Table Tennis

RUBBER

HOW TO CHOOSE

Rubber sheets come as a square in a sealed package. The rubber is custom-assembled to a blade after the player makes their blade and rubber choices. Paddle Palace will assemble rubber to the blade as a free service upon request.

One rubber sheet covers one side of a blade, two rubbers are required to cover both sides. ITTF regulations require black rubber on one side and a contrasting color on the other.

4 MAIN RUBBER TYPES:

- Smooth: Most players use smooth (also called "inverted") rubber. The surface is smooth with a layer of sponge underneath. Smooth rubber provides the most spin and is used by over 85% of tournament players.
- Short Pips, or "pimpled" rubber, has a bumpy surface and usually has a layer of sponge underneath. It is used by players who do not execute a great deal of spin in their game. It often provides more control if you have difficulty playing against spin. "Hard rubber" is the term for short pips rubber with no sponge, used primarily for Classic or Hardbat play.
- Long Pips rubber has extra-long pips that reverse the spin of the opponent. Unpredictability of spin from long pips can give the player an advantage over the opponent who has not learned to read the spin. It is difficult to play offensively with long pips, so most players who use long pips only use it on one side.
- Anti-Topspin rubber has a smooth surface and does not generate much spin/speed. Anti rubber neutralizes opponent's spin. Most players using anti block with it on one side and use different rubber on the other.

CHOOSING RUBBER:

- Speed vs. Spin: With so many rubber sheets, how do you choose? The Paddle Palace Rubber Ratings are a good place to start. Look at the speed/spin ratings of the rubber and match one to your playing style. Offensive players who use topspin, drive, loop, and smash usually prefer rubber with a high speed rating, while defensive players who primarily use underspin, chop, push, and block usually prefer slower rubber. Loopers and choppers prefer rubber with a high spin rating. The faster or spinnier a rubber is, the harder it is to control. and is also more affected by the opponents' spin.
- **Sponge Thickness** affects the speed of the rubber. Thicker sponge = more speed and more spin. Thinner sponge = more control. Thicker sponge adds weight to the paddle and gives a more cushioned feel. Thinner sponge is lighter and gives a woodier feel. Offensive players prefer 1.8 to 2.5mm. Allround players prefer 1.5 to 2.0mm. Defensive players prefer OX (no sponge) to 1.6mm. Loopers prefer thicker sponge. Choppers prefer thinner sponge. Developing players needing more control should choose a thinner sponge that fits their playing style.
- **Sponge Hardness** affects spin, speed, control, and feeling. A soft sponge offers the most control and feeling and often suits beginners and intermediate players. Medium sponge suits players with an allround game who appreciate touch/control but also like to place powerful strokes. Harder sponge brings the most power and speed, and is favored by aggressive, well-practiced, higher level players trying to win the point outright with powerful strokes, and who need additional power when playing back from the table.

RUBBER RATINGS:

Rubbers are assigned ratings for Speed, Spin, & Control on a scale of 10 to 99. The higher the rating, the higher that attribute. Paddle Palace ratings use a universal scale which differs from the manufacturers' ratings so that rubbers from all brands can be compared.

Ratings are intended only as a tool for helping to select rubber. Naturally, speed, spin, and control are greatly affected by an individual player's skill, strokes, playing style, and blade.

This Paddle Palace catalog includes **Comparison Charts** with all the rubber ratings, so you can see it at a glance.

Go to **PaddlePalace.com** for interactive filters of all the rubber attributes, viewable from both a Thumbnail View or Chart View.

TAKING CARE OF YOUR TABLE TENNIS RUBBER

Table tennis rubber is one of the biggest investments players make in the sport. A new sheet of rubber, right out of the package, is beautiful and clean and fresh. As soon as you play with it – in no time at all – dirt, oil, dust, grime, nicks, and dead spots find their way onto your originally pristine rubber. Without proper cleaning and care, your rubber will get old quickly. So it is a good idea, both performance-wise and budgetwise, to do everything you can to prolong the life of your rubber.

CLEAN YOUR RUBBER!

Dirty rubber will cause the surface to be less tacky and spinny. It will also play inconsistently due to the surface of some areas being different from others. This results in a lack of touch. When you see players breathe on the racket and wipe it with their hands, usually it is because they have noticed their rubber has a dirty spot, or they are ensuring against it. Although in a pinch it is tempting to clean your rubber in this way, it is not recommended! The less you touch the surface of your rubber, the longer it will last.

It is best to use a cleaner that is specifically made for table tennis rubber. People sometimes ask if it is ok to use household detergent. We advise against this, because these often have chemical elements that can leave unwanted residue on your rubber, can cause it to deteriorate too quickly, and/or it can have solvents that will fail a racket test. Using plain water is a safe option. However, water will not remove some oils from your rubber. It does not give the desired back-to-newer-condition that rubber cleaner does.

Spray one or two sprays of cleaner on one rubber, then wipe it with a sponge or lint-free cloth. Most kitchen sponges won't do because they leave bits of sponge on your rubber, and many towels are too abrasive or leave pieces of lint. For this reason, we recommend a table tennis sponge. Check our Paddle Care section (pg 54) for an assortment of sponges.

Always clean your rubber at the end of each playing session, and any time it seems dirty or you notice decreased or inconsistent performance.

COVER YOUR RUBBER!

As soon as you open a new rubber sheet, it starts to lose its newness. Even new and unused paddles will deteriorate over time. When rubber is covered, it stays new much longer. The plastic protects the rubber surface from air and elements, and keeps it from inadvertently rubbing up against anything, including your paddle case.

We like adhesive protection sheets because they actually stick to the rubber. No air gets to the rubber and the sheet stays on. Protection sheets come in squares. You can cut it to fit the size of your rubber, or leave it as is.

KEEP YOUR PADDLE IN A CASE!

After you clean your rubber and cover it in plastic, then put it in a paddle case. Cases provide padding and protection, they keep the paddle out of direct sunlight, and they help keep it clean. The best case is one that is roomy enough to insert and remove your paddle without the rubber scraping against the case. We also recommend using a case with an opening that allows you to insert and remove the paddle by the handle so that it is not necessary to touch the rubber. Keep your paddle at room temperature and away from sunlight. Do not leave rubber sheets or your paddle in a hot car.

USE EDGE TAPE!

Edge tape around the edge of your paddle makes a significant difference in the number of nicks and splits on your blade edge and it helps keep your rubber edges from chipping. Our pros at Paddle Palace prefer edge tape that covers some or all of the rubber in addition to the blade edge.

Eventually you will need to change your rubber or get a new paddle.
But if you take care of it, your rubber will last much longer!

How to read the

RUBBER CHARTS

SPEED/SPIN/CONTROL Ratings are on a scale of 10 to 99, with the higher the rating, the higher that attribute. These ratings use a universal scale which differs from manufacturers' ratings, so that the rubbers from all the brands can be compared. Ratings are meant only as a tool to help select rubber. Naturally, speed, spin, and control are affected by a player's skill, strokes, and playing style.

SPONGE THICKNESS is shown in millimeters. The measurement includes only the sponge (not the topsheet). Often the manufacturer indicates "MAX" for the thickest sponge available for a rubber. MAX thickness can vary from brand to brand, but usually means the sponge is approximately 2.3 to 2.5mm. MAX means sponge and topsheet together measure 4.0mm, since this is the maximum thickness allowed under ITTF regulations. All rubber sheets at Paddle Palace are of ITTF-legal sponge thickness.

SPONGE HARDNESS is indicated with the relative values: S = Soft, MS = Medium-Soft, M = Medium, MH = Medium-Hard, and H = Hard.

COLOR: Rubber sheets are available in both black and red unless otherwise indicated. Some rubbers have additional colors available. Look for the color dot () next to the chart listing. One package contains one rubber, and will cover one side of a blade.

Rubber Comparison Charts are listed by brand, and are included on each page of the specific brand section.

Paddle Palace will glue rubber to the blade at no extra charge upon request.

One rubber sheet will cover one side of a blade. No returns on custom-made paddles.

NEW RASANTER C RUBBERS

The first rubbers specially developed for counterspin!

NEW

Andro Rasanter C48

The answer to the opening topspin! Perfect if you're looking for high stroke quality when you serve and return, and pressure your opponent with topspins and counterspins.

SPEED96 SPIN98 CONTROL 69 Hardness MH Thickness 2.0 / Max

Item# RARC48 ^{\$}54.95

NEW

Andro Rasanter C53

Utilizes a newly integrated dampener. This counterspin dampener neutralizes the topspin and makes the controlled counterspin possible, with its agressive trajectory and unrecognizable dynamics.

SPEED .. SPIN97 CONTROL 68 Hardness H

Thickness 2.0 / Max

Item# RARC53 \$59.95

Rasanter R45

You force the point by your powerful, persistent topspin game. Energy Cell sponge ensures an extremely dynamic energy transfer for all topspin variations.

SPEED96 SPIN97 CONTROL 70 Hardness M

Thickness 1.7 / 2.0 / Max Item# RAR45

\$52.95

Rasanter R48

Your game is loaded with spin and speed. 48° hard sponge puts power and quality in your strokes, high dynamics and longer ball contact feel.

SPEED97 SPIN97 CONTROL 68 Hardness MH Thickness 1.7 / 2.0 / Max Item# RAR48

Rasanter R53 PRO

Your game is powered by max spin and high dynamics. 53° sponge provides extremely dynamic energy transfer, especially for fast and hard topspins.

blades

If you like to hold a paddle like you're shaking hands, then these are the blades for you! Over 90% of the blades we sell are Shakehand style.

Blade Selection Guide

HANDLE STYLE

Handle style is a personal decision – shape and size that feels best in your hand is what you should use. For shakehand players, flared handles are the most popular, followed by anatomic and straight. The code for flared is FL, straight is ST, anatomic is AN. The Donic Dotec blades have a unique cork handle that is designed for either a left-hander or righthander. The code is LEFT and RIGHT. Nittaku offers a few blades with a unique ergonomic handle, ERGO, which is comfortable for using with both a shakehand or penhold grip.

SPEED

The CLASS Speed ratings of the blades range from the fastest (OFF+) to the slowest (DEF-). OFF means offensive, ALL means allaround, and DEF means defensive. In general, offensive-style players prefer blades ranging from OFF+ to ALL+. Allround players prefer blades ranging from OFFto ALL-. Defensive players prefer ALL to DEF- blades.

Besides CLASS ratings, Paddle Palace has a universal number rating system for speed and control so that blades from all the various brands can be compared on the same scale. In basic terms, the faster the speed rating, the farther the ball bounces off of the blade, given an equal amount of force. Keep in mind that generally the faster the blade, the more skill it takes to control it. Also, the rubber applied to the blade makes a huge difference in the speed and control of the paddle. A player's skill level, playing style, rubber used, and interaction of those factors, impact the amount of speed and control that a player experiences. Therefore, the speed and control ratings are only a general tool for choosing a blade.

WEIGHT

Most blades weigh between 70 and 100 grams before rubber is applied. An average weight is around 86 grams. Some players feel that a heavier blade provides more power but other players would disagree. Some players feel that a lighter blade is guicker, but again, there are varying opinions on this. Remember: power and quickness are not just functions of the blade, but mainly the skills of the player. Like handle style, ideal blade weight is the weight that feels best. Note: individual blade weight may vary.

PLIES

The number of plies (wood layers) of a blade normally ranges from one to seven, with five being the most common. There are many blades on the market that add thin plies of materials such as carbon, glass fibre, titanium or kevlar to an otherwise all-wood blade. These non-wood plies may add speed or a different feel to a blade. Some players feel that mixed-ply blades offer a larger sweet spot, and/or possibly result in added control. With or without non-wood plies, every blade has a unique feel, and only by experimenting will you discover what works best for you. We indicate the number and composition of the plies: W=Wood, C=Carbon, G=Glass Fiber, F=Fiber, D=Dyneema Fiber, Z=Zylon, T=Titanium, K=Kevlar, A=Arylate.

Paddle Palace **PRO SPECIALS**

Paddle Palace has created brilliant blade+rubber combinations with an emphasis on perfectly matching your playing style – and for a super special price!

These blade/rubber combinations are popular with tournament-caliber players and are well-suited to a wide range of playing styles. Each Pro Special paddle is custom pre-assembled with smooth, inverted ITTF-approved rubber, with black on one side and red (or alternate color) on the other.

Paddle Palace **COMBO SPECIALS**

Combo Specials are a great bargain for professional blades with rubber. We offer a selection of the most popular blades as Combo Specials.

The price includes everything you need for a complete paddle: blade and two sheets of rubber. Penhold Combo Specials include penhold blade and either one or two rubbers, as indicated. Assembly (cutting and gluing the rubber to the blade) by our expert staff is free, or you can choose to receive it unassembled. We apply free edge tape, and shipping is free to USA.

Rubber options include all rubbers from STIGA, NITTAKU, TIBHAR, JUIC, DHS, DONIC, ANDRO, DR NEUBAUER, and YASAKA. No extra charge for any rubber with current price under \$55. Over \$55, there is an extra charge per sheet.

* Extra charae for each rubber priced over \$55: Up to \$55 = no extra charge // Any rubber over \$55, will be charged the difference in price

How to read the

BLADES CHARTS

HANDLE SHAPE: FL = Flared / ST = Straight / AN = Anatomic / ERGO = Ergonomic

PLY (number of layers + type): W=Wood, C=Carbon, G=Glass Fiber, T=Titanium, K=Kevlar, A=Arylate, Z=Zylon, F=Fiber, D=Dyneema Fiber

THICKNESS: Thickness of blade, shown in millimeters.

WEIGHT: The average weight of each blade is indicated in grams. Individual weights may vary.

CLASS: OFF = offensive blade, ALL = allround blade, DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. The rubber sheet that is applied to the blade will naturally affect the speed of the paddle.

SPEED: The higher the number, the greater the speed, meaning bounce per force input.

CONTROL: The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

Blade Comparison Charts are listed by brand, and are included on each page of the specific

Paddle Palace is happy to assemble blades with rubber at no extra charge upon request. One rubber sheet will cover one side of a blade. No returns on custom-made paddles.

ALL NEW APEX BLADES

A BRAND APART

Our Hunter brand has a rich history. Developed in the 1980s, the original blades were made by hand in our Paddle Palace warehouse. Over the years, we expanded our line of blades to include the finest wood and carbon technology with premium construction and quality. We're excited to evolve our Hunter brand again, with a new logo and 3 fantastic, top-of-the-line blades.

IALL NEW SABRE 7 Named in honor of the very first Hunter blade, the Sabre, this new all-wood blade sets a new standard.

NEW Sabre 7

The NEW Hunter Sabre 7 is an all-wood blade that provides plenty of speed and power for your offense along with outstanding touch for serve and control shots. 5 Ayous inner plies along with 2 Limba surface veneers gives the Sabre 7 the perfect tempo.

CLASS. .. OFF SPEED 90 CONTROL 68 Plies 7W Weight 90g Handles FL, ST Item# SPSB7 \$59.95

PENHOLD BLADES

If you hold your paddle like you would hold a pen or pencil, then you should choose a Penhold blade. There are 2 main styles of penhold blades: Chinese & Japanese.

Chinese Style... normally has a rounded head, similar to a shakehand blade head, but often somewhat smaller. The Chinese-style handle is smaller and shorter than a shakehand handle.

All Chinese-style penhold blades (C) are suitable for putting either one or two rubbers on the blade.

Japanese Style... has a handle with a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more squarish in shape, but it can vary from roundish to squarish.

Some Japanese-style penhold blades are designed for applying just one rubber (J-1), and some are suitable for applying one or two rubbers (J-2).

Penhold-style blades are used by fewer than 10% of players in North America, although the popularity in Asia is 20-40%, with younger players favoring the shakehand style.

See the Blade Selection Guide on page 26 for information about choosing Blades and Combo Specials.

REC PADDLES

Rec Paddles are pre-assembled by the manufacturer and are designed for players who are newer to the sport, or who primarily play recreationally.

The characteristics and prices are well-suited for developing players in schools, homes, and rec centers.

The Class ratings here are on a different scale from the ratings of blades and rubbers, and are intended only for comparison with other pre-assembled Rec Paddles.

Rec Paddles are generally slower, impart less spin, and have more control than the pro gear. Choose a Rec Paddle with thicker sponge for more speed and spin.

ROBOTS BY PADDLE PALACE

THROW WHEELS - One, Two, or Four?

Robots with one throw wheel can shoot topspin, underspin, and sidespin. Two throw wheels make it possible for independent spin and speed settings. This results in a great range of spin options – light to heavy topspin, underspin, or sidespin or no spin shots. Four throw wheels provides the greatest versatility of all, including serve and volley in the same training sequence.

OSCILLATION: Random, Controlled, Programmable: Controlled Oscillation means you can set the robot to hit alternately only to the two widest points in the angle range, plus you can set the width of the angle. With Random Oscillation, the robot hits to the inner angles as well as the widest angles. Where the ball lands depends on the frequency and speed settings you have chosen. Programmable Oscillation is the most versatile. It achieves everything Controlled and Random Oscillation does, plus you can program sequences of your choice for where the ball lands.

LCD TOUCH SCREEN:

The LCD Touch Screen is a very easy and intuitive menu-based interface to control all functions of the robot. It is a self-contained functionality; no bluetooth, mobile app, or computer is necessary for operation.

SERVE & RETURN SEQUENCES:

The Robot can be set to serve and return in the same sequence. So, for example, you can set a sequence to begin with a serve, then shoot returns to specific landing spots with spins of your choice for a realistic training pattern.

TOPSPIN/UNDERSPIN SEQUENCE:

The robot can shoot topspin shots and underspin shots (and other spins) in consecutive shots in the same sequence.

SPIN INDICATOR:

A Spin Indicator light shows you what kind of spin is on the ball.

FREE SHIPPING ON ALL ROBOTS. For owners manuals and details go to PaddlePalace.com

Item#OPVH2 \$179595

The Most Versatile High-Tech Robot. Easy to Use!

The Paddle Palace H2W Touch Pro Robot is a very versatile and user-friendly high-tech robot. The LCD Touch Screen makes operation and programming very easy! Get started in seconds using one of the 30 built-in ball sequences with just a few touches on the screen.

Making your own custom sequences is also simple, as the Touch Screen walks you step by step through the setup. You can save up to nine of your own favorite custom sequences, and you can easily modify the 30 built-in sequences

The new Spin Indicator Panel located just below the shooting head shows you the spin for each ball before it shoots. This makes playing with the robot more like playing with a human partner, as you can visually anticipate the spins on the upcoming balls.

Two throw wheels with independently programmed motors, allow a great variety and degree of spins, including topspin, underspin, sidespin, and no-spin. Plus the robot can seamlessly shoot consecutive shots with different spins. There are 22 possible landing spots on the table including short and long balls, making possible any combination of spins and landing spots you choose.

Item#OPVTT

The Paddle Palace A32W Pro has many outstanding advanced robot features, but is offered at a very affordable price! It has two throw wheels controlled by two independent motors. It includes an automatic ball recycle and net collection system. It has multiple oscillation options, and has convenient robot controls on the player's side of the table.

The A32W Pro is high quality, sturdy, reliable. It comes ready to play with virtually no assembly required, and it rolls from storage to table for very

\$44995

Super Easy Set-Up. High Quality!

The Paddle Palace Table Top Pro is an affordable and quality robot that delivers strong and consistent topspin, underspin, and sidespin shots. It is simple to use and is jam free. Convenient robot controls on the player's side of the table. It can be set to hit to one spot on the table, or to oscillate to your choice of angle.

Table Top Pro can be placed on any location on the table, or it can be set on a stand behind the table (stand not included). A ball collection net is available for an extra charge.

Paddle Palace Rolling Ball Collection Net with Stand (Item# OPNES)

Paddle Palace Ball Collection Net (Item# OPNET)

PURCHASING YOUR TARI.F.

TABLE TOP: Look for tables with thicker tops. Thicker tops give a more consistent bounce and are less likely to warp after years of use. Paddle Palace recommends table tops of 3/4 inches or more.

TABLE TYPE (FOLD TYPE):

- 1 Stationary without wheels on undercarriage. Both halves fold and store separately.
- **2** Rollaway with two undercarriages and each half folds and rolls separately.
- **3** Rollaway with one undercarriage and each half folds independently.
- 4 Rollaway with one undercarriage and both halves always fold in and out together.

NET SET: Table price includes net set. Some tables have net posts permanently attached to the frame. These make setup and takedown a little quicker but may not be as adjustable or easy to replace as separate net posts.

FRAME: Look for tables that have larger, sturdier legs and support frames. Sturdier frames contribute to a more consistent ball bounce and also help prevent top warpage. If you set up and store your table regularly, a larger frame increases durability.

WHEELS: Larger and stronger wheels are important particularly if you set up and store your table frequently.

TABLE SHIPMENT: Tables are shipped by freight line. Delivery generally takes 2-3 weeks from date of order. The table is delivered to curbside and the delivery person will need assistance in unloading the table.
