integrated dynamics for reliable control

Integrated dynamics + perfect hardness = reliable control. Solid ball-capturing at the surface and perfectly matching sponge hardness promote extra spins and control at contact. Aggressive launch and clicking sensation at ball contact reflects maximized built-in tension, simulating full speed-glue effect. Sponge 2.0, Max. Item: RXO4U

90 94 71 \$49.95

Omega IV Elite

- Designed for modern allround pros
- Longer ball dragging at contact with softer feel
- Very precise and consistent control
- Higher ball trajectory with extra spin performance

Balanced towards full "speed-glue" feel. New top sheet matched with upgraded soft Carbo Sponge offers amazing spin and feel. Bigger window over the net with high spinning trajectory. Extra spin, precision, and consistency benefit modern allround pros. Sponge 2.0, Max. Item: RXO4E

86 96 71 \$49.95

Musa III

- Hyper Elasto for increased probability of success
- Close to the table control
- Creative and tactical ball-trajectories

MUSA III, newly tuned from HYPER ELASTO enables accurate service, controlled service return, tactical pre-attack rally, and solid close-to-table topspin made mainstream by the example of Chinese players. Innovative, controllable accuracy and the ball-clicking dynamics of the rubber formula allow creative tactical ball-trajectories around the table. Sponge Max Item: RXMU3

81 85 77 \$32.95

SHORT PIPS

Vega SPO

- * Hyper Elasto Generation Tensor Pimple Out
- * Scienced for Close-To-Net Attack and Blocking
- * Focused on Real Winning Probability

Neutralizes opponent's spin and provides extremely aggressive speed for close-to-net play. Pips made by Hyper Elasto Tensor technology, for more accurate and powerful dynamics against opponent's spin. Chemically designed to maximize the aggressiveness with easier control; combined with special pips geometry. Parabolic trajectory increases success. Sponge 2.0, MAX Item: RXVSP

86 70 72 \$39.95

Dr. Neubauer

ANTI TOPSPIN RUBBER

Power Attack

The first offensive frictionless Anti-Spin rubber! This new type of anti rubber not only provides the effectiveness of a completely frictionless surface but also allows for attacking possibilities. Produces good spin reversal while blocking against topspin although it does not quite reach the disruptive effect of Dr Neubauer anti rubbers BUFFALO or BISON. For service return the frictionless surface neutralizes any spin. Different from other Anti-Spin rubbers with frictionless surface, it enables putting pressure on your opponent through active counter-attacking, allowing for both disruptive blocking and active counter-attacking and hitting.

Sponge 1.5, 1.8, 2.0 Item: RUPAK

SPEED **52** CONTROL **89** \$49.95

NEW

Bison

Enhanced effectiveness for blocking close-to-table. As effective as the old frictionless long pips for excellent spin reversal while blocking topspin shots with a lot of rotation. Very low speed, and sets a new standard in the field of frictionless Anti-Spin rubbers due to its ability to return the ball very short over the net. Can be used on classic "combination" blades as well as on fast, stiff offensive blades, thanks to absorption power of its dampening sponge that will literally "kill" the speed of the oncoming ball. Even "power loops" (high speed, little spin) can be returned easily. Great control and maximum spin reversal even on fast blades. Sponge 1.2, 1.5, 1.8 Item: RUBSN

SPEED **32** CONTROL **97** \$54.95

Buffalo

Fantastic for blocking close-to-table. Combines the strengths of all existing Anti-Spin rubbers, setting new benchmarks for control and disruption. Excellent spin reversal against topspin shots with a lot of rotation thanks to its frictionless surface. Produces deceptive attacking shots. The most effective technique is aggressive pushing on chopped balls, but counter-attacking against float balls will also put pressure on your opponent. Sponge 1.2, 1.5, 1.8 Item: RUBUF

SPEED **34** CONTROL **96** \$54.95

New Gorilla

Gorilla with a slow dampening sponge = better control, while producing good spin reversal in blocking spiny topspin balls. The 1.2mm sponge is the slowest and most effective for short close-to-table blocking, and 1.5 and 1.8mm sponge give a decisive disruptive effect for blocking but with better attack with aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8 (PINK color). Item RUGON

SPEED **42** CONTROL **92** \$54.95

Gorilla

- Outstanding playing characteristics for blocking/chopping.
- Excellent disruptive effect with good control.
- Enables versatile game using aggressive pushing + lifting.

Highly effective blocking against strong topspin. Offers disruptive effect as the ball can be returned short or long over the net, with the ball staying low after the bounce, making it hard for an opponent to keep looping the ball. Good control on serve return, either passively or aggressively. Best effect with 0.6mm sponge. Sponge 0.6, 1.0 (CREAM color) Item RUGOR

SPEED **49** CONTROL **90** \$54.95

Grizzly ABS Sponge

Slower than original version, topsheet produces good spin reversal on topspin balls with a lot of rotation. Ball bounces very low on the other side of the table. A.B.S. has a dampening effect to reduce rubber speed but with remarkable control. Sponge 1.2, 1.5, 1.8 (PEACH color). Item RUGRN

• Please note: Packaging for original and new versions of Grizzly are the same. The sponges are different colors - original sponge is white, new A.B.S. sponge is peach.

SPEED **44** CONTROL **91** \$54.95

Grizzly

Innovative anti-spin rubber, adapted to an allround game. Offers good control and great disruptive effect. Also effective for classical defense with very good control/backspin variation. Even strong topspin shots can be returned with a flat flight path and maximum backspin. It is also effective for control and placing of service returns. Sponge: 1.0, 1.6, 2.0 (WHITE color). Item RUGRI.

SPEED **53** CONTROL **88** \$54.95

A.B.S.

Control + good spin reversal! For close to the table blocking. Distinctly slower than Gorilla and Grizzly and offers much better control. Very good spin reversal and attacking possibilities through aggressive pushing and lifting, especially against chop shots. Sponge 1.2, 1.5, 1.8 Item RUABS

SPEED **36** CONTROL **95** \$54.95

Anti Special

Slower than Dr Neubauer's Gorilla and Grizzly, but with better control. Great for spin reversal for effective blocking game close-to-table. Good attack through aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8. Item RUANT

SPEED **40** CONTROL **93** \$54.95

SMOOTH RUBBER

NEW

Domination Speed 2

Enhanced for new plastic ball requirements. Topsheet is unchanged, still producing maximum rotation on serve and loop (topspin). Very grippy surface for good control. Decisive breakthrough in sponge development -- soft but allowing for high speed and long contact time between rubber and ball to impart maximum rotation to the plastic ball. Highly effective weapon for modern offense! Sponge 1.8, 2.1 Item: RUDS2

SPEED **94** CONTROL **80** **76** \$49.95

Domination Speed

Inverted smooth rubber with "speed glue" tension in sponge & top sheet. Sponge 1.5, 1.8, 2.1. Item RUDOS

SPEED **92** CONTROL **80** **76** \$49.95

Domination

"Speed glue" tension in sponge and the top sheet. Elasticity and tension create acceleration. Sponge 1.2, 1.5, 1.8, 2.1. Item: RUDOM

SPEED **84** CONTROL **71** **83** \$49.95

Goliath Speed

Speed glue effect without speed glue, for an extremely dynamic attacking game. Harder sponge allows more speed for attacks. Sponge 1.5, 1.8, 2.1. Item RUGOL

SPEED **93** CONTROL **77** **76** \$49.95

Special Defense

High friction surface without being sticky. Effective in combination with pips or anti-spin rubber. Sponge 1.0, 1.2, 1.5. Item RUSPE

SPEED **79** CONTROL **92** **86** \$49.95

HERBERT NEUBAUER plays with the Dr. Neubauer Matador blade and uses Dr. Neubauer KILLER on forehand and NUMBER 1 rubber on backhand side.

RUBBER RATINGS KEY

SPEED SPIN CONTROL PRICE

DR NEUBAUER COMPARISON CHART pages 100-101

LONG PIPS RUBBER

Viper Soft

Long pimples with friction - the soft alternative. Viper Soft has even softer pimples than Viper. It produces a low bouncing, wobbly ball both while blocking passively and for chop-blocking. The new rubber formula also allows for more backspin while chopping from behind the table. The outstanding attacking possibilities remains, thus creating a long pimple rubber that excels in a variety of fields. Sponge OX, 0.6, 1.0 Item: RUVIS

53 85 85 \$45.95

Allround Premium

Extraordinary Allround Weapon. Disruptive long pips rubber enabling aggressive blocks and hitting and counter-looping against topspin shots. Excels at passive shots with very low bounce. Great for classic defense with spin and control. Heavy chops and float balls can be performed interchangeably. Unusual pip geometry with vertical distribution. Sponge OX, 0.6, 1.0, 1.3 Item RUALL

55 85 85 \$45.95

Number 1

Rubber formula with vertical pip alignment. Softer pips enable you to reduce the speed of the game while blocking passively. Fantastic control at all levels. Very efficient for putting pressure on your opponent, and highly versatile for producing long pimple attacking shots with ease. Sponge OX, 0.6, 1.0 Item: RUNO1

52 45 94 \$45.95

Desperado

Long pips rubber from another dimension! Both versions without sponge (OX) and with sponge (0.6, 1.0mm) are very effective for chop-blocking close-to-table - passive or aggressive blocks against topspin with push-blocking technique where ball is "pushed down" while holding the bat at a closed angle. OX version is best for close-to-the-table block. Versions with sponge are better for action attacks and floating balls. Sponge OX, 0.6, 1.0 Item RUCES

56 38 95 \$45.95

Fighter

Innovative rubber composition provides excellent control with good attacking possibilities through aggressive pushing and counter-attacking at the table. Sponge OX, 1.2 Item RUFIF

57 42 91 \$38.95

Boomerang Classic

Defence weapon! This long pips rubber is great for classic defense, and provides lots of backspin and disruption. Sponge: OX, 0.6, 1.0 Item RUBOC

55 46 91 \$45.95

Monster Classic

Monster Classic: Long pips with friction for an aggressive game close to the table. Special pimple geometry, rubber formula and sponge enables effective blocking and counter-attacking. Sponge: 1.0, 1.6, 2.0 Item RUMOC

59 51 88 \$45.95

Viper

A major step forward for all long pip players blocking close to the table. Completely new rubber formula provides great control - even fast topspin shots can be handled easily. Soft pips help to dampen ball speed, producing a low bounce when blocking. Both passive- and chop-blocking provide a disruptive effect that will cause problems to your opponent. A highly interesting development in long pip rubber with friction. All standard attacking techniques with long pips can be performed quite easily. Sponge OX, 0.6, 1.0 Item: RUVIP

55 82 85 \$45.95

SHORT PIPS RUBBER

Killer Pro

Great weapon for the aggressive game with short pips! Same topsheet as best-selling rubber Killer, but laminated with a revolutionary new sponge to enable disruptive blocking, counter-attacking, and hitting, with speed. Sponge 1.3, 1.5, 1.8, 2.0, MAX Item: RUKIP

92 62 77 \$45.95

Terminator

Differs from other short pips rubbers. Available exclusively with fabric reinforcement (no sponge) underneath to produce a float ball while blocking passively. Ball bounces low, drops on aggressive blocks. Enables dynamic, efficient play against chops and produces fast "dummy loop". Great for allround game. Sponge OX. Item RUTRM

58 64 90 \$45.95

Diamant [Half-Long Pips]

A multi-purpose weapon for serve return, block, attack and defense. Also great against chops: any backspin can be smashed for winner points. Sponge 1.2, 1.5, 1.8, 2.1 Item RUDIA

70 59 86 \$45.95

Leopard [Short Pips]

This rubber will be a real challenge for your opponents. Blocking with topspin or smash produces disturbing returns with the ball dropping and wobbling. A supreme weapon for block, counter-attack, and provides very good control for all blocking and attacking strokes. Sponge 1.0, 1.5, 2.0. Item RULEO

61 61 88 \$45.95

Pistol [Short Pips]

Fast, powerful, dynamic for fast attack - especially straight hitting and fast looping. Enormous speed with a disturbing "flat" effect. Sponge 1.0, 1.6, 2.0. Item RUPIS

95 68 73 \$45.95

Tornado Ultra [Short Pips]

Big spin/speed and tactically dynamic for blocking and counter-attack. Creates wobbling balls. Sponge 1.5, 2.0. Item RUTOR

94 55 78 \$45.95

HOW TO READ THE RUBBER CHART ▶▶

The Rubber Comparison Chart lists Smooth Rubber on pages 98-100. Short Pips, Long Pips, and Anti-Topspin Rubbers are on page 101. For more info on rubber types and how to choose rubber, see page 66.

Sponge Thickness is shown in millimeters. The measurement includes only the sponge (not the topsheet). Often the manufacturer indicates "MAX" for the thickest sponge available for a rubber. MAX thickness can vary from brand to brand, but usually means the sponge is approximately 2.3 to 2.5mm. Often MAX means sponge and topsheet together measure 4.0mm, since this is the maximum thickness allowed under ITTF regulations. All rubber sheets at Paddle Palace are of ITTF-legal sponge thickness.

S = SPECIAL **PRO** = PRO SPECIAL (Details on pages 4-7)

Speed/Spin/Control Ratings are on a scale of 10 to 99, with the higher the rating, the higher that attribute. These ratings use a universal scale which differs from manufacturers' ratings so that the rubbers from all the brands can be compared. Ratings are meant only as a tool to help select rubber. Naturally, speed, spin, and control are affected by a player's skill, strokes, and playing style.

Rubber sheets are available in red and black unless otherwise indicated. One rubber covers one side of a blade. Paddle Palace will apply rubber to the blade at no extra charge upon request. ●

Paddle Palace ROBOTS

Spin Indicator!

Spin Indicator panel on the robot shows you the spin for each ball before it shoots.

LCD Touch Screen!

Operation and programming of all functions of the robot is very easy with the new Touch Screen.

PADDLE PALACE H2W TOUCH PRO ROBOT

The Most Versatile High-Tech Robot + Easy to Use!

The Paddle Palace H2W Touch Pro Robot is a very versatile and user-friendly high-tech robot. The new LCD Touch Screen makes operation and programming of all functions of the robot very easy! Get started in seconds using one of the 30 built-in ball sequences with just a few touches on the screen. Making your own custom sequences is also simple, as the Touch Screen walks you step by step through the setup. You can save up to nine of your own favorite custom sequences, and you can easily modify the 30 built-in sequences. Whether you use built-in sequences or your own custom sequences, start-up is easy every time you play.

The new Spin Indicator Panel located just below the shooting head on the robot shows you the spin for each ball before it shoots. This makes playing with the robot more like playing with a human partner, as you can visually anticipate the spins on the upcoming balls.

The H2W Touch Pro Robot has two throw wheels with independently programmed motors, allowing a great variety and degree of spins, including topspin, underspin, sidespin, and no-spin. Plus the robot can seamlessly shoot consecutive shots with different spins. There are 22 possible landing spots on the table including short and long balls, making possible any combination of spins and landing spots you choose. The H2W Touch Pro Robot is designed for the player who wants a high-quality long-lasting robot that is easy to use, yet offers the sophisticated technology for practicing the ideal training patterns to take your game to the next level.

PADDLE PALACE A32W PRO

The Paddle Palace A32W Pro has many outstanding advanced robot features, but is offered at a very affordable price! Unlike other robots in this price range, it has two throw wheels controlled by two independent motors. This gives you great control over setting the variety and degree of spins including topspin, underspin, sidespin and no-spin. It includes an automatic ball recycle and net collection system. It has multiple oscillation options, and has convenient robot controls on the player's side of the table. The A32W Pro is high quality, sturdy, reliable. It comes ready to play with virtually no assembly required, and it rolls from storage to table for very quick setup/take-down.

Item OPVA3

- Two throw wheels, for multiple spin options
- Multiple Oscillation Options
- Very durable, made with high quality materials
- Ball Recycling and Net Collection System
- Rolls easily from table for easy storage
- No-Jam, easy-feed engineering

FREE shipping to contiguous USA!

FREE 120 Nittaku training balls

PADDLE PALACE TABLE TOP PRO

The Paddle Palace Table Top Pro is an affordable and quality robot that delivers strong and consistent topspin, underspin, and sidespin shots. It is simple to use and is jam free. The frequency and speed of the shots are controlled by convenient robot controls on the player's side of the table. It can be set to hit to one spot on the table, and it also has multiple oscillation options, both controlled and random. It can be set to shoot serves or rally shots. It can be placed on any location on the table, or it can be set on a stand behind the table (stand not included). A ball collection net is available for an extra charge. The Paddle Palace Table Top Pro is the easiest robot to set up and use that we have ever seen! Item OPVTT

- Versatile, shoots from any location on the table
- Outstanding topspin, underspin, sidespin
- Multiple Oscillation Options
- Set for serves or rallies
- Easiest robot to set up and use
- Net not included. Nets available. See p. 106

\$449⁹⁵

Paddle Palace ROBOTS

PADDLE PALACE S4W PRO ROBOT

Taking Robot Technology to the Next Level

The Paddle Palace S4W Pro has two heads, each with two throw wheels. Both heads, and the four throw wheels, are all independently programmable, allowing you great flexibility in designing playing patterns and practice options. You can program a seamless combination of topspin and underspin (or side-spin or no-spin) shots in the same play sequence. The S4W Pro comes with an easy-to-use, comprehensive control box, conveniently located at the player's end of the table. This heavy duty robot is ready to use right out of the box - for club or home. You can use either one or both heads to produce the desired practice patterns. Use the single head to set up a specific serve or volley, or employ both heads to alternate seamlessly between types of spin, short/long balls, strong/weak balls, or high/low balls. Plus, you choose the landing spots, speed and throw frequency. You can set up one head to reproduce a realistic serve that hits the robot side of the table first, then complete the sequence with volleys from the 2nd head. The S4W is easy to use, yet provides the sophisticated technology and flexible programming to be your ultimate training machine. Item OPVS4

\$1499⁹⁵

* Includes Shipping

PADDLE PALACE S4W ROBOT INCLUDES:

- Free 120 Nittaku training balls
- Free Ball Pick-up Net
- Free shipping to contiguous USA
- 30-day money-back Guarantee
- One year limited Warranty

See PaddlePalace.com for details and owner's manual.

Throw Wheels – One, Two, or Four?

Robots with one throw wheel can shoot topspin, underspin, and sidespin. With two throw wheels, the two independently controlled motors make it possible for independent spin and speed settings. This results in a great range of spin options – light to heavy topspin, underspin, or sidespin – or no spin shots. Four throw wheels provides the greatest versatility of all, including serve and volley in the same training sequence.

Oscillation: Random (R), Controlled (C), Programmable (P)

Controlled Oscillation means you can set the robot to hit alternately only to the two widest points in the angle range, plus you can set the width of the angle. With Random Oscillation, the robot hits to the inner angles as well as the

widest angles. With Random Oscillation, where the ball lands depends on the frequency and speed settings you have chosen. Programmable Oscillation is the most versatile. It achieves everything Controlled and Random Oscillation does, plus you can program sequences of your choice for where the ball lands!

LCD Touch Screen

The LCD Touch Screen is a very easy and intuitive menu-based interface to control all functions of the robot.

Serve & Volley Sequences

The Robot can be set to serve and volley in the same sequence. So, for example, you can set a sequence to begin with a serve, then shoot

volleys to specific landing spots with spins of your choice for a realistic training pattern.

Topspin/Underspin Sequence

The robot can shoot topspin shots and underspin shots (and other spins) in consecutive shots in the same sequence.

Spin Indicator

The Spin Indicator is located just under the shooting head. Before the ball shoots, it shows you the spin type on next shot: topspin, underspin, right-sidespin, left-sidespin, right-side/topspin, left-side/topspin, right-side/underspin, left-side/underspin, or no-spin/deadball.

Each product comes with a 30 day money-back guarantee, 1 year warranty and free 5 year service policy.

FOR CURRENT PRICING AND SPECIALS, GO TO PADDLEPALACE.COM

Paddle Palace always offers the latest NEWGY web specials and offers.

Newgy Robots are affordable robots that provide hours of table tennis fun for the whole family. All Newgy Robots have one throw wheel, and they can throw topspin, sidespin, and underspin. They throw one spin at a time. The robots can oscillate to different landing spots (except for the Robo-Pong 540)

\$999*

Newgy Robo-Pong 2050

Newgy's top robot has digital technology for easy, precise regulation of ball speed, wait time, and landing location. Normal Mode gives you simple manual control over each function, while in Drill Mode you can run any of 64 drills stored on the controller. Use PC Mode to create and save drills using a simple interface, then run those drills direct from your PC. Setup Mode makes it easy to calibrate motors to a set standard and select your desired language. Intelligent design also allows selection for right-handers and left-handers alike. Item: ON5

- Package Includes:
- Ball Thrower (w/Oscillation)
 - Recycling Net System
 - Side Net Extenders
 - Rubber Tips Packet
 - Full Size Digital Control Box
 - Transformer
 - Connector Cable
 - Owner's Manual
 - Set-up DVD
 - 48 Orange 40mm Robo-Balls
 - Training Book

\$654*

Newgy Robo-Pong 1050

Identical to the Robo-Pong 2050 except it does not have the Recycling Net System. Purchase a Ball Catch Net (sold separately) for ball capture and manual recycling. Or later on, upgrade to full 2050 capabilities with the Newgy Recycling Net Upgrade Kit. The 1050 Ball Bucket holds 200 balls for several minutes of non-stop play. Position the robot anywhere on top of table or mount it back from the table in the optional Robo-Caddy (sold separately) to get a variety of angles and trajectories. Item: ON1050

\$479*

Newgy Robo-Pong 1040

Includes all features of Robo-Pong 540 plus it includes oscillation and more powerful speed and frequency controls. Bucket Extender expands ball capacity for longer continuous play. Item: ON1040

\$799*

Newgy Robo-Pong 2040

Includes recycling net and ball recycle system for non-stop action. Can oscillate back and forth or set it to shoot to one landing spot. Can shoot topspin, underspin, and sidespin. Shoots one spin at a time. You can set the frequency, speed, and oscillation. Item: ON4

\$374*

Newgy Robo-Pong 540

Ideal for the budget-minded recreational player. Lower speed and frequency ranges and static delivery accommodate untrained strokes. Set on top of table and twist base to change trajectory. Improved bucket design ensures reliable ball feed. Item: ON540

PREMIUM COMPACT

The Ultimate in Table Design and Performance!

Designed and engineered to combine a true tournament playing experience with the most efficient and user friendly chassis design ever produced by Stiga. The table ships 100% fully assembled from the factory. Commercial grade pistons engage when both opening and closing the table, which make this heavy-duty table feel almost weightless. Due to this innovative design, the table can be converted between play and storage position by only one person with minimal effort in less than 3 seconds. When in play position the table is rock solid from surface to ground and the 1" top surface is all you would expect from a flagship Stiga table that is ITTF approved. When placed into storage position, the table is extremely compact at only 22" wide and the machine grade 5" ball bearing casters make it effortless to move to about. Includes a tournament grade Premium VM net and post set. Size: 62 x 60 x 22 in folded position. Item: TEPECT

ITTF Approved
Made in Germany

OPTIMUM 30

The Stiga Optimum 30 sets a new standard for consistency and design in table tennis tables. With a 30 millimeter (1.2 inch) top, the thickest in the sport and 20% thicker than its closest competitor, the Optimum 30 has the most even and consistent bounce of any table. ITTF approved and made in Germany, this table represents the pinnacle of current table tennis tables.

The playing surface of the Optimum 30 is coated with a special varnish for the ideal amount of friction and the truest bounce. The edge and center lines are silk screened for even placement and professional appearance. The undercarriage features a 2.4 inch steel apron and 2.4 inch by 1.6 inch steel legs with levelers. The table separates into two halves, each with their own set of four 4 inch casters for easy movement and the two halves allow compact storage as well as use in playback position. The Optimum 30 also comes with a high-quality Stiga VM net set. Size: 61" x 60" x 26" in folded position. Item: TEOP3

See PaddlePalace.com for latest SPECIALS

ABOUT PURCHASING YOUR TABLE

Table Top: Look for tables with thicker tops. Thicker tops give a more consistent bounce and are less likely to warp after years of use. The Paddle Palace recommends table tops of 3/4 inches or more.

Net Set: Some tables have net posts permanently attached to the frame. These make setup and takedown a little quicker but may not be as adjustable or sturdy as separate net posts. Table price includes net set.

Frame: Look for tables that have larger, sturdier legs and support frames. Sturdier frames contribute to a more consistent ball bounce and also help prevent top warpage. If you set up and store your table regularly, a larger frame increases durability.

Wheels: Larger and stronger wheels are important particularly if you set up and store your table frequently.

Table Shipment: Tables are shipped directly from the manufacturer by freight line. Delivery generally takes 2-3 weeks from the date of order. The delivery person will need assistance in unloading your table and will leave table at the curbside. Some tables require some assembly.

Shipping Charge: Price includes shipping! Some locations incur extra shipping charges. In that case, Paddle Palace will contact you before processing the order.

SCOREBOARDS

Stiga SensorScore \$99.95

SensorScore by STIGA is the first and only hands-free, fully-automated table tennis scoring system. Utilizing innovative sensor technology, SensorScore turns the table tennis table playing surface into a nano-vibration detection field. Sensors attached under the table communicate contact data to the scoring unit which displays the score in real time. The system tracks and displays the score, announces the score and informs the players when it is time to change serve. Scores 11 or 21 points. Net set included. Net does not extend a full 6" from sides of table.

SensorScore Features:

- Digital scoring unit with vibrant led display and audio prompts
- Premium net and post set with integrated sensor
- Two surface vibration sensors easily mount under table
- Rail mounted master controller to control game settings
- Universal mounting design for regulation tables up to 1" thick
- Simple installation requiring only minutes to set up Item: MSSEN

BALL CATCHERS / BALL STAND

My Ping Pong Buddy Ball Picker Upper \$44.95

Quickest and most efficient way to pick up lots of table tennis balls off the floor. With its long reach and length-adjustable aluminum handle, it is easy to reach balls under the table, under furniture, under feet, and all around the floor -- without bending over! The catch net is on top. You simply put the device over the balls, and they pop right into the net. So easy, and fun too! If you use a robot or train with multi-ball, this table tennis ball collector will save you a lot of time and energy while saving you from straining your back. Made in USA. Item: MMCA

STIGA Ball Catcher \$29.95

Perfect to use during practice for collecting the balls. Lightweight. Aluminum. Item: MSBTC

JUIC Ball Catcher \$29.95

Juic Ball Catcher folds for storage, and has a telescoping adjustable handle. This is a great item for picking up balls - and it saves your back! Plus it folds for easy storage and includes a storage bag. Color: Black. Size: 102cm long when open. 52 cm when folded. Item: MJBC

STIGA Multiball Stand \$79.95

Great for multiball sessions. Four castor wheels for easy movement. Height is adjustable. Holds over 100 balls (not included). Basket dimensions: 40 x 40 x 27 cm. Item: MSMUL

Stiga Ballbag Pro \$14.95

Nifty bag for holding table tennis balls. The drawstring opening doubles as shoulder strap. Holds approx. 10 doz. balls. (not included.) Circular base is 21 cm diameter x 42 cm tall. Item: MSBBG

VOC-FREE WATER-BASED GLUE

These Water-Based glues contain no VOC's, are legal under the new ITTF regulations, and can be sent by air shipping methods. All water-based glues must be kept at room temperature. When water-based glues freeze, they harden and are no longer usable.

DHS #15 Aquatic Glue

Water-based and VOC free. High adhesiveness with excellent elasticity. The elasticity will be increased gradually after repetitious gluing. Includes two application sponges each measuring 6 x 3 cm. Item: GCAGQ

\$14.95

50 ml in tube dispenser

Stiga Optimizer Glue

Water-based and VOC-free to conform to ITTF regulations, non-toxic and environmentally safe. Quick-drying (typically 4-8 minutes) and easily removed when changing rubber sheets, Optimizer represents the newest in modern glue technology. Item: GSOPT

INTERNATIONAL TABLE TENNIS SKILLS DVD

2 hours 17 min. \$58.95 Item: VMDDIN

Samson shares 19 years of knowledge that he has learned from 40 different coaches while traveling to Europe, Asia, and throughout North America. During the 2 hour 17 minute DVD, Samson explains each professional skill in a simple, step-by-step approach that you can be understood by all ages and all levels. Topics include - advanced footwork, drills, strokes, serve, serve return, looping, flipping, game strategy, training routines, mental strategies, and much more.

Here is what is being said about this DVD:

"Great tool to learn the proper technique and start playing table tennis like a pro!"
- Doru Gheorghe (Olympic Coach)

"I had a chance to view your DVD a couple of times and plan to view the DVD several more times in the future. This video is a "one stop" shopping for those that want to improve their table tennis game either in practice or in tournaments!"
- Philip Wu (Beginner Table Tennis Player)

"This fast-paced 2-hour DVD is packed full of expert coaching advice on strokes, mental game, and much more!"
- Ariel Hsing (Olympian)

"What I like most about the DVD is Samson's ability to demonstrate the proper technique and how to apply it to match play!"
- Sean O'Neill (Olympian)

"The DVD seems so personal. When I watch it, I feel like I'm getting a personal lesson just for me!"
- Chris Jordan (recreational player)

"This is one of the very best table tennis DVDs that I have ever watched!"
- Carl Hardin (USATT Coach)

"Perfect for teaching the complicated table tennis technique in simple terms. Highly recommended to any athlete who wishes to improve their game and their knowledge of the sport!"
- Richard McAfee (National Coach and Hall-of-Famer)

\$24.95

Serve receive is the most difficult part of competitive table tennis. This dvd shows over 250 examples of service returns executed by some of the best players in the world. The most popular options for receiving specific serves are included. The DVD is organized according to the type of service that is to be returned, whether long, short, underspin or topspin, to the forehand or the backhand. Alpha Productions shows the serve and the receive and

how the point plays out. Then the sequence is repeated in slow and stop motion, occasionally employing graphics to illustrate the spin, and then it is played once more at regular speed. Commentary points out some of the significant factors for each receive. Item: VADSR

PRO TABLE TENNIS SERVES

By Alpha. \$29.95. Item: VADSE

Program features 29 players and 140 serves!

Alpha Productions has captured the serves of some of the world's best players during practice. This program clearly shows each detail in their movement and reveals the secrets of the contact.

Covers serves of all styles - shakehand, penhold, righthanders, lefties -- organized in the basic categories of underspin, topspin and no spin, with a special mention if the side spin component becomes significant. Each serve is presented at full speed, half speed and a extra-slow "analysis speed". On some serves, the use of a super slow motion camera reveals even more detail of motion. Item: VADSE

Ping Pong for FightersBy Paralympic Gold Medalist
Tahl Leibovitz

152 pages/Foreward: Stellan Bengtsson

Tahl Leibovitz is known for his passionate play, creativity, and indomitable spirit. In **Ping Pong for Fighters**, he reveals the mind and heart of world-class table tennis – how champions think, act, and succeed, even when things don't go their way.

Leibovitz identifies four main elements in competitive play: the **environment**, the **ball**, the **opponent**, and the **self**. If the player masters each element, he or

Price \$19.95 Item: MMBL
Paperback

she will eliminate unnecessary baggage from the game, finding themselves more resilient, focused, less frustrated, and better-equipped to handle the volatile nature of table tennis. In **Ping Pong for Fighters**, Tahl Leibovitz has developed a philosophy for the thinking and feeling player. Rather than teaching players to get into fights, **Ping Pong for Fighters** gives you tools to develop confidence, self-belief and a will-to-win that remains long after you've left the table.

100 Days of Table Tennis

By Samson Dubina, ITTF Coach, US National Team Member

210 pages. Travel with top USA coach/player Samson Dubina on a 100-day table tennis journey. Each day you will learn new skills about strokes, spins, drills, game tactics, training routines, and tournament performance. This book will give you necessary tools to move past your competition both mentally and physically. Here is what USATT National Coach and Hall of Famer Larry Hodges says about the book:

"100 days... that's how long it'll take for coach/player Samson Dubina to lead you through these pages, a few minutes each day, with the goal of taking your game to the next level."

Item: MMBD

**Revelations of a Table Tennis Champion**

\$24.95

by Danny Seemiller / 218 pages, 96 photos

This autobiography of five-time U.S. Men's Singles Champion Danny Seemiller takes you through his 50 years in the sport, from early days of training, breakthroughs, agonizing defeats and great triumphs. You'll learn why the three-sport star (baseball, basketball, and football) changed focus to table tennis. You'll experience his trips around the world, from being marched at gunpoint to achieving his boyhood dream of defeating the Chinese. But playing is only half his story. Danny was the U.S. Olympic and World Team Coach for ten years, and received USOC Coach of the Year for Table Tennis three times. He served five years as president of USATT, ran dozens of major tournaments through the years,

and was instrumental in bringing the 2018 World Veterans Games to the U.S. He is a member of the USA Table Tennis Hall of Fame, and in 2012 became the youngest recipient of the Lifetime Achievement Award. Item: MMBE

**Ping Pong Diplomacy:
The Secret History Behind the Game That
Changed the World**

By Nicholas Griffin / 336 pages

Chosen Amazon Best Book of the Month
January 2014. Hardbound. From Scribner.

Ping Pong Diplomacy tells the strange, tragic story of how the game was manipulated at the highest levels; how the Chinese government helped cover up the death of 36 million by holding the World Table Tennis Championships during the Great Famine; how championship players were condemned, tortured, and murdered during the Cultural Revolution; and, finally, how the survivors were reconvened in 1971 and ordered to reach out to their American counterparts. Through a cast of eccentric characters – from spies to hippies, ping pong-obsessed generals to atom-bomb survivors – Griffin explores how a neglected sport incited a realignment of world super powers. Price \$25.95. Item: MMBR

"Ping-Pong Diplomacy belongs in the category of 'you can't make this stuff up.' It reads more like a le Carré novel than diplomatic history. But the tale it recounts actually happened, and casts a new and provocative light on the U.S. Opening to China, one of the great foreign policy breakthroughs of the 20th century."

– Anne-Marie Slaughter, author of *A New World Order* and *The Idea That Is America*

"Ping-Pong as a vehicle for international espionage? It's an idea so outlandish that, if it weren't true, some novelist would have to invent it. A remarkable story, well documented and excitingly told."

– Booklist, starred review

Tactics to Devastate the Long Pips Blocker

The long pips blocker is often described as the most frustrating opponent in the game – unless you use the proper tactics!

Before I jump into the tactics, I want to first give you an explanation on spin. When both you and your opponent are using normal, grippy inverted rubber and rallying topspin to topspin, the rubber grabs the ball and changes the rotation forward in order to maintain topspin. The grippiness of the rubber is what allows the spin to maintain topspin back and forth. When playing against long-pips, the ball usually doesn't grab the ball when it hits the pips, causing your own spin to come back at you. For example, when you serve heavy backspin to the long pips player, regardless if he hits or blocks or pushes, the ball will come back with some topspin. If you loop the ball with extreme topspin, regardless if he hits or blocks or pushes, the ball will come back with backspin. It isn't so much a matter of what stroke HE did, it is a matter of what spin YOU did.

Now here is one pitfall. When beginners play against long pip opponents, they often give a weak loop then try to push the next ball, and the balls go flying 8 feet high. What happened? The loop was so weak with practically no topspin; when the long pips player blocked, it actually came back as "no-spin". You must understand that the amount of spin coming back to you is proportional to the amount of spin you impart. If you loop with 80 rotations per second topspin, the long pips ball will likely come back to you with about 60 rotations per second backspin. If you loop with 16 rotations per second topspin, the long pips ball will likely come back to you with about 12 rotations per second backspin.

Now here is where it gets very complicated. When you are playing against a long pips player who has some friction to his pips, the ball will be different from an opponent who has much less friction on his pips. Unlike inverted, the pips with some friction will give less spin. Less spin? Samson, are you sure about that? Absolutely! When the pips with some friction slightly grab the ball, they deaden the spin a bit. The statistics that I quoted in the above paragraph will actually be different based on the type of long pips used. If you loop with 80 rotations per second, the grippy long pips ball will likely come back to you with 40 rotations per second whereas the less grippy long pips ball will likely come back to you with 75 rotations per second.

There are many myths floating around table tennis club world-wide as to how tricky long pips players can be. For the long pips player without much friction, the only thing that they can be tricky about is depth and placement. Regardless of the stroke used, the spin will be very predictable. The trickier version of long-pips player is the one who has some friction. If the rubber has some friction, then the player can give some slight variations. If you push to the long pips with friction and he pushes very aggressively, then it is possible for him to deaden the ball more. If you push to the long pips with friction and he does a slight loop swing, then he can add more topspin to the ball. If these concepts are too difficult to grasp, then I recommend just returning to the first paragraph again. Once you have mastered the basic concept then continue reading the tactics.

TACTICS

- **#1 Basic Spins:** The basic tactic against long pips is to know the spin and get in the groove. If you try too many spin variations, the spin will confuse you more than it will confuse your opponent. Try to avoid varying the spin and definitely avoid putting sidespin on the ball.

- **#2 Your Serve:** Start with a deep backspin serve. Deep is critically important because your opponent will be forced to likely return deeper, which gives you an easier first attack.

- **#3 Attack:** Next, loop forward with good speed and spin. After you serve the deep backspin serve, you will be getting a topspin ball that is likely to be an easy attack. Drive forward on this shot. In order to maintain your consistency, make sure that you add spin which makes it more controlled.

- **#4 The Next Ball:** This is the tough one! When your opponent blocks back your powerful loop, it will be a fast, line-drive chop coming at you like a bullet. You need to push it early or late and push with spin. If you contact the ball high, your push will go flying long. Push it as soon as it bounces or when it is dropping to keep it low. This is the most critical ball in the tactics against long-pips. If you can push well on this ball, then you can again begin the cycle of loop then push.

- **#5 Repeat:** Repeat the pattern of loop one then push one. If you stay with the pattern, then you will always be looping topspin and always be pushing backspin. If you "double-up" on your push or your loop, then you will likely get confused by the spin. If you constantly have to change from various amounts of pushes and loops and dealing with different spins, the joke is on you. Of course you will be confused. Keep it simple.

- **#6 Plan B:** Okay, so you are using the Samson Dubina long pips tactics and it isn't working!!?!?!?!! What next? Is there an alternative? Good news! Yes! You must remember the various ways to win points: with speed, spin, placement, consistency, and change-ups. If it isn't working, maybe you haven't worked the point long enough. Instead of 5 ball rallies, maybe you need to be mentally and physically prepared for 15 ball rallies. Maybe you are looping all the balls to the middle, why not try to serve backspin deep to the sharp angles and loop wider and push wider? Maybe you are looping at 50% speed and you need to ramp it up to 80% speed. You see, even within the framework of the basic tactics, there are always adjustments within the tactics that can make you more dangerous. I have used these tactics for years and haven't lost to a long-pips blocker for at least 15 years.

- **#7 Practice:** Before your upcoming match against that long-pips legend, try your best to find a long-pips practice partner and warm-up for 20-30 minutes with him. Chances are that the long-pips opponent is used to playing against your style but the opposite is not true. If you can have a 20 minute adjustment period to long pips prior to the match, then the adjustment will be much easier when you actually begin the real battle!

Please Note:

There are 30 distinct different styles in table tennis. You now have a general plan on how to beat the long-pips blocker, and you need to continue to adjust and re-adjust based on your specific opponent's strengths, weaknesses, tendencies, and game patterns.

STIGA®

**OUTSTANDING
SHOE STYLES FROM
STIGA**

\$84⁹⁵

Stiga Agility *SPECIAL*

Reg. \$99.95. Meets all the requirements for the modern fast table tennis game. This flexible and light shoe enables maximum speed and quickness on every floor surface. Agility allows you full use of your footwork due to excellent floor contact provided by natural rubber in the sole. Reinforced sides and leather fabric offer outstanding stability in both forward and sideways movements. Agility has STIGA'S soft EVA innersole for maximum comfort. Euro sizes 36-46. Item: HSAG

\$99⁹⁵

Stiga Premier

Perfect for table tennis! The design at the front gives perfect grip in length and sideways movement and the extra high outer sole gives your foot extra support even when making the fastest movements. An asymmetrical heel design provides a very stable and strong support combined with comfortable padding. White with orange and gray accent colors. Euro sizes 36-46. Item: HSPR

\$99⁹⁵

Stiga Instinct II

Inner sole of soft EVA gives maximum comfort, and combined with a special and unique outer sole developed specifically for table tennis. The pattern and grip areas give perfect grip for quick moves at the table. Excellent feeling against the floor and maximum support for your foot! Euro sizes 34-46. Item: HSI2

\$99⁹⁵

Stiga Instinct

Developed to withstand the tough and intense movement patterns used in table tennis, Stiga Instinct offers you extreme flexibility with a feeling like no shoe before it. With its natural balance and speed you can focus entirely on your game. The Instinct sole gives you perfect grip on every surface, and the ability to move quickly. Black with red and silver trim. Euro sizes 36-46. Item: HSIN

\$99⁹⁵

Stiga Center Court

Stiga's Center Court shoe is very flexible and is designed to adapt to the foot's motion, providing firm contact with the floor and enabling you to instantly change direction. As table tennis becomes faster every year, footwear must accommodate the need for increased quickness and speed. The importance of reacting and accelerating more quickly than the opposition is more important than ever. Center Court is the shoe to make it happen! Euro sizes 36-46. Item: HSCE

DONIC

WALDNER

Enhanced Cushioning and Grippy Sole

\$69⁹⁵

Donic Waldner Flex III
