PADDLE PALACE PRO SPECIALS

What is a Paddle Palace Pro Special?

Paddle Palace has created brilliant blade+rubber combinations with an emphasis on perfectly matching your playing style – and for a super special price! All of these blade/rubber combinations are popular with tournament-caliber players and are well-suited to a wide range of playing styles. Each Pro Special paddle is custom pre-assembled with smooth, inverted ITTF-approved rubber, with red on one side and black on the other.

STIGA®

STIGA ETERNITY VPS

$149.95 reg. $195.85

Playing Style: Modern Offensive Spin — **Overall Rating: Speed: 92 Spin: 97**

Blade: STIGA Eternity VPS (flared legend or penhold) — **Rubber: STIGA Mantra M (Max sponge)**

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Eternity VPS V blade comes assembled with Stiga Mantra M rubber. The Stiga Eternity VPS V was developed in close collaboration with the Chinese National Team to suit today's modern game. It has special temperature treated middle veneers (VPS) which reduce vibrations and gives great stability. The Mantra M rubber creates high speed with great hitting power while also producing extreme spin when desired. Together this combination gives the player the upper hand in spin-spin topspin rallies. It is the ideal choice for spin dominating offensive players.

Shakehand Item: **ZZSSETRN306** | Penhold Item: **ZZPSETRN306**

Playing Style: Modern Offensive Spin

STIGA CARBONADO 245

$229.95 reg. $305.85

Playing Style: Aggressive Offense — **Overall Rating: Speed: 98 Spin: 97**

Blade: STIGA Carbonado 245 (flared legend) — **Rubber: STIGA Mantra H (Max sponge)**

The Stiga Carbonado 245 blade comes assembled with Stiga Mantra H rubber. The Carbonado 245 blade is constructed with special TeXtreme carbon fibers that provide extreme power and carbon feeling. The angle of the carbon provides torsional bendability, providing both flexibility and increased stiffness. The Mantra H rubber creates heavy rotation on topspins, very high speed, and stable and consistent hit and touch. Combined this is the absolute choice for playing a fast offensive topspin game.

Shakehand Item: **ZZSSC245306**

Playing Style: Aggressive Offense

STIGA ALLROUND CLASSIC

$79.95 reg. $96.85

Playing Style: Classic Allround — **Overall Rating: Speed: 74 Spin: 80**

Blade: STIGA Allround Classic (flared legend) — **Rubber: STIGA Mendo Energy (Max sponge)**

The Stiga Allround Classic blade comes assembled with Stiga Mendo Energy rubber. The Allround Classic blade is definitely a classic! A perfect balance between speed, weight, and feel lies behind the Allround Classic's enormous popularity among allround and introductory players. The Mendo Energy rubber has been developed in cooperation with world leading players to develop a Power-Soft rubber that creates maximum friction on the ball. Together this combination is ideal for all allround players, and especially recommended for those looking for their first competition paddle.

Item: **ZZSSALCN299**

Playing Style: Classic Allround

DONIC

DONIC OVTCHAROV ORIGINAL SENSO CARBON

$129.95 reg. $179.85

Playing Style: Modern Offensive Spin | **Overall Rating: Speed: 93 Spin: 97**

Blade: DONIC Ovtcharov Original Senso Carbon (flared handle) | **Rubber: DONIC Bluestorm Z1 (Max sponge)**

The Donic Ovtcharov Original Senso Carbon blade comes assembled with Donic Bluestorm Z1 rubber. This is the original blade used by the European Champion! Donic used their expertise to create a blade that perfectly suits Dima's attacking style. The Donic Bluestorm Z1 rubber has a comprehensively thinner top surface, subjected to high tension that allows space for a thicker sponge - generating extra power and speed. Topspins and power shots are quick as lightning! Together this combination can be used by a wide range of offensive topspin players.
Item: **ZZSDOVO306**

Playing Style: Modern Offensive Spin

DONIC OVTCHAROV CARBOSPEED

$129.95 reg. $174.85

Playing Style: Aggressive Offense | **Overall Rating: Speed: 96 Spin: 97**

Blade: DONIC Ovtcharov Carbospeed (flared handle) | **Rubber: Bluefire M1 Turbo (Max sponge)**

The Donic Ovtcharov Carbospeed blade comes assembled with Donic Bluefire M1 Turbo rubber. Playing with this paddle is an attacker's dream! The Ovtcharov Carbospeed is a very fast carbon blade with great stiffness and durability. The Bluefire M1 Turbo is the most explosive rubber yet! A new sponge structure combined with a new spin-elastic top sheet ensures enhanced dynamic spin qualities. This paddle is recommended for all out attacking players with hard top-spins. Item: **ZZSDOVP303**

Playing Style: Aggressive Offense

DONIC PERSSON POWER ALLROUND

$85.95 reg. $113.85

Playing Style: Allround Spin | **Overall Rating: Speed: 78 Spin: 88**

Blade: DONIC Persson Power Allround (flared handle) | **Rubber: DONIC Desto F4 (2.0 sponge)**

The Donic Persson Power Allround blade comes assembled with Donic Desto F4 rubber. The Persson Power Allround blade has aggressive allround characteristics while retaining excellent ball control. The Donic Desto F4 rubber combines the control of classic rubbers with the dynamics of modern generation rubbers. The result is an allround paddle that can adapt to any situation and player's style. From loop to block to drive, this paddle allows easy transition and is ideal for those who seek clever placement and variation in their play.
Item: ZZSDPPO304

Playing Style: Allround Spin

TIBHAR

TIBHAR SAMSONOV FORCE PRO

$129.95 reg. $165.85

Playing Style: Aggressive Offense | **Overall Rating: Speed: 96 Spin: 96**

Blade: TIBHAR Samsonov Force Pro (flared handle) | **Rubber: TIBHAR Evolution MX-P (2.1 sponge)**

The Tibhar Samsonov Force Pro blade comes assembled with Tibhar Evolution MX-P rubber. The Samsonov Force Pro is the new blade of the multiple European and World Cup Champion, Vladimir Samsonov. Its powerful seven ply wood construction provides varied speed reserves and excellent ball control to put your adversary under pressure. It is combined with the dynamic Tibhar Evolution MX-P rubber. Evolution MX-P makes no concessions in speed and spin, and with the perfectly adjusted pimple geometry, it allows for more flexibility and extra energy conferred to attacking balls. This combination is recommended to the offensive player that wants to excel in the aggressive topspin game.
Item: ZZSTSAF298

Playing Style: Agressive Offense

TIBHAR STRATUS POWER WOOD

$124.95 reg. $160.85

Playing Style: Modern Offense | **Overall Rating: Speed: 90 Spin: 97**

Blade: TIBHAR Stratus Power Wood (flared handle) | **Rubber: TIBHAR Evolution FX-S (2.1 sponge)**

The Tibhar Status Power Wood blade comes assembled with Tibhar Evolution FX-S rubber. The Stratus Power Wood Pro Special distinguishes itself by its unlimited flexibility. From the hard flip to a precise topspin with lots of rotation, you will be able to realize the whole range of stroke play for the offensive game! The Evolution FX-S rubber has a flexible medium sponge and high-grip topsheet that creates a sensational feeling and generates enormous spin. This combination is ideal for a wide range of offensive players that use spin to take the initiative.
Item: ZZSTSPW305

Playing Style: Modern Offense

PADDLE PALACE PRO SPECIALS

CONTINUED FROM PAGE 5

XIOM

XIOM STRADIVARIUS

$159.95 reg. $209.85

Playing Style: Offense Loop & Drive — **Overall Rating: Speed: 93 Spin 95**

Blade: XIOM Stradivarius (flared) — **Rubber: XIOM Omega V Pro (Max sponge)**

The Xiom Stradivarius blade comes assembled with Xiom Omega V Pro rubber. The Stradivarius blade has two plies of Aramid Carbon (mix of vibration-absorbing soft Aramid and highly elastic carbon) to boost speed while creating a solid, stable feeling on contact. The Omega V Pro rubber maximizes spin and speed at higher swing speed for top players and professionals. Solid clicking, energy-charged repulse, and precise energy transfer allows the advantageous edge in small and big shots. This combination is best suited for the high level offensive player.
Item: **ZZSXSTV301**

Playing Style: Offense Loop & Drive

XIOM ALLROUND S

$109.95 reg. $134.85

Playing Style: Allround Spin & Control — **Overall Rating: Speed: 78 Spin: 90**

Blade: Xiom Allround S (flared handle) — **Rubber: Xiom Vega Europe (2.0 sponge)**

The Xiom Allround S blade comes assembled with Vega Europe rubber. The Allround S blade is a classic allround blade with lowered and controlled speed that provides the opportunity to manage and direct a game. Solid and clear feel connects the ball with the player's senses. The Vega Europe rubber is equipped with Xiom's "Carbo Sponge" and "Hyper Elasto" topsheet that have combined to create a rubber with innovative spin performance as well as the largest "safe zone" or sweet spot to minimize mistakes. This combination is best for traditional allround players and those looking for their first competition paddle.
Item: **ZZSXALS297**

Playing Style: Allround Spin & Control

JUIC

JUIC PRO ALPHA

$124.95 reg. $178.85

Playing Style: Power Allround — **Overall Rating: Speed: 86 Spin: 91**

Blade: JUIC Pro Alpha (flared handle) — **Rubber: JUIC NanoSpin II (Max sponge)**

The Juic Pro Alpha blade comes assembled with Juic NanoSpin II rubber. The Juic Pro Alpha blade is an ALL+ allround blade, medium in weight, fast allround in speed. With 5-wood and 2- carbon/kevlar plies, it has very little vibration and a fantastic huge sweet spot. The Nano Spin II gives you excellent spin and enhanced speed to bring a new dimension to the spin attack game. This combination is recommended for the power allround player that utilizes high levels of spin. Item: **ZZSJPRA303**

Playing Style: Power Allround

Yasaka

YASAKA MA LIN EXTRA OFFENSIVE

$99.95 reg. $127.85

Playing Style: Allround Offense — **Overall Rating: Speed: 85 Spin: 80**

Blade: YASAKA Ma Lin Extra Offensive (flared or penhold) — **Rubber: YASAKA Mark V (Max sponge)**

The Yasaka Ma Lin Extra Offensive blade comes assembled with Yasaka Mark V rubber. The Ma Lin Extra Offensive is the blade used by 2008 Olympic Gold Medalist Ma Lin. It has a large sweet spot and excellent speed performance in attacks. Also excels in the important blocking play. The Mark V rubber is a classic allround offensive rubber and is still one of our top-selling rubber sheets because of its versatility and performance. This combination is suited to employ a variety of offensive spin shots while maintaining excellent control. Recommended for a wide variety of allround to offensive players focused on controlled shots.
Shakehand Item: **ZZSYMAE299** / Penhold Item: **ZZPYMAEC299**

Playing Style: Allround Offense

Prices subject to change without notice

See PaddlePalace.com for latest **SPECIALS**

Nittaku®

NITTAKU RESIST II

$116.95 reg. $150.85

Playing Style: Defensive with Spin — **Overall Rating: Speed: 65 Spin: 88**

Blade: NITTAKU Resist II (straight handle) — **Rubber: NITTAKU Moristo DF (1.9 sponge)**

The Nittaku Resist II blade comes assembled with Nittaku Moristo DF rubber. The Nittaku Resist II blade is made for the defensive player seeking versatility and stability. It is made in Japan with five plies of wood, using Yanagi (willow) wood on the exterior layer. It's light in weight giving extra ease in handling. The Moristo DF rubber allows the ball to dig deep into the sponge for a great spring effect with slower speed, providing a "hang effect" to give extra control on chops. This combination is outstanding for the pure defensive and chopping players.
Item: ZZSNRS2305

Playing Style: Defensive with Spin

NITTAKU RISING

$94.95 reg. $120.85

Playing Style: Allround Control — **Overall Rating: Speed: 81 Spin: 82**

Blade: NITTAKU Rising (flared handle) — **Rubber: NITTAKU Nodias (2.0 sponge)**

The Nittaku Rising blade comes assembled with Nittaku Nodias rubber. The Rising blade is a light-weight, medium speed allround blade. Its amazing control and feel on ball contact makes it well suited for a wide variety of playing styles. The Nodias rubber is produced with a precise mixture of natural rubber gum and results in giving superior grab and ideal balance between speed, spin, and pin-point control. This combination is excellent for a wide range of allround players that require a paddle that reacts in any situation.
Item: **ZZSNRIS301**

Playing Style: Allround Control

NITTAKU FLAME CARBON

$142.95 reg. $189.85

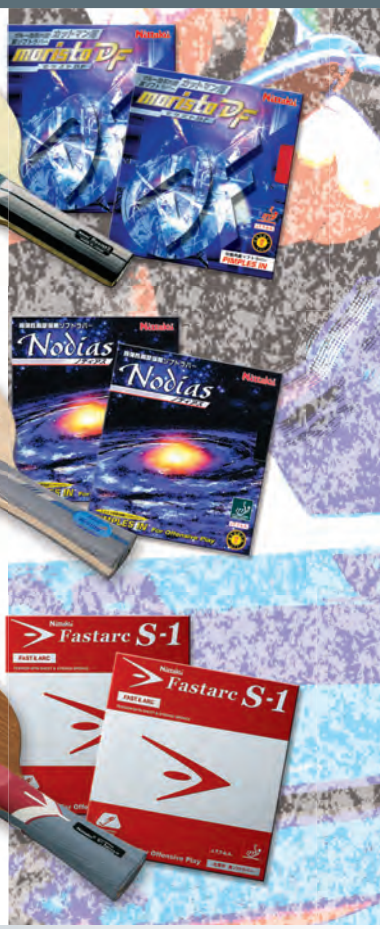

Playing Style: Aggressive Offense — **Overall Rating: Speed: 96 Spin: 94**

Blade: NITTAKU Flame Carbon (flared handle) — **Rubber: NITTAKU Fastarc S-1 (2.0 sponge)**

The Nittaku Flame Carbon blade comes assembled with Fastarc S-1 rubber. The Flame Carbon blade has been developed using Nittaku's "burning wood" technology, which hardens the outer wood ply and increases speed. Add two plies of kevlar/carbon, and the result is a blade optimized for speed. We combined this blade with the popular Fastarc S-1 rubber – favored for its amazing spin capabilities. This rubber utilizes a grippy topsheet and soft tension sponge for explosive spin + power. Recommended for the offensive player that demands high speed and spin to put pressure on their opponent.
Item: **ZZSNFLC297**

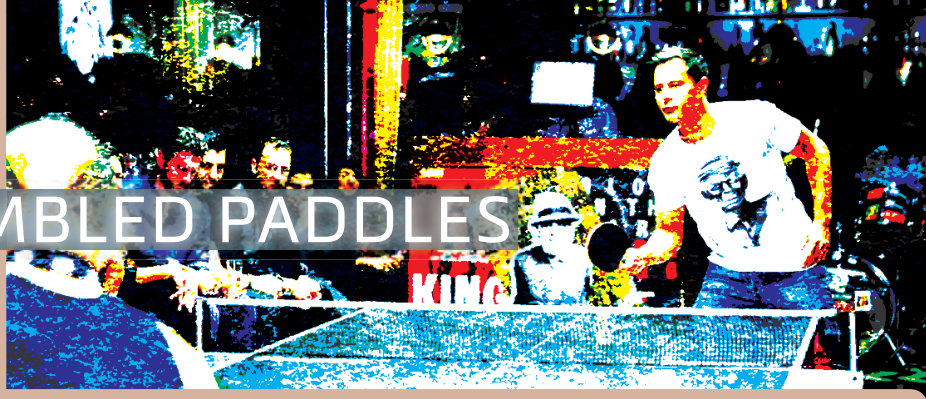

Playing Style: Aggressive Offense

We have assigned an overall speed and spin rating for each combination. These ratings take into consideration the combined characteristics of the blade, rubber, and sponge thickness. The ratings are intended as a tool only for comparing these particular blade/rubber combinations. Choose the combination that is best for your game, and enjoy a great savings!

ABOUT PRE-ASSEMBLED PADDLES

Paddles in this department are pre-assembled at the factory and are designed for players who are newer to the sport, or who primarily play recreationally. The characteristics and prices are well-suited for developing players in schools, homes, and recreation centers. The Speed Ratings in this department are on a different scale from the speed ratings in the blade and rubber departments, and are intended only for comparison with other pre-assembled recreational paddles. The pre-assembled paddles are generally slower, impart less spin, and have more control than the pro gear. Choose the pre-assembled paddles with thicker sponge for more speed and spin.

ABOUT BLADES

Combo Specials

Combo Specials are a great bargain for professional blades with rubber. We offer a selection of the most popular blades as Combo Specials. The price includes everything you need for a complete paddle: blade and two sheets of rubber. Penhold Combo Specials include penhold blade and either one or two rubbers, as indicated. Assembly (cutting and gluing the rubber to the blade) by our expert staff is free, or you can choose to receive it unassembled. We apply free edge tape, and shipping is free to USA for all Combo Specials. Rubber options include all rubbers from STIGA, NITTAKU, TIBHAR, JUIC, ANDRO, DR NEUBAUER, DONIC, DHS, YASAKA, and XIOM. No extra charge for any rubber with current price under $50. Over $50 there is an extra charge per sheet.

Pro Specials

Pro Specials include a specific combination of a professional blade and two rubbers pre-assembled at Paddle Palace. See pages 4-7 for details.

Blade Selection Guide

Blade style

Shakehand and Penhold are the two basic blade types. If you hold the paddle like you are shaking hands, then you should choose a Shakehand blade. Over 90% of the blades we sell are Shakehand style. If you hold your paddle like you would hold a pen or chopsticks, then you should choose a Penhold blade. There are two styles of penhold blades: Chinese and Japanese. Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than the shakehand. Japanese-style penhold handles have a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more square in shape than the Chinese-style, but it can vary from roundish to squarish, so check the image. (See the Penhold Blade section on pages 57 to 65).

Handle style

Handle style is a personal decision – shape and size that feels best in your hand is what you should use. For shakehand players, flared handles are the most popular, followed by anatomic and straight. The code for flared is FL, straight is ST, anatomic is AN, and conic is CO. STIGA offers two sizes of flared handles, Flared-Large (aka Legend) and Flared-Small (aka Master). The codes for these are FL (lg) and FL (sm). The DONIC Dotec blades have a unique cork handle that is designed for either a left-hander or right-hander. The code is LEFT and RIGHT. NITTAKU offers a few blades with a unique ergonomic handle, ERGO, which is comfortable for using with both a shakehand or penhold grip. Penhold blades are available in either Chinese-style or Japanese-style. Chinese-style is the most popular (C) and are suitable for one or two rubbers on the blade. Some Japanese-style penholds are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

Speed

The CLASS speed ratings of the blades range from the fastest (OFF+) to the slowest (DEF-). OFF means offensive, ALL means allaround, and DEF means defensive). In general, offensive-style players prefer blades ranging from OFF+ to ALL+. Allround players prefer blades ranging from OFF- to ALL-. Defensive players prefer ALL to DEF- blades.

Besides CLASS ratings, Paddle Palace has a universal number rating system for speed and control so that blades from all the various brands can be compared on the same scale. In basic terms, the faster the speed rating, the farther the ball bounces off of the blade, given an equal amount of force. Keep in mind that generally the faster the blade, the more skill it takes to control it. Also, the rubber applied to the blade makes a huge difference in the speed and control of the paddle. A player's skill level, playing style, rubber used, and interaction of those factors, impact the amount of speed and control that a player experiences. Therefore, the speed and control ratings are only a general tool for choosing a blade.

Weight

Most blades weigh between 70 and 100 grams before rubber is applied. An average weight is around 86 grams. Some players feel that a heavier blade provides more power but other players would disagree. Some players feel that a lighter blade is quicker, but again, there are varying opinions on this. Remember: power and quickness are not just functions of the blade, but mainly the skills of the player. Like handle style, ideal blade weight is the weight that feels best. Note: individual blade weight may vary slightly.

Plies

The number of plies (wood layers) of a blade normally ranges from one to seven, with five being the most common. Over 70% of players use an all-wood blade. There are many blades on the market that add thin plies of materials such as carbon, glass fibre, titanium or kevlar to an otherwise all-wood blade. These non-wood plies may add speed or a different feel to a blade. Some players feel that mixed-ply blades offer a larger sweet spot, and/or possibly result in added control. With or without non-wood plies, every blade has a unique feel, and only by experimenting will you discover what works best for you. We indicate the number and composition of the plies: W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid.

BLADE HANDLE COMPARISON CHART KEY

FL = Flared = FL AN = Anatomic ST = Straight
J-1, J-2 = Penhold Japanese-style C = Penhold Chinese Style

STIGA®

NEWEST CARBONADO BLADES

The new Carbonado 245 and Carbonado 290 blades are constructed with thicker TeXtreme® 200 gram per m2 carbon fiber, providing extreme power and carbon feel. These two new additions to the Carbonado family are built with the same expert processes and quality materials as the original Carbonado 145 and Carbonado 190, with one difference – the Carbonado 245 and 290 contain 200 gram per m2 carbon fiber while the original Carbonado 145 and 190 contains 100 gram per m2 carbon fiber. Choose Carbonado 245 and 290 for top quality, expert craftsmanship, and outstanding performance, along with increased hitting power and carbon feeling.

Carbonado 290

- Constructed with carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- 200 gram carbon fibre per m2. A thicker TeXtreme® carbon fibre for increased power and carbon feel.
- High personalized sweet spot.

ARCTIC WOOD

COMBINING NATURE AND SCIENCE

Combining nature and science – born in nature and crafted by STIGA's knowledge and experience. It has a rare pale outer veneer which only grows in the cold and deep forests above the arctic circle. This, together with the well-renowned VPS (Veneer Precision System) in the second layer, results in a unique blade with characteristics like none other.

Nittaku®

FINELY TUNED INSTRUMENTS

Made with special wood lamination technology originally used in stringed instrument production, and incorporated with FE-carbon material. This construction creates a solid feel and even more power. Feel the blade in every part of your hand. Thicker wood produces solid feeling for close-to-table topspin play. Available in Standard and Large Grip. The Large Grip is normal sized—just a little larger. See below for handle dimensions.

ACOUSTIC CARBON INNER

Special wood lamination technology originally used in stringed instrument production is incorporated with new FE-carbon material positioned between the center and inner plies. This construction creates a solid feel with greater ball retention. Feel the blade in every part of your hand. Thicker wood produces solid feeling for close-to-table topspin play.
Handle FL, ST / Wt 90 / Plies 5W, 2C / Item SNACI

OFF 90 66 **Blade $179.95**

ACOUSTIC CARBON INNER LARGE GRIP

Exactly the same as the Acoustic Carbon Inner blade, but the handle is a little bit larger. It is a normal sized handle but it is made larger for those who like a larger handle grip.
Handle FL, ST / Wt 92 / Plies 5W,2C / Item SNACG

OFF 90 66 **Blade $179.95**

OFF+	95	60	Blade $119.95

See PaddlePalace.com for latest **SPECIALS**

Dr. Neubauer

Jackpot

The ultimate weapon for pips-out/Anti-Spin rubbers!
Perfectly balanced plywood composition + new lamination procedure ensure excellent results with pips-out and Anti-Spin rubbers. Spin reversal while blocking with Anti-Spin rubbers and the wobbly ball produced by long pips set a new benchmark: Reduced ball speed = maximum effectiveness. Jackpot does not consist of balsa, but offers control + attack with reversed rubbers. Active, highly disruptive game can be produced with any pips-out or Anti-Spin rubber on the other side. Handle FL, AN, ST / Wt 82 / Plies 5W / Item SUJKP

ALL	82	76	**Blade $74.95**

World Champion Carbon

Enhanced version of the World Champion blade
Two more layers of carbon fiber make this blade stiffer, for more powerful, precise topspin. Control stays high because of a special heat treatment, but still provides a soft "feeling." Stability is gained by use of fiber material, making a great weapon for attack with fast pips-out rubbers and for blocking with slow, long pips or Anti-Spin rubbers. Preferred choice for modern attack with any kind of rubber! Handle FL, AN, ST / Wt 80 / Plies 5W,2C / Item SUWCC

OFF-	92	65	**Blade $74.95**

Barricade

Maximum Defense, Excellent Control!
For short blocking close-to-table and safe yet dangerous chopping. For all rubber types. Attack by looping or hitting to confuse your opponent. Effective for passive /active strokes. FL,AN,ST / Wgt 58 gm / Plies 7W / Item SUBAR

DEF+	65	88	**Blade $63.95**

High Technology Plus

Offense + Excellent Control!
For all strokes. Gluing technique+Balsa handle, gives great ball feeling. Effective attack with long pips through push/lift and counter-attack, with safe returns on block. Super acceleration. FL, AN, ST / Wt. 65 gm / Plies 5W / Item SUHIP

ALL+	89	64	**Blade $89.95**

Firewall Plus

Similar to Firewall, but no weight shakers.
Modified plywood compostion enables dynamic offense w/smooth or short pips rubber. Balsa core for speed on hit/loop. Good feel. High spin reversal + fast attack w/ long pips. FL,AN,ST / Wt. 65 gm / Plies 5W / Item SUFIP

ALL	79	73	**Blade $68.95**

Bulldog

Fast allround blade - light, with control for all shots.
Long pips or anti-spin rubbers slow ball for short shots. Short pips produce deadly shots while straight hitting. With fast inverted rubber, you get a powerful topspin weapon. Handle: FL,AN,ST/ Wt: 68 gms / Plies: 7W / Item: SUBUL

ALL+	87	69	**Blade $63.95**

Kung Fu

Allround blade for the combination player.
Great for anti-spin and pips-out rubbers. Softer, better control than Dr Neubauer's Gladiator, but just as effective, and can be used for powerful attacks. Handle FL,AN,ST / Wt 85 gms / Plies 7W / Item SUKUN

ALL	76	74	**Blade $77.95**

Matador Texa

Maximum dynamics! The original Matador, but with selected fiber material for a total of 9 plies. Result: slightly faster blade w/high power for modern offensive game. Fast topspins + high-rotation loops can be made with no problem. Effective combined with pips-out and Anti-Spin rubbers. Blade produces low bounce while blocking passively and chop-blocking aggressively with long pips. Like with the MATADOR, max spin reversal on blocks with Anti-Spin rubbers. Despite blade speed, you get very short blocking with Anti-Spin. Very dynamic attacking game w/offensive pips-out rubbers. Handle FL, AN, ST / Wt 89 / Plies 7W,2F / Item SUMTX

OFF	95	62	**Blade $74.95**

Matador

For use with pips-out or anti-spin rubbers. If you want a fast blade with high control + disruptive effect, special plywood composition provides astounding power for a modern attack. Rigid but with "touch" for the ball and good control for all strokes. Handle FL,AN,ST/Wt 88/Plies 7W/ Item SUMAT

OFF-	90	68	**Blade $64.95**

Hercules

Unique wood composition
Legendary Kiso-Hinoki wood + new type of artificial fiber. Great match for any pips-out and Anti-Spin rubber. Excellent for highly disruptive balls while blocking close-to-table. Great control, excellent feeling, for strong hitting and fast looping. Handle FL,AN,ST/Wt 85 gm / Plies 5W / Item SUHRC

ALL	82	77	**Blade $151.95**

Phenomenon

Symbiosis of disruptive effect and control!
Highly disruptive effect with pips-out or Anti-Spin rubbers. Very low bounce for block of attacks. Excellent control + feeling, plus speed for attack or counter-attack. Handle FL,AN,ST/Wt 78 gm / Plies 7W / Item SUPHN

ALL	80	79	**Blade $74.95**

World Champion

Fast OFF- for Dynamic Attack!
For attack hitting/looping (topspin), close-to-table or mid-distance and for combination players w/pips out or anti-spin rubbers. Special heat treatment gives soft feeling+control. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SUWOR

OFF-	86	71	**Blade $69.95**

Titan

"Combination": fast forehand speed on backhand.
Disruptive effect w/long pips or anti-spin rubber. Dynamic attack w/pips-out or smooth rubber. Control + feeling. FL,AN,ST/Wt: 65 gms / Plies: 7W / Item: SUTIA

ALL+/ALL-	80/66	69/85

Blade $177.95

Combination Effect

Different speeds on the two sides of the blade using unique wood composition. Low rebound on one side slows the ball, allowing short return shot with a maximum spin reversal on block. FL,AN,ST / Wt. 70 gm / Plies 6W / Item SUCOM

ALL+/ALL-	79/66	70/84

Blade $179.95

Special

The magical blade yet improved!
Maximum effects and very short blocking w/long pips. Excellent touch due to Balsa wood handle. Easy, effective counter-attack, push and lift w/long pips. Thick 7-ply blade w/large handle. FL,AN,ST / Wt. 68 gm / Plies 7W / Item SUSPE

PRO Look for this sign for blades that are available as PRO SPECIALS. Details on pages 4-7.

Ovtcharov True Carbon

The blade chosen by champion Dima Ovtcharov presents the perfect combination of speed and feel. With the change to plastic balls, the European Champion looked for a solution that would meet his high requirements -- a blade to compliment Dima's powerful strokes while enabling him to play the short service and return game with precision and accuracy. The combination of five high quality plies and two layers of carbon, plus a specially designed synthetic fiber has resulted in a top quality blade, enabling Ovtcharov to use the hardness of the blade for his power game, yet retain fine touch when reacting to his opponents' spin. Handle FL, AN, ST / Wt 87 / Plies 5W,2C-K / Item SVOTC

OFF	95	71	Blade $106.95

Ovtcharov Feat

Extremely light 75 gm blade guarantees that you can use your whole strength to play your strokes. Manufactured to the highest quality using the innovative Spruce Pressing technology, which drastically reduces the moisture content. Hand made in Germany with selected sawn veneers, it has qualities which will improve your play: Quality, lightness and a special feel. The flawless round handle fits comfortably into the hand due to the ergonomic shape. Handle FL, ST / Wt 75 / Plies 5W / Item SDOVF

OFF-	90	70	Blade $129.95

WORLD CHAMPION 89

DONIC Blade Series

Top workmanship, made in Germany!

Persson World Champion 89

The fastest of the new World Champion 89 blades. For players requiring a harder blade with high speed. Handle FL, ST / Wt 85 gm / Plies 5W,2Z-C / Item SDPWC

Ovtcharov Original Senso Carbon

PRO

Used by Dima Ovtcharov, European Champion. Unique new ply formation maximizes the sweet spot. Two separate Ayous layers are treated and glued at high temperature pressure, then cooled before the next stage. This forms the core. Plies are surrounded by two carbon plies for stability + hardness. Senso handle allows for precise return of ball. Dima Ovtcharov commented, "This blade was a huge help to me on my way to the world's elite. DONIC's 'know-how' and the Swedish blade technicians have created a blade precisely to suit my game. As a result of their expertise I can develop top speeds when attacking but am able to retain super control when under pressure."
Handle FL/Wt 90/Plies 6W, 2C/Item SDOVO

OFF	89	70	Blade $60.95

DOTEC TECHNOLOGY

The DONIC Dotec System is the wood technology without awkward edges. Since the human hand does not have hard edges, DONIC wanted to develop a smooth blade without sharp edges to ensure a completely smooth transition between blade and handle. The DONIC Dotec system is the technology that provides a blade with a perfectly smooth handle – a joy to grip. Choose between Right-Handed and Left-Handed versions.

DONIC continues to build on many years of success of its DOTEC series with three newest Ovtcharov blades: Off, All+ and All. Ovtcharov Dotec blades incorporate the brand new CBF technology. Vulcanized artificial plies have been carefully glued and put together with top quality plies to ensure extremely good feel and precise return of the ball.

Ovtcharov Dotec OFF

The fastest in the Ovtcharov Dotec series. It is really fast but has excellent control. Best suited for attackers and allround players with power who like to loop or counter-attack close or away from the table.
Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODO

OFF-	88	67	Blade $72.95

Ovtcharov Dotec ALL+

Slightly less powerful and little softer than the Ovtcharov Dotec OFF version. This blade has fantastic control but is still quite fast. Suitable for allround players with power and spin who require maximum control when under pressure. Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODP

ALL+	81	73	Blade $72.95

Ovtcharov Dotec ALL

The easiest blade to control from the Ovtcharov Dotec series. Top control and a particularly good feel guarantee the best possible allround qualities. Especially recommended for allround players who like to block and chop in defensive situations. Handle LEFT, RIGHT / Wt 80 gm / Plies 5W / Item SDODA

ALL	78	75	Blade $72.95

Persson Dotec OFF

Great offensive blade for players of every ability, with DONIC Dotec technology. Super versatility with top speed + fantastic feel in every playing situation. Covering of legendary Japanese Hinoki wood, with Dotec-Balsa and Koto plies. Available in LEFT- or RIGHT-handed version. Handle LEFT, RIGHT / Wt 75 gm / Plies 7W / Item SDPDO

OFF-	91	67	Blade $78.95

Waldner Dotec Carbon

A 4mm core of Balsa surrounded by carbon and Limba plies give this Dotec blade enormous potential for speed, quick topspin and smashes while maintaining remakable control. Handle LEFT, RIGHT / Wt 85 gm / Plies 5W,2C / Item SDWDC

OFF	93	66	Blade $92.95

Waldner Dotec AR

Limba/Balsa combination produced by DONIC Dotec Technology, results in a perfect, fast, all round blade. Amazing touch! Available in LEFT-handed or RIGHT-handed version. Handle LEFT, RIGHT / Wt 70 gm / Plies 7W / Item SDWDA

ALL+	81	74	Blade $72.95

Appelgren Dotec Control

The last word in control and accuracy! Easy control and good feel. Ideal for those who want more ball control without loss of speed necessary for attack. DOTEC fiber is placed between a limba cover and an ayous inner ply. Middle core consists of a DOTEC balsa layer. Handle LEFT, RIGHT / Wt 70 gm / Plies 7W / Item SDADC

ALL+	79	76	Blade $65.95

Wang Xi Dotec Control Plus

Fine touch and precise placement for for the defensive player! Provides not only control but reserves of speed to enable positive all-round players to go on the attack. Ideal for players who value control but not at the loss of attack play. This blade is available with a straight handle, making it easier for defenders to "twiddle" their racket. Handle LEFT, RIGHT, ST / Wt 80 / Plies 7W / Item SDXDP

ALL-	69	83	Blade $71.95

PRO

Ovtcharov Carbospeed
Very fast carbon blade with great stiffness and durability. High class Hinoki outer ply. Recommended for all out attackers with hard top-spins who prefer to counter-attack. Handle FL, ST / Wt 85 / Plies 3W, 2C / Item SDOVP

OFF+ 95 55 **Blade $74.95**

Waldner Legend Carbon
Fast, extremely light offensive blade with a larger "sweet spot" for premium control and designed with great care. Choice of wood plies - Hinoki outer ply with carbon layers and soft inner ply provide stiffness for good topspin. Effective for players who like to dominate close to the table. Handle FL, ST / Wt. 85 / Plies 5W, 2C / Item SDWLC

OFF 93 66 **Blade $74.95**

Baum Espirit
Blade of European star, Patrick Baum. Aramid-Carbon fiber combined with high quality wood plies ensure precise ball return and outstanding offensive quality. Very fast, but with maximum ball control in every playing situation. Particularly suited for counter top-spinning and for touch play. Handle FL, ST / Wt 89 / Plies 5W, 2C / Item SDBES

OFF 89 61 **Blade $65.95**

Persson Seven
Developed especially for modern, dynamic top spin players. This 7-ply blade (Limba-Ayous-combination) has good feel and is very apt at producing spin. It also offers excellent control when hard top spins are required. Handle: FL, ST / Wt: 90 / Plies 7W / Item SDPE7

OFF- 88 67 **Blade $49.95**

Waldner Black Devil CB
A Champion's blade! Outstanding for attack! Advanced technology + revolutionary 7-ply design: as exuberant as the playing style of the Master. Carbon, soft Balsa core + Koto plies = super control, power + speed with an enlarged sweet spot. Handle FL, AN, ST / Wt 80 gm / Plies 5W, 2C / Item SDWBD

OFF+ 96 59 **Blade $86.95**

Waldner Diablo Senso
Two plies of glass fibre with wood provide stability, larger sweet spot, more rigidity and speed, but with the good feel of a wood blade. Senso hollowed-out handle. Handle FL, AN, ST / Wt 85 gm / Plies 3W, 2G / Item SDWDB

OFF- 88 64 **Blade $57.95**

Waldner Dicon
DICON stands for **DI**rect **CON**trol. Parts of the handle are removed with a milling tool, providing direct contact between the player's hand, arm, and blade to improve feel of power and speed, giving you more control. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDWDI

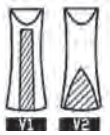

OFF- 87 66 **Blade $43.95**

See PaddlePalace.com for latest **SPECIALS**

DONIC SENSO V1 and V2:

The V1 hollow space (see sketch) leads to more speed, with identical control to the original blade. The V2 hollow space increases the control with identical speed.

V1 = optimum speed **V2 = optimum control**

COMBO SPECIAL with 2 rubbers

$123.95

Item XSDOV1

Ovtcharov Senso V1 *COMBO SPECIAL*

Fantastic feel and power. 7-ply blade with a hard walnut outer designed for high speed smash and topspin. Inner plies are medium hard and medium soft veneers. Gluing technology results in added rigidity. Handle FL,AN,ST / Wt 90 gms / Plies 7W / Item SDOV1

OFF+	95	64	Blade $58.95

Ovtcharov Senso V2

This power allround blade has a mahogany outer ply, softer than the mahogany outer ply of the Ovtcharov Senso V1. A solid blade with perfect combination of specially chosen medium-hard plies, ensuring a high degree of control. Recommended for those who value control but still require power and speed when attacking. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDOV2

OFF-	88	70	Blade $58.95

OFF	91	64	Blade $49.95

FREE SHIPPING >> Orders over $60 (see p. 137)

DONIC BURN SERIES

Thermal treatment of the veneers results in extremely high stability, similar to features of high-quality tropical woods. Exposure to 200 degrees centigrade for 24 hours hardens and dries the wood, resulting in unique playing characteristics.

Burn OFF

Stiff and fast with excellent control and an outstanding sweet spot. It is not top heavy even used with heavy and hard rubbers. Handle FL, AN, ST / Wt 90 gm / Plies 5W / Item SDBUO

OFF	94	65	Blade $49.95

Burn OFF-

More controllable than the Burn OFF blade. In harmony with the thinner middle ply it is slightly more elastic. With softer rubbers imparts slightly more spin than the OFF version. Beautiful blade, excellent sweet spot. Handle: FL, AN, ST / Wt: 85 gm / Plies: 5W / Item: SDBUM

OFF-	89	68	Blade $49.95

Burn AR+

Aim for this blade is ease of control and feel. The thinner Kiri center ply offers great control, and at 80 gms, it is relatively light. Use with harder attacking rubbers for fantastic speed or use softer rubbers for greater spin. Handle: FL, AN, ST / Wt: 80 gm / Plies: 5W / Item: SDBUA

ALL+	81	73	Blade $49.95

COMBO SPECIAL with 2 rubbers

$114.95

Item XSDDEF

Defplay Senso *COMBO SPECIAL*

Awesome for versatile defense! World's most successful veneer combo (5-ply allround) has two dampening, elastic outer plies (Gabon and Anegre). Vibration/speed of blade is reduced by increasing blade size by 3 mm. Unbelievable control for defense + fantastic offensive acceleration. FL, AN, ST / Wt 85 gm / Plies 5W / Item SDDEF

DEF+	63	94	Blade $49.95

Cayman

Great all-round blade with good feel! Lightweight, high rigidity and excellent control. Hard outer plies are especially suitable for players using short or long pips. Amazing control, with no loss of speed. Handle FL, AN, ST / Wt 70 gm / Plies 5W / Item SDCAY

ALL+	80	76	Blade $52.95

Alligator Combi

The main feature of this blade is the difference in speed between forehand and backhand sides. The 5-ply ALL+/DEF+ blade creates perfect harmony between playing styles. Soft Balsa core makes the blade light and relatively stiff. Amazing possibilities with anti and long pips rubbers. Handle: FL, ST / Wt: 80 gm / Plies: 5W / Item: SDALG

ALL+/DEF+	76/66	75/90	Blade $52.95

TIBHAR®

Paddle Palace:
Sole North American Distributor for TIBHAR

CHEN CHIEN-AN:
blade: TIBHAR CCA Unlimited
rubber: TIBHAR Evolution MX-P
• World Doubles Champion

CCA 7

Named after the initials of the World Doubles Champion, Chen Chien-An, the CCA 7 blade has high potential for acceleration and speed. Although being a very fast blade, the serve remains soft. CCA 7 gives a lot of feeling and is very spin friendly. Enables strong topspins at the table and at half distance. The Chen Chien-An playing style corresponds to powerful topspins and a backhand full of touch. Very suitable for a fast game with spin. Handle FL, AN, ST / Wt 88 / Plies 7W / Item STCA7

OFF	91	71	Blade $99.95

CCA Unlimited

The oversized sweet spot offers the necessary amount of control for the offensive game. The fast acceleration potential of this wood is the result of the balanced combination of its carbon fibers with catapult friendly layers, even when playing a topspin game at half distance from the table, without losing the necessary stability when playing counter and block. Excellent for the offensive game with the perfect balance between hardness and sensation. Handle FL, AN, ST / Wt 88 / Plies 5W, 2C/K / Item STCAU

OFF+	96	67	Blade $189.95

VS Unlimited

Large sweet spot and extra control for the offensive game. The combination of high-tech synthetic fibers, low vibration, carbon fiber and its optimal transfer of energy, is perfect for a variable spin attack and topspin game from half distance. Optimal transfer of energy of your own strokes on the ball, and the possibility to counter the offensive strokes of your opponent's with your own offensive strokes. Good balance between hardness and sensation for an offensive game. Handle FL, AN, ST / Wt 87 / Plies 5W,2C-K / Item STVSU

OFF+	96	68	Blade $179.95

Prices subject to change without notice

Balsa Fibretec 75

Extra light blade, perfectly suited to aggressive offensive rallies.
The 7.5 mm thick Balsa core provides high speed and an enormous potency. The two layers of fibreglass increase the stability and allow you to play, thanks to the greater sweet spot, fast attacking topspin strokes. Handle FL, AN, ST / Wt 73 / Plies 3W,2G / Item STBFC

OFF	92	64	Blade $54.95

Balsa Fibre OFF 60

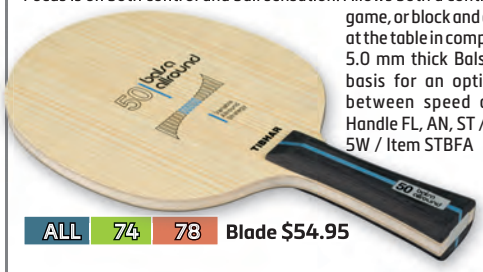

For players who like to play an offensive game but also want to place very precise shots. Compared to the Fibretec 75 it has more control for your passive game. It is extra light with good speed potential and is very sensation friendly. The fibreglass layers confer high stability and increase the sweet spot. Handle FL, AN, ST / Wt 73 / Plies 5W,2G / Item STBFO

OFF-	90	65	Blade $54.95

Balsa Allround 50

Focus is on both control and ball sensation. Allows both a controlled topspin game, or block and counter shots at the table in complete comfort. 5.0 mm thick Balsa core is the basis for an optimal balance between speed and control. Handle FL, AN, ST / Wt 73 / Plies 5W / Item STBFA

ALL	74	78	Blade $54.95

Defense Plus
Makes Your Surprise Attack Complete!
Wood layers + oversize blade delivers braking effects when playing defensive spin. Dream-like ball feeling is sustained with acceleration on attack. Handle FL, ST / Wt 75 gm / Plies 5W / Item STDEP

DEF+ | 59 | 92 **Blade $44.95**

Samsonov Premium Jr.
Smaller grip for the ambitious, developing player! Adapted from Samsonov Premium Contact but with smaller grip and slightly smaller blade head. Excellent results with high quality rubber. Handle FL / Wt 73 gm / Plies 5W / Item STSAJ

ALL+ | 77 | 79 **Blade $39.95**

Samsonov Start
Smaller grip and blade size for young players. Slightly larger than the Samsonov Premium Jr. Increased control gives the beginner a boost in confidence as they develop their playing skills. Handle FL / Wt 85 gm / Plies 4W / Item STSAS

ALL- | 67 | 84 **Blade $29.95**

Yasaka

Great Quality Blades
Made in Sweden

Sweden EK Carbon

Same "5 + 2 layers" construction as all other Yasaka carbon blades. Outer veneers are made by oak wood, grown in Scandinavia. The oak wood is hard and improves the blades stiffness and speed. In addition this lacquered blade has an elegant look. Produced in the famous table tennis factory in Tranås, Sweden. Handle FL, AN, ST / Wt 89 / Plies 5W,2C / Item SYEKC

OFF	96	67	Blade $69.95

Goiabao 5

The word GOIABAO means "nice wood" – a very suitable name for this elegant blade with top level playing characteristics. This is a fast 5-ply blade with a hard outer veneer and a relatively thick middle veneer. The second veneer is hand selected Scandinavian pine. Surface is lacquered. Handle FL, AN, ST / Wt 86 / Plies 5W / Item SYGOI

OFF	94	66	Blade $51.95

COMBO SPECIAL with 2 rubbers
$114.95
Item XSYBBL

Battle Balsa

COMBO SPECIAL

Produced in the famous blade factory in Tranås, Sweden. Many players appreciate blades made with balsa material because of the low weight, but also because of the special feel in the ball touch. However, some players find traditional balsa blades too slow. In the Battle Balsa, Yasaka has combined the best balsa-quality with Scandinavian pine to produce a faster blade, but still with a low weight. The special feeling of a "self playing blade" is of course still there! Handle FL, AN, ST / Wt 75 / Plies 5W / Item SYBBL

OFF-	86	68	Blade $49.95

$137.95
Item XSYMAS

Ma Lin Soft Carbon

COMBO SPECIAL

A softer feel than the Ma Lin Carbon. One of the best control carbon blades on the table tennis market. Large sweet spot supports consistent shots. Great for block, loop, counter, touch. Handle FL,AN,ST / Wt 83 grams / Plies 5W,2C / Item SYMAS

OFF-	88	68	Blade $72.95

Sweden Defensive

Produced in the famous table tennis factory in Tranås, Sweden. Most defensive players are looking for optimal soft touch of the ball combined with exceptional feeling and control. This blade is designed to meet that demand. Fractionally softer outer veneers and a slightly enlarged head in comparison to traditional blades gives the Sweden Defensive its unique characteristics. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SYSDF

DEF	63	90	Blade $47.95

SABINE WINTER

LIGNA

FINEST INSTRUMENTS! Once you have a LIGNA blade in your hands, you won't let it go. Finest sawing veneers, which are actually used for creating violins, provide a distinctive character to these handmade premium blades.

Ligna F.R. OFF

• Noble and exceptionally clean processed wood lying comfortably in the hand right from the start. • Carbon liner under the outer veneer gives direct and undisturbed playing feel, and ensures impulse response. • LIGNA F.R. has a slightly harder touch compared to LIGNA OFF because of the carbon layer positioning. • Ideal for spin-oriented attack players who want to score points from any distance with modern offensive strokes. Handle FL, ST / Wt 85 / Plies 5W,2F / Item SALRF

OFF	90	65	Blade $155.95

Ligna Tour OFF+

• Solid timber with good blend of control, ball feeling and speed with balanced touch • Perfect balance for simple and quick handling • Nobly processed and with exceptional, trouble-free feel for the ball due to high quality outer spruce veneer. Handle FL, ST / Wt 85 / Plies 5W / Item SALTO

OFF+	95	62	Blade $129.95

Ligna ALL+

• The most controllable in the LIGNA series. • Very lightweight allround blade with exceptional feeling being reminiscent of the playing feel of former legendary allround blades. • The first choice for players of all levels with controlled offensive play and game overview
Handle FL, ST / Wt 75 / Plies 5W / Item SALAP

ALL+	84	72	Blade $125.95

Ligna OFF

• Direct and straight forward touch by an outer veneer of fine spruce, which is usually used for violins. • The carbon layer between core and middle ply adds extra pressure behind each stroke and avoids disturbing vibrations. • A well-measured pace, the noble processing and the relatively high ball bounce support the spin-oriented offensive play. Handle FL, ST / Wt 85 / Plies 5W,2F / Item SALOF

OFF	91	64	Blade $139.95

Ligna OFF+

• The fastest blade of the exclusive andro LIGNA series • The slightly thicker Ayouse core and spruce outer veneer provide more power to your strokes. • The fast basic tempo becomes even more dangerous by the high trajectory produced by spruce outer veneers. • The offensive prodigy for forceful, aggressive topspin play. Handle FL, ST / Wt 85 / Plies 5W / Item SALOP

OFF+	96	62	Blade $144.95

WANOKIWAMI

HANDCRAFTED IN JAPAN
Samurai's first choice! There is no blade having more honest Japanese craftsmanship, more passion for quality, and with such a classy finish.

Wanokiwami Ren

First seven ply **andro** blade made in Japan. Characterized by an excellent, artful finish, the moderate speed harmonizes perfectly with the comfortable feedback and provides a solid ground for a variable topspin style. Takeshi Wanaka, a Japanese master in wood processing with the focus on processing noble woods worked hand in hand with andro developers to produce this premium blade. Handle FL,ST / Wt 84 / Plies 7W / Item SAWRN

OFF	91	67	Blade $179.95

Wanokiwami AO

• Pure wood feeling! Clearly grounded edges, ergonomically adjusted thumb pad, 100% uniform thick veneers, impressive craftsmanship. • The 4.2 mm thick core veneer provides a high flexural strength and a direct and straightforward ball feedback. Pleasant hard impact feeling. • Two thinner outer and inner plies enable controlled, well-dosed strokes. Handle FL, ST / Wt 86 / Plies 5W / Item SAWAO

OFF	90	68	Blade $162.95

TREIBER

DRIVEN BY TECHNOLOGY

Every TREIBER model is based on a different premium artificial fiber, giving every blade a unique individual character

Treiber Z

• Stands out because of its unusual structure: under the high-quality Hinoki wood outer ply lies an intermediate layer of high-quality Z-Fiber. • High speed and high, very direct ball bounce is a distinguishing highlight feature. Handle FL, ST / Wt 88 / Plies 5W,2C/F / Item SATRZ

OFF | 93 | 63 **Blade $122.95**

Treiber Q

• Classic carbon blade construction with synthetic fiber directly under the Koto outer ply. Hard impact feel, huge optimum hitting zone, no energy loss. • Perfectly suits modern, aggressive topspin play. • Great for players seeking more pace with new plastic balls. • Fastest of all TREIBER blades – extraordinary! Handle FL, ST / Wt 88 / Plies 5W,2C/F / Item SATRQ

OFF | 96 | 61 **Blade $77.95**

Treiber H

• The H-fiber is set around the core veneer (Inner), whereby the typical hard carbon impact is slightly less. • The artificial fiber blade with focus on control! Great for service and return play. • The most sensitive of all TREIBER blades. Handle FL, ST / Wt 90 / Plies 5W,2C/F / Item SATRH

OFF | 88 | 65 **Blade $77.95**

Treiber K *COMBO SPECIAL*

• Traditional construction of a synthetic fiber wood with K-fiber directly under the outer ply . Direct but controlled feel when hitting the ball. No vibrations. • Best possible balance between speed and control. No loss of control, neither in passive nor in offensive strokes. • The classic of the TREIBER blades. Handle FL, ST / Wt 90 / Plies 5W,2C/F / Item SATRK

COMBO SPECIAL with 2 rubbers
$153.95
Item XSATRK

OFF | 95 | 62 **Blade $88.95**

Wanokiwami Midori

• A defensive blade in a class of its own! The impressive craftsmanship ensures excellent feeling
• Slightly thicker core veneer (responsible for the moderate pace) and two extremely thin mid- and top-veneers (for maximum ball feeling and control)
• The premium defensive blade from the country where even nowadays defense table tennis enjoys a very high status
Handle FL, ST / Wt 86 / Plies 5W / Item SAWMD

DEF | 68 | 90 **Blade $162.95**

CORE 7

Long before synthetic fibers in the construction of high-quality table tennis blades were used for the first time, 7- ply blades were already the absolute classics.

Core 7 OFF+

Offensive 7-ply blade with great speed reserves. Five Ayous layers and two Limba outer veneers, with a thicker veneer construction and more speed than the Core 7 OFF. The good processing and the fine balance of the wood guarantee good ball feeling. Many players today also know about the excellent qualities of a 7- ply blade that is made of 100% wood: a pleasantly direct, not too hard impact and a high ball bounce, forming a perfect base for a forceful topspin game. Handle FL,ST / Wt 88 / Plies 7W / Item SAC7P

OFF+ | 94 | 65 **Blade $39.95**

Core 7 OFF

For high-feeling, spin-oriented offensive play. Five Ayous veneers, encased in two Limba veneers. Characterized by a pleasant feeling, not too hard impact and slight vibrations. Low weight facilitates handling and a slight top-heaviness increases the impact power in offensive game situations. Many players today also know about the excellent qualities of a 7- ply blade that is made of 100% wood: a pleasantly direct, not too hard impact and a high ball bounce, forming a perfect base for a forceful topspin game. Handle FL,ST / Wt 88 / Plies 7W / Item SAC7F

OFF | 91 | 67 **Blade $39.95**

FLAXONITE

NATURAL POWER AND RESPONSE

You want a blade with artificial fiber inside, having a typical hard feedback, while also having the sensitive feeling of natural blades at the same time? Then the innovative Natural Fiber Composite Technology will surely convince you! FLAXONITE – absolutely direct, but provided with an extremely sensitive feedback.

Flaxonite Driver

• A focus on speed and offense. Thicker veneers increase the basic speed of the this blade. • The mixture of Kiri (core veneer), Ayous and Koto (outer veneers) ensures an optimal balance of speed, control and feel. • The natural fiber fleece below the outer veneer with harder impact provides more pressure and poer for all strokes. Handle FL, AN, ST / Wt 88 / Plies 5W,2F / Item SAFDO

OFF | 92 | 65 **Blade $60.95**

Flaxonite Cruiser *COMBO SPECIAL*

• The FLAXONITE model with focus on outstanding control values, due to thinner outer-plies that perfectly forward the momentum of ball touch. • The core veneer Kiri ensures a moderate but easy to activate ground speed. • The natural fiber fleece directly under the outer veneer leads to a harder, carbon-like strike
Handle FL, AN, ST / Wt 80 / Plies 5W,2F / Item SAFCA

COMBO SPECIAL with 2 rubbers
$125.95
Item XSAFCA

ALL+ | 84 | 70 **Blade $60.95**

SUPER CORE CARBON LIGHT

ZERO GRAVITY

andro SUPER CORE CARBON LIGHT blades consist of a Balsa core covered by intermediate Carbon layers. Carbon feeling in combination with an incredibly low weight!

Super Core Carbon Light ALL+

• Equipped with more control by a thinner balsa core with less speed. • Provides benefits in passive playing situations and in the service-return play. Handle FL, AN, ST / Wt 70 / Plies 3W,2C / Item SACLA

ALL+	81	74	Blade $66.95

Super Core Carbon Light OFF

• The Super Core Carbon Light blade with focus on speed. • The hard, carbon typical impact brings advantages in the aggressive, spin-oriented game and for topspin against backspin. Handle FL, AN, ST / Wt 70 / Plies 3W,2C / Item SACLO

OFF	90	70	Blade $66.95

CS V

PURE PERFORMANCE

These blades with a classic construction provide a pure and direct playing feel.

CS5 OFF

• Kiri core, Ayous intermediate layers and Koto outer veneers. Classic structure of five layer blades. • Provided with slightly more vigorous effect compared to CS5 OFF. • Recommended for straightforward attack play close to the table
Handle FL, AN, ST / Wt 82 / Plies 5W / Item SAC5O

OFF	88	75	Blade $38.95

CS5 ALL+

• Solid Kiri wood core, encased by acacia and fineline veneers. • Rock-solid allround blade with good control. Well suited for technique training. • Good mix of pace and ball feel. For safe and error-free allround play. Handle FL, AN, ST / Wt 82 / Plies 5W / Item SAC5A

ALL+	82	75	Blade $38.95

CS 7 BLADE SPECIALS

TAKE SEVEN

Thanks to its seven ply construction the andro CORE 7 blades support you in every situation with relatively hard feedback accompanied by minimal vibrations.

CS7 Tour BLADE SPECIAL

• The key to the noticeable power is the layer of Limba outer wood. • Core and intermediate plies in different thicknesses are perfectly matched together. • Created for players who play consistently and put pressure on the opponent with topspin strokes. Handle FL, AN, ST / Wt 90 / Plies 7W / Item SACST

OFF	92	67	Blade Reg $57.95

CS7 Velocity BLADE SPECIAL

• Pure speed + penetrating power for unconditional offense, provided by five Ayous-plies surrounded by two rigid Hinoki-plies. • The core of more elastic Ayous wood permits dangerous top-spin strokes from half-distance. • For absolute offensive players with good technique willing to take risks. Handle FL, AN, ST / Wt 90 / Plies 7W / Item SACSV

OFF+	94	65	Blade Reg $57.95

BORN FOR DEFENSE

Low speed, thin plywood combination, oversized blade, huge control – these are the parameters describing andro defensive blades

Fibercomp

• Two intermediate fiberglass plies under the outer veneers ensure high bounce and an exceptional feel. • Slightly higher basic tempo (by Kiri core veneer) for occasional topspin play nd changeovers to attack. • The blade for defenders prone to occasional allround play. Handle FL, ST / Wt 85 / Plies 7W, 2G / Item SAFCD

DEF	64	87	Blade $60.95

Defcon

• The ultimate blade for the modern defender with focus on effective counter-attacks. • A carbon fiber amplifies the Ayous core veneer, resulting in less vibration and more straightforward power for targeted attacks. • Thin and sensitive Ayous layers provide maximum ball feeling and high control. Handle FL, ST / Wt 78 / Plies 7W, 2C / Item SADFC

DEF	62	88	Blade $65.95

SUPER CORE CELL

SMOOTH ENERGY! The SUPER CORE CELL handle technology reduces vibrations and helps to build up power for your own rebound. A plus in control and feeling is included!

Super Core Cell OFF

• Same construction as SUPER CORE CELL ALL, but with slightly harder intermediate veneer. • Solid foundation for more power in all strokes. • Hard touch when hitting the ball and pleasant balance of control /speed. • The CELL-blade for the powerful, point-in offensive with topspin from any position. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SASOF

OFF	86	67	Blade $47.95

Super Core Cell ALL

• Maximum error tolerance to compensate inaccuracies in movement. Perfect for technical training and basic stroke techniques. • Large blade surface (156 x 153 mm) and high control, also recommended for modern defenders. • The control freak amoung andro SUPER CORE CELL blades. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SASAL

ALL	78	75	Blade $47.95

XIOM®

SHAKEHAND BLADES FROM XIOM

Paddle Palace: Sole North American Distributor for XIOM

Omega Blades

Omega and Vega Blades are MADE WITH JOINTLESS® WOOD VENEERS – trademarked by XIOM Corp. Many blades are constructed by fabricating together pieces of wood. The OMEGA and VEGA blades are made of wood plies that are all one piece.

Omega Tour

Offensive 7-ply blade, notable for good dwell time, and recommended for a mix of allround topspin and aggressive spin and smash. Made with JOINTLESS® one piece veneer without material - saving joint fabricated structure, trademarked by XIOM. Handle FL, ST / Wt 88 / Plies 7W / Item SXOMT

OFF- 87 66 **Blade $159.95**

Omega Pro

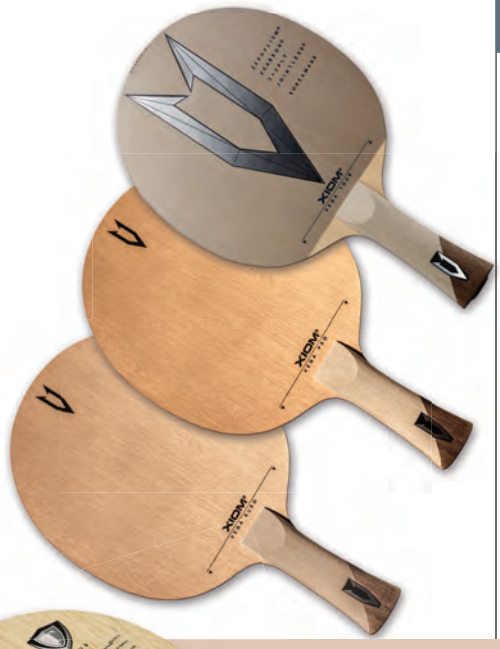

Offensive 7-ply blade constructed with centuries grown natural rosewood veneers with high density for power and superb vibration. JOINTLESS® one piece veneer without material - saving joint fabricated structure, trademarked by XIOM. Handle FL, ST / Wt 98 / Plies 7W / Item SXOMP

OFF 93 64 **Blade $139.95**

Omega Euro

Constructed with 7-ply all natural JOINTLESS® wood veneers -- 4 layers Jointless black ebony and 3 layers Jointless natural wood. Fast offensive blade recommended for a mix of allround topspin and aggressive spin and smash. Handle FL, ST / Wt 97 / Plies 7W / Item SXOMU

OFF 92 65 **Blade $119.95**

Vega Blades - Zephylium + X-Carbon

Vega Tour

Good dwell time, solid feel, excellent when paired with medium to hard sponge rubber.
Constructed with ZEPHYLIUM® - thermoset liquid crystalline polyoxazole fiber and XCARBON® - carbon graphite fiber for table tennis plywood. All wood veneers are JOINTLESS® one piece veneers without material - saving joint.
Handle FL, ST / Wt 87 / Plies 5W, 2Z-C / Item SXVGT

OFF 90 65 **Blade $179.95**

Vega Pro

Offensive speed with good feel, made with five ply wood and 2 composite Zephylium /X Carbon layers.
This new era blade has good feel and is offensive in speed. It is sensitive to the new plastic ball and is ready to enhance your game. Made with jointless wood veneers, which is a first for the table tennis industry. This adds extra stability and consistency. The carbon plies are thin, reducing weight without reducing power or touch. Comes with removable T-Foil plastic layer to protect the top layer from scratching during packaging or transit. T-Foil layer can then be used to protect the rubber sheet after assembly. Handle FL, ST / Wt 88 / Plies 5W, 2 Z/C / Item SXVGP

OFF 91 64 **Blade $159.95**

Vega Europe

Offensive blade made with 5-ply wood and 2-ply Zephylium/X-Carbon construction. The Zephylium allows for maximum spin and control, and the X-Carbon allows for maximum catapult effect. Each veneer is made of single piece wood; they are not jointed from two to one. This gives better feeling and vibration to the player. A T-foil rubber protection sheet is included, for maintenance of rubber and blade. Handle FL, ST / Wt 90 / Plies 5W, 2 Z/C / Item SXVGU

OFF- 89 65 **Blade $139.95**

PRO SPECIAL with XIOM OMEGA V PRO Rubber

$159.95

See Page 6

Stradivarius PRO

Two plies of Aramid Carbon (a mixture of vibration-absorbing soft Aramid and highly elastic Carbon), provides ideal performance for professional offensive players. The blade catches the ball deeply with minimal residual vibration after impact. Results are a combination of exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure.
Handle FL, ST / Wt 85 gms / Plies 5W, 2A/C / Item SXSTV

OFF 91 64 **Blade $99.95** available as PENHOLD

XIOM®

SHAKEHAND BLADES FROM XIOM

Continued

Zetro Quad

This is the blade for topspin. Zylon fiber is directly placed under the top layers to increase the ability to grab the ball. Soft carbon fiber under the middle layers adjusts the overall performance, and the top layer of selected Kiso Hinoki wood guarantees comfortable feel. Making heavy topspin is effortless, and even secure. Players can take the initiative in the game with effective preparatory topspin attack, and keep the initiative with continuous topspin from any distance. Handle FL, ST / Wt 92 gms / Plies 5W, 2C, 2Z / Item SXZEQ

OFF	93	63	Blade $114.95

V1 Quad

High-tech blade provides both super power and precise control. Utilizes advanced "Quad" technology. Two layers of "Energy Carbon" with very high energy transfer efficiency are used directly under the hard surface woods. Another two layers of soft carbon are used inside for adjusting the balance and performance. Lightweight, with extremely large sweet spot and unique feel allowing for very precise control, as well as superb power. Handle FL, ST / Wt 88 gms / Plies 5W, 2C, 2Z / Item SXV1Q

OFF+	95	62	Blade $109.95

V1

Hard, fast, lightweight carbon blade with a thickness of only 5.4 mm, which allows sufficient deformation required by modern aggressive top-spin players. Special hard wood on the surface and "Energy Carbon" directly under the surface, results in a combination of high speed and compact feel. Both close-to-table topspin and hard smash are very easy. Excellent for precise ball placement with blocks. Stability and security of V1 even gives players the advantage in topspin vs. topspin. Handle FL, ST / Wt 85 gms / Plies 5W, 2C / Item SXV1C

OFF-	88	65	Blade $84.95

Axelo

Named for "acceleration". Top layer is Kiso Hinoki wood, which provides a very high level of energy efficiency as well as a comfortable feel. Newly developed Energy Carbon is inserted under this layer, which also provides very high energy efficiency. Overall thickness is about 7.5mm, which makes this a very powerful blade. Amazing speed, but also very good for top-spin or passive blocking. Strong topspin from any distance is the most important advantage.
Handle FL, ST / Wt 92 gms / Plies 3W, 2C / Item SXAXE

OFF+	97	59	Blade $94.95

Strato

Newly developed Energy Carbon layers for a new level of performance and feel. Improved efficiency of energy transfer for more powerful strokes. Kiso Hinoki wood for the outer layers provides a very comfortable and mild feel. Improved control, and excellent for all-round play though it is very fast blade. Topspin is more stable than players expect, and it draws a very sharp trajectory with good control. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXSTR

OFF+	97	60	Blade $94.95

Ignito

The blade for passionate and aggressive table tennis. Ideal weapon for aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put a lot of pressure on the opponent. Light in weight, it needs less energy to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. Recommended for players migrating from all-wood offensive blades. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXIGN

OFF	94	61	Blade $94.95

PRO SPECIAL with XIOM VEGA EUROPE Rubber

$109.95

See Page 6

Allround S

PRO

Xiom Allround S is a classic allround blade of European style construction. Lower and controlled speed provides the opportunity to manage the game against your opponent. Slightly bigger and thinner face combines well with soft /max sponges. Solid and clear feel connects the ball with the player's senses. Perfect for the traditional allround player. Handle FL, ST / Wt 85 gms / Plies 5W / Item SXALS

ALL	73	77	Blade $54.95

Offensive S

Perfect for speedy drives with great speed performance and excellent control from both forehand and backhand. Soft touch at contact offers amazing ball control. Excellent for both modern offensive players with higher/speedy hits and also traditional style players with lower/controlled hits.
Handle FL, ST / Wt 87 gms / Plies 5W / Item SXOFS

OFF-	82	74	Blade $54.95

Extreme S

Piercing speed and destructive power in this classic offensive 7-ply all wood blade. Special layer construction is focused on providing very sharp and delicate control for top-spin drives and defensive blocks. Superb fit for both mid-distance power play and close to the net speed play.
Handle FL, ST / Wt 92 gms / Plies 7W / Item SXEXS

XIOM BLADES COMPARISON CHART page 51

Aria

One of the most powerful all-wood 5-ply blades, recommended for skilled players. Excellent for all-round power play from close to mid to far distance from the table. Thick, medium soft wood outer layer provides a neutral feel and the second layer provides clear feel and optimal balance. Overall thickness is 6.4mm. Hard and fast, but able to catch the ball softly and release it with great control, especially when players attack with topspin.
Handle FL, ST / Wt 84 gms / Plies 5W / Item SXARI

OFF-	86	68	**Blade $64.95**

Aria Lite

Lighter weight version of the Aria. Thickness is 5.8 mm for optimal stability and aggressive topspin strategy. Great for powerful close-to-table topspin. Weight is reduced and control is significantly enhanced. Allows for easy stroke right off the bounce, and for heavy and sharp topspin. Optimized performance for aggressive, close-to-table play. Recommended for aggressive topspin players and for the modern all-round strategic game.
Handle FL, ST / Wt 80 gms / Plies 5W / Item SXARL

OFF-	82	74	**Blade $54.95**

Solo

Unique 7-ply blade developed for continuous topspin or all-round strategic play. Though it has a 7-ply construction it is soft, mild, balanced, and full of stability. The linear relationship between impact strength and the level of rebound provides ideal predictability with exceptional stability. Every technique of table tennis is so easy with Solo. Topspin is quite easy and full of rotation. Hard smash is very safe and full of speed. Block is secure and full of variation.
Handle FL, ST / Wt 91 gms / Plies 7W / Item SXSOL

OFF-	84	67	**Blade $64.95**

THE GLOBAL STANDARD

Nittaku 3-Star Premium 40+ is recognized worldwide as the best table tennis ball. It is made in Japan by Nittaku ball engineering experts with decades of experience in producing balls to the very highest standards. Made of the finest material exclusive to Nittaku, the Premium 40+ is unsurpassed in quality and consistency. It exceeds all ITTF specifications, including roundness, rebound, size, hardness and weight. With both superior longevity and the best feeling, this ball is a pleasure to use. Nittaku Premium 40+ is the Global Standard!

MIYUU KIHARA:
blade: JUIC Fracta
rubber: JUIC NanoSpin
Japan U-10 Girls Champion

Duo

Combination blade for Speedy forehand and Control backhand!

The forehand and backhand sides have a different wood ply formation, an adjustment of the thickness of the wood plies resulting in the perfect blade that provides a speedier forehand and extra touch and control on the backhand. Two plies of titanium contribute to the special feeling and performance.
Handle FL, ST / Wt 85 / Plies 5W, 2T / Item SJDUO

OFF-/ALL	83/75	67/75	Blade $134.95

Brown Carbon

Balsa and Carbon!

Five plies wood and two carbon, with the core made of balsa. Light weight, and with brown carbon close to the surface, the Brown Carbon feels hard and stiff for a balsa blade. Excellent combination for a touch offensive game.
Handle FL, ST / Wt 83 / Plies 5W, 2C / Item SJBRO

OFF-	84	72	Blade $85.95

Dry Heat

Heat Technology for Cool Play!

Adopted (heat technology) HT is applied to dry and cure the wood for an excellent balance and performance for the allround game. Dry-hitting sound and feel at impact.
Handle FL, ST / Wt 85 / Plies 5W / Item SJDRY

ALL+	80	78	Blade $69.95

Lafita *BLADE SPECIAL*

Fast with Great Arc for the Offensive Game!

This 7-ply blade is stiff and fast, with a great arc and surprising control. Coach Stellan Bengtsson said, "I am happy to recommend the Lafita as a very good blade. It is very fast with great arc and great control. It is a little stiffer than other JUIC blades but the feel of the ball is very good. The ball rebounds quickly with a higher arc than the Alpha and Balsa-C." Handle FL, AN, ST / Wt 85 / Plies 7W / Item SJLAF

OFF	92	63	Blade Reg $84.95

Fracta *BLADE SPECIAL*

Soft Feel and Special Touch for Allround and Offensive Game. This 5-ply blade has a soft feel and is outstanding for the allround and offensive game. Stellan Bengtsson reports, "With Fracta, I feel the ball in a great way. The blade has a very nice arc and is actually quite fast on the offensive."
Handle FL, AN, ST / Wt 80 / Plies 5W / Item SJFRA

ALL+	79	76	Blade Reg $69.95

TITANIUM BLADES

Titanium Chop

A relatively fast defensive blade. The JUIC Titanium series, with the combination of meshed Titanium and wood, has been greatly improved with weight and grip. The process of electric-drying system reduces weight by 10-15% and the meshed titanium provides excellent power and speed even with its lightness. Highly recommended with the JUIC Ultima rubber series. Handle ST / Wt 87 gm / Plies 5W,2T/ Item SJTIC

ALL-	69	80	Blade $99.95

Titanium Turbo

Turbo Charged Play! The fastest JUIC Titanium blade! Meshed Titanium+wood with an electric-drying process that reduces the blade's weight by 10-15%. Excellent power and speed even with its lightness. Highly recommended with the JUIC Ultima rubber series. Handle FL, AN, ST / Wt 87 gm / Plies 5W,2T / Item SJTIT

OFF+	97	53	Blade $99.95

Titanium II Allround

Allround wood with flecks of titanium in between the wood plies. Great feel/touch for allround/offensive play. Handle FL, AN, ST / Wt 81 gm / Plies 5W,2T / Item SJTIA

ALL+	79	70	Blade $99.95

Ghost

Great lightweight blade for versatile defensive play! Weighs only 72 grams with oversized head. Excellent for chop, push, block, controlled countering, and surprising smash. Handle ST / Wt. 72 gm / Plies 5W / Item SJGHO

DEF+	59	92	Blade $84.95

PPC JUNIOR PROGRAM BUILDING FOR THE FUTURE

▲ *A laughing break with Coach Christian Lillieroos during a Junior Camp*

Paddle Palace Club Junior Program Reaches One-year Anniversary

The future of Table Tennis is our juniors! Nobody cares about this more than **Sean O'Neill**, a 5-Time USA Men's Champion and 2-Time Olympian. Sean has been the driving force behind the Junior Program of Paddle Palace Club in Portland, Oregon. PPC opened its doors to the general public on October 1st of 2016 and Sean began the junior program two weeks later, coaching enthusiastic bright-eyed kids, including his daughter Kaitlyn, every Sunday morning.

Taking stock one year later, the program has added Thursday after school as a second day each week, and regular monthly tournaments are being incorporated into the mix to give the juniors additional opportunities to compete with other kids. As the program grew this year, training sessions expanded from 60 to 90 minutes to give more table time and extend the drills. As of November 2017, there are up to 30 kids who participate regularly, with new players showing up each week. The youngest players are 5 years of age and the oldest are in high school.

Assistant Coaches Provide Quality Experience

Committed parental involvement by players who love the sport has been a key to the high-quality junior experience. Since the beginning, Coach Sean O'Neill has had coaching assistance from **Tran Nguyen** (daughter My & son Tri), **Thomas Kung** (son Nathaniel & best friend Dustin Leung), and **Oleg Yusimov** (son Liron & daughter Michelle). This allowed for a solid base of players from the start, dedicated to building and learning together as a team. Having multiple coaches also makes it possible for the kids to be easily grouped for specialized and individualized training.

▲ *Kids fill all the tables during Junior Team Practice*

Many of the skills and drills from the ITTF Level One Coaching course make their way into the Paddle Palace Junior program. Last month Paddle Palace Club hosted its first ITTF course led by recent Portland transplant **Christian Lillieroos**. Christian has joined the junior program along with coaches-in-training **Joanne McBride** and **Richard Brzezinski**. **Peng Zhang** (daughter Cheery) has also provided great one-on-one support for new team members working on fundamentals.

The Coaching Program

Each session begins with group exercises that include warm-up laps followed by progressive stretching from head to toe. A different junior player leads the exercises each time with Head Coach Sean assisting in case they forget a muscle group. Often the group begins a training session by playing a favorite "around the world" warm-up game. This is where a coach stands at the center table in a row of 5 tables and returns the single ball while each player hits it back and runs around all the tables to get back into line. When a player misses, they sit out until the final two players play a sudden death point for the championship.

The juniors work on a variety of themes such as consistency, footwork, serve and serve return, looping, lobbing, pushing, and blocking. The kids learn by doing both single ball and multi-ball drills. There is an ample supply of top quality Nittaku J-Top Training balls for the program, and each coach uses a full box for their respective groups. Sometimes the more experienced juniors work directly with the youngest players to help develop their own coaching skills and to better learn how to understand and explain strokes and movement. Playing 5-point "winner-moves-up and loser-moves-down" table games is a big favorite, as well as a fun doubles format where players switch to a different partner for each round. At the end of each training session the kids do 5-7 minutes of circuit training involving push-ups, sit-ups, jumping and side to side movement.

The PPC Junior Program under Sean O'Neill's leadership emphasizes fun as well as work, and teamwork as well as individual development. During the first year the program has welcomed birthday party guests of junior members, participated in Olympic Day, celebrated holidays, and attended PPC Junior Camps. Many of the kids play additional times during the week at PPC with their friends and family, and some take private lessons with PPC's high caliber coaches.

Ethan Kuan earning goal certificates ▶

All Juniors Are Invited!

Whether you are a beginning or advanced junior in the Portland area or just visiting from out of town, the PPC Junior Team would like to invite you to drop in any time to play, or sign up for one of the special Junior Camps at the coolest club in the country! ●

SEAN O'NEILL'S 10 TIPS FOR COACHING JUNIORS

Coach Sean O'Neill with daughter Kaitlyn

1. MAKE IT FUN. If the kids aren't having a good time and eager to participate then you won't be accomplishing much in the long-run. Kids learn best when they play other kids.

2. GET PARENTS INVOLVED... IN A HEALTHY WAY. Having parents work with kids other than their own fosters a real team environment and reduces their own child's feeling of being over coached.

3. ADD VARIETY AND SPICE. Mix it up, and don't always do the same drills the same length of time. Play games one week and drills the next. Focus on different themes each week.

4. WORK BOTH SIDES OF THE NET. While it is very important to focus on technique, don't neglect tactics. Point out when a junior plays the ball to a smart location or sets up a winner.

5. REGULAR COMPETITION. Mix in games at the end of an individual training session or choose an entire session to play games. Keeping results can mimic the experience of tournament pressure.

6. CHANGE UP THE PARTNERS. Keeping the same practice partners too often increases boredom and stifles creativity. Pair up players even if playing levels differ, and all players will benefit. Teach higher-level players to maintain their intensity when they are playing a weaker player.

7. PLAY DOUBLES. Doubles teaches teamwork and has an additional benefit of improving footwork. Encouraging hand signals for serves can help juniors learn how to set up a point and to control the start of the rally.

8. DO PHYSICAL FITNESS. At the end of each session do a series of circuit training to build upper and lower bodies. Push-ups, Sit-ups, Jumping Rope and side to side movements are a must for building upper body strength and endurance.

9. TEAM UNIFORMS. Nothing makes a kid prouder than to be part of a good looking well-outfitted team. Come up with team colors and add names to the back of the jerseys.

10. TEACH MORE THAN THE SPORT. Emphasize healthy competition and improvement, but also look for opportunities to build confidence and improve problem-solving skills. Creating a strong social element to the program enables players to develop lasting friendships and to share many memorable moments that can last a lifetime! ●

HOW TO READ THE SHAKEHAND BLADES CHART

Turn to page 15 for Blade Selection Guide

2 **PLY** [Number of layers or plies] W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon

3 **THICKNESS** [Thickness of blade, shown in millimeters.]

Paddle Palace is happy to assemble new blades with rubber at no extra charge upon request. One rubber sheet will cover one side of a blade. Rubber comes in red and black.

4 **BLADE MEASUREMENTS: LENGTH/WIDTH/HANDLE LENGTH** The length, height, and width of the blade and handle length are shown in centimeters.

5 **WEIGHT:** The average weight of each blade is indicated in grams. Individual weights may vary.

6 **CLASS:** OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. The rubber sheet that is applied to the blade will naturally affect the speed of the paddle.

7 **SPEED:** The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.

8 **CONTROL:** The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

ABOUT PENHOLD BLADES

THERE ARE two main styles of penhold blades: Chinese and Japanese. The Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than a shakehand handle. The Japanese-style penhold has a handle with a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more squarish in shape than the Chinese-style penhold, but it can vary from roundish to squarish, so check the image. Penhold-style blades are used by fewer than 10% of players in North America, although the popularity in Asia is 20% to 40%, with the younger players favoring the shakehand style.

All Chinese-style penhold blades (C) are suitable for putting either one or two rubbers on the blade. Some Japanese-style penhold blades are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

See the Blade Selection Guide on page 15 for information about choosing Blades and Combo Specials, and see page 63-65 for the Penhold Blades Comparison Chart. •

CARBONADO

High Speed + Great Stability

NEW

Carbonado 45

- Constructed with Carbon layers in a 45 degree angle
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness
- High trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control
- Wide personalized sweet spot • 64 gram Carbon fibre per m2

Handle C / Wt 87 / Plies 5W, 2C / Item PSC45

OFF+ 93 63 **Blade $189.95**

Carbonado 290

- Constructed with carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- 200 gram carbon fibre per m2. A thicker TeXtreme® carbon fibre for increased power and carbon feel.
- High personalized sweet spot.

Handle C / Wt 87 / Plies 5W, 2C / Item PSC290

OFF+ 99 58 **Blade $179.95**

Carbonado 245

- Constructed with carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- 200 gram carbon fibre per m2. A thicker TeXtreme® carbon fibre= more power + carbon feel.
- Wide personalized sweet spot.

Handle C / Wt 87 / Plies 5W, 2C / Item PSC245

OFF+ 99 58 **Blade $199.95**

Carbonado 90

Same processes/quality materials as Carbonado 145 and 190, but with **64** gram per m2 carbon fiber (Carbonado 145 and 190 contain 100 gm/m2). Expert craftsmanship + performance + control and wood feel! Carbon layers are at a 90 degree angle, giving flexability. Blade has a stiff feel, great stability and speed. Longer, flatter trajectory makes it an excellent choice for those wanting to command gameplay with high speed strokes. High personalized sweet spot.

Handle C / Wt 90 / Plies 5W, 2C / Item PSC90

OFF+ 93 63 **Blade $169.95**

Carbonado 145

Carbon layers in a 45 degree angle w/torsional bendability, for more flexibility and stiffness. High trajectory makes it a perfect choice for offensive play for good speed and stability and excellent control. The Carbonado 145 with torsional bendability gives a wider Sweet Spot.

Handle C / Wt 87 gm / Plies 5W,2C / Item PSC145

OFF+ 98 60 **Blade $199.95**

Carbonado 190

Constructed with carbon layers in a 90 degree angle with flexural bendability, giving the blade a stiff feel with great stability and high speed. The longer and flatter trajectory makes it an excellent choice for players who want to dominate play with high speed strokes. The Carbonado 190 with flexural bendability gives a higher Sweet Spot.

Handle C / Wt 87 gm / Plies 5W,2C / Item PSC190

OFF+ 98 60 **Blade $179.95**

Clipper Classic

Outstanding fast blade for powerful play. Clipper wood is used by many Asian world-class players.

Handle C / Wt 88 gm / Plies 7W / Item PSCLIN

OFF 88 68 **Blade $69.95**

Carbo 7.6 WRB

Very fast blade with maximum touch and feel. Microscopic carbon layers between each layer of wood increases speed but keeps natural movement and resilience.

XIOM®

PENHOLD BLADES from XIOM

Stradivarius
Two plies of Aramid Carbon (vibration-absorbing soft Aramid+highly elastic Carbon) makes this blade ideal for professional offence play. Ball goes deep in blade with little vibration after impact. Exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure. Handle Chinese / Wt 81 gms / Plies 5W, 2C / Item PXSTVC

OFF 91 64
Blade $99.95

Ignito
For passionate, aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put pressure on the opponent. Lightweight makes it easier to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. For players migrating from all-wood offensive blades.
Handle Chinese / Wt 84 gms / Plies 3W, 2C / Item PXIGNC

OFF 94 61

OFF 88 65 **Blade $39.95**

Power G8

Power G8 has classic 5-ply wood offensive structure with good handling. The perfect combination of friction and clean striking makes it perfect for close to the table quick loop drives. Handle C/Wt 82/Plies 5W/ Blade $39.95 /Item PCPG8

OFF- 83 72 **Blade $39.95**

TG7-SP

The TG7-SP is different from a traditional 7-ply blade. The thin and high elastic materials create a progressive effect so that the power of the blade can be released immediately. The blade maintains an outstanding balance between speed and spin. Handle C/Wt 89/ Plies 7W/Item PCTSP

OFF+ 98 56 **Blade $139.95**

TG7-CP2

TG7-CP2 utilizes "High pressure ballonet" technology to create high elasticity and excellent offensive power from mid to long distance. It has 7-ply construction with ebony wood outer layers. The special material and structure offer good control and exquisite handling. Handle C/Wt 94/Plies 7W /Item PCTC2

OFF- 86 68 **Blade $119.95**

COMBO SPECIAL
$144.95
Item XPCT7P2 with 2 rubbers

TG7-P *COMBO SPECIAL*

High pressure ballonet technology is applied to the TG7-P blade. The integrative structure of the 5 interior timber layers form a "ballonet" which reduces energy waste and creates a fast offensive weapon. Handle C/Wt 87/Plies 7W/Item PCT7P

OFF 88 65 **Blade $79.95**

Dipper SP500

The Dipper SP500 uses Aramid and Carbon for fast speed and substantial initial power. Handle C/Wt 90/ Plies 5W, 2A/C/Item PCDS5

OFF- 89 64 **Blade $89.95**

Wind Series W3020

Wind Series blades help developing players understand the complexity of table tennis in short time. They are developed for those who have mastered basic technique and want to develop more. The selection of materials and structures brings you a brand new experience suitable to your personal style. Wind Series 3020 is excellent for the allround player. Handle C/Wt 89/Plies 5W/Item PCW32

ALL 76 77 **Blade $29.95**

PENHOLD BLADES

Yasaka

Silver Carbon
Great for attack play and fast, controlled counter block. Many carbon blades are fast but difficult to handle, but cutting edge gluing process of two carbon layers keeps the control. Large sweet spot. Handle C/Wt 88gm/Plies 5W, 2C / Item PYSLCC

OFF | 94 | 65 | **Blade $79.95**

Extra Offensive 7 Power
Superior offensive weapon. Hard outer veneer combines with medium hard second veneer + thin, light layer of carbon. Gluing and pressing process improves the balance between speed and control. Lacquered surface. Handle C / Wt 87 gm / Plies 5W,2C / Item PYEO7C

OFF+ | 96 | 62 | **Blade $69.95**

Galaxya
Developed by Yasaka's in Sweden in collaboration with Japanese players. Fast, powerful blade with inner veneers of varied thicknesses blended for basic power; medium soft outer veneers add ball feel. Double lacquered surface. Handle C / Wt 92 gm / Plies 7W / Item PYGLXC

OFF | 95 | 64 | **Blade $69.95**

Extra Special
Ultimate pure all-wood blade for strong power strokes. Hard inner veneers + soft middle veneer add power without vibration. Surface veneers are of select hard walnut. Handle C / Wt 90 / Plies 7W / Item PYEXTC

OFF | 92 | 64 | **Blade $74.95**

Ma Lin Extra Offensive PRO
PRO SPECIAL with YASAKA Mark V Rubber

$99.95

See Page 6

Excellent speed in attacks and blocking. Large sweet spot. Surface is lacquered at factory for speed and durability. Handle C/Plies 5W/ Wt.82 gm/Item PYMAEC

OFF | 89 | 67 | **Blade $51.95**

COMBO SPECIALS

Ma Lin Soft Carbon
COMBO SPECIAL

$137.95

Item XPYMACC2 with 2 rubbers

One of the best control carbon blades. Large sweet spot for consistency. Great for block, loop, counter, touch. Handle C/ Plies 5W,2C/ Wt 85 gm/ Item PYMASC

OFF- | 88 | 68 | **Blade $72.95**

Ma Lin Carbon
COMBO SPECIAL

$137.95

Item XPYMASC2 with 2 rubbers

Olympic Gold Medalist Ma Lin appreciates the powerful blocking and looping of this blade. Little vibration due to high quality wood/carbon. Handle C/Plies 5W,2C/Wt 85gm/Item PYMACC

OFF | 95 | 60 | **Blade $72.95**

MA LIN:
blade: YASAKA Ma Lin Carbon / rubber: YASAKA Rakza 7
- *Olympic Gold Medalist 2008 in Singles, Doubles, & Team*

HOW TO READ THE PENHOLD CHART

1 Handle C=Chinese style. J-1 = Japanese style designed for one rubber. J-2 = Japanese style designed for either one or two rubbers. Ergo FL = Ergonomic.

2 PLY [Refers to number of layers or plies] W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon

3 THICKNESS [Thickness of blade, shown in millimeters.]

4 BLADE MEAS.: LENGTH / WIDTH The length [height] and width of the blade are shown in centimeters.

5 WEIGHT: The average weight of each blade is indicated in grams. Individual weights may vary.

1 Handle Shapes

6 CLASS: OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. Rubber sheets that are applied will affect the speed of the paddle.

7 SPEED: The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.

8 CONTROL: The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

ABOUT RUBBER

How To Choose

Rubber sheets come as a square in a sealed package. The rubber is custom-assembled to a blade after the player makes their blade and rubber choices. Paddle Palace will assemble rubber to the blade as a free service upon request. One rubber sheet covers one side of a blade, so shakehand blades require two rubbers. ITTF regulations require red rubber on one side and black on the other.

4 Main Rubber Types – Smooth, Short Pips, Long Pips, and Anti-Topspin

- **Smooth:** Most players use smooth rubber, also called "inverted" rubber. The surface is smooth with a layer of sponge underneath. Smooth rubber provides the most spin and is used by over 85% of tournament players. Hitters, loopers, all-around players and defensive players all use smooth inverted rubber.
- **Short Pips**, or "pimpled" rubber, has a bumpy surface and usually has a layer of sponge underneath. It is used by players who do not execute a great deal of spin in their game. Some close-to-the-table hitters, all-around players, and defensive players use short pips. Short pips often provide more control for players who have difficulty playing against spin. "Hard rubber" is the term for short pips rubber with no sponge, used primarily for "Classic" or "Hardbat" play.
- **Long Pips** rubber has extra-long pips that reverse the spin of the opponent. The unpredictability of the spin from long pips can give the long pips player an advantage over the opponent who has not learned to read the spin. It is difficult to play offensively with long pips, so most players who use long pips only use it on one side.
- **Anti-Topspin** rubber has a smooth surface and does not generate much spin or speed. Anti rubber neutralizes the spin of the opponent. Most players who use anti, block with it on one side and use a different rubber on the other.

Choosing Rubber

- **Speed vs. Spin:** With so many rubber sheets, how do you choose? The Paddle Palace Rubber Ratings are a good place to start. Look at the speed and spin ratings of the rubber and match one to your playing style. Offensive players who use topspin, drive, loop, and smash usually prefer rubber with a high speed rating, while defensive players who primarily use underspin, chop, push, and block usually prefer slower rubber. Loopers and choppers prefer rubber with a high spin rating. The faster or spinnier a rubber is, the harder it is to control. Rubber that is spinny also is more affected by the opponents' spin.
- **Sponge Thickness** affects the speed of the rubber. Thicker sponge = speed and somewhat more spin. Thinner sponge = more control. Thicker sponge adds weight to the paddle and gives a more cushioned feeling. Thinner sponge is lighter and gives a woodier feeling. Offensive players prefer 1.8 to 2.5mm. Allround players prefer 1.5 to 2.0mm. Defensive players prefer OX (no sponge) to 1.6mm. Loopers prefer thicker sponge. Choppers prefer thinner sponge. Developing players who need more control should choose a thinner sponge that that fits their playing style.

Rubber Ratings

Rubbers are assigned ratings for Speed, Spin, & Control on a scale of 10 to 99. The higher the rating, the higher that attribute. Paddle Palace ratings use a universal scale which differs from the manufacturers' ratings so that rubbers from all brands can be compared. Ratings are intended only as a tool for helping to select rubber. Naturally, speed, spin, and control are greatly affected by an individual player's skill, strokes, playing style, and blade.

Each Paddle Palace catalog includes a comparison chart of all the rubbers so you can see them at a glance. Go to PaddlePalace.com and click on "Chart View" for an interactive comparison chart. You can view by categories or brands, and click on columns to numerically order the ratings for each attribute. We also have charts online for blades, tables, and paddles.

Is Your Rubber Legal?

The USATT and ITTF have several regulations to determine if a rubber sheet is legal to use in sanctioned competitions. To be legal, a rubber sheet must meet all of the following conditions:

Each side of the blade used for striking the ball must be covered with ITTF approved rubber, either pimpled rubber (long pips or short pips), or inverted rubber (smooth or anti-spin). A list of ITTF-Approved rubbers is published on the ITTF (International Table Tennis Federation) website at www.ittf.com. If a rubber is ITTF-Approved, then it is also approved for USATT sanctioned events.

The rubber on one side of the blade must be red and the other side must be black. If you only use one side of the blade for striking the ball, you do not need rubber on the other side. For example, some penhold players only hit with one side of the blade and they only put rubber on one side. In this case, the unused side must be colored the opposite color (either red or black) from the side with rubber. Many penhold players use a "paint sheet" on their blade to comply with this rule. However, if you hit the ball with the side that does not have rubber, you lose the point!

Rubber sheets must extend up to, but not beyond, the limits of the blade face, except that the part nearest the handle and gripped by the fingers may be left uncovered or covered with any material. The rubber (and all layers of the blade) must be continuous and of even thickness throughout. The surface must be matte (not shiny). Slight deviations from continuity of surface or uniformity of color due to accidental damage or wear may be allowed provided that they do not significantly change the characteristics of the surface.

Pimpled rubber (pips out) must have the pimples evenly distributed over its surface at a density of not less than 10 per cm2 and not more than 30 per cm2. Length of the pips must be uniform and no longer than 2mm.

Inverted (smooth) rubber may have a total thickness no more than 4mm, including sponge and rubber together. The rubber layer (not including sponge) may have a thickness no more than 2mm. There is no maximum thickness stipulated for the sponge thickness alone.

Rubber sheets may not have any physical, chemical or other treatment applied that affects the characteristics of the rubber or sponge. This means no more speed glue! Speed glue and elements such as baby oil that expand the sponge, or sticky solvents used on the surface of the rubber, change the characteristics of the rubber and make it illegal for use in USATT and ITTF sanctioned events.

Confused by all the regulations? Don't be uncertain. If you buy rubber at **Paddle Palace** you know it is legal! Paddle Palace only carries USATT and ITTF approved rubbers.

- **Official Rules of Table Tennis**
- **ITTF Racket Testing Video**

The ITTF Racket Testing Video shows an official performing and explaining the step-by-step racket testing for an international competition. He checks for ITTF rubber approval then does the four tests for Flatness, Thickness, VOC gas, and Gloss.

Taking Care of Your Table Tennis Rubber

Table tennis rubber is one of the biggest investments players make in the sport. A new sheet of rubber, right out of the package, is beautiful and clean and fresh. As soon as you play with it – in no time at all – dirt, oil, dust, grime, nicks, and dead spots find their way onto your originally pristine rubber. Without proper cleaning and care, your rubber will get old quickly. So it is a good idea, both performance-wise and budget-wise, to do everything you can to prolong the life of your rubber.

Clean your rubber!

Dirty rubber will cause the surface to be less tacky and spinny. It will also play inconsistently due to the surface of some areas being different from others. This results in a lack of touch. When you see players breathe on the racket and wipe it with their hands, usually it is because they have noticed their rubber has a deader spot, or they are ensuring against it. Although in a pinch it is tempting to clean your rubber in this way, it is not recommended! The less you touch the surface of your rubber with your fingers, the longer it will last.

It is best to use a cleaner that is specifically made for table tennis rubber. People sometimes ask if it is ok to use household detergent. We advise against this, because these often have chemical elements that can leave unwanted residue on your rubber, can cause it to deteriorate it too quickly, and/or it can have solvents that will fail a racket test.

Using plain water is a safe option. However, water will not remove some oils from your rubber. It does not give the desired back-to-newer-condition that rubber cleaner does.

Spray one or two sprays of cleaner on one rubber, then wipe it with a sponge or lint-free cloth. Most kitchen sponges won't do because they leave bits of sponge on your rubber, and many towels are too abrasive or leave pieces of lint. For this reason, we recommend a table tennis sponge. Players here like the Nittaku Clean Sponge because it is good quality, small, dense, and has just the right amount of absorbancy. It also comes in a clear soft plastic case that keeps it clean between uses. Many people like bigger, fluffier sponges like the Tibhar Combi Sponge. Use one side of a sponge to spread the cleaner on the rubber, and the other side to wipe off excess cleaner in long straight strokes.

When should you clean your rubber? Always clean it at the end of each playing session. Also clean it any time it seems dirty or you notice decreased or inconsistent performance.

Rubber Cleaner
Page 115

Cover your rubber in plastic!

As soon as you open a new rubber sheet, when it is no longer covered in the plastic package, it starts to lose its newness. Even new and unused paddles will deteriorate over time. When rubber is covered in plastic, it stays new much longer. The plastic protects the rubber surface from air and elements, and keeps it from inadvertently rubbing up against anything, including your paddle case.

Our favorite plastic covering is adhesive rubber protectors, like the Nittaku Adhesive Rubber Protector, or Donic Formula Protection Sheets, or DHS Adhesive Rubber Protectors. We like adhesive protection sheets because they actually stick to the rubber. No air gets to the rubber and the sheet stays on. Protection sheets come in squares. You can cut it to fit the size of your rubber, or cut it slightly bigger than your rubber, or leave it in squares as long as it fits in your paddle case.

Protection Sheets & Sponges
Page 117

Keep your paddle in a case!

After you clean your rubber and cover it in plastic, then put it in a paddle case. Cases provide padding and protection, they keep the paddle out of direct sunlight, and they help keep it clean. The best case is one that is roomy enough to insert and remove your paddle without the rubber being rubbed against the case. We also recommend using a case with an opening that allows you to insert and remove the paddle by the handle so that it is not necessary to touch the rubber.

Keep your paddle at room temperature and away from sunlight. Do not leave rubber sheets or your paddle in a hot car.

Paddle Palace Cases
Page 124

Use edge tape!

Edge tape around the edge of your paddle makes a significant difference in the number of nicks and splits on your blade edge and it helps keep your rubber edges from chipping. Our pros at Paddle Palace prefer edge tape that covers some or all of the rubber in addition to the blade edge.

Eventually you will need to change your rubber or get a new paddle. But if you take care of it, your rubber will last a whole lot longer!

Edge Tape
Page 116

DONIC
TUNED TO PERFECTION

bluestorm

A comprehensively thinner top surface rubber, subjected to high tension, allows space for a thicker sponge - generating extra power and speed. The DONIC Bluestorm Series offers noticeably greater acceleration while retaining its outstanding spin and speed characteristics, making the latest trend. The thinnest sponge is 1.9 mm, middle sponge thickness is 2.1 mm - and the thickest variation is called max+, because this sponge is even thicker than previous max versions.

Bluestorm is available in three versions: Z1, Z2, Z3. Select your own Bluestorm!

Bluestorm Z1 *A LIGHTNING STRIKE!*

A lightning strike! Bluestorm Z1 with its medium pored sponge and short, wide pimple structure is the hardest and fastest of the three Bluestorm versions. It has immense power. However, in order to engage with so much horse power, a competent driver is required behind the wheel. A well trained player, master of the fastest game, will find Z1 to be a lethal weapon.
Sponge 1.9, 2.1, Max Item: RDBZ1

97	97	69	$49.95

Bluestorm Z2 *A POWERFUL STORM!*

A Powerful Storm! Bluestorm Z2 has a long, thin pimple structure and a large pored sponge. This 47.5° medium hard sponge is ideal for many players. One feels the storm and its power with the first contact and can direct this energy where one wants. Great speed, enormous rebound, with excellent spin and speed characteristics.
Sponge 1.9, 2.1, Max Item: RDBZ2

95	97	70	$49.95

Bluestorm Z3 *A THUNDERBOLT!*

A Thunderbolt! Bluestorm Z3 with its large pored 42.5° sponge is considerably softer. This makes a difference. One not only feels it but also hears it. Lovers of freshly glued rubbers will delight in the sound. An attacking stroke with Bluestorm Z3 sounds like the crash of thunder, yet the topspin player remains in full control.
Sponge 1.9, 2.1, Max Item: RDBZ3

91	97	73	$49.95

ACUDA BLUE

The Acuda Blue rubber P1 Turbo, as well as P1, P2, P3, are a pleasure to play with, a rubber to be at ease with. It has the latest in sponge technology – the blue sponge with medium sized pores is softer than previous sponges, despite having a higher degree of hardness. Grippy smooth surface and new inner pimple geometry, extra space in between the inner longer pimples. Ball return is excellent, with maximum control and satisfying sound, and fine touch.

Acuda Blue P1 Turbo

A packet of strength for the uncompromising attacker with optimum speed + power combined with an easy feel. An impressive result of the most modern technology, it offers greater speed while retaining its legendary control. All is made possible by a unique new pimple formation. The P1 Turbo is the most dynamic and hardest rubber from the Acuda series. Since the distance between the pimples is wider and the pimples themselves are smaller, the rubber actually plays softer.
Sponge 1.8, 2.0, Max Item: RDAPT

96	96	70	$49.95

Acuda Blue P1

Medium hard, the dynamic attacking version for the offensive game.
Sponge 1.8, 2.0, Max Item: RDAP1

95	95	71	$49.95

Acuda Blue P2

Medium soft, all-round attacking version, the gold standard of an all-round rubber.
Sponge 1.8, 2.0, Max Item: RDAP2

93	95	72	$49.95

Acuda Blue P3

Super soft, excellent control with satisfying sound, for all-round players.
Sponge 1.8, 2.0, Max Item: RDAP3

88	96	74	$49.95

bluefire

MAX CATAPULT MAX ARC

Bluefire Big Slam

For all those who loved and have never forgotten the sound of the old speed glue times, there is now the new Bluefire Big Slam. This extremely soft blue sponge produces more sound - it really rocks! Added to this is the high grade grippy and spinny top surface rubber of the Bluefire series: The perfect combination! Sponge 1.8, 2.0, Max Item: RDBMB

89	94	74	$49.95

BLUEFIRE M 1 TURBO • M1 • M 2 • M 3

Available with DONIC Ovtcharov Carbospeed blade as a PRO SPECIAL. See page 5

Bluefire M1 TURBO

PRO

Highest level high-end rubber sheet. Small changes to sponge structure plus new pips formation enhances dynamic and spin qualities. Top surface offers extra spin. Slightly harder sponge (50°). Great for powerful attackers and offensive players. Sponge 1.8, 2.0, Max Item RDBMT

96	97	68	$49.95

Bluefire M1

With a medium hard sponge, very direct, highly dynamic, extremely spinny. Recommended for top players or players who practice a lot and prefer to use harder rubbers.
Sponge 1.8, 2.0, Max Item RDBM1

96	93	69	$49.95

Bluefire M2

With its medium sponge, it combines the perfect balance between speed, catapult effect, and feel. In combination with fast, stiffer blades, it presents its optimum potential. Recommended for players who like to play with medium hard rubbers and attach high importance to spin and speed with optimum feeling. Sponge 1.8, 2.0, Max Item RDBM2

91	94	70	$49.95

Bluefire M3

Combined with a soft, dynamic sponge. Perfect adjustment of the soft version has resulted in precise feel, excellent spin, and distinctive sound. Recommended for players who prefer soft rubbers with perfect control and good speed. Also for aggressive all-round players. Sponge 1.8, 2.0, Max Item RDBM3

88	95	73	$49.95

BLUEFIRE JP 01 TURBO • JP 01 O JP 02 O JP 03

Bluefire JP 01 TURBO

High end rubber sheet at highest level. Small changes to the structure of the sponge combined with a new pimple formation ensure that this Turbo has enhanced dynamic and spin qualities. Same sponge hardness as JP 01 (47.5°). Recommended for offensive players who value good control. Sponge 1.8, 2.0, Max. Item RDBLJT

95	94	69	$49.95

Bluefire JP 01

A very consistent rubber which is suitable for most players. The quickest and hardest sponge version (47.5°), especially recommended for close to the table attacking players as well as those who prefer to play away from the table.
Sponge 1.8, 2.0, Max. Item RDBLJ1

94	92	70	$49.95

Bluefire JP 02

This rubber with open-pored sponge, in the medium hardness range (45°), produces a perfect combination of spin, speed and control. Ideally suited for attackers and powerful allround players who require all these qualities in one rubber. Sponge 1.8, 2.0, Max. Item RDBLJ2

93	93	71	$49.95

Bluefire JP 03

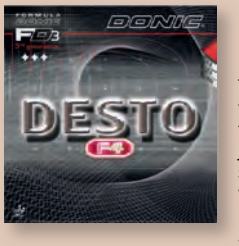

Extremely grippy, taut, though elastic top surface rubber is combined with softer sponge (42.5°). Ensures outstanding feel with maximum control. Great for attackers as well as power-allround players who require maximum control to return the ball under pressure in any situation.
Sponge 1.8, 2.0, Max. Item RDBLJ3

90	94	72	$49.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

DONIC
TUNED TO PERFECTION

DESTO SERIES

Available with DONIC Bluefeeling blade as a PRO SPECIAL. See page 5

PRO

Desto F4

The perfect introduction to Formula DONIC, for ambitious players who want to change to rubbers with inbuilt speed glue effect. Great for those who seek clever placement and variation in play and not just brute force. Provides an introduction to FORMULA DONIC (inbuilt speed glue effect) - for the improving ambitious player. Soft sponge, with slightly reduced speed glue effect, combines control of classic rubbers with the dynamic of the modern generation of rubbers. Sponge 2.0, Max Item: RDDF4

79	88	77	$36.95

Desto F1 Plus

First class update (FD3 Generation) of Donic's best selling, much loved Desto F1 (highly regarded in Asia), with inbuilt speed glue effect. Slightly harder, speed-optimized sponge ensures more dynamic play, while retaining a slightly flatter ball arc, plus an increased playing life (Lifetime PLUS). • Lifetime PLUS: The number of possible playing hours advanced by about 50%. • Catapult PLUS: Catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions. • Tension PLUS: Improved inner tension with feeling of even more "speed glue" energy. Sponge 2.0, Max Item: RDDFP

93	92	70	$39.95

These rubber sheets have DONIC FORMULA technology with strengthened inbuilt speed glue effect. Fast + spinny. DESTO F1 has even more speed. Improved durability.

Desto F3 Big Slam

Loud sound, without speed glue! Distinctive sound is permanently incorporated into BigSlam, which is softer but not slower than the popular DESTO F3. Amazing ball control with the same effect as optimum speed glue. For players who used speed glue and value sound and ball control qualities rather than maximum speed. Sponge 2.0, MAX. Item RDDFB

85	88	73	$37.95

Desto F1

The fastest rubber from the DESTO Formula series! More speed and spin due to built-in speed glueing effect! A high-tech weapon for well-trained players of ability, who want more speed. Good sound, softness, plus speed and spin. Sponge 2.0, MAX. Item RDDF1

92	84	70	$37.95

Desto F2

The bridge between F3 and F1, giving great control at high speed. F2 is soft, has a good feel and the full sound of speed glue. It produces more speed than traditional spin elastic rubber. Slower than F1. Sponge 2.0, MAX. Item RDDF2

89	85	71	$37.95

Desto F3

Built-in speed glue effect, with same speed but more control. Desto F3 is somewhat faster than a traditional spin elastic rubber. Soft, dynamic, w/excellent control, and great sound of speed glue. Speed glue must not be used. Sponge 2.0, MAX. Item RDDF3

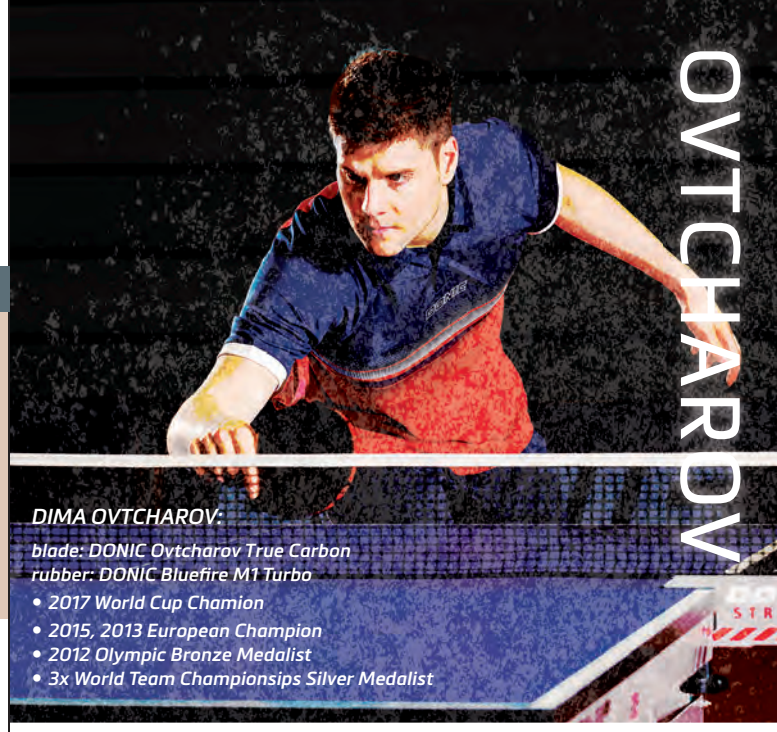

85	86	73	$37.95

Baracuda Big Slam

Now even more vicious: more sound & control due to softer sponge. Built-in speed glue effect produces fantastic spin. Ball leaves blade in a higher arc, with increased rotation to stabilize the flight and increase speed and placement even for top players. Topsheet minimizes abrasion for more playing hours. Sponge 1.8, 2.0, MAX. Item RDBAB

87	95	71	$43.95

ACUDA Formula High Spin

Acuda S1 Turbo

Spinny, accurate, top class rubber for performance attack. Built-in speed glue effect enhances speed and acceleration. A precision rubber for accuracy at high speeds. Despite its speed, it has perfect feel -like earlier speed glue days. Good length when playing fast loops. Sponge 1.8, 2.0, MAX. Item RDACT

96	94	68	$46.95

Acuda S1

Close to or away from the table it is possible to play "loop-loop" as in the days of speed-glued rubbers. Despite a medium-hard sponge, ACUDA S1 is easily controllable and great feel, even in an awkward situation. Basic character: spin-focused, high precision fast rubber. Play style: aggressive, first ball attack, close to the table. Sponge 1.8, 2.0, MAX. Item RDACU

95	92	69	$46.95

Acuda S2

Ideal for attacking players who have used soft rubbers with speed glue. Spin-optimized and fast, with medium-soft, large-pored sponge, and precise feel. You get speed and a uniquely loud sound. Great for close to- and away from- the table for topspin/topspin duels. Great for power allrounders and attacking players. Sponge 1.8, 2.0, MAX. Item RDAC2

90	93	71	$46.95

Acuda S3

Acuda S3 is spin-optimized, fast, paired with perfect sound. The very soft sponge increases feel and sound, and offers sufficient speed for powerful spin and a positive block game. Unique sound! Recommended for players with an allround style who require excellent control. Sponge 1.8, 2.0, MAX. Item RDAC3

87	94	72	$46.95

Baracuda

Built-in speed glue effect produces fantastic spin. When the ball leaves the blade, higher arc results in increased spin + rotation. The ball is stabilized, fast and accurate. Top rubber surface is more durable than similar rubbers and less prone to damage. Sponge 2.0, MAX. Item RDBAR

90	94	70	$43.95

TRACTION SERIES

Traction III

Chinese know-how + European quality! Mid-hard sponge, developed with newest Macro-Cell Technology, ensures maximum catapult and speed. Very spinny, elastic top sheet is specially designed for the the new plastic ball 40+. The perfect combination of rubber and sponge ensures optimum high performance rubber. Traction III is especially designed for offensive topspin players acting close to the table as well as from half distance. Sponge 2.1 Item: RDTR3

93	94	70	$49.95

Traction II

DONIC's successor to MS Soft & MS Pro. Chinese rubber to fit European requirements. Result: Top acceleration + excellent bounce off the blade. Very spinny! Suitable for topspin players who like to play close as well as away from the table. Perfect combination of grippy top surface with speed and a medium hard, super-elastic sponge. Sponge 2.1 Item: RDTR2

87	91	72	$52.95

VARIO SERIES

Vario Sound

Unique sound system! Soft sponge and very elastic top surface rubber gives a distinctive loud sound when topspinning. This rubber is the softest of the three Japanese Vario rubbers and is very spinny, with a high ball arc and fast topspin. Great for attack that combines stiff blade with soft rubbers, or for allround game of spin+control when striking the ball. Sponge 2.0, MAX. Item RDVAO

86	92	71	$49.95

Vario Big Slam

Perfect feeling with fantastic sound! First Vario rubber to be made in Germany, with world-famous Formula DONIC technology with built-in speed glue effect for the modern game. Soft, 35-degree sponge gives perfect feeling for controlled all around play, with some offense. Ideal for spin/rotation players who prefer soft rubbers with a fantastic sound when hitting the ball. Sponge 2.0, Max. Item RDVAB

80	84	76	$41.95

Vario

One of the best selling rubbers world-wide. Semi hard sponge, high grip, outstanding spin elasticity, high speed, good control. As its name indicates, this rubber is recommended for all modern playing strategies. Sponge 2.0, MAX. Item RDVAR

81	80	75	$32.95

COPPA Formula High Speed

Coppa

For aggressive offensive play with topspin, counter topspin and block, & winning points with hard strokes. High-elastic, spinny surface with soft, dynamic sponge = outstanding control. One of Donic's best-selling rubbers. Used by J.O. Waldner and Jörgen Persson to win the World Champs titles in men's singles. Sponge 2.1, MAX. Item RDCOP

82	82	70	$37.95

Coppa Tenero

Well liked soft-sponge version of the bestseller World Champion rubber, COPPA. Coppa Tenero has the same outstanding spin abilities. Due to its soft sponge it grants an absolute ball control with a slightly reduced speed. Excellent ball feeling. Sponge 2.1, MAX. Item RDCOT

76	82	76	$44.95

Akkadi Taichi

Very grippy top surface for maximum spin, and rotation.
Used by many world top ranked Asian players on forehand. Special black sponge makes this harder and stiffer than the red version. Red Akkadi Taichi is more elastic with even better bounce of the ball. This black version is recommended for the forehand. Great for serve and the first top spin in the rally. Sponge1.5, 1.8, 2.0. Item RDAKK

76	88	76	$29.95

Liga Plus

Combines the tried and tested Liga top sheet with a new more flexible sponge. This combination guarantees even more playing fun with relatively high grip and spin. The rubber with the perfect price-performance ratio.
Sponge 2.0 Item RDLIP

63	59	81	$24.95

Slice 40

Smooth rubber with a sophisticated pips-in design, with a soft rubber surface tuned for defensive strategies. Quicker than the standard version Slice rubber. It offers more chop possibilities and more trickiness when defending with the 40 mm ball. Great control, but very good offensive characteristics for top-spin and counter attacks. Sponge 1.2, 1.5. Item RDSLI

58	93	84	$42.95

SHORT PIPS RUBBER

Baxter F1-A

Fast short pips-out rubber. The typical softness of the sponge gives a superb feeling for the ball. Baxter F1-A masters ball control in slow rallies, yet gives explosive power for fast strokes. This is the result of the integrated molecular tension of Formula Donic technology. Sponge 2.0. Item RDBAF

89	52	77	$44.95

LONG PIPS RUBBER

Piranja Tec

Technic defense long pips rubber for classical defenders. Formula DONIC technology results in exceptional long pips – soft, very elastic, with excellent gripping qualities. The player gets more backspin against topspin than with other current technology. Pips are faster but easier to control because of the inbuilt "speed glue" effect, ensuring more accurate blocking, counter-attack and variations of spin. Best weapon for the technically gifted classic defender, particularly effective when paired with modern sponge rubber on the other side. Sponge OX, 1.2. Item RDPIR

52	81	80	$45.95

ANTI TOPSPIN RUBBER

Alligator Anti

Anti-loop rubber that is very troublesome for the opponent—it has a bite! The taut anti-spin top sheet + the hard sponge ensure that the ball is returned with speed, therefore putting the opponent under pressure. It enables using effective variations and dropping the ball short with good touch. The opponent's shots can be returned short or long with this effective weapon. Attack and counter-attack are easily possible. Sponge 1.0, 1.5. Item RDALL

56	83	$39.95
SPEED	CONTROL	

Anti Classic

The elastic anti-spin top surface and the soft sponge make this the classic among anti-spin rubbers. Great for defenders who play with variety as well as allround players who attack close to the table. The outstanding control is apparent in all playing situations. Made in Japan.
Sponge 1.5, 2.0. Item RDANC

50	85	$44.95
SPEED	CONTROL	

TIBHAR

BERNADETTE SZOCS:
blade: TIBHAR Texo OFF
rubber: TIBHAR Evolution MX-P/Evolution EL-P
Romanian National Team

THIS IS THE NEW AGE
EVOLUTION RUBBER FROM TIBHAR

Evolution EL-S
High grip PRO top sheet, elastic medium-hard sponge, extremely high speed and maximum spin. The EL-S combines the enormous spin values of the MX-S with a completely new rubber surface and the power of the MX-P. The EL-S gives sensational touch despite enormous dynamism and high spin values. Excelling at topspin, the EL-S offers high rotation and power in all game situations. Sponge 1.7, 1.9, 2.1 Item: RTEVL

96	97	69	$49.95

PRO **Available with TIBHAR Stratus Power Wood blade as part of a blade/rubber PRO SPECIAL. See page 5**

Evolution FX-S
High grip PRO top sheet, flexible medium sponge, medium-high speed and maximum spin. FX-S is the 'little brother' of the EL-S. The FX-S has the enormous spin values of MX-S and the power of the MX-P with a newly designed rubber surface. Sponge of the FX-S is softer than the EL-S. Combined with a personalized pimple geometry, it is more elastic, generating 'Flexible Spin'. The FX-S is much softer than MX-P and MX-S, but slightly harder than the FX-P. Sponge 1.7, 1.9, 2.1 Item: RTEVX

94	97	71	$49.95

EVOLUTION MX-S: chosen by most TIBHAR Bundesliga and National Players!

Evolution MX-S
This spin-oriented dynamic version of the EVOLUTION rubber series has a much longer bat/ball contact time, thanks to specially developed pips geometry of the rubber surface. Players who use a more physical body action, with acceleration of arm and wrist, can activate the great potential of the MX-S. At the table or at half distance, this rubber realizes an even and consistent outstanding performance. Sponge 1.7, 1.9, 2.1 Item RTEVS

97	96	68	$49.95

PRO **Available with TIBHAR Force Pro blade as part of a blade/rubber PRO SPECIAL. See page 5**

Evolution MX-P
Fastest, most dynamic of the EVOLUTION rubbers. Perfect adjustment of pips geometry gives more flexibility and energy on attack. Well-adapted to any game in terms of speed/spin. Ball/bat contact time is a little bit longer than the reference time, thus conferring much more sensation. Chosen by topspin players willing to feel the necessary pressure of their strokes at the table and at half distance. Sponge 1.7, 1.9, 2.1 Item RTEVM

97	96	68	$49.95

Evolution EL-P
The most elastic rubber of the Evolution series. EL-P with its medium sponge perfectly fits in between the harder MX-P and the softer FX-P. The selected pimple geometry of the elastic EL-P does not even come close to the other Evolution versions in terms of Spin and speed. Very precise and powerful strokes can be realised at half distance or at the table. Evolution EL-P: chosen by most of the Topspin players for whom the MX version is too hard and the FX version too soft, however putting the emphasis on rotation and power! Sponge 1.7, 1.9, 2.1 Item RTEVE

95	96	70	$49.95

Evolution FX-P
The most flexible, soft version of the EVOLUTION rubber family, FX-P confers a lot of sensation and control in any situation. FX-P is a high-performing rubber proven by the enormous sound resulting from topspin strokes. The rubber surface is rich in spins and soft sponge with high catapult effect. You get the power necessary for a variable topspin game. The player who likes to attack near the table and is not willing to concede any ball while playing a risky game will enjoy the fine tuning of the rubber surface with the soft sponge. Sponge 1.7, 1.9, 2.1 Item RTEVF

93	96	72	$49.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

Prices subject to change without notice

MORE TIBHAR RUBBER ON NEXT PAGE ▶▶

AURUS
PRIME + SELECT

Aurus Prime
Ideal choice for the offensive technical player who plays an attacking all action game and requires perfect ball placement even when his opponent plays passive strokes. The smooth and spin oriented rubber surface combined with a middle hard, catapult loaded sponge will enable the user, in almost any playing situation, to put the sufficient amount of pressure on their opponent. With the innovative SSP technology (a thinner and smooth rubber surface combined with a thicker sponge), the result is a fast and catapult friendly offensive rubber; this rubber also combines an excellent price/quality ratio.
The Prime version of Aurus comes with Tibhar's new and exclusive purple colored sponge.
Sponge 1.9, 2.1, Max Item: RTAPM

95	95	68	$48.95

Aurus Select
The perfect weapon for the experienced player seeking consistent performance. Includes the innovative SSP technology (a thinner and smooth rubber surface combined with a thicker sponge), which is a real positive for speed but also provides optimized spin ratings and fantastic sensation. The Select version of Aurus comes with Tibhar's new and exclusive pink colored sponge.
Sponge 1.9, 2.1, Max Item: RTAST

88	92	73	$44.95

AURUS ON SPECIAL

$38.95

Aurus SPECIAL
For the ambitious player striving to play topspin strokes in any situation. Ultra soft rubber surface provides outstanding spin and playing sensation, allowing a secure and aggressive game. The integrated SPI (Speedglue-Effect-Inside) technology confers an extreme catapult reaction to the ball. Sponge 1.9, 2.1. Item RTAUR

89	89	74	~~$44.95~~

$38.95

Aurus Soft SPECIAL
Softer version of Aurus, offering better control with a high ball rebound. An energy-loaded rubber ideal for spin-rich strokes and secured topspins with good control. Very well adapted to each game level for an optimal performance.
Sponge 1.9, 2.1. Item RTAUS

85	91	76	~~$44.95~~

$38.95

Aurus Sound SPECIAL
The softest version of Aurus produces a great sound and pure playing pleasure. Balanced playing sensation of the soft sponge and the elastic rubber surface were adapted to players who want to use energy-loaded strokes with greater accuracy. Sponge 1.9, 2.1. Item RTAUO

83	92	80	~~$44.95~~

Q SERIES

OPTRA TECHNOLOGY (Optimized Trajectory - Optimized Ball Curve) plus SPI ADVANCED (Speed Effect Inside) guarantees maximum performance from these excellent rubber sheets.

$39.95

1Q SPECIAL
SPI Technology Optimization results in great speed glue effect in this fast, dynamic rubber with a high ball curve. Robust rubber surface enables an explosive game rich in spins. The basic principle of OPTRA technology (Optimized Trajectory – Optimized ball curve) is improved longer trajectories with high ball curve. Opponents have a hard time controlling/returning the ball, putting you at the edge of your potential without passing your limits!
Sponge 1.9, 2.1 Item RT1Q

95	90	69	~~$58.95~~

5Q
This softer version of the Q-rubber has a medium-hard sponge that transfers rotation to topspin and counter-topspin shots at mid-distance. Rubber surface is full of sensation, supported by the SPI-Advanced-Technology, and with a great sound and good handling. Rubber surface allows lots of rotation and provides security when playing the large pallet of spins. Sponge 1.9, 2.1 Item RT5Q

91	93	72	$54.95

5Q Sound
The proven and highly flexible rubber surface of the TIBHAR 5Q was reworked, and the 5Q Sound offers approximately 15% more spin, and a sound that is very close to the sound of speed glued rubber. Combined with a softer sponge, it confers an extraordinary playing sensation fitting perfectly into a topspin game. Controlled, spin-friendly strokes, without a big speed loss, are the main characteristics. Sponge 1.9, 2.1. Item RT5QS

88	94	74	$54.95

5Q VIP
Many years of research & development led to a revolutionary surface with a new rubber mixture allowing optimization of ball contact and energy transfer in any type of exchange. The most remarkable point about this rubber is the sponge – a combination of open pores with extremely elastic, but still tensioned rubber mixture. Result: explosive sponge conferring power and playing sensation in all your strokes. Sponge 1.9, 2.1. Item: RT5QV

90	95	72	$54.95

QUANTUM
FROM TIBHAR

The Quantum rubbers put the focus on catapult response at the precise moment of bat/ball contact. Quantum and Quantum S will also allow you to keep the dynamics of your strokes even after switching over to plastic balls. The composition of the sponge produces fantastic playing sensation and a totally regular ball trajectory. Your strokes will be loaded with just the right amount of energy thanks to the perfect pips/rubber partnership.

Quantum
Choose Quantum for a fast game.
Sponge 1.8, 2.0, Max Item: RTQUA

91	77	83	$56.95

Quantum S
Choose Quantum S for more control and sensation.
Sponge 1.8, 2.0, Max Item: RTQUS

90	78	84	$56.95

TIBHAR® Continued

MORE SMOOTH RUBBER

NIMBUS DELTA S & DELTA V FROM TIBHAR

The new Delta rubbers are the result of Tibhar's decision to produce a new generation of rubbers that focus the three fundamental characteristics of the highly successful NIMBUS rubber family: speed, playing sensation, and control. Compared to the original NIMBUS ranges, both of the new versions – Delta V and Delta S – have new pip orientation providing more dynamic and extreme catapult reaction to the ball.

Delta S
More feeling and playing sensation, for the player striving to play a spinnier game. Sponge 1.8, 2.0, Max Item: RTNDS

85	77	86	$49.95

Delta V
For speed -- the player's first choice if he privileges a fast game.
Sponge 1.8, 2.0, Max Item: RTNDV

86	76	85	$49.95

NIMBUS RUBBERS

Nimbus
No need for speed glue! NIMBUS -SPI includes TIBHAR's newly developed 'speedglue integrated configuration' gving you all the essential factors of speedglued rubber. Incredible spin-speed dynamic plus typical sound and ball contact feeling. With a 45 degree sponge hardness it is not ony the hardest Nimbus rubber, but also the fastest. Sponge 2.0, Max. Item RTNIM.

85	82	76	$45.95

Nimbus Soft
The soft version of Nimbus will definitely impress players who like very soft offensive rubbers. Nimbus Soft with its 37.5 degree sponge hardmenss has exceedingly perceptive ball control and was developed in such a way that, even in extreme playing situations it provides a large margin for technical error. Sponge 2.0, MAX. Item RTNIS

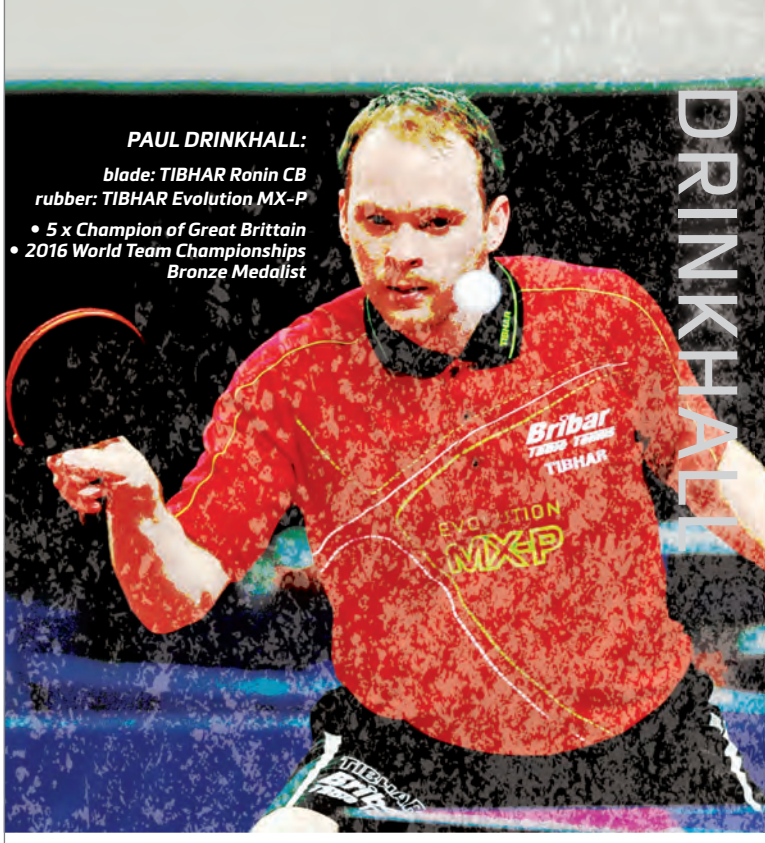

83	82	78	$45.95

Nimbus Sound
Thanks to the new SPI technology, the playing sensation and sound are highly emphasized. The extremely soft sponge gives this rubber an extraordinary sound and high spin. It also gives players high potential for flexibility in stroke play. Especially designed for players who look for more than just speed in a rubber. You get extreme spin rotation which improves delivery of strong offensive stroke play. Sponge 2.0, MAX. Item RTNIO.

82	83	79	$45.95

Prices subject to change without notice

GENIUS RUBBER

Genius+ Optimum
A premium rubber with Optra and Speed Effect Inside Technologies. The pimple structure is a little bit different and smaller than that of Genius, thus conferring more rotation and an unbelievable dynamic for the topspin game. Sponge 2.0, Max. Item RTGOP

88	91	73	$46.95

Genius
Rich in spin for the offensive game!
Obviously focused on spin--and more spin in this case also signifies more speed. More spin also means that the angle of the ball rebound is more upright, conferring a bow-formed ball curve, giving more precision to your strokes and putting your adversary under pressure. Sponge 1.8, 2.0, Max. Item RTGEN

87	88	76	$46.95

$30.95

Rapid DTecS Soft *SPECIAL*
Dynamic Technology! SOFT version is even more advanced than the normal D.TecS rubber. The sound is fantastic and the speed is extreme, even without speed glue. Sponge Max. Item RTRADS

78	73	79	~~$44.95~~

Rapid
Vladimir Samsonov helped develop this rubber. Soft sponge+very elastic rubber provide speed, spin and lots of ball feeling with optimum control. Sponge 1.8, 2.0, Max. Item RTRAP

80	80	78	$35.95

See PaddlePalace.com for latest **SPECIALS**

SINUS RUBBERS

Sinus Alpha
Softer sponge than Sinus provides even better control. Not as fast as its harder twin but with unequaled precision on fast topspins and blocking balls. Balls have longer, evenly curved trajectory, for more pressure on the opponent. For players looking for dependability + acceleration. Sponge 2.0, Max. Item RTSIA

86	85	76	$49.95

Sinus Sound
The "loud" variety of the SINUS series. Great sound with ball contact + amazing speed glue effect! Pronounced ball curve forgives mistakes. Integrated speed-glue-effect sponge is softer than Sinus or Sinus Alpha. You get great game sensation, optimal contact, and maximum spin + speed, even during slow topspin exchanges. Sponge 2.0, Max. Item RTSIS

84	86	77	$49.95

Sinus
NO LIMITS! Developed for high-performance with harder sponge for powerful play. Unsurpassable, with tremendous ball speed. Great rotation during topspin, service and short exchanges. Also provides the ever popular fresh-glue sound. Sponge 2.0, Max. Item RTSIN

87	84	75	$49.95

Super Defense 40
The best super defense! Developed expressly for defense with pimple geometry and extremely thin smooth rubber surface, plus special sponge. Definitive ball control allows you to cut the ball spin with extra spin. Item RTDEF. Sponge 0.5, 0.9, 1.3, 1.5, 1.7, 1.9.

62	86	81	$46.95

Super Defense 40 Soft
The soft version of Super Defense 40 offers even better control with excellent spin variations. Effective for close-to-table strategies. Put your adversary under pressure, applying even more tactical force in Allround defensive play. Sponge 1.3, 1.6. Item RTDES

60	86	83	$46.95

Legend
An extremely adhering surface, which when combined with a very soft sponge allows this high quality Chinese rubber to play more like its European counterparts. This then makes it the ideal rubber for players looking to produce much rotation and benefit from feeling. Sponge 2.0, MAX Item RTLEG

75	81	75	$27.95

Volcano
A high quality Allround attacking rubber at a competitive price. But do not let the excellent price mislead you! Volcano is top-notch with its superior adhering surface and typical "characteristics" of rubbers made in Germany. Sponge 2.0, MAX. Item RTVOL

70	78	80	$23.95

LONG PIPS RUBBER

Grass Defense
The wave of the longest (and legal) Japanese long pips is similar to waving grass in the wind. The Defense version has a soft sponge and is easy to play with.

GRASS DEFENSE 1.0 or OX [no sponge] Item RTGRDE

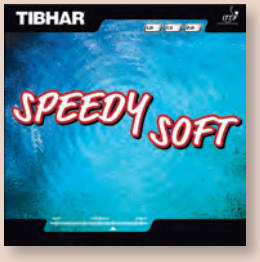

54	77	86	$41.95

Grass D.TecS
D.TecS effect integrated into classical long pips rubber. You get new ways to cut the ball and counter destabilizing strokes. Softer pips provide amazing control plus speed to destabilize the opponent with nervous aggressive shots during attacks.
Sponge 0.5, 0.9, 1.2, 1.6, OX [no sponge]. Item RTGRDT

56	80	84	$44.95

SHORT PIPS RUBBER

Speedy Soft
Broad, short pips for highest speed on counter attack or block at the table. Soft sponge gives maximum ball control, without affecting the popular "naps effect." Sponge 1.0, 1.5, 2.0. Item RTSSO

83	55	77	$39.95

Speedy Soft D.TecS
D.TecS (Dynamic Technology with Samsonov) results in more speed and more danger for your opponent on block or counter balls! Sponge 1.5, 2.0. Item RTSSD

86	49	76	$41.95

ANTI TOPSPIN RUBBER

Ellen Defense & Ellen Offense

ELLEN DEFENSE–Soft sponge for defense players sensitive to topspin. Has a distinct braking effect, to give unsurpassable ball control. Sponge 1.5, 2.0. Item RTELD

SPEED	48	CONTROL	88	$29.95

ELLEN OFFENSE–Hard sponge for active anti game. Very strong against opponents' spin, w/ distinct braking effect, resulting in unsurpassable ball control. Sponge 1.5,2.0. Item RTELO

SPEED	52	CONTROL	84	$29.95

STIGA®

BUILDING WORLD CHAMPIONS SINCE 1944

MANTRA

The new STIGA Mantra is developed with the latest Japanese rubber technology and offers the perfect balance of synthetic and natural rubber. This new rubber mixture creates a tension between the surface and the sponge resulting in an incredible catapult effect. Microscopic air bubbles in the sponge (Oxygen Capsule System) provide great speed with a stable and consistent hit and touch. This rubber is perfect for players who require the highest in rubber quality and performance. Mantra is suitable for all types of players, with sponge variation ranging from soft to hard.

PRO Available with STIGA Eternity VPS V blade as a blade/rubber PRO SPECIAL. See page 4

Mantra M

- The medium sponge creates a high speed rubber with great hitting power
- High speed and feeling from mid distance
- Gives players the upper hand in spin-spin rallies
- Produces extreme spin in serves when desired

Sponge 1.7, 1.9, 2.1 Item: RSMNM

96	97	67	$52.95

PRO Available with STIGA Carbonado 245 blade as part of a professional blade/rubber PRO SPECIAL. See page 4

Mantra H

- The hard sponge creates the classic feel with extreme attacking possibilities
- Very high speed/effectiveness from short distance
- Excellent blocking in close to table action
- Heavy rotation topspin in flicks & offensive returns

Sponge 1.7, 1.9, 2.1 Item: RSMNH

97	97	67	$52.95

Mantra S

- Soft sponge creates high spin with excellent feel
- Perfect soft sponge sound
- Tremendous feeling from long distance
- Exceptional control in serve and returns

Sponge 1.7, 1.9, 2.1 Item: RSMNS

92	97	70	$52.95

AIROC

POLY BALL OPTIMIZED — AIROC WITH OCS OXYGEN CAPSULE SYSTEM

AIROC ASTRO M & AIROC ASTRO S

In Airoc Astro, STIGA has multiplied the amount of microscopic air bubbles (Oxygen Capsule System) in the sponge, creating more intense catapult effect+speed. New topsheet transfers energy between sponge and ball, giving precision+power to every stroke. Developed with members of the Chinese National Team for the new Poly Ball.

AIROC ASTRO M

Medium sponge version.
Sponge 1.7, 1.9, 2.1. Item: RSAAM

95	93	68	$54.95

AIROC ASTRO S

Soft sponge version. Sponge 1.7, 1.9, 2.1 . Item: RSAAS

92	94	69	$54.95

AIROC M & AIROC S *ON SPECIAL*

STIGA Airoc utilizes STIGA's new OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the spin/speed proportions they have always enjoyed. The key to this evolutionary advancement is the delicate balance between size of the air pockets within the sponge and elasticity of the top sheet. STIGA's engineers tested many different pips designs and tensions to achieve the perfect rubber for the attacking player. Poly Ball Optimized!

AIROC M

Medium sponge version. Airoc M increases the catapult effect without changing the spin ratio. Sponge 1.7, 1.9, 2.1. Item: RSARM

94	93	69	~~$54.95~~

AIROC S

Soft sponge version. Airoc S is designed to expand shot selection and feel for control players. Sponge 1.7, 1.9, 2.1. Item: RSARS

90	94	70	~~$54.95~~

CALIBRA

TAKE THE ULTIMATE STEP FOR LONG TRAJECTORY

Calibra LT

A medium hard sponge, suitable for the highly skilled player with excellent technique. Calibra LT is for advanced players who demand tremendous spin and speed, combined with a sensitive touch. If you want to advance your game, this is the rubber for you! Sponge 1.8, 2.0, MAX. Item RSCAL

93	85	72	$49.95

Calibra LT Sound

Soft sponge good for all types of attacking game. You get more control, especially for blocks and receiving serves, but are still able to make lethal strokes to finish your opponent. Calibra LT Sound will also gives you a crisp, clear sound on ball strike - The closest you will get to the feeling and sound of speed glue! Sponge 1.8, 2.0, MAX. Item RSCAO

88	87	74	$49.95

Calibra LT Spin

Made with medium soft sponge, and recommended for highly trained attackers and loopers who emphasize tactical spin. You will have outstanding control for touch shots and service return, but when you are attacking you will experience new levels of possibility.
Sponge 1.8, 2.0, MAX. Item RSCAN

89	88	73	$49.95

Calibra LT Plus

Made with extra hard sponge that ensures tremendous power when hitting. This is an excellent choice for the highly skilled player who demands a professional combination of spin, speed, power and long trajectory.
Sponge 1.8, 2.0, MAX. Item RSCAP

94	84	72	$49.95

GENESIS

GENESIS M & GENESIS S

The new STIGA Genesis combines the best of the major table tennis cultures into one rubber. It has a potent synthesis of Japanese/STIGA developed OCS technology, Swedish knowledge, and a new spin elastic top sheet made in China. Members of the Chinese and Swedish national teams collaborated to create the ultimate balance between east and west. The new top sheet is sustainably developed to increase the durability and lifetime of the rubber. The Oxygen Capsule System in the sponge generates an intense catapult effect and speed.

BOOST RUBBERS

BOOST TS is outstanding for offensive players of all levels who like soft sponge. Boost TS gives a crisp clear sound when striking the ball. Although the sponge is soft, it generates very good speed. The Boost TS sponge is softer than Boost TC. The sound and feeling of Boost TS is unsurpassed! It enables offensive players of all abilities to play to full potential. Sponge: 1.8, 2.0,MAX. Item: RSBOS

85	85	76	$44.95

BOOST TC

Thanks to TransTension Sponge, new exciting material and a new formula, your game will be enhanced with maximum tension and power. Boost TC is for leading players who demand ultimate spin, speed plus a sensitive touch. Soft sponge for sensational touch and feel, plus crisp clear sound on striking the ball. Sponge: 1.8, 2.0, MAX. Item: RSBOC

87	84	75	$44.95

BOOST TP TransTension Sponge and new exciting material to generate maximum tension and power. TransTension sponge will transform your game and bring out your individual characteristics. Boost TP rubber is for the leading players who want maximum spin/speed plus a sensitive touch. Boost TP offers a soft sponge, this creates a truly sensational touch and feel for the player. Sponge: 1.8, 2.0, MAX. Item: RSBOP

86	83	76	$44.95

BOOST TX

The answer for those who want optimum acceleration without speed glue, because of its outstanding combination of speed and spin. TransTension Sponge gives maximum tension and high acceleration returns for a fast spin/speed game. Sponge hardness of Boost TX rubber is between Boost TC and Boost TP. Recommended for attackers with good technical know-how. Sponge: 1.8, 2.0, MAX. Item: RSBOX

91	82	73	$44.95

MAGNA RUBBERS

Magna TX II

Magna TX II is for the player who wants to achieve optimum acceleration. It generates maximum tension, and provides high acceleration returns for fast spin and speed. Great for highly trained attackers with good technical know-how. Sponge 2.0, MAX Item RDMAX

92	84	72	$47.95

Version of Tension Clic (TC) and Tension Sound (TS) sponges combined with the popular Magna top sheet specifically to transform your game to bring out the best in each individual player!

Magna TC II

Very dynamic and sensitive, with great spin + speed. You get a crisp, clear sound when striking the ball. You can easily attack short balls over the table and will feel the grip and speed when touching the ball. Recommended for highly skilled attackers with excellent technique. Sponge: 2.0, Max Item: RSMAC

88	86	73	$47.95

Magna TS II

Outstanding for offense of all levels with soft sponge and amazing sound when striking the ball. You get excellent control of all strokes, thanks to the unique Magna surface, while the specially developed TS II sponge gives you the speed you seek for attacking the ball. Sponge: 2.0, Max Item: RSMAS

86	88	74	$47.95

Magna

Magna is erupting on the market! Stiga ACS system increases speed and spin without sacrificing control. Smooth inverted rubber gives more spin in serves & returns. You dominate in topspin vs topspin rallies, and get better spin control in all situations. Sponge 2.0, MAX. Item RSMAG

80	85	77	$44.95

MENDO RUBBERS

THE CHAMPION'S CHOICE

Mendo

Mendo is a great rubber for attacking and offensive players. Because of the extremely resilient sponge, it gives the extra players are looking for. Four-time World Champ Peter Karlsson plays with Mendo. Sponge 1.8, 2.0, MAX. Item RSMEN

78	78	81	$29.95

PRO **With STIGA Allround Classic blade as part of a professional blade/rubber PRO SPECIAL. See page 4**

Mendo Energy

The Stiga research laboratory and the World's leading players have together developed Power-Soft-Rubber for absolute world class performance. Special Mendo Energy sponge creates maximum friction on the ball. Sponge 1.8, 2.0, MAX. Item RSMEE

75	80	83	$29.95

Mendo MP

High-tech rubber that revolutionizes touch and sets new standards in transforming energy. Faster than conventional rubbers but with excellent touch and control. Sponge 2.0, MAX. Item RSMEP

83	74	80	$32.95

NEOS RUBBERS

STIGA´s innovative Air-Capsule System has been applied to the top sheet, creating a more responsive rubber sheet with more tension. The results of this new technology - Mega Tension - are amazing! The "molecule-walls" are thinner than ordinary top sheets, creating more tension without increasing the weight of the rubber, causing quicker rubber recovery.

Neos
STIGA Neos, with Mega Tension Technology gives you extra speed. Approx. 10% lighter than a regular rubber sheet. Sponge: 2.0, MAX. Item: RSNEO

77	80	81	$35.95

Neos Sound
STIGA Neos Sound is ultra light for extra speed. Approximately 15% lighter than a regular rubber sheet. Sponge: 2.0, MAX. Item: RSNES

76	81	82	$35.95

Neos Tacky
STIGA Neos Tacky gives you offensive tacky spin. Approximately 10% lighter than a regular rubber sheet. Sponge: 1.8, 2.0, MAX. Item: RSNET

72	90	84	$36.95

INNOVA + ALMANA RUBBERS

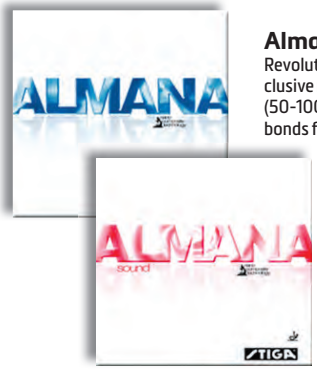

Innova and Innova Ultra Light
Revolutionary ACS technology combines very high speed with maximum springiness/elasticity in an ultra-light rubber with outstanding control. Innova is approx. 10% lighter and Innova Ultra Light is approx. 15% lighter than regular rubber sheets.
Sponge: 2.0, MAX.

Innova Item: RSINN

80	82	78	$33.95

Innova Ultra Light Item: RSINL

79	80	79	$33.95

Almana and Almana Sound
Revolutionary NC "Nano Composite" technology. An exclusive mixing technique creates extremely small grains (50-100 nanometers) in the sponge for stronger, tighter bonds for maximum dynamic effect. Sponge 2.0, MAX.

Almana Item: RSALM

81	81	78	$38.95

Almana Sound Item: RSALS

80	82	79	$38.95

China Extreme
One of the World's foremost rubbers for maximum spin. With macromolecules and optimized pimple structure STIGA has developed one of the best tacky rubbers for competition play.
Sponge 2.1. Item RSCHI

70	82	82	$27.95

V = Velocity = smaller, more distant placed pimples that maximize the catapult effect

R = Rotation = thicker, tightly arranged pimples that maximize the contact area to the ball

RASANTER RUBBER

NEW

THE ULTRAMAX-SPONGE

SPONGE AT ITS FINEST

With the sponge thickness ultramax, RASANTER enters new dimensions. With a thickness of 2.3 mm the sponge is the thickest modern TENSOR sponge so far, made in Germany. By reducing the thickness of the rubber surface, additional volume is provided and paves the way for huge rebound power. This is the ultimate answer to the loss of speed by the 40+ ball!

CHOOSE R OR V

In addition to a newly developed sponge, RASANTER is also based on a surface specially designed for the 40+ ball. The new, shriveled pimple geometry provides the sponge more space to unfold its strengths. In addition, it expands the contact surface to the ball at the ball hitting momentum and enables more rotation in general.

NEW

Rasanter R37

Your profile is spin driven. Variable all distance play is your formula for success. As a mid to advanced level player you prefer the soft 37° sponge for allowing precise active topspin play and control. Spin is key – you will be inspired by the extremely curved trajectory of your topspin, even at moderate stroke speed.
Sponge 1.7, 2.0, Max Item: RAR37

94	96	70	$49.95

NEW

Rasanter R42

Your profile is spin driven. You are looking for maximum grip. As an advanced to high level player you will benefit from medium 42° sponge hardness taking full control on your spins. Your style is versatile and you can combine top spin potential with a medium soft sponge to guarantee superior feedback and control.
Sponge 1.7, 2.0, Max, Item: RAR42

95	96	69	$49.95

NEW

Rasanter R47

Your profile is spin driven. Offensive topspin play at higher speed is your strategy. As a high level player you will take full advantage of the 47° sponge hardness for extra power and speed in your topspin play. Enables topspin with a precise curved trajectory and creativity in the semi distance play as well.
Sponge 1.7, 2.0, Max, Item: RAR47

96	96	68	$49.95

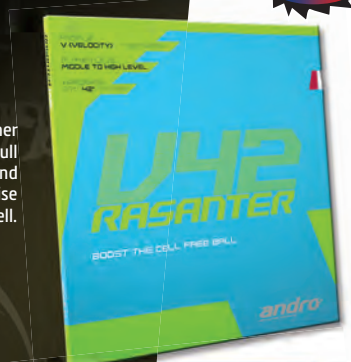

NEW

Rasanter R50

Your profile is spin driven. You take the lead with spin at maximum speed. As a high to pro level player you have what it takes to master the power of this top level 50° hardness sponge, boosting your topspin play. Your full throttle short strokes will activate unseen spin performance at maximum speed.
Sponge 1.7, 2.0, Max, Item: RAR50

97	96	67	$49.95

NEW

Rasanter V42

Your profile is speed driven. You score flat and fast without any detour. As a mid to high level player you will benefit from the medium soft 42° sponge compensating smaller sweet spot inaccuracies of your stroke, even at high speed play. Be confident and take the risk of fast strokes in today's offensive semi-distance play.
Sponge 1.7, 2.0, Max, Item: RAV42

96	93	70	$49.95

NEW

Rasanter V47

Your profile is speed driven. You go for flat and direct ballistics. As a high to pro level player you will take control of this hard 47° sponge for unlimited power and energy. Your configuration will be the ultimate speed weapon, performing short and fast top spins – offensive with no compromise.
Sponge 1.7, 2.0, Max, Item: RAV47

RASANT RUBBER

ALL RASANT RUBBER ON SPECIAL

$39.95

Rasant Powergrip SPECIAL

The RASANT with the hardest sponge (50°) and the most power. Optimized rubber top-sheet keeps a safe ball contact also in strokes with difficult angles. Offensive rubber that generates a lot of power and redation based on a fast swing. For ambitious and technical-educated players with a high level.
Sponge 1.7, 1.9, 2.1 Item: RARPG

96	96	68	~~$52.95~~

Rasant Grip SPECIAL

Medium-hard sponge (45°) and with the newest top-sheet technology. Optimized rubber top-sheet keeps a safe ball contact also in strokes and difficult angles. The medium-hard sponge is easy to handle. Players with a medium or fast swing can activate the enormous power of this rubber. Recommended for advanced and technical-educated top-spin players with a medium or high level.
Sponge 1.7, 1.9, 2.1 Item: RARGP

94	96	69	~~$52.95~~

Rasant Turbo SPECIAL

Medium-hard sponge (47.5°) for massive offensive strokes. Perfect for the close-to-table and uncompromising player, due to the lower arc. The hardness of the rubber requires a fast swing to tap the full potential. Perfect choice for high-level players who play close-to-table with aggressive top-spins.
Sponge 1.7, 1.9, 2.1 Item: RARPS

95	95	68	~~$52.95~~

Rasant SPECIAL

Medium-hard sponge (45°) with a focus on control and a high arc. Easy to handle within a short time. Perfect combination of the medium sponge and the top-sheet with maximum grip. The result is great control. The all-rounder: good control for your passive game, strong catapult-effect for powerful strokes. Suitable for spin-oriented players of all levels.
Sponge 1.7, 1.9, 2.1 Item: RARNT

93	94	70	~~$52.95~~

Rasant Powersponge SPECIAL

Soft sponge (40°) with great control and easy to handle. The spinny RASANT top-sheet offers endless options for the variable and controlled top-spin game. The soft sponge with strong catapult effect is perfect for players with slow or medium swing acceleration. Recommended for players with a high level who prefer softer rubbers, and as well as for players of lower and mid leagues that prefer control and enjoy their game.
Sponge 1.7, 1.9, 2.1 Item: RARPS

90	94	71	~~$52.95~~

Rasant Beat SPECIAL

Soft sponge (37.5°). The beatbox within the RASANT rubber series. The ultra-soft sponge increases the contact time between ball and rubber and evens minor technical mistakes in the stroke. Result: Fewer mistakes and better control. RASANT top-sheet for a lot of spin. Extreme sound and good control are the perfect package for players of all levels.
Sponge 1.7, 1.9, 2.1 Item: RARBE

89	97	70	~~$52.95~~

IMPULS RUBBER

Impuls Powersponge

Spin and control! The coarse cellular sponge keeps the ball, extending the contact time and balancing inaccuracies. The plentiful power for offensive shots is the result of a strong catapult-effect and a tight top-sheet. For players of all levels who like a soft rubber for their precise and spinny game. Sponge 1.8, 2.0, 2.2. Item: RAIPP

84	88	76	$47.95

Impuls Speed

The SPEED version of the successful andro IMPULS series. It explodes with its extreme soft sponge at ball contact. It absorbs the speed while blocking your opponent's shots, but generates a lot of energy in your offensive game. The spinny TENSOR top-sheet makes this rubber a controllable offensive rubber for players of all levels. Sponge 1.8, 2.0, 2.2. Item: RAIPS

81	82	78	$43.95

Impuls

The basic version of the andro IMPULS series. Maximum control with a perfectly mixed TENSOR effect. The elastic and soft sponge balances inaccuracies during the ball contact and minimizes your mistakes. The energy and the speed potential are close together to avoid loss of control. Allround and easy to handle.
Sponge 1.5, 1.8, 2.1. Item: RAIPU

79	79	80	$37.95

andro® Continued

Hexer HD
Excellent energy transfer due to innovative sponge structure. Natural rubber top-sheet extends durability. More grip for your topspins with the special microstructure on the rubber surface. More speed and sharpness for your game: high def microstructure for precision and spin while you hit the ball. For players who depend on spin, speed and precise offensive shots. Sponge 1.9, 2.1. Item: RAHHD

93	89	71	$49.95

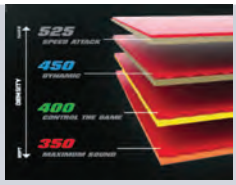

Hexer
Strong catapult-effect, extreme spin due to 100% natural rubber and a sponge of the 4th TENSOR-generation. The ball leaves your racket in a high aggressive arc through the extreme spin potential. The underlying pimple geometry gives you a powerful and compact feeling for your game. The HEXER sponge gives you the highest possible feeling. For the spin-oriented offensive player. Sponge 1.9, 2.1. Item: RAHEX

90	87	73	$47.95

Hexer+
Connects a sponge with the advanced HEXER-technology and a speed-focused top-sheet geometry. The underlying pips geometry takes care of a flat, direct bounce and sends the ball to its target fast. You need less power to generate speed and spin.Time-saving. High dynamic, strong TENSOR-effect. For players who have a hige variety in their shots. Sponge 1.9, 2.1. Item: RAHEP

92	86	73	$47.95

The andro PLAXON rubber technology stands for target-oriented precision and has its origins in the modern laser industry. The new energy-loaded sponge provides an extreme direct and powerful arc. With PLAXON you are well-prepared for the new plastic ball 40+ and even have maximum control.

Plaxon 525
Maximum power and precision. The hard sponge with its high energy and power pushes the ball directly to the other side of the table. The unique top-sheet catapults the ball with a lot of rotation and power out of your racket. During the contact of rubber and ball, the new top-sheet increases the sweetspot for a perfect hit. For players of every level who play close to the table. Sponge 2.0, Max. Item: RAP52

96	86	71	$43.95

Plaxon 450
Highly dynamic, speed and control of the ball. The compact medium-hard sponge generates a lot of power for your offensive game and shoots the ball directly to its target. The newly developed top-sheet assures a perfect contact of rubber and ball without any loss of energy or uncertainties. Minimize your mistakes and maximize your positive results. For players of every level. Sponge 2.0, Max. Item: RAP45

91	86	73	$43.95

Plaxon 400
Highest precision: increased control and a precision known only by lasers. Continuous speed, even when hitting the ball not in the sweet-spot and soft top-spins caused by the softer medium sponge. Better control due to the new top-sheet's better contact of rubber and ball. Outstanding top-sheet avoids loss of energy and imprecision in every stroke. For players of lower/mid leagues. Sponge 2.0, Max. Item: RAP40

89	86	74	$43.95

Plaxon 350
Extreme soft sponge for maximum fun and great control. Good feedback to blade and hand whilst hitting the ball due to improved combination of sponge and top-sheet. Great feeling and control. Perfect for players who prefer soft rubbers and want to improve their game to the plastic ball. For players of lower and mid leagues. Sponge 2.0, Max. Item: RAP35

85	86	75	$43.95

Prices subject to change without notice

Hexer Powersponge
Great sound with the very soft sponge of the 4th TENSOR-generation. The soft sponge forgives smaller timing mistakes and increases your control. The underlying pimple geometry is made to give you as much spin as possible. Excellent ball response gives you additional control. For players of all levels who want speed and sound but don't want to lose control. Sponge 1.9, 2.1. Item: RAHPS

87	88	74	$47.95

Hexer Duro
For players who want strong spin, speed and durability. Top-sheet of 100% natural rubber and a HEXER sponge (medium) gives you a huge choice of shots and makes a great alternative for all players. The grippy top-sheet provides you with a longer contact time of rubber and ball. More control, fewer mistakes, comfortable and economic. For players of all levels who are searching for a consistent and long-lasting rubber. Sponge 1.9, 2.1. Item: RAHDU

88	86	74	$43.95

Backside 2.0 C
The ultimate choice for defenders. Extreme top-sheet for a controlled game with strong rotation and many variations. Extreme soft sponge to easily handle the offensive strokes of your opponents. For the defensive allrounder. Sponge 1.3, 1.5, 1.7, 1.9. Item: RABKC

74	82	83	$37.95

SHORT PIPS

Hexer Pips Force
Pimples out with a medium-sponge with the modern HEXER technology. The shape of the pimples gives extra energy and force. The ball will leave the racket more aggressively and with more speed. You can adjust the specification with the 0/90 technology according to your game. Apply at 0 degrees for more speed, 90 degrees for more spin and control. Sponge 1.7, 1.9, 2.1 Item: RAXPF

90/89	61/60	74	$47.95

Hexer Pips
Sponge of the 4th TENSOR generation combined with an innovative pimple geometry. You can adjust the specifications with the 0/90-technology according to your game: 0 degrees for more speed, 90 degrees for more spin and control. The direction of the pimples makes the difference. The rubber mixture of 100% natural rubber assures a long durability and consistent playing properties. High control values due to a soft sponge. Sponge 1.7, 1.9, 2.1 Item: RAXPI

88/87	61/60	75	$47.95

Blowfish+
Compared to BLOWFISH, the BLOWFISH+ rubber is equipped with even more power. Hard sponge and an aggressive pimple geometry allow you to play nasty offensive shots. The TENSOR technology gives you a good feeling and a high control value. The medium sponge enables you to play precise blocks and hard shots. For the aggressive offense player. Sponge 1.8, 2.0, Max Item: RABLP

90	52	84	$43.95

Blowfish
Unlike other traditional pips-out rubbers, Blowfish uses a TENSOR sponge and aggressive pimple arrangement. The advantages of the TENSOR sponge are huge: perfect feeling, strong catapult, high control, and huge variety. The rubber mixture as well as shape and arrangement of the pimples simply make the rubber a dangerous weapon. Soft, fast, and variable. Sponge 1.8, 2.0, Max Item: RABLF

89	55	85	$43.95

LONG PIPS

Chaos
Long pips produce unpredictable strokes from every distance. The modern defensive player always focuses on an impressive response. Built-in TENSOR technology guarantees safety and backs up the defender in all positions. The ability to create surprisingly slice variations and dangerous, annoying strokes generates unpredictability for your opponent. Sponge OX, 1.2. Item: RACAO

66	60	84	$47.95

COACHING CORNER

by SAMSON DUBINA

Inspect Your Opponent's Weapon!

Samson Dubina (above) demonstrates to Sarah Jalli the etiquette of inspecting an opponent's racket before a match.

In table tennis, there are no concealed weapons. You have the right to inspect your opponent's weapon prior to the start of the match. Make this a habit! You want to know what you are up against!

Over the years, I have heard countless tournament players say, "Well, I was down 0-2 in games before I realized that he was using anti-spin rubber!" So how do you go about getting a look at his racket? You walk up to your opponent, put out your hand, smile, and say "Hi, I'm Ryan, it is nice to meet you! May I check out your racket?" According to the rules, your opponent must allow you to inspect his racket. Inspect his racket? What does that mean? It doesn't mean that you can slide your oily fingers over his grippy rubber surface ruining his topsheet. It means that you can have a visual inspection and I feel that you can use the ball as well. Using the ball to test isn't stated in the rules and is generally allowed about 99% of the time (depends on the official). When you test with the ball, please be gentle and don't damage your opponent's racket. I once saw a player scrub so hard on his opponent's long pips that he actually broke 3 pips from the middle of the rubber when testing it out before the match. When you find out what kind of equipment he is playing with, don't make a scene! Don't roll your eyes, and yell toward your coach, "Oh no, another long-pips hacker!" Just be polite and keep your comments to yourself. Making a scene will put you in the wrong mindset before the match and might even boost the confidence of your opponent!

When you check your opponent's racket, what are you looking for? There are a few things – type of rubber on both sides, grippiness of inverted, length and width of pips, sponge thickness, and bounce.

Both Sides

Make sure that you check both sides of the rubber. If he is using a penhold racket and has rubber on both sides, he is probably playing a modern penhold game. If he is using a penhold racket and has rubber on one side and a paint sheet on the other side, he is probably a traditional penhold player. Many players will use inverted rubber on one side and pips on the other side. Check both sides.

Grippiness of Inverted

Even if he has inverted on both sides, you need to check for the amount of grippiness. Very gently slide the ball near the edge of the rubber. It is important to know the amount of grip. If it has no grip at all, it might act like anti-spin rubber, even if it wasn't sold as anti-spin rubber initially when it was purchased in 1969!

Length and Width of Pips

Take the ball and gently push down on the pips (as soft as possible). Now gently wiggle the rubber side-to-side. If the rubber wiggles, it is long pips. If it doesn't wiggle, it is short pips. Short pips grab the ball better and usually produces a very light spin ball. Long pips doesn't grab the ball very much and usually produces a no-spin or reversal spin ball. Also, short pips are often used for attacking and defending. Long pips are usually used only for defending.

Sponge Thickness

The sponge type, density, and thickness also have a large bearing on the amount of speed and spin your opponent can produce. You can gain info even from a visual inspection: players with thicker sponge usually have more potential for spin, and players with thinner sponge or no sponge usually focus more on control.

Bounce

Bounce the ball in the center of the racket. How much bounce do you have? With a very fast racket, it will be easier for your opponent to produce speed shots but harder to control his serve short and use his drop shots. With a very dead racket, it is easy to serve short and block, but harder to add pace to the ball. Besides the speed test, the type of blade that your opponent is using is somewhat irrelevant. A pink handle or black handle or flared handle or straight handle won't make much difference. If he is using a Nittaku Ludeak blade, you can say "Wow, that's the same one Samson uses!" Or if he is using a Nittaku Acoustic Carbon blade, you can say, "Wow, that's the same one Sarah Jalli uses!"

Summary

In closing, I want to add a few more comments. If your opponent is playing with a very fast, very spinny racket, it doesn't necessarily mean he is a power player. If your opponent is playing with a very slow, very dead racket, it does mean that he will have difficulty producing spin. If your opponent has long pips or anti-spin rubber, it does mean that he will have difficulty producing spin. If your opponent has a combination racket with inverted on one side and pips on the other side, look for racket flips, he might not always have the inverted on his forehand and pips on his backhand. So how to you play tactically correct against choppers, loopers, lobbers, blockers, etc? You need to purchase the book – 100 Days of Table Tennis. There are chapters that detail each of those styles. But for now, just remember this... Greet your opponent, take care of his racket, don't make a scene, and think about his potentials and limitations based on his equipment. Inspecting the racket is your first step in defeating your opponent!

SMOOTH RUBBER

Gold Arc 8

The rubber surface is highly elastic just like a fully bent bow, which can easily create strong friction. The smooth surface rubber with underlying intensive big-pimple structure gives the rubber great elasticity and off-court power. The player can enjoy the instant feeling of striking with minimal effort and will appreciate the crisp hitting sound. The outstanding performance in strength and speed brings an overwhelming pressure to the opponent in full court and is suitable for both forehand and backhand. This highly elastic non-sticky rubber was developed by the DHS R&D center and German rubber-making experts with the consultation of World Champion Wang Liqin.
Sponge 2.1 Item: RCGA8

93	94	69	$49.95

Gold Arc 5

Integrates the intensive pimple-structure and BIOS technology to provide stable control and excellent hand feel. The balance of friction and tension can be controlled with minimal effort. The performance of rubber will be comprehensively raised by increasing the playing strength. This highly elastic non-sticky rubber was developed by the DHS R&D center and German rubber-making experts under consultation of World Champion Wang Liqin.
Sponge 2.1 Item: RCGA5

84	84	75	$39.95

Hurricane 8 Mid & Hurricane 8 Hard

TWO VERSIONS! Hard version has slightly harder sponge than Mid version.
Hurricane 8 is a new generation of sticky-speed rubber. A new high-density sponge with 'Macro-Cell' and 'High-Elasticity Particle Osmosis' technology helps Hurricane 8 raise the elasticity by 15%. Hurricane 8 provides unique spin, changeable arc, and enhances shot speed significantly, for a refreshing feel for offensive play. Hurricane 8 is specially designed to enhance the spin and speed of 40+ celluloid-free balls. Sponge 2.15.

Hurricane 8 Mid - Item RCH8A

89	97	74	$44.95

Hurricane 8 Hard - Item RCH8H

90	96	74	$44.95

Hurricane 3-50 Mid & Hurricane 3-50 Soft

TWO VERSIONS! Mid version has slightly harder sponge than Soft version.
First choice for players who want drive-loop and topspin. It integrates tacky rubber with elastic sponge. The #50 sponge is receptive to ball contact, while the Hurricane 3 rubber friction grips and holds the ball. Players get great ball feeling with every shot and suits those who want to exert a fast, stable loop attack. Sponge 2.1.

Hurricane 3-50 Mid - Item RCH35

86	92	73	$29.95

Hurricane 3-50 Soft - Item RCH35S

85	93	73	$29.95

Hurricane 3

Designed for players who mainly adopt a controlled playing style or have relatively weak attack. This rubber can add strength and produce a long arc, which increases ball control and fast attack and loop drive close-to-table. Hurricane 3 has been the choice for almost all of the Chinese players since the 2000 Olympic Games. Exclusive Hurricane 3, with increased tackiness, enhances the spin of 40+ celluloid-free balls. Sponge 2.15. Item RCH3A

83	92	74	$21.95

Hurricane 3 NEO

Powerful "NEO" sponge and Hurricane 3 rubber with special glutinosity creates stable and high-speed arc to improve player's scoring ability. Hurricane 3 NEO has a high speed and low fast loop, changeable arc, and stronger spin. Sponge 2.15. Item RCH3N

85	92	73	$21.95

Hurricane 2

Hurricane 2, known for decisive blows with outstanding power, can create much higher speed and spin while maintaining stable control. In addition, it generates strong close to the table offensive power to make the ball fly in a low arc, which frustrates opponent's defenses. Exclusive new Hurricane 2, with increased tackiness, enhances the spin of 40+ celluloid-free balls. Sponge 2.15. Item RCH2A

86	93	76	$21.95

Hurricane 2 NEO

With "NEO" sponge, Hurricane 2 NEO rubber breaks through the speed limit of water-based glue and keeps the speed, spin, and control of former versions. Quick attack, low arc, and strong low fast loop are the characteristics of Hurricane 2 NEO. Sponge 2.15. Item RCH2N

88	93	72	$21.95

Skyline 3-60 Mid & Skyline 3-60 Soft

TWO VERSIONS! Mid version has slightly harder sponge than Soft version.
Skyline 3-60 is designed with a unique sponge-rubber combination. It absorbs and responds rapidly on ball contact, providing excellent elasticity and speed. Such dynamic properties make Skyline 3-60 ideal for continuous, high-strength loop attacks with minimal effort. Players will not be limited to one certain type of loop, but have the option of varied loop techniques. Skyline 3-60 is the optimal combination of classic sticky rubber and elastic sponge. Sponge 2.1.

Skyline 3-60 Mid - Item RCS36

85	94	72	$29.95

Skyline 3-60 Soft - Item RCS36S

84	95	72	$29.95

Prices subject to change without notice

DOUBLE HAPPINESS RUBBER: THE MARK OF TIMELESS QUALITY

Skyline TG3

Fast, continual, and dense attack is characteristics of Skyline 3. It is made with a new technique to give quicker attacking power with loop drive. The deformation of the sponge on ball contact returns to original shape quickly to ensure continual loop attack. Then your opponent will be under continual attack pressure. Sponge 2.15. Item RCS3A

83	90	75	$19.95

Skyline TG3 NEO

Continual quick loop performance stands out in Skyline 3 NEO. It has exquisite arc technology and acute ball feeling. The deformation of the "NEO" sponge on ball contact returns to original shape quickly to enhance loop attack. Skyline 3 NEO allows for outstanding style of continual, quick attack without any interspaces. Sponge 2.15. Item RCS3N

85	90	74	$19.95

Skyline TG2

Spin or not, strong or weak, delicate changes are achieved in a flash. Skyline 2 rubber is made by new technique brings fresh experience of loop with quick attack. Colloid with acerbity and glutinosity combined has completely different friction from traditional Chinese rubbers and can create powerful and changeful spin. Power and speed come out continually owing to the unique pimple structure and elastic colloid so that changeful spin is more steady and threatening. Sponge 2.15. Item RCS2A

80	94	74	$19.95

Skyline TG2 NEO

The technology in Skyline 2 NEO can create strong and changeful spin by both friction and deformation methods. The ball on impact can penetrate into "NEO" sponge, which transfers the energy to give players power to create more aggressive spin. Sponge 2.15. Item RCS2N

82	94	74	$19.95

TinArc 5

Combines great feeling with powerful elastic shots and allows the ball to absorb and penetrate easily, ideal for quick loops with feel, ball handling near the net, or off-court play. The outstanding elastic rubber and thick pimple design enables strong power with minimal effort. Specially designed to enhance the speed of 40+ balls. Sponge 2.1. Item RCTI5

92	94	70	$39.95

TinArc 3

TinArc 3's pimple structure is specially designed for buffering and absorbing energy. This makes the rubber perform excellent in ball control and creates varying spin close to the table and generates power from mid to far distance. TinArc 3 incorporates 'Dual-Extreme' technology in rubber and sponge and is preferred by top players who play with loop and control drives. Sponge 2.1. Item RCTI3

88	88	74	$42.95

TinArc

'Dual-Extreme' technology creates high elasticity in both rubber and sponge. This is combined with a specially designed 'speedy' pimple structure. Shot making has remarkable ball acceleration with a characteristic loud sound. The topsheet provides tackiness and spin when hitting or brushing the ball. Top players who are in pursuit of excellent power and speed, as well as spin will prefer TinArc rubber. Sponge 2.1. Item RCTIN

90	85	74	$42.95

PF4

PF4 is suitable for quick-attack with loop drive. It has accompanied many players to win the world chamionships. Sponge 2.0. Item RCPF4

75	78	80	$13.95

G555

High elastic rubber designed for backhand. New cementing agent with chemical technology and high elastic sponge. High strength and elasticity satisfies the backhand demands for high speed and strength on the medium-range and long-range distance from table, and makes up for the shortages of the backhand drive.
Sponge 2.2 Item: RCG55

55	50	95	$15.95

G888

The performance of high elasticity and stickiness strengthens spin and speed while strengthening power far from the table so that G888 can be suited for quick-attack with loop and also mediate the relationship of "spin" and "speed".
Sponge 2.1 Item: RCG88

58	55	92	$15.95

SHORT PIPS RUBBER

Dragonow

Special pimple design strengthens the friction of this rubber. It is easy for players to play 'small top-spin skill'. The rubber strengthens control of the ball route. Meanwhile, it has excellence of powerful rebound, high speed with smash sponge. Sponge 1.8, 2.0. Item RCDRA

84	78	74	$12.95

Sharping

Sharping adopts special clear concave design on the top of pimples, which is contrary to traditional design. The special pimple strengthens friction and sensitivity when touching balls. The colloid has abundant elasticity with soft and flexible sponge. It can express power quickly and reduce wasted energy. This rubber makes the ball route monstrous and can control the point of fall. For offensive play. Sponge 1.8, 2.15. Item RCSHA

85	60	78	$12.95

LONG PIPS RUBBER

C7

C7 rubber ensures the player can attack and defend at will. Sponge OX, 1.0, 1.2. Item RCC7A

52	64	78	$13.95

C8

C8 has been called the "Chinese Magic Racket" or "Chinese T.T. Team Secret Weapon" by the world table tennis field. It makes a breaking effect due to its irregular swing of super long pimples. Sponge OX, 1.0, 1.2. Item RCC8A

54	66	76	$13.95

Yasaka

PUSH YOUR LIMITS

RAKZA X + RAKZA X SOFT

The latest of the popular, highly successful RAKZA series of Yasaka rubbers. The top sheet is made of natural rubber, using a new production method to result in a top surface with exceptional grip for phenomenal spin and speed. These qualities reduce the margin for error. The top sheet is then combined with "Power Sponge" – a faster sponge and high grip top sheet enables you to place the ball accurately with a high degree of success. Serves and short returns are both very sharp, similar to Rakza 7 and Rakza 9.

RAKZA X
Medium-hard sponge version.
Sponge 1.8, 2.0, Max Item: RYRAX

96	95	68	$54.95

RAKZA X SOFT
Soft sponge version.
Sponge 2.0, Max Item: RYRXS

89	96	70	$54.95

RAKZA 9
Improved speed characteristics! The surface rubber of Rakza 9 has a newly developed formula/rubber combination on surface rubber, and a new sponge made of a more homogenous material with larger pores. Rakza 9 is the fastest of Yasaka's Hybrid Energy rubbers and is suitable for technical offensive players, using both high speed and spin to win the point. Sponge 1.8, 2.0, Max Item RYRA9

95	93	69	$52.95

RAKZA 7
Natural rubber gum in the top sheet dramatically improves grip and spin. Top sheet is combined with the new Power Sponge to produce Yasaka's newest Hybrid Energy rubber. When you hit the ball hard, the rubber grips the ball so you can place the ball accurately, both in direction and length. Serve and short returns are sharp and easy to control. Natural gum also improves durability. A winning combination! Sponge: 1.8,2.0,MAX Item: RYRAK

92	94	70	$52.95

RAKZA 7 SOFT
Yasaka Rakza 7 Soft uses the same top sheet as Rakza 7, but with softer sponge, giving the rubber more sound and built-in speed glue effect plus increased control. After hitting a topspin shot, the curve of the ball is slightly higher, giving little bit bigger margins in the game. In the short return play, the ball feel is better. Sponge: 1.8,2.0,MAX Item: RYRAS

87	95	71	$52.95

THE DRAGONS

Shining Dragon
A very sticky top sheet combined with a little bit hard sponge. This strong sticky top sheet creates a stable spin ball when the player hits a topspin ball, and it makes it easy to control the serve and short cut return. The sponge, which has strong tension creates outstanding speed and carry. It is also relatively light in weight and easy to control as a sticky rubber.
Sponge 2.0, Max Item: RYSDN

87	95	71	$42.95

Rising Dragon
YASAKA has combined the advantages of the Chinese sticky surface with the outstanding qualities of speed and touch from Japanese rubber technology. This highly sticky top sheet creates strong spin with hard tension sponge, working in perfect synergy as it creates outstanding power. The serve and short cut returns are very sharp and easy to control.
Sponge 2.0, Max Item: RYRID

89	94	71	$42.95

YASAKA COMPARISON CHART pages 100-101

Mark V is available with YASAKA Ma Lin Extra Offensive blade as part of a professional blade/rubber PRO SPECIAL combination. See page 6

Mark V

PRO

Many championships have been won with Mark V, which represents the absolute highest quality of rubber production. For the aggressive player who masters the modern, fast technique close to the table, Mark V gives unique possibilities. Sponge: 1.0, 1.5, 1.8, 2.0, MAX. Item: RYMKV

80	80	79	$37.95

Mark V GPS

Same quality surface rubber as Mark V with softer sponge, giving more "feeling" and "control". Sponge: 1.8, 2.0, MAX. Item: RYMKG

74	82	81	$37.95

Mark V 30

Double glue absorption, improved spring capacity due to maintaining the sponge hardness levels at 30 degrees. Sponge: 2.0, MAX. Item: RYMK3

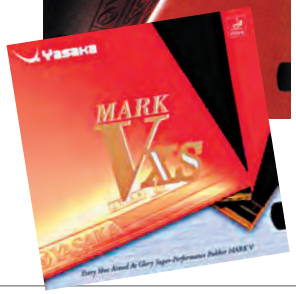

72	83	81	$37.95

Mark V M2

Made for Maximum Speed. Based on the incomparable technical features of Mark V, but with slightly harder sponge. Gives the ball sharp spin and ultimate speed. Sponge: 2.0, MAX. Item: RYMKM

85	78	78	$39.95

Mark V XS

Newest rubber sheet from Yasaka: Mark V XS. This highest quality rubber is ideal for the aggressive player who masters the modern, fast technique close to the table. Sponge: 2.0, MAX. Item: RYMKX

78	81	80	$45.95

Mark V HPS & Mark V HPS Soft

Outstanding top-of-the-range fast rubber has all the characteristics required for advanced offensive play. The HPS (Hybrid Power Sponge) technology is the result of the newest advances in Japanese rubber technology. It provides improved dynamics in the sponge, and more speed and spin, without higher weight.

MARK V HPS has a medium-hard sponge, suitable for aggressive play close to the table. Sponge: 2.0, MAX. Item RYMKH

92	89	72	$47.95

Mark V HPS SOFT has a slightly softer sponge than the regular Mark V HPS, suitable for offensive allround players. Sponge: 2.0, MAX. Item RYMKS

89	91	72	$47.95

X-Tend HS The Spin Machine!

No speed glue needed! STS (Spin-Tension-System) technology by Yasaka gives 2/3 of the tension energy to spin and 1/3 to speed. Topsheet and sponge deliver high-power speed with easy handling-- just what the players asked for. Do NOT apply speed glue, as it will destroy the rubber. Xtend HS is made to be fast without speed glue. Sponge: 2.0,MAX Item: RYXTH

84	83	77	$43.95

X-Tend

The Spin Machine! No speed glue needed! "Tension increase" gives you 2/3 more spin and 50% more speed. Sponge: 2.0, MAX. Item: RYXTE

82	85	77	$43.95

V-Stage

For players looking for powerful spin and speed. V-Stage is produced by simultaneously vulcanizing high-friction coefficient rubber to improve spring and high elasticity. Sponge: 2.0, MAX. Item: RYVST

89	85	74	$52.95

PIPS & ANTI RUBBERS

Rakza PO [Short Pips]

The newly developed top sheet uses mainly natural rubber gum. This improves the level of grip and the power of spin drastically. The top sheet is combined with the new "Power Sponge". The top sheet and "Power Sponge" work in perfect synergy, producing the Hybrid Energy rubber. This short pimples out rubber has increased spin capacity, due to the shape of the pimples geometry and the use of the natural gum in the top sheet.
Sponge 2.0, Max Item: RYRPO

93	70	78	$52.95

Yasaka A-1 [Short Pips]

Short pips rubber with no sponge. Approved for hardbat play by the USATT Hardbat Advisory Committee. Has a cloth backing for easy glue application. This is a favorite rubber for US classic hardbat players and defensive players. Works well with defensive blades like the Hunter Hawk. Sponge: OX Item: RYA1

40	40	94	$19.95

Phantom Infinity [Long Pips]

Regulation length long soft pips: Deadly weapon for any defensive player. Neutralize opponent's spin and use the effect of the spin to benefit your own returns. Design of the top of the pips aid attack.

0011 Sponge: 1.0. Item: RYPH1

49	58	88	$34.95

0012 No sponge. Item: RYPH2

42	65	88	$32.95

Anti Power [Anti]

Neutralizes spin, thanks to low friction and the moderating qualities of the outer rubber. Anti Power is best used by offensive combination players, since the sponge is fast compared to other anti rubber. Sponge: 2.0. Item: RYANT

SPEED	40	CONTROL	85	$32.95

XIOM®

RUBBER RATINGS KEY

SPEED	SPIN	CONTROL	PRICE

XIOM COMPARISON CHART pages 100-101

OMEGA V SERIES

Made with Dynamic Friction Technology and developed for the new plastic ball. Performance parameters of the plastic vary from the celluloid, which mostly impacts professional players. Dynamic Friction Technology originally adopted from the physics of snow tires makes the unprecedented level of friction for Omega V. Dynamic Friction of the table tennis is different from the normal friction because the rubber in the fast movement should make the proper friction against the also fast moving balls, without the decline of repulsive power. Dynamic Friction rubber grabs the slippery plastic balls far more firm and solid at contact. Control of your ball with Dynamic Friction is simply beyond your expectation. And as a consequence, it increases the spin rotation dramatically - at the same speed. Thanks to the higher friction you can also catch the ball at the extreme angle, which is truly a professional advantage.

XIOM Omega V Pro Rubber is available with the XIOM Stradivarius Shakehand or Penhold blade as part of a blade/rubber PRO SPECIAL. **See page 6**

PRO

Omega V Pro

- *New Power Dynamics for Professional Swing Speed*
- *Energized Ball Flight and Rebound*
- *Extra Precision on Passive/Offensive Shots*

Sponge 2.0, Max. Item: RXO5P

- *Plastic Ball Ready - For Top Professionals*
- *Dynamic Friction Against Slipperiness*
- *Unprecedented Control and Extreme Angle Shots*

Sponge 2.0, Max. Item: RXO5U

94	97	67	$54.95

VEGA DF SERIES

Evolved from snow tire technology, a Dynamic Friction rubber with higher friction rate in movement against the ball. Dynamic Friction is a result of balancing chemical composition with physical structure for the specific purpose, differing from static friction. New plastic balls are more difficult to catch with the rubber for spin because the harder plastic shell is more slippery, especially when the ball hits the rubber with high speed at extreme angle. VEGA Dynamic Friction series improved the grip on plastic ball while keeping the legacy of XIOM's popular rubber formula.

Vega Asia DF

- *Hard sponge version of Vega DF*
- *Firm and solid grip on plastic ball*
- *Improved Spin Dynamic with plastic ball*

Sponge 1.8, 2.0, Max Item: RXVDA

91	88	72	$44.95

Vega Europe DF

- *Soft sponge version of Vega DF*
- *Firm and solid grip on plastic ball*
- *Improved Spin Dynamic with plastic ball*

Sponge 1.8, 2.0, Max Item: RXVDU

87	92	72	$44.95

SIGMA II SERIES

Sigma II Pro

- *IMB Generation for modern close-to-table style*
- *Winning trajectory with extra-energized spin*
- *Hyper dynamics of dominating Carbo Sponge*

The rubber of choice for close to the table play! Designed to deliver higher energy on the spinning ball. The ball winds up quicker and aggressively lower on the opponent's court while starting out comfortably higher. Very exact and hyper-spinning ball trajectory is made by the combination of new IMB technology and the world dominating black Carbo Sponge. Sponge 2.0, Max Item: RXS2P

94	95	67	$52.95

Sigma II Euro

- *Pro-made Tour version of IMB generation*
- *Winning trajectory with extra-energized spin*
- *Hyper dynamics of the dominating Carbo Sponge*

Tour professional version of Internal Mechanical Boost (IMB) makes you control the amount of spin easier and better. Sigma II Europe also shapes ball trajectory easier than any other rubbers. High level players will realize well-controlled short balls and accurate ball path. IMB technology and black Carbo Sponge give more energy on the spin; ball winds up quickly and aggressively lower at the opponent, while it can start comfortably higher. Sponge 2.0, Max Item: RXS2U

93	96	67	$52.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

VEGA SERIES

Vega Japan

- *True Innovation - Hyper Elasto IMB technology*
- *Super Dynamics - Engined by Black Carbo Sponge*
- *New Era, New Shape - Vega's "Win Fit" design*

Internal Mechanic Boost of Hyper Elasto IMB generation opens the new opportunity for Vega users. Tuned to make more spin energy easier, Vega Japan makes the power-charged spin and allows for flexible control. Ball capturing at the contact is very solid, yet also superbly comfortable. Sponge 2.0, Max. Item: RXVGJ

90	90	72	$44.95

Vega China

- **Max built-in tension by German Tensor Bios technology**

Combination of sticky surface top sheet with a softened hard sponge. Composed with world renowned Tensor Bios technology, to reach the proper elasticity. Sponge Max. Item: RXVGC

84	93	72	$44.95

Vega Asia

- *Spin Weapon with upgraded speed*
- *Higher success rate with "big window" over the net*
- *Black Carbo sponge generates more power*

Unique "Carbo Sponge" provides the most energy efficiency. The pips on Vega Asia have a special structure to create more trampoline effect and feeling at impact. It also has a bigger safe zone (window) above the net, for topspin attack. Sponge 2.0, Max. Item: RXVGA

89	87	73	$39.95

Vega Pro

- *Professional Spin Weapon*
- *Innovatively enlarged attack window over the net*
- *New Black Carbo sponge to generate more power*

Extreme topspin performance is realized by the mixture of Hyper-Elasto and Carbo Sponge technologies. Pips are densely arranged for a harder, more direct feel. The ball draws a higher, sharply curved arc that enlarges the 'safe zone' above the net. Precise response lets you lead the game. Sponge 2.0, Max. Item: RXVGP

87	89	73	$41.95

XIOM Vega Europe Rubber is available with the XIOM Allround S blade as part of a professional blade/rubber PRO SPECIAL. See page 6

PRO

Vega Europe

- *Safer Spin Attack with upgraded control*
- *More chances + fewer misshots with "big window"*
- *Black Carbo sponge generates more power*

Softest of the Vega series, for an exciting feel, plus the same level of energy efficiency as the harder Vega Pro and Asia. Special sponge and top layer give great control, and spin performance. Perfect for modern European play style, with controlled topspin. Sponge 1.8, 2.0, Max. Item: RXVGU.

85	91	73	$39.95

Vega Elite

- *Super balance for all levels of players*
- *Spin, speed, control, and softness*
- *Dynamic sound for pure pleasure of table tennis*

Soft version of the Vega series provides super balance for all levels of players. It provides great stability and dynamic sound for pure pleasure of table tennis. The ball from Vega Elite draws sharper and higher ball-trajectory to create larger safe zone (BIG WINDOW) above the net. Sponge 2.0, Max. Item: RXVGE

83	83	76	$39.95

OMEGA IV SERIES

Omega IV Asia

- *For dynamic power-spin attackers*
- *Powered by extra-hard new Carbo sponge*
- *Extra spin by new built-in tension*

Extreme power with extra spins in deadly aggression. Grippy top sheet with hard Carbo Sponge creates amazing power-spin performance. Omega IV Asia returns the ball aggressively and low with extra spin. Extra precision and superb consistency from solid construction benefits high-speed players. Sponge 2.0, Max. Item: RXO4A

92	89	71	$49.95

Omega IV Pro

- *Extra playing properties by new carbo sponge*
- *Additional clicking feel for sharper control*
- *Extra spins with new chemical composition*

Based on 'Hyper Elasto' technology, the top sheet matched with an upgraded Carbo Sponge offers extraordinary playing properties. New chemical composition plus built-in tension makes the ball trajectory higher for more spin. You can return the ball fiercely after the bounce. Sponge 2.0, Max. Item: RXO4P

90	91	71	$49.95

Omega IV Euro

- *For technical style keen on balanced aggression*
- *Deeper and longer ball dragging at the surface*
- *Extra power spins from high-density carbo sponge*
- *Newly integrated dynamics for reliable control*

Integrated dynamics + perfect hardness = reliable control. Solid ball-capturing at the surface and perfectly matching sponge hardness promote extra spins and control at contact. Aggressive launch and clicking sensation at ball contact reflects maximized built-in tension, simulating full speed-glue effect. Sponge 2.0, Max. Item: RXO4U

88	93	71	$49.95

Omega IV Elite

- *Designed for modern allround pros*
- *Longer ball dragging at contact with softer feel*
- *Very precise and consistent control*
- *Higher ball trajectory with extra spin performance*

Balanced towards full "speed-glue" feel. New top sheet matched with upgraded soft Carbo Sponge offers amazing spin and feel. Bigger window over the net with high spinning trajectory. Extra spin, precision, and consistency benefit modern allround pros. Sponge 2.0, Max. tem: RXO4E

85	95	71	$49.95

Musa III

- *Hyper Elasto for increased probability of success*
- *Close to the table control*
- *Creative and tactical ball-trajectories*

MUSA III, newly tuned from HYPER ELASTO enables accurate service, controlled service return, tactical pre-attack rally, and solid close-to-table topspin made mainstream by the example of Chinese players. Innovative, controllable accuracy and the ball-clicking dynamics of the rubber formula allow creative tactical ball-trajectories around the table. Sponge Max Item: RXMU3

81	85	77	$32.95

SHORT PIPS

Vega SPO

** Hyper Elasto Generation Tensor Pimple Out*
** Scienced for Close-To-Net Attack and Blocking*
** Focused on Real Winning Probability*

Neutralizes opponent's spin and provides extremely aggressive speed for close-to-net play. Pips made by Hyper Elasto Tensor technology, for more accurate and powerful dynamics against opponent's spin. Chemically designed to maximize the aggressiveness with easier control; combined with special pips geometry. Parabolic trajectory increases success. Sponge 2.0, MAX Item: RXVSP

86	70	72	$39.95

JUIC®

Paddle Palace: North American Sole Distributor for JUIC

NEW SPONGE TECHNOLOGY

CHARISMA

999 Elite Charisma

Fantastic spin and greater speed than other tacky rubber sheets. The new Charisma catapult sponge combined with the classic tacky 999 Elite topsheet enhances both speed and spin characteristics. Retains original spin characteristics longer, and is lighter in weight. The JUIC 999 Elite rubbers are all 100% made in Japan. Sponge 1.8, 2.0, Max Item: RJ9EC

88	94	72	$39.95

Nano Spin Charisma

The latest development of the special Juic technology that allows speedy play with tacky rubbers. New Charisma catapult sponge, developed for the 40+ plastic ball, is combined with the tacky Nano Spin topsheet. Tacky rubbers tend to be most effective in their characteristics when serving or chopping, but Nano Spin Charisma also enables outstanding allround and offensive play both close to and far from the table. Sponge 1.8, 2.0, Max Item: RJNAC

91	94	70	$49.95

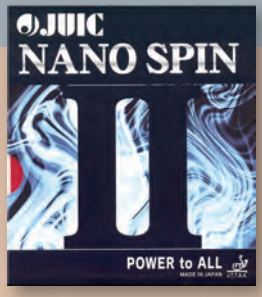

Nano Spin II Charisma

More power and sound! The new Charisma catapult sponge, developed for the 40+ plastic ball, provides excellent spin and enhanced speed, bringing a new dimension to the spin attack game. Sponge 1.8, 2.0, Max Item: RJNSC

96	95	68	$49.95

NANO SPIN RUBBERS

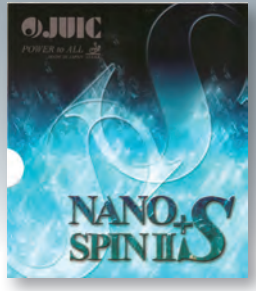

JUIC NANO Spin II is available with the JUIC Pro Alpha blade as part of a professional blade/rubber PRO SPECIAL. See page 6

PRO

NANO Spin II

Juic's Nano Technology gives Nano Spin II more power and sound for your game. Excellent spin and enhanced speed brings a new dimention to the spin attack game.
Sponge 1.8, 2.0, MAX. Item RJNS2

93	91	71	$49.95

NANO Spin II+S

Same Nano Spin II topsheet as the original, but with a softer sponge for even greater ball spin. Features of this rubber are the ball grip, control, and width of sweet spot. You get an amazing feel as if the rubber is an extension of the hand. Sharp topspins and surprising services are a breeze. NanoSpin II+S is a great weapon for the player seeking the best ball feeling! Sponge 1.8, 2.0, MAX. Item RJNSS

91	93	71	$49.95

NANO Spin *SPECIAL*

Special JUIC Technology offers speedy play with tacky rubbers that tend to be most effective when serving or chopping, but Nano Spin enables outstanding allround and offensive play close to and far from the table. Spin, speed and control: If you need the best of them all, Nano Spin is the rubber you are looking for! Sponge 1.8, 2.0, MAX. Item RJNAS

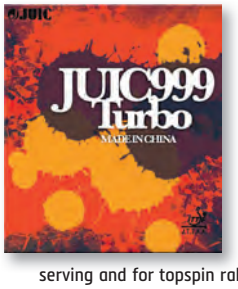

90	90	72	~~$49.95~~

NANO Spin +Flex *SPECIAL*

Grippy topsheet and soft-flexible tension sponge combine to give the ideal arc for topspin. Based on original Juic Nano Spin, the new +Flex version utilizes greater flexibility between sponge and topsheet to boost speed and spin. Light weight allows for higher swing speeds and greater ball rotation. Great for the player with allround-aggressive play. Sponge 1.8, 2.0, MAX. Item RJNAF

89	92	72	~~$49.95~~

999 Turbo

Tension and Spin! Juic 999 has dominated the table tennis scene with the top players. Now this ultimate version with Juic's original tension system in the sponge, and with greater rotation from the topsheet itself, Juic 999 Turbo offers players increased spin at serving and for topspin rallies, as well as great speed. Sponge 2.0, MAX. Item RJ99T

90	94	71	$39.95

JUIC 999 Attack

JUIC 999 Attack has a softer sponge than 999 Hardtype (but harder than 999 Elite). Slightly more super spin than the JUIC 999 hardtype but has slightly better control. Sponge 1.5, 2.0, MAX. Item RJ99A

73	89	78	$34.95

JUIC 999 Defense

JUIC 999 Defense is made for the modern defensive player and has fantastic spin. Great versatility. Superb defensive control. Sponge 1.0, 1.5, 2.0. Item RJ99D

60	95	83	$34.95

Scramble

An all-time best seller! Inverted rubber made for aggressive offensive players. Great speed + spin + consistency. Similar to Mark V. Sponge 1.0, 1.5, 2.0, MAX.
Item RJSCRA

78	78	81	$34.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

Prices subject to change without notice

SMOOTH RUBBER

999 ELITE RUBBERS

JUIC 999 Elite Ultima ***SPECIAL***
Fantastic! JUIC Ultima high tension sponge is combined with the popular, spinny, tacky, and fast JUIC 999 Elite topsheet to produce this 100% Made in Japan masterpiece! Sponge 2.0, MAX. Item RJ9EUL

85	92	73	~~$37.95~~

JUIC 999 Elite Ultima SV
The great JUIC Elite Ultima rubber is available with softer SV Ultima sponge! Perfect if you want the Ultima sponge but with more softness, hanging spin, and control. Combined with the JUIC 999 Elite topsheet that is so popular for its outstanding tacky spin with speed. Sponge 2.0, MAX. Item RJ9EUS.

83	93	74	$37.95

JUIC 999 Elite
JUIC 999 Elite is one of our hottest rubber sheets! Fantastic spin, but greater speed than other tacky rubber sheets. Long lasting spin characteristics but is lighter weight. Medium-soft sponge. Sponge 1.5, 1.8. 2.0, MAX. Item RJ9EL

82	89	75	$37.95

JUIC 999 Elite SV
Same great topsheet as the JUIC 999 Elite, but even softer sponge. Sponge1.5, 2.0, MAX. Item RJ9ES

80	90	76	$37.95

JUIC 999 Elite Defense
Great tacky spin and quality of Juic 999 Elite, combined with super-soft control-type sponge to slow speed down to the level that defensive players love. Sponge 1.0, 1.5, 2.0. Item RJ9ED

62	94	82	$37.95

Dany V
For the powerful allround player. Good spin and speed, but with more control than many other offensive rubbers. Dany V combines a topsheet balancing spin and control with a intermediate tension sponge, making it an excellent rubber for the player who uses a variety of techniques. Sponge 2.0 Item RJDAV

67	67	88	$27.95

Driva Smash Ultima
Ultima high tension sponge is combined with fantastic Driva Smash topsheet. Results are WOW! Very powerful, and highly recommended for the advanced offensive player. Sponge thickness MAX. Item RJDRUL.

86	80	78	$35.95

Driva Smash
Cadillac of rubber sheets. Outstanding for offensive play, fast with excellent spin. Made for topspin play and good for smashing and counterdriving. Sponge 2.0. Item RJDRI

84	78	79	$35.95

FREE SHIPPING >> Orders over $60 (see p. 137)

RUBBER RATINGS KEY

SPEED	SPIN	CONTROL	PRICE

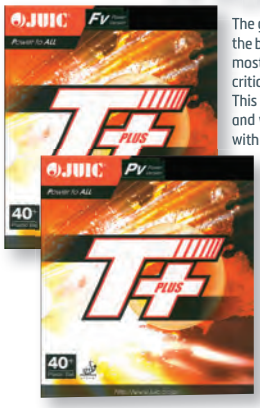

JUIC COMPARISON CHART pages 99-101

SpinSpiel
Sticky adhesive on the smooth inverted topsheet gives explosive spin, power drives, and stable control. Very tacky and spinny. For power players who need lots of spin, w/ medium-fast speed. Sponge 1.0, 1.5, 2.0, MAX. Item RJSSP

73	87	79	$35.95

T+ RUBBER = POWER+SPIN

The general characteristics of the new plastic ball are 1) less deformation of the ball at impact, and 2) less spin. With the classic approach, the spin factor mostly comes from the rubber sheet. But with the new ball material, it is now critical to analyze the spin factor with a total topsheet and sponge approach. This is what JUIC has done with the T+ rubber. T+ has elasticity and softness, and withholds the new ball at the impact. It spins and stabilizes the stroke with the arch of the ball. This speedy-allround power rubber leads the way into the plastic ball table tennis of the future.

JUIC T+ FV
The "Flex Version" with softer sponge for the power spin player. Sponge 2.0, Max. Item: RJTFV

93	91	70	$54.95

JUIC T+ PV
The "Power Version" with harder sponge for the power player. Sponge 2.0, Max. Item: RJTFV

94	90	70	$54.95

LONG PIPS RUBBER

Leggy Defense LONG PIPS
Long pips rubber that complies with the new ITTF long pips rule. Pips have maximum legal pip length ratio. Deception and spin-reversal is great. Sponge is soft, giving you added control. Sponge OX, 1.0, 1.5, 2.0. Item RJLEG

54	61	86	$30.95

SHORT PIPS RUBBER

PATISUMA

BEST PIPS-OUT RUBBER FOR SPIN AND BLOCK!!

Patisuma Top Speed
Powered by Topspeed sponge. With the poly rule changes, pips-out players are seeking a rubber that has the great spin/rotation of the Patisuma rubber along with speed which creates difficulty for the opponent to block or counter attack. This rubber delivers! Sponge 2.0, MAX Item: RJPTS

92	74	77	$35.95

Patisuma II
Patisuma II is a faster, quicker version with harder sponge than Patisuma (but still relatively soft). High-friction material and perfect allocation of pips give superb spin. The rubber of choice for offense- and spin-minded pips players wanting max speed, with outstanding <knuckle> ball on blocks + powerful topspins + sharp smash. Sponge 2.0. Item RJPA2

88	72	79	$35.95

ANTI TOPSPIN RUBBER

Neo Anti
Designed to kill the spin of your opponent's ball, and with its dead, slow speed gives incredible control. Elastic surface with special sponge gives added tricky spin when ball is hit hard. Sponge 1.0, 1.5, 2.0. Item RJNEO

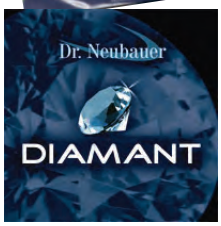

57	87	$36.95
SPEED	CONTROL	

Dr. Neubauer

Aggressor [Half Long Pips]
Disruptive weapon with half-long pimples, with new a completely new pimple geometry. The pimples are just as long as those of long pimple rubbers thus producing considerable disruptive effect while blocking, counter-attacking and straight hitting. At the same time, the ball is "slowed down" for all passive strokes. This comes in very handy for blocking but also for service returning. The special rubber formula is results in a rubber that is easy to control and produces good disruptive effect throughout the game. Also it can be used for a variety of attacking shots such as counter-attacking, lifting and straight hitting. Sponge 1.3, 1.5, 1.8, 2.0 Item: RUAGR

83	68	88	$45.95

Diamant [Half-Long Pips]
A multi-purpose weapon for serve return, block, attack and defense. Also great against chops: any backspin can be smashed for winner points. Sponge 1.2, 1.5, 1.8, 2.1 Item RUDIA

80	67	75	$45.95

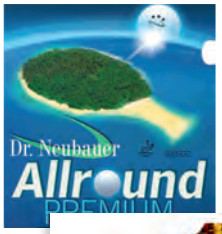

Viper Soft
Long pimples with friction - the soft alternative. Viper Soft has even softer pimples than Viper. It produces a low bouncing, wobbly ball both while blocking passively and for chop-blocking. The new rubber formula also allows for more backspin while chopping from behind the table. The outstanding attacking possibilities remains, thus creating a long pimple rubber that excels in a variety of fields. Sponge OX, 0.6, 1.0 Item: RUVIS

52	74	82	$45.95

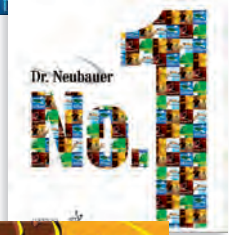

Viper
A major step forward for all long pip players blocking close to the table. Completely new rubber formula provides great control – even fast topspin shots can be handled easily. Soft pips help to dampen ball speed, producing a low bounce when blocking. Both passive- and chop-blocking provide a disruptive effect that will cause problems to your opponent. A highly interesting development in long pip rubber with friction. All standard attacking techniques with long pips can be performed quite easily. Sponge OX, 0.6, 1.0 Item: RUVIP

54	71	82	$45.95

Allround Premium
Extraordinary Allround Weapon. Disruptive long pips rubber enabling aggressive blocks and hitting and counter-looping against topspin shots. Excels at passive shots with very low bounce. Great for classic defense with spin and control. Heavy chops and float balls can be performed interchangeably. Unusual pip geometry with vertical distribution. Sponge OX, 0.6, 1.0, 1.3 Item RUALL

54	74	82	$45.95

Number 1
Rubber formula with vertical pip alignment. Softer pips enable you to reduce the speed of the game while blocking passively. Fantastic control at all levels. Very efficient for putting pressure on your opponent, and highly versatile for producing long pimple attacking shots with ease. Sponge OX, 0.6, 1.0 Item: RUNO1

53	69	84	$45.95

Desperado
Long pips rubber from another dimension! Both versions without sponge (OX) and with sponge (0.6, 1.0mm) are very effective for chop-blocking close-to-table – passive or aggressive blocks against topspin with push-blocking technique where ball is "pushed down" while holding the bat at a closed angle. OX is best for close-to-table block. Versions with sponge are better for action attacks and floating balls. Sponge OX, 0.6, 1.0 Item RUDES

54	72	79	$45.95

Prices subject to change without notice

NEW RUBBERS

ANTI TOPSPIN

Django
The first classic Anti-Spin rubber with disruptive effect. Surface is not completely frictionless. It is more of a classic Anti-Spin but with a bit of surface friction. It does not produce spin reversal, but a very versatile disruptive game nevertheless, with good control. Blocking, counter-attacking and straight hitting will cause trouble for opponents with a wobbly, low-bouncing ball for direct winning shots. Also is good for serve return since it neutralizes most of the oncoming spin. Sponge 1.5, 1.8, 2.0 Item: RUDJG

SPEED	61	CONTROL	86	$49.95

Rhino
New benchmark for frictionless Anti-Spin rubbers. Just like Dr Neubauer Anti-Spin rubbers BISON and BUFFALO, RHINO produces excellent spin reversal. It slows down the ball massively and provides very good feeling for the ball. Rubber enables very short blocking, even on a fast blade and against fast topspins. Most of all, control can be raised to a higher level thanks to a new rubber formula. It has become easier to find the right angle for the bat. Sponge 1.2, 1.5, 1.8 Item: RURHN

SPEED	57	CONTROL	81	$54.95

HALF LONG & LONG PIPS

K.O. [Half Long Pips]
Disruptive effect + control with half-long pips! Developed after Aggressor which was launched in 2016. While Aggressor is most effective in active blocking, counter-attacking, hitting, the new K.O. also produces a distinctive disruptive effect with low bounce while blocking passively. Also provides great control, including and especially for service returning and pushing over the table. Sponge 1.3, 1.5, 1.8, 2.0 Item: RUKKO

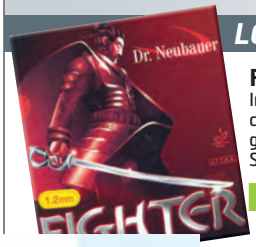

91	70	90	$45.95

Gangster [Long Pips]
New symbiosis of disruptive effect + control! Developed 100% for use with the new plastic ball, Gangster enables an effective blocking game close-to-table, both while blocking passively and while chop-blocking. All standard attack strokes with long pips can be performed easily, even for less experienced players. Great control at all levels – for service returning, pushing over the table, and blocking against fast topspins. Sponge OX, 0.6, 1.0, 1.3 Item: RUGTR

51	74	84	$45.95

LONG PIPS RUBBER

Fighter
Innovative rubber composition provides excellent control with good attacking possibilities through aggressive pushing and counter-attacking at the table. Sponge OX, 1.2 Item RUFIG

57	77	74	$38.95

Boomerang Classic
Defence weapon! This long pips rubber is great for classic defense, and provides lots of backspin and disruption. Sponge: OX, 0.6, 1.0 Item RUBOC

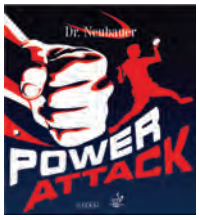

49	57	87	$45.95

Monster Classic
Monster Classic: Long pips with friction for an aggressive game close to the table. Special pimple geometry, rubber formula and sponge enables effective blocking and counter-attacking. Sponge: 1.0, 1.6, 2.0 Item RUMOC

69	54	82	$45.95

ANTI TOPSPIN RUBBER

Power Attack
The first offensive frictionless Anti-Spin rubber! Not only provides the effectiveness of a completely frictionless surface but allows for attack possibilities. Good spin reversal for blocking topspins but does not quite reach the disruptive effect of Dr Neubauer anti rubbers BUFFALO or BISON. Frictionless surface neutralizes any spin on service return. Differs from other frictionless Anti-Spin rubbers by increasing pressure on opponents through active counter-attack. Sponge 1.5, 1.8, 2.0 Item: RUPAK

SPEED 63 CONTROL 85 $49.95

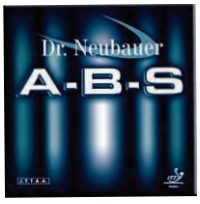

Bison
Enhanced effectiveness for blocking close-to-table. As effective as frictionless long pips for excellent spin reversal while blocking topspin shots with a lot of rotation. Very low speed sets a new standard in the field of frictionless Anti-Spin rubbers due to its ability to return the ball very short over the net. Can be used on classic "combination" blades or on fast, stiff offensive blades, thanks to absorption power of its dampening sponge that will literally "kill" the speed of the oncoming ball. Even "power loops" (high speed, little spin) can be returned easily. Great control/spin reversal, even on fast blades. Sponge 1.2, 1.5, 1.8 Item: RUBSN

SPEED 57 CONTROL 80 $54.95

Buffalo
Fantastic for blocking close-to-table. Combines the strengths of all existing Anti-Spin rubbers, setting new benchmarks for control and disruption. Excellent spin reversal against topspin shots with a lot of rotation thanks to its frictionless surface. Produces deceptive attacking shots. The most effective technique is aggressive pushing on chopped balls, but counter-attacking against float balls will also put pressure on your opponent. Sponge 1.2, 1.5, 1.8 Item: RUBUF

SPEED 61 CONTROL 80 $54.95

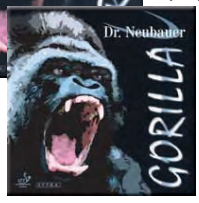

A.B.S.
Control + good spin reversal! For close to the table blocking. Distinctly slower than Gorilla and Grizzly and offers much better control. Very good spin reversal and attacking possibilities through aggressive pushing and lifting, especially against chop shots. Sponge 1.2, 1.5, 1.8 Item RUABS

SPEED 57 CONTROL 82 $54.95

New Gorilla
Gorilla with a slow dampening sponge = better control. Good spin reversal in blocking spinny topspins. The 1.2mm sponge is the slowest and most effective for short close-to-table blocking, and 1.5 and 1.8mm sponge give a disruptive effect for blocks but with better attack with aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8 (PINK color). Item RUGON

SPEED 62 CONTROL 79 $54.95

Gorilla
- Outstanding playing characteristics for blocking/chopping.
- Excellent disruptive effect with good control.
- Enables versatile game using aggressive pushing + lifting.

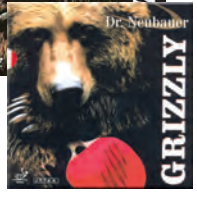

Highly effective blocking against strong topspin. Best effect with 0.6mm sponge. Sponge 0.6, 1.0 (CREAM color) Item RUGOR

SPEED 69 CONTROL 78 $54.95

Grizzly ABS Sponge
Slower than original version, topsheet produces good spin reversal on topspin balls with a lot of rotation. Ball bounces very low on the other side of the table. A.B.S. has a dampening effect to reduce rubber speed but with remarkable control. Sponge 1.2, 1.5, 1.8 (PEACH color). Item RUGRN

SPEED 64 CONTROL 79 $54.95

Grizzly
Innovative anti-spin rubber for allround game. Good control + disruptive effect for classical defense with very good control/backspin. Even strong topspins can be returned with a flat flightpath and maximum backspin. Effective control and placing of service returns. Sponge: 1.0, 1.6, 2.0 (WHITE color). Item RUGRI.

SPEED 70 CONTROL 82 $54.95

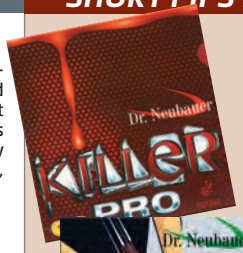

● **Please note:** *Packaging for original and new versions of Grizzly are the same. The sponges are different colors – original sponge is white, new A.B.S. sponge is peach.*

Anti Special
Slower than Dr Neubauer's Gorilla and Grizzly, but with better control. Great for spin reversal for effective blocking game close-to-table. Good attack through aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8. Item RUANT

SPEED 61 CONTROL 82 $54.95

SHORT PIPS RUBBER

Killer Pro
Great weapon for the aggressive game with short pips! Same topsheet as best-selling rubber Killer, but laminated with a revolutionary new sponge to enable disruptive blocking, counter-attacking, and hitting, with speed. Sponge 1.3, 1.5, 1.8, 2.0, MAX Item: RUKIP

87 | 69 | 88 | $45.95

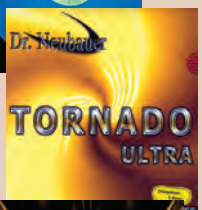

Terminator
Differs from other short pips rubbers. Available exclusively with fabric reinforcement (no sponge) underneath to produce a float ball while blocking passively. Ball bounces low, drops on aggressive blocks. Enables dynamic, efficient play against chops and produces fast "dummy loop". Great for allround game. Sponge OX. Item RUTRM

76 | 70 | 75 | $45.95

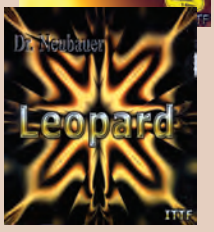

Pistol [Short Pips]
Fast, powerful, dynamic for fast attack - especially straight hitting and fast looping. Enormous speed with a disturbing "flat" effect. Sponge 1.0, 1.6, 2.0. Item RUPIS

88 | 71 | 86 | $45.95

Tornado Ultra [Short Pips]
Big spin/speed and tactically dynamic for blocking and counter-attack. Creates wobbling balls. Sponge 1.5, 2.0. Item RUTOR

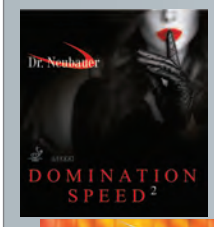

87 | 75 | 82 | $45.95

Leopard [Short Pips]
This rubber will be a real challenge for your opponents. Blocking with topspin or smash produces disturbing returns with the ball dropping and wobbling. A supreme weapon for block, counter-attack, and provides very good control for all blocking and attacking strokes. Sponge 1.0,1.5,2.0. Item RULEO

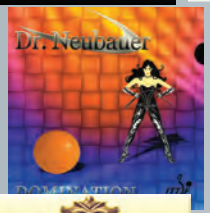

79 | 67 | 74 | $45.95

SMOOTH RUBBER

Domination Speed 2
Enhanced for new plastic ball requirements. Topsheet is unchanged, with maximum rotation on serve and loop (topspin). Very grippy surface for good control. Decisive breakthrough in sponge development -- soft but allowing high speed and long contact time between rubber and ball for maximum rotation. Highly effective for modern offense! Sponge 1.8, 2.1 Item: RUDS2

92 | 82 | 75 | $49.95

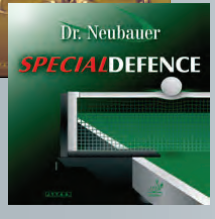

Domination
"Speed glue" tension in sponge and the top sheet. Elasticity and tension create acceleration. Sponge 1.2, 1.5, 1.8, 2.1.
Item: RUDOM

84 | 84 | 77 | $49.95

Goliath Speed
Speed glue effect without speed glue, for an extremely dynamic attacking game. Harder sponge allows more speed for attacks. Sponge 1.5, 1.8, 2.1. Item RUGOL

89 | 80 | 73 | $49.95

Special Defense
High friction surface without being sticky. Effective in combination with pips or anti-spin rubber. Sponge 1.0, 1.2, 1.5. Item RUSPE

68 | 92 | 94 | $49.95

HOW TO READ THE RUBBER CHART

The Rubber Comparison Chart lists Smooth Rubber on pages 98-100. Short Pips, Long Pips, and Anti-Topspin Rubbers are on page 101. For more info on rubber types and how to choose rubber, see page 66.

Sponge Thickness is shown in millimeters. The measurement includes only the sponge (not the topsheet). Often the manufacturer indicates "MAX" for the thickest sponge available for a rubber. MAX thickness can vary from brand to brand, but usually means the sponge is approximately 2.3 to 2.5mm. Often MAX means sponge and topsheet together measure 4.0mm, since this is the maximum thickness allowed under ITTF regulations. All rubber sheets at Paddle Palace are of ITTF-legal sponge thickness.

Speed/Spin/Control Ratings are on a scale of 10 to 99, with the higher the rating, the higher that attribute. These ratings use a universal scale which differs from manufacturers' ratings so that the rubbers from all the brands can be compared. Ratings are meant only as a tool to help select rubber. Naturally, speed, spin, and control are affected by a player's skill, strokes, and playing style.

Rubber sheets are available in red and black unless otherwise indicated. One rubber covers one side of a blade. Paddle Palace will apply rubber to the blade at no extra charge upon request. ●

PADDLE PALACE ROBOTS

Spin Indicator!
Spin Indicator panel on the robot shows you the spin for each ball before it shoots.

LCD Touch Screen!
Operation and programming of all functions of the robot is very easy with the new Touch Screen.

PADDLE PALACE H2W TOUCH PRO ROBOT

The Most Versatile High-Tech Robot + Easy to Use!

The Paddle Palace H2W Touch Pro Robot is a very versatile and user-friendly high-tech robot. The new LCD Touch Screen makes operation and programming of all functions of the robot very easy! Get started in seconds using one of the 30 built-in ball sequences with just a few touches on the screen. Making your own custom sequences is also simple, as the Touch Screen walks you step by step through the setup. You can save up to nine of your own favorite custom sequences, and you can easily modify the 30 built-in sequences. Whether you use built-in sequences or your own custom sequences, start-up is easy every time you play.

The new Spin Indicator Panel located just below the shooting head on the robot shows you the spin for each ball before it shoots. This makes playing with the robot more like playing with a human partner, as you can visually anticipate the spins on the upcoming balls.

The H2W Touch Pro Robot has two throw wheels with independently programmed motors, allowing a great variety and degree of spins, including topspin, underspin, sidespin, and no-spin. Plus the robot can seamlessly shoot consecutive shots with different spins. There are 22 possible landing spots on the table including short and long balls, making possible any combination of spins and landing spots you choose. The H2W Touch Pro Robot is designed for the player who wants a high-quality long-lasting robot that is easy to use, yet offers the sophisticated technology for practicing the ideal training patterns to take your game to the next level.

PADDLE PALACE A32W PRO

The Paddle Palace A32W Pro has many outstanding advanced robot features, but is offered at a very affordable price! Unlike other robots in this price range, it has two throw wheels controlled by two independent motors. This gives you great control over setting the variety and degree of spins including topspin, underspin, sidespin and no-spin. It includes an automatic ball recycle and net collection system. It has multiple oscillation options, and has convenient robot controls on the player's side of the table. The A32W Pro is high quality, sturdy, reliable. It comes ready to play with virtually no assembly required, and it rolls from storage to table for very quick setup/take-down. Item OPVA3

- **Two throw wheels, for multiple spin options**
- **Multiple Oscillation Options**
- **Very durable, made with high quality materials**
- **Ball Recycling and Net Collection System**
- **Rolls easily from table for easy storage**
- **No-Jam, easy-feed engineering**

FREE shipping to contiguous USA!
FREE 120 Nittaku training balls

PADDLE PALACE TABLE TOP PRO

The Paddle Palace Table Top Pro is an affordable and quality robot that delivers strong and consistent topspin, underspin, and sidespin shots. It is simple to use and is jam free. The frequency and speed of the shots are controlled by convenient robot controls on the player's side of the table. It can be set to hit to one spot on the table, and it also has multiple oscillation options, both controlled and random. It can be set to shoot serves or rally shots. It can be placed on any location on the table, or it can be set on a stand behind the table (stand not included). A ball collection net is available for an extra charge. The Paddle Palace Table Top Pro is the easiest robot to set up and use that we have ever seen! Item OPVTT

- **Versatile, shoots from any location on the table**
- **Outstanding topspin, underspin, sidespin**
- **Multiple Oscillation Options**
- **Set for serves or rallies**
- **Easiest robot to set up and use**
- **Net not included. Nets available. See p. 106**

PADDLE PALACE S4W PRO ROBOT

Taking Robot Technology to the Next Level

The Paddle Palace S4W Pro has two heads, each with two throw wheels. Both heads, and the four throw wheels, are all independently programmable, allowing you great flexibility in designing playing patterns and practice options. You can program a seamless combination of topspin and underspin (or side-spin or no-spin) shots in the same play sequence. The S4W Pro comes with an easy-to-use, comprehensive control box, conveniently located at the player's end of the table. This heavy duty robot is ready to use right out of the box - for club or home.

Use one or both heads to produce the desired practice patterns, or the single head to set up specific serves or volleys, or employ both heads to alternate seamlessly between types of spin, short/long balls, strong/weak balls, or high/low balls. You choose the landing spots, speed and throw frequency. You can set up one head to reproduce a realistic serve that hits the robot side of the table first, then complete the sequence with volleys from the 2nd head. Easy to use, yet provides sophisticated technology and flexible programming to be your ultimate training machine. Item OPVS4

$1499.95

***Includes Shipping**

S4W Robot Includes:

- **Free 120 Nittaku training balls**
- **Free Ball Pick-up Net**
- **Free shipping to contiguous USA**

Throw Wheels – One, Two, or Four?

Robots with one throw wheel can shoot topspin, underspin, and sidespin. With two throw wheels, the two independently controlled motors make it possible for independent spin and speed settings. This results in a great range of spin options – light to heavy topspin, underspin, or sidespin – or no spin shots. Four throw wheels provides the greatest versatility of all, including serve and volley in the same training sequence.

Oscillation: Random (R), Controlled (C), Programmable (P)

Controlled Oscillation means you can set the robot to hit alternately only to the two widest points in the angle range, plus you can set the width of the angle. With Random Oscillation, the robot hits to the inner angles as well as the widest angles. With Random Oscillation, where the ball lands depends on the frequency and speed settings you have chosen. Programmable Oscillation is the most versatile. It achieves everything Controlled and Random Oscillation does, plus you can program sequences of your choice for where the ball lands!

LCD Touch Screen

The LCD Touch Screen is a very easy and intuitive menu-based interface to control all functions of the robot.

Serve & Volley Sequences

The Robot can be set to serve and volley in the same sequence. So, for example, you can set a sequence to begin with a serve, then shoot volleys to specific landing spots with spins of your choice for a realistic training pattern.

Topspin/Underspin Sequence

The robot can shoot topspin shots and underspin shots (and other spins) in consecutive shots in the same sequence.

Spin Indicator

The Spin Indicator is located just under the shooting head. Before the ball shoots, it shows you the spin type on next shot: topspin, underspin, right-sidespin, left-sidespin, right-side/topspin, left-side/topspin, right-side/underspin, left-side/underspin, or no-spin/deadball.

NEWGY® INDUSTRIES INC.

NEW NEWGY ROBOTS OPTIMIZED FOR THE 40+ BALL

Newgy Robots are affordable robots that provide hours of table tennis fun for the whole family. All Newgy Robots have one throw wheel, and they can throw topspin, sidespin, and underspin. They throw one spin at a time. The robots can oscillate to different landing spots (except for the Robo-Pong 540+)

$1,249*

Newgy Robo-Pong 2050+

Newgy's top robot has digital technology for easy, precise regulation of ball speed, wait time, and landing location. Normal Mode gives you simple manual control over each function while in Drill Mode, you can run any of the 64 drills stored on the controller. Use PC Mode to create and save drills using a simple interface, then run those drills direct from your PC. Setup Mode makes it easy to calibrate motors to a set standard and select your desired language. Intelligent design also allows selection of favored hand so drills run correctly for right-handers and left-handers alike.
Item: ON205P

Package Includes:

- Ball Thrower (w/Oscillation)
- Recycling Net System
- Rubber Tips Packet
- Full Size Digital Control Box
- Transformer
- Connector Cable
- Owner's Manual
- Set-up DVD
- 48 White 40+mm Robo-Balls (USA only)
- Training Book

$949*

Newgy Robo-Pong 2040+

The Robo-Pong 2040+ robot can do everything Newgy Robo-Pong 1040+ does and more. Includes recycling net and ball recycle system for non-stop action. Can shoot topspin, underspin, and sidespin. Shoots one spin at a time. You can set the frequency, speed, and oscillation.
Item: ON204P

$799*

Newgy Robo-Pong 1050+

Identical to the Robo-Pong 2050+ except it doesn't have the Recycling Net System. Purchase a Ball Catch Net (sold separately) for ball capture and manual recycling. Position the robot anywhere on top of table or mount it back from the table in the optional Robo-Caddy (sold separately) to get a variety of angles and trajectories.
Item: ON105P

$549*

Newgy Robo-Pong 1040+

Includes all features of Robo-Pong 540+ plus it includes oscillation and more powerful speed and frequency controls. Bucket Extender expands ball capacity for longer continuous play.
Item: ON104P

$429*

Newgy Robo-Pong 540+

This is Newgy's first step to seeing how robot practice can revolutionize your game. Ideal for recreational players and the budget-minded. Lower speed and frequency ranges and static delivery accommodate untrained strokes. Set on top of table and twist base to change trajectory. Improved bucket design ensures reliable ball feed.
Item: ON540P

MORE COURT GEAR ON PAGES 112-113

TT-Flex

$89.95

TT-FLEX gives you a full-body workout while strengthening the primary muscles that you need to enhance your performance. Includes a 600 gram stainless steel paddle with premium handcrafted wood handle, with 12 attachment points and an elastic band with clips on each end, and instructions. While working on your strokes you strengthen the major muscles groups needed to take your game to the next level. In addition to your normal training, use TT-FLEX for 10 minutes at the conclusion of each workout session. Your shots will have more speed and spin within 30 days!

The Ultimate in Table Design and Performance!

Designed and engineered to combine a true tournament playing experience with the most efficient and user friendly chassis design ever produced by Stiga. Ships 100% fully assembled from the factory. Commercial grade pistons engage when opening and closing the table, which make this heavy-duty table feel almost weightless and it can be converted between play and storage position by only one person with minimal effort in less than 3 seconds. When in play position, the table is rock solid from surface to ground and the 1" top is all you would expect from a flagship Stiga table that is ITTF approved. In storage position, the table is extremly compact – only 22" wide – and the machine grade 5" ball bearing casters make it effortless to move to about. Includes tournament-grade Premium VM net and post set. Size: 62 x 60 x 22 in folded position. Item: TEPCT

ITTF

ITTF Approved
Made in Germany

OPTIMUM 30

The Stiga Optimum 30 sets a new standard for consistency and design in table tennis tables. With a 30 millimeter (1.2 inch) top (the thickest in the sport and 20% thicker than its closest competitor), the Optimum 30 has the most even and consistent bounce of any table. ITTF approved and made in Germany, this table represents the pinnacle of current table tennis tables.

The playing surface is coated with a special varnish for the ideal amount of friction and truest bounce. Edge and center lines are silk screened for even placement and professional appearance. The undercarriage features a 2.4 inch steel apron and 2.4 inch by 1.6 inch steel legs with levelers. The table separates into two halves, each with their own set of four 4" casters for easy movement and the two halves allow compact storage as well as use in playback position. Comes with a high-quality Stiga VM net set. Size: 61" x 60" x 26" in folded position. Item: TEOP3

See PaddlePalace.com for latest SPECIALS

ABOUT PURCHASING YOUR TABLE

Table Top: Look for tables with thicker tops. Thicker tops give a more consistent bounce and are less likely to warp after years of use. The Paddle Palace recommends table tops of 3/4 inches or more.

Net Set: Some tables have net posts permanently attached to the frame. These make setup and takedown a little quicker but may not be as adjustable or sturdy as separate net posts. Table price includes net set.

Frame: Look for tables that have larger, sturdier legs and support frames. Sturdier frames contribute to a more consistent ball bounce and also help prevent top warpage. If you set up and store your table regularly, a larger frame increases durability.

Wheels: Larger and stronger wheels are important particularly if you set up and store your table frequently.

Table Shipment: Tables are shipped directly from the manufacturer by freight line. Delivery generally takes 2-3 weeks from the date of order. The delivery person will need assistance in unloading your table and will leave table at the curbside. Some tables require some assembly.

Shipping Charge: ***Price includes shipping! Some locations incur extra shipping charges. In that case, Paddle Palace will contact you before processing the order.***

ACCESSORIES FOR THE COURT

SCOREBOARDS

Stiga Sensorscore $99.95

SensorScore by STIGA is the first and only hands-free, fully-automated table tennis scoring system. Utilizing innovative sensor technology, SensorScore turns the table tennis table playing surface into a nano-vibration detection field. Sensors attached under the table communicate contact data to the scoring unit which displays the score in real time. The system tracks and displays the score, announces the score and informs the players when it is time to change serve. Scores 11 or 21 points. Net set included. Net does not extend a full 6" from sides of table.

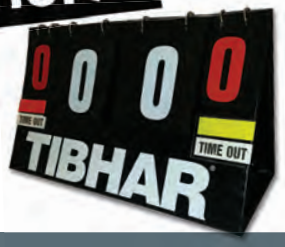

SensorScore Features:

- Digital scoring unit with vibrant led display and audio prompts
- Premium net and post set with integrated sensor
- Two surface vibration sensors easily mount under table
- Rail mounted master controller to control game settings
- Universal mounting design for regulation tables up to 1" thick
- Simple installation requiring only minutes to set up Item: MSSEN

Stiga Scoreboard Large $49.95

Stiga Scoreboard Large is made of durable soft plastic. Scoring 0-21 points and game score from 0-5. Folds and snaps easily for storage. Length 49cm x width 23cm x height 27.5 cm. Color: Navy or Black. Item: MSSCL

Tibhar Score Counter Time Out $49.95

Foldable plastic coated board with PVC numbers from 0 to 20 and 0 to 5(sets). Item: MTSCT

INTERNATIONAL TABLE TENNIS SKILLS DVD

Samson Dubina Table Tennis Academy SamsonDubina.com

Samson shares 19 years of knowledge that he has learned from 40 different coaches while traveling to Europe, Asia, and throughout North America. During the 2 hour 17 minute DVD, Samson explains each professional skill in a simple, step-by-step approach that you can be understood by all ages and all levels. Topics include - advanced footwork, drills, strokes, serve, serve return, looping, flipping, game strategy, training routines, mental strategies, and much more.

Here is what is being said about this DVD:

"Great tool to learn the proper technique and start playing table tennis like a pro!"
– Doru Gheorghe (Olympic Coach)

"I had a chance to view your DVD a couple of times and plan to view the DVD several more times in the future. This video is a "one stop" shopping for those that want to improve their table tennis game either in practice or in tournaments!"
– Philip Wu (Beginner Table Tennis Player)

"This fast-paced 2-hour DVD is packed full of expert coaching advice on strokes, mental game, and much more!"
– Ariel Hsing (Olympian)

"What I like most about the DVD is Samson's ability to demonstrate the proper technique and how to apply it to match play!"
– Sean O'Neill (Olympian)

"The DVD seems so personal. When I watch it, I feel like I'm getting a personal lesson just for me!"
– Chris Jordan (recreational player)

"This is one of the very best table tennis DVDs that I have ever watched!"
– Carl Hardin (USATT Coach)

"Perfect for teaching the complicated table tennis technique in simple terms. Highly recommended to any athlete who wishes to improve their game and their knowledge of the sport!"
– Richard McAfee (National Coach and Hall-of-Famer)

$24.95

PRO TABLE TENNIS SERVE RECEIVES

By Alpha. $29.95. Item: VADSR

Serve receive is the most difficult part of competitive table tennis. This dvd shows over 250 examples of service returns executed by some of the best players in the world. The most popular options for receiving specific serves are included. The DVD is organized according to the type of service that is to be returned, whether long, short, underspin or topspin, to the forehand or the backhand. Alpha Productions shows the serve and the receive and how the point plays out. Then the sequence is repeated in slow and stop motion, occasionally employing graphics to illustrate the spin, and then it is played once more at regular speed. Commentary points out some of the significant factors for each receive. Item: VADSR

$29.95

PRO TABLE TENNIS SERVES

By Alpha. $29.95. Item: VADSE

Program features 29 players and 140 serves!

Alpha Productions has captured the serves of some of the world's best players during practice. This program clearly shows each detail in their movement and reveals the secrets of the contact.

Covers serves of all styles - shakehand, penhold, righthanders, lefties -- organized in the basic categories of underspin, topspin and no spin, with a special mention if the side spin component becomes significant. Each serve is presented at full speed, half speed and a extra-slow "analysis speed". On some serves, the use of a super slow motion camera reveals even more detail of motion. Item: VADSE

$34.95

MODERN TABLE TENNIS 102 DVD

By Alpha, 35 mins. $34.95. Item: VADM2

1996 Olympic Team member Wei Wang and five time U.S. Men's Champion Sean O'Neill explain serve motion & strategy, receive motion, footwork & strategy. See paddlepalace.com for more details. Item: VADM2

Ping Pong for Fighters

By Paralympic Gold Medalist Tahl Leibovitz
152 pages/Foreword: Stellan Bengtsson

Tahl Leibovitz is known for his passionate play, creativity, and indomitable spirit. In **Ping Pong for Fighters**, he reveals the mind and heart of world-class table tennis – how champions think, act, and succeed, even when things don't go their way.

Leibovitz identifies four main elements in competitive play: the **environment**, the **ball**, the **opponent**, and the **self**. If the player masters each element, he or she will eliminate unnecessary baggage from the game, finding themselves more resilient, focused, less frustrated, and better-equipped to handle the volatile nature of table tennis. In **Ping Pong for Fighters**, Tahl Leibovitz has developed a philosophy for the thinking and feeling player. Rather than teaching players to get into fights, **Ping Pong for Fighters** gives you tools to develop confidence, self-belief and a will-to-win that remains long after you've left the table.

100 Days of Table Tennis

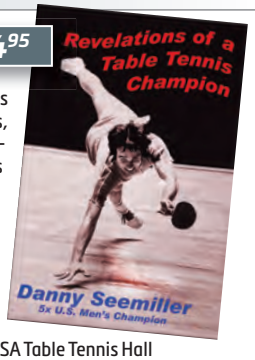

By Samson Dubina, ITTF Coach, US National Team Member

210 pages. Travel with top USA coach/player Samson Dubina on a 100-day table tennis journey. Each day you will learn new skills about strokes, spins, drills, game tactics, training routines, and tournament performance. This book will give you necessary tools to move past your competition both mentally and physically. Here is what USATT National Coach and Hall of Famer Larry Hodges says about the book:

"100 days… that's how long it'll take for coach/player Samson Dubina to lead you through these pages, a few minutes each day, with the goal of taking your game to the next level.

Revelations of a Table Tennis Champion

$24.95

by Danny Seemiller / 218 pages, 96 photos

This autobiography of five-time U.S. Men's Singles Champion Danny Seemiller takes you through his 50 years in the sport, from early days of training, breakthroughs, agonizing defeats and great triumphs. You'll learn why the three-sport star (baseball, basketball, and football) changed focus to table tennis. You'll experience his trips around the world, from being marched at gunpoint to achieving his boyhood dream of defeating the Chinese. But playing is only half his story. Danny was the U.S. Olympic and World Team Coach for ten years, and received USOC Coach of the Year for Table Tennis three times. He served five years as president of USATT, ran dozens of major tournaments through the years, and was instrumental in bringing the 2018 World Veterans Games to the U.S. He is a member of the USA Table Tennis Hall of Fame, and in 2012 became the youngest recipient of the Lifetime Achievement Award.

Ping Pong Diplomacy:
The Secret History Behind the Game That Changed the World

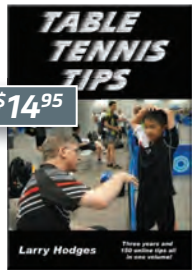

By Nicholas Griffin / 336 pages

Chosen Amazon Best Book of the Month January 2014. Hardbound. From Scribner.

Ping Pong Diplomacy tells the strange, tragic story of how the game was manipulated at the highest levels; how the Chinese government helped cover up the death of 36 million by holding the World Table Tennis Championships during the Great Famine; how championship players were condemned, tortured, and murdered during the Cultural Revolution; and, finally, how the survivors were reconvened in 1971 and ordered to reach out to their American counterparts. Through a cast of eccentric characters – from spies to hippies, ping pong-obsessed generals to atom-bomb survivors – Griffin explores how a neglected sport incited a realignment of world super powers. Price $25.95. Item: MMBR

"Ping-Pong Diplomacy belongs in the category of 'you can't make this stuff up.' It reads more like a le Carré novel than diplomatic history. But the tale it recounts actually happened, and casts a new and provocative light on the U.S. Opening to China, one of the great foreign policy breakthroughs of the 20th century."
– Anne-Marie Slaughter, author of A New World Order and The Idea That Is America

"Ping-Pong as a vehicle for international espionage? It's an idea so outlandish that, if it weren't true, some novelist would have to invent it. A remarkable story, well documented and excitingly told."
– Booklist, starred review

Stiga Liner

Durable, flexible polyester fabric keeps the foot in the correct position during multi-directional movements and high performance activities. Reinforced sides provide a high level of fit and stability. Lightweight breathable material on upper reduces heat and humidity inside the shoe for a dryer and cooler environment. Natural rubber in the outsole has excellent grip allowing full use of your footwork. Specifically designed flex grooves improve balance and feel of the ground. Liner uses STIGA´s well-renowned soft EVA innersole for maximum comfort. Color: Black with blue trim. Euro sizes 36-46. Item: HSLN

Stiga Instinct II

Inner sole of soft EVA gives maximum comfort, and combined with a special and unique outer sole developed specifically for table tennis. The pattern and grip areas give perfect grip for quick moves at the table. Excellent feeling against the floor and maximum support for your foot!
Euro sizes 34-46. Item: HSI2

Stiga Agility *SPECIAL*

REG $99.95. Meets all the requirements for the modern fast table tennis game. This flexible and light shoe enables maximum speed and quickness on every floor surface. Agility allows you full use of your footwork due to excellent floor contact provided by natural rubber in the sole. Reinforced sides and leather fabric offer outstanding stability in both forward and sideways movements. Agility has STIGA'S soft EVA innersole for maximum comfort. Euro sizes 36-46. Item: HSAG

Stiga Instinct

Developed to withstand the tough and intense movement patterns used in table tennis, Stiga Instinct offers you extreme flexibility with a feeling like no shoe before it. With its natural balance and speed you can focus entirely on your game. The Instinct sole gives you perfect grip on every surface, and the ability to move quickly. Black with red and silver trim. Euro sizes 36-46. Item: HSIN

The Latest High-Performance Shoe with Non-Slip Sole

$69.95

Donic Ultra Power SPECIAL

REG $76.95. High-performance table tennis shoe with enhanced cushioning effect incorporates a non-slip sole. The use of a higher percentage of natural rubber ensures excellent grip. Upper nylon mesh tongue and padding provides comfort with performance. Orthopedic shock absorbing EVA-middle sole with cushioning of the innersole allows for maximum comfort. Color: Black with blue trim. Euro sizes 35 to 47. Item: HDUP

NOTE: These shoes run a size small. Choose one size bigger than you normally choose for shoes.

Enhanced Cushioning and Grippy Sole

A comprehensively thinner top surface rubber, subjected to high tension, allows space for a thicker sponge - generating extra power and speed. The DONIC Bluestorm Series offers noticeably greater acceleration while retaining its outstanding spin and speed characteristics, making the latest trend.

Bluestorm is available in three versions: Z1, Z2, Z3. Select your own Bluestorm!

See page 68

Bluestorm Z1

A LIGHTNING STRIKE!

Bluestorm Z1 with its medium pored sponge and short, wide pimple structure is the hardest and fastest of the three Bluestorms.

SPEED	97
SPIN	97
CONTROL	69

Bluestorm Z2

A POWERFUL STORM!

Bluestorm Z2 has a long, thin pimple structure and a large pored sponge. This 47.5° medium hard sponge is ideal for many players.

SPEED	95
SPIN	97
CONTROL	70

Bluestorm Z3

A THUNDERBOLT!

Bluestorm Z3 with its large pored 42.5° sponge is considerably softer. Lovers of freshly glued rubbers will delight in the sound.

SPEED	91
SPIN	97
CONTROL	73
