PADDLE PALACE PRO SPECIALS

WHAT'S SO SPECIAL ABOUT PADDLE PALACE PRO SPECIALS? OUR EXPERTS HAVE CREATED 16 BRILLIANT BLADE+RUBBER COMBINATIONS TO PERFECTLY MATCH YOUR PLAYING STYLE - AND FOR A SUPER SPECIAL PRICE!

These blades and rubbers are popular with tournament-caliber players and are well-suited to a wide range of playing styles. All are custom pre-assembled with smooth, inverted ITTF-approved rubber with red on one side and black on the other.

Playing Style:
Offense, Speed & Drive

TIBHAR SAMSONOV ALPHA

\$99⁹⁵ reg. \$124.85

Playing Style: Offense Speed & Drive

Overall Rating: Speed: 79 Spin: 82

Blade: TIBHAR Samsonov Alpha (Flared)

Rubber: TIBHAR Rapid (Max sponge)

The Tibhar Samsonov Alpha blade comes assembled with Rapid rubber. This combination is ideal for the attacking player looking for good speed and touch, with enough grip to generate good spin on serves and topspin on drives. The Samsonov Alpha uses classic 5-ply construction with a strong middle layer to create a balance between power and control. Rapid rubber combines an elastic top sheet with a softer sponge, giving good speed and spin without giving up touch and control.
Item: ZZSTSAM292

Playing Style:
Aggressive Offense

TIBHAR BLACK CARBON

\$104⁹⁵ reg. \$166.85

Playing Style: Aggressive Offense

Overall Rating: Speed: 90 Spin: 76

Blade: TIBHAR Black Carbon (Flared)

Rubber: TIBHAR Rapid D.TecS Soft (Max)

The Tibhar Black Carbon blade comes assembled with Tibhar Rapid D.TecS Soft rubber. This Pro Special is built for speed! The Black Carbon is a stiff blade constructed with a unique carbon concept that offers extreme acceleration. The Rapid D.TecS Soft rubber unleashes its full speed potential when combined with this blade. This combination is recommended for speed oriented offensive players.
Item: ZZSTBLC295

Playing Style:
Modern Offensive Spin

TIBHAR TEXO OFF

\$129⁹⁵ reg. \$184.85

Blade: TIBHAR Texo OFF (Flared handle)

Rubber: TIBHAR Evolution EL-P (Max)

Playing Style: Modern Offensive Spin

Overall Rating: Speed: 91 Spin: 97

The Tibhar Texo OFF blade comes assembled with Evolution EL-P rubber. The Texo OFF blade dominates in the offensive game and is perfectly adapted for high speeds and quick exchanges. It excels at both close and mid distance from the table while maintaining precision control. The Evolution EL-P rubber is incredibly elastic and creates very high spin and speed. Very precise and powerful strokes can be realized at varying distances from the table. Evolution EL-P adapts perfectly to any situation. This combination is recommended for the modern offensive player.
Item: ZZSITE0297

Playing Style:
Offensive Speed & Spin

STIGA CARBO 7.6 WRB

\$139⁹⁵ reg. \$202.85

Playing Style: Offensive Speed & Spin Overall Rating: Speed: 96 Spin: 91
Blade: STIGA Carbo 7.6 WRB (Flared or Penhold) Rubber: STIGA Calibra LT Plus (Max sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Carbo 7.6 WRB blade is assembled with Calibra LT Plus rubber. The Carbo 7.6 WRB has six plies of carbon combined with seven plies of wood, giving it amazing speed potential and consistency. Calibra LT Plus is the newest version in the Calibra series. It is optimized for speed and gives the player greater distance and a longer trajectory on all their shots. This combination is perfect for the topspin player who is comfortable away from the table and is looking for greater range.
Shakehand Item: ZZSSCA7294 | Penhold Item: ZZPSCA7W295

Playing Style:
Controlled Offense & Spin

STIGA OFFENSIVE CLASSIC

\$94⁹⁵ reg. \$118.85

Playing Style: Controlled Offense & Spin Overall Rating: Speed: 84 Spin: 82
Blade: STIGA Offensive Classic (Straight or Penhold) Rubber: YASAKA Mark V (2.0 sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Stiga Offensive Classic blade comes assembled with Yasaka Mark V rubber. The Offensive Classic is one of the all-time best selling blades worldwide. Lightweight and well-balanced, this blade is offensive-minded with excellent touch. Combined with the classic Yasaka Mark V rubber, this combination is excellent for a wide range of allround to offensive playing styles.
Shakehand Item: ZZS0FFN295 | Penhold Item: ZZPS0FFN295

Playing Style:
Classic Offense & Loop

DONIC WALDNER SENSO CARBON V1

\$116⁹⁵ reg. \$166.85

Playing Style: Classic Offense & Loop Overall Rating: Speed: 88 Spin: 95
Blade: DONIC Waldner Senso Carbon V1 (Flared) Rubber: Acuda S2 (Max sponge)

The Donic Waldner Senso Carbon V1 blade is assembled with Acuda S2 rubber. This is the ideal combination for a wide range of aggressive allround and attacking players. The Waldner Senso Carbon V1 is the choice blade for many of the world's best players, including Waldner himself. It offers an ideal balance of fantastic speed and control and gives essential feedback on ball contact. The Acuda S2 rubber is the perfect complement for this blade. It produces excellent spin and a high arc that sets the Acuda rubber series apart from the rest. This blade and rubber combination is a fantastic choice for any player. Its versatility makes it suitable for a wide range of skill levels and styles.
Item: ZZSDWSC296

Playing Style:
Offense Speed & Spin

DONIC OVTCHAROV SENSO V1

\$119⁹⁵ reg. \$171.85

Playing Style: Offense, Speed & Spin Overall Rating: Speed: 95 Spin: 92
Blade: DONIC Ovtcharov Senso V1 (Flared handle) Rubber: Acuda S1 Turbo (Max sponge)

The Donic Ovtcharov Senso V1 blade comes assembled with Acuda S1 Turbo rubber. Designed for high speed smashes and topspin, this blade produces unbelievable power with a fantastic feel. We combined this blade with the high precision Acuda S1 Turbo rubber. This rubber was an immediate worldwide success from its original debut on the market. It is designed for accuracy at high speeds, and is the ideal rubber for skilled offensive players to gain the advantage in topspin v. topspin rallies. Together, this paddle is recommended for the offensive player that demands high speed and precision to put pressure on their opponent.
Item: ZZSDOV1296

Playing Style:
Modern Offensive Spin

DONIC BAUM ESPRIT

\$124⁹⁵ reg. \$187.85

Playing Style: Modern Offensive Spin Overall Rating: Speed: 91 Spin: 96
Blade: Donic Baum Esprit (Flared handle) Rubber: Donic Bluefire M2 (Max sponge)

The Donic Baum Esprit comes assembled with Bluefire M2 rubber. The Baum Esprit is the blade used by European star Patrick Baum. Constructed with aramid/carbon and high quality wood plies ensures maximum speed and ball control in any playing situation. The Donic Bluefire M2 rubber is unbelievably fast with a characteristically high arc that enables maximum spin on topspin shots. This combination of blade and rubber is ideal for a wide range of offensive styles that put an emphasis on spin.
Item: ZZSDBES297

PRO SPECIALS

CONTINUED FROM PAGE 5

Playing Style:
Offense Loop & Drive

XIOM STRADIVARIUS

\$136⁹⁵ reg. \$209.85

Playing Style: Offense Loop & Drive

Overall Rating: Speed: 91 Spin 93

Blade: XIOM Stradivarius (Flared or Penhold)

Rubber: Sigma I Pro (Max sponge)

AVAILABLE AS SHAKEHAND AND PENHOLD

The Xiom Stradivarius blade, with Sigma I Pro rubber, is an excellent choice for the offensive player who wants optimal speed/spin. The blade has two plies of Aramid Carbon (mix of vibration-absorbing soft Aramid and highly elastic Carbon) to boost speed while creating a solid, stable feeling on contact. Sigma I Pro is Xiom's latest top-of-the-line rubber, unparalleled by other tension rubbers on the market + speed and spin with a large sweet spot. In the middle or around the edges, you feel quality ball contact every time. Best for skilled offensive play with topspin shots from all distances from the table. Shakehand Item: ZZSXSTV296 | Penhold Item: ZZPXSTVC296

Playing Style:
Allround Spin & Control

XIOM ALLROUND S

\$99⁹⁵ reg. \$118.85

Playing Style: Allround Spin & Control

Overall Rating: Speed: 78 Spin: 90

Blade: Xiom Allround S (Flared handle)

Rubber: Xiom Vega Europe (2.0 sponge)

The Xiom Allround S blade comes assembled with Vega Europe rubber. The Allround S blade is a classic allround blade with lowered and controlled speed that provides the opportunity to manage and direct a game. Solid and clear feel connects the ball with the player's senses. The Vega Europe rubber is equipped with Xiom's "Carbo Sponge" and "Hyper Elasto" topsheet that have combined to create a rubber with innovative spin performance as well as the largest "safe zone" or sweet spot to minimize mistakes. This combination is best for traditional allround players and those looking for their first competition paddle.

Item: ZZSXALS297

Playing Style:
Balanced Spin & Control

JUIC LIGHT OFFENSE III

\$94⁹⁵ reg. \$121.85

Playing Style : Balanced Allround Control

Overall Rating: Speed 84 Spin 71

Blade: JUIC Light Offense III (Flared)

JUIC Scramble 21 Ultima EX (2.5 sponge)

The Juic Light Offense III blade comes assembled with Scramble 21 Ultima EX rubber. The blade is lighter than average and allows for a versatile game that combines loops, counter-drives and blocks. The Scramble 21 Ultima EX rubber offers a combination of softness and power, allowing for more flexible play. Together, this blade and rubber combination makes an ideal paddle for the balanced allround player focused on continuing long rallies. This combo is especially recommended for players selecting their first custom paddle.

Item: ZZSJLI3297

Playing Style:
Allround Spin & Control

JUIC KALINIC

\$89⁹⁵ reg. \$115.85

Playing Style: Allround Spin & Control

Overall Rating: Speed 81 Spin 92

Blade: JUIC Kalinic (Flared or Chinese Penhold)

Rubber: JUIC 999 Elite Ult (2.5 sponge)

AVAILABLE IN SHAKEHAND AND PENHOLD

The Juic Kalinic blade comes assembled with 999 Elite Ultima rubber. The Kalinic blade features an all-wood 5-ply construction to create a medium speed blade with a heavier than average weight that adds to its consistent touch. The 999 Elite Ultima rubber is a long-time favorite! Made with a 10% lighter sponge and a tacky topsheet, this rubber obtains the perfect combination of spin, speed, and control. When combined, this blade and rubber combo is best suited for the allround player focused on consistency and spin.

Item: Shakehand ZZSJKAL297 / Penhold ZZPJKALC297

Playing Style:
Allround Offense & Spin

YASAKA Balsa+

\$99⁹⁵ reg. \$125.85

Playing Style: Allround Offense & Spin

Overall Rating: Speed: 84 Spin: 82

Blade: YASAKA Balsa+ (Flared)

Rubber: YASAKA Mark V (Max sponge)

The Yasaka Balsa+ blade comes assembled with Mark V rubber. The blade is one of the lightest offensive blades made, and with a Balsa wood core it has a very soft touch and feel. Mark V is a classic allround offensive rubber, still one of our top-selling rubber sheets because of its versatility and performance. Together, they allow you to employ a variety of offensive spin shots while maintaining excellent control.

Item: ZZSYBAP294

Playing Style:
Offense, Drive & Spin

NITTAKU FLYATT CARBON

\$138⁹⁵ reg. \$184.95

Playing Style: Offense, Drive & Spin Overall Rating: Speed: 89 Spin: 92
Blade: NITTAKU Flyatt Carbon (Flared handle) Rubber: NITTAKU Flyatt Hard (2.0 sponge)

The Nittaku Flyatt Carbon blade comes assembled with Flyatt Hard rubber to create a consistent offensive weapon. The Nittaku Flyatt Carbon blade is a versatile offensive blade. It is thin, light-weight, and loaded with 2 plies of thin carbon to secure its speed and power performance. Combined with Flyatt Hard rubber, produced with high grade natural rubber and "Active Charge Technology" to create outstanding speed and spin with an ideal ball trajectory. This combination is the choice for the offensive player that requires consistent feeling shots.
Item: ZZSNFLY297

Playing Style:
Aggressive Offense

NITTAKU FLAME CARBON

\$142⁹⁵ reg. \$189.85

Playing Style: Aggressive Offense Overall Rating: Speed: 96 Spin: 96
Blade: NITTAKU Flame Carbon (Flared handle) Rubber: NITTAKU Fastarc S-1 (2.0 sponge)

The Nittaku Flame Carbon blade comes assembled with Fastarc S-1 rubber. The Flame Carbon blade has been developed using Nittaku's "burning wood" technology, which has the effect of hardening the outer wood ply and increasing speed. Add two plies of kevlar/carbon, and the result is a blade optimized for speed. We combined this blade with the popular Fastarc S-1 rubber that has become a favorite for its amazing spin capabilities. This rubber utilizes a grippy topsheet and a soft tension sponge to generate explosive spin and power. This blade and rubber combo is recommended for the offensive player that demands high speed and spin to put pressure on their opponent.
Item: ZZSNFLC297

Playing Style:
Defense with Spin

NITTAKU MONOPHONIC

\$99⁹⁵ reg. \$128.85

Playing Style: Defense with Spin Overall Rating: Speed: 67 Spin: 92
Blade: NITTAKU Monophonic (Straight handle) Rubber: NITTAKU Moristo DF (1.9 sponge)

The Nittaku Monophonic blade comes assembled with Moristo DF rubber. The Monophonic blade has 5 plies of soft wood and 2 plies of glass fiber, creating a huge sweet spot combined with a soft feel that modern defensive players demand. The Moristo DF rubber allows the ball to dig deep into the sponge for a great spring effect with slower speed, providing a "hang effect" to give extra control on chops. This combination is outstanding for pure defensive and chopping players.
Item: ZZSNMON297

ABOUT PRE-ASSEMBLED PADDLES

Paddles in this department are pre-assembled at the factory and are designed for players who are newer to the sport, or who primarily play recreationally. The characteristics and prices are well-suited for developing players in schools, homes, and recreation centers. The Speed Ratings in this department are on a different scale from the speed ratings in the blade and rubber departments, and are intended only for comparison with other pre-assembled recreational paddles. The pre-assembled paddles are generally slower, impart less spin, and have more control than the pro gear. Choose the pre-assembled paddles with thicker sponge for more speed and spin.

DONIC

NEW

Donic Waldner 600

The DONIC Waldner 600 is suitable for all playing techniques with good spin and excellent control. Flared handle. Pre-assembled with 3* Avantgarde smooth rubber, 2.0mm sponge. Speed: OFF-. Item: DDWA6

\$39⁹⁵

NEW

Donic Waldner 800

The DONIC Waldner 800 allows sophisticated play with optimum spin and relatively high speed. Flared handle and pre-assembled with Alpha Slick 2.1 mm rubbers. Speed: OFF. Item: DDWA8

Red rubber on one side, black stained wood on back. Speed: OFF-. Item: DNOP1J

Nittaku Japan Original 1000 Penhold

This Japanese-style penhold with red ITTF-approved Japan Original rubber (1.5mm sponge) on one side. Back side is wood stained black. Wood handle w/cork on back for comfortable grip. Great control for the allround game. With 2 Nittaku 40mm Japan Original balls. Speed: ALL- Item: DNOPEJ

ABOUT BLADE SELECTION AND COMBO SPECIALS

Combo Specials

Combo Specials are a great bargain for professional blades with rubber. We offer a selection of the most popular blades as Combo Specials. The price includes everything you need for a complete paddle: blade and two sheets of rubber. Penhold Combo Specials include penhold blade and either one or two rubbers, as indicated. Assembly (cutting and gluing the rubber to the blade) by our expert staff is free, or you can choose to receive it unassembled. We apply free edge tape, and shipping is free to USA for all Combo Specials. Rubber options include all rubbers from STIGA, NITTAKU, TIBHAR, JUIC, DR NEUBAUER, DONIC, YASAKA, HALLMARK and XIOM. NO EXTRA charge for any rubber with current price under \$50. Over \$50 there is an extra charge per sheet (see chart).

Pro Specials

Pro Specials include a specific combination of a professional blade and two rubbers pre-assembled at Paddle Palace. See pages 4-7 for details.

Blade Selection Guide

Blade style

Shakehand and Penhold are the two basic blade types. If you hold the paddle like you are shaking hands, then you should choose a Shakehand blade. Over 90% of the blades we sell are Shakehand style. If you hold your paddle like you would hold a pen or chopsticks, then you should choose a Penhold blade.

There are two styles of penhold blades: Chinese and Japanese. Chinese style normally has a rounded

head, similar to a shakehand blade but often somewhat smaller. The Chinese-style handle is smaller and shorter than the shakehand. Japanese-style penhold handles have a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more square in shape than the Chinese-style, but it can vary from roundish to squarish, so check the image. (See the Penhold Blade section on pages 48 to 54).

Handle style

Handle style is a personal decision – shape and size that feels best in your hand is what you should use. For shakehand players, flared handles are the most popular, followed by anatomic and straight. The code for flared is FL, straight is ST, anatomic is AN, and conic is CO. STIGA offers two sizes of flared handles, Flared-Large (aka Legend) and Flared-Small (aka Master). The codes for these are FL (lg) and FL (sm). The DONIC Dotec blades have a unique cork handle that is designed for either a left-hander or right-hander. The code

is LEFT and RIGHT. NITTAKU offers a few blades with a unique ergonomic handle, ERGO, which is comfortable for using with both a shakehand or penhold grip. Penhold blades are available in either Chinese-style or Japanese-style. Chinese-style is the most popular (C) and are suitable for one or two rubbers on the blade. Some Japanese-style penholds are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

Speed

The CLASS speed ratings of the blades range from the fastest (OFF+) to the slowest (DEF-). OFF means offensive, ALL means allaround, and DEF means defensive. In general, offensive-style players prefer blades ranging from OFF+ to ALL+. Allround players prefer blades ranging from OFF- to ALL-. Defensive players prefer ALL to DEF- blades.

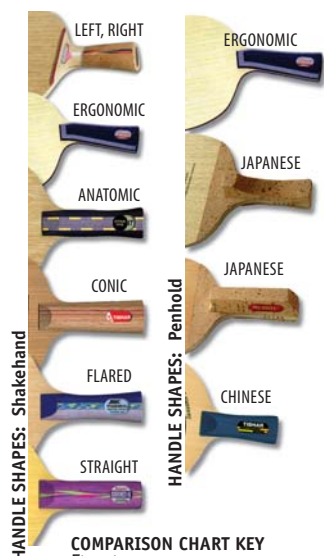

Besides CLASS ratings, Paddle Palace has a universal number rating system for speed and control so that blades from all the various brands can be compared on the same scale. In basic terms, the faster the speed rating, the farther the ball bounces off of the blade, given an equal amount of force. Keep in mind that generally the faster the blade, the more skill it takes to control it. Also, the rubber applied to the blade makes a huge difference in the speed and control of the paddle. A player's skill level, playing style, rubber used, and interaction of those factors, impact the amount of speed and control that a player experiences. Therefore, the speed and control ratings are only a general tool for choosing a blade.

Weight

Most blades weigh between 70 and 100 grams before rubber is applied. An average weight is around 86 grams. Some players feel that a heavier blade provides more power but other players would disagree. Some players feel that a lighter blade is quicker, but again, there are varying opinions on this. Remember: power and quickness are not just functions of the blade, but mainly the skills of the player. Like handle style, ideal blade weight is the weight that feels best. Note: individual blade weight may vary slightly.

Plies

The number of plies (wood layers) of a blade normally ranges from one to seven, with five being the most common. Over 70% of players use an all-wood blade. There are many blades on the market that add thin plies of materials such as carbon, glass fibre, titanium or kevlar to an otherwise all-wood blade. These non-wood plies may add speed or a different feel to a blade. Some players feel that mixed-ply blades offer a larger sweet spot, and/or possibly result in added control. With or without non-wood plies, every blade has a unique feel, and only by experimenting will you discover what works best for you. We indicate the number and composition of the plies: W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid

COMPARISON CHART KEY

Flared = FL
Anatomic = AN
Straight = ST
J-1, J-2 = Penhold Japanese-style
C = Penhold Chinese Style

COMBO SPECIALS

Combo Specials are custom-made racquets which include the shakehand blade plus two rubber sheets of your choice from any of these brands:*

NITTAKU	TIBHAR	STIGA
JUIC	DONIC	HALLMARK
DR NEUBAUER	YASAKA	XIOM

* Extra charge for each rubber priced over \$50

Up to \$50 = no extra charge
(\$50 - \$55) = \$10
(\$55 - \$60) = \$15
(\$60 - \$65) = \$20

XIOM®

NEW SHAKEHAND BLADES FROM XIOM

New paradigm defines Hayabusa optimizing controversial properties to make the unprecedented table tennis weapon!

Hayabusa Z

The Xiom Hayabusa Z blade is constructed with a harmonious synergy of wood and composite material. Zephylium not only improves ball speed, but defines the vibration better. Sharp and clear vibrations of Hayabusa Z upgrades the control phase of your game. Spin loading was also eased by a new unique construction of layers. Wood-like flexibility of Hayabusa Z makes the ball contact feel very natural and solid. Well balanced power and top spin control of Z make the player keep up with a longer continuous rally. Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZ

OFF- 88 65 Blade \$164.95

Hayabusa Zi

Hayabusa Zi is constructed with a creative synergy of wood and composite material. Zephylium in new construction makes Hayabusa Zi feel natural yet sharper than all wood blades. Leveraged spin loading and increased ball energy are made easily by the unique construction inside. Flexible, yet solid contact with the ball to generate heavy spins identifies Zi as the new European power-blade.

Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZI

OFF- 90 64 Blade \$164.95

Hayabusa Z+

The Hayabusa Z+ blade is constructed using a superb synergy of wood and composite material. Hayabusa Z+ has restructured wood and composite layers to create extra synergies, while maintaining the original woody character. Zephylium tuned with other layers provides sensibly sharp feel at ball contact. Unique feel properties improve the control phase of your game and eventually your opportunities to win. Powerful spin dynamics from the unique offensive construction of Z+ are intimidating to opponents.

Handle FL, ST / Wt 85 gms / Plies 5W, 2Z / Item SXHZP

OFF 92 63 Blade \$164.95

Hayabusa ZX

Xiom's Hayabusa ZX is constructed with a powerful synergy of wood and composite material. Zephylium carbon character in the third layer makes Hayabusa ZX feel sensibly sharp, yet unbelievably softer than other composite blades. Flexibility was kept by the re-construction of the inside layers, regardless of non-wood material. This allows for continuous top spins with extra power. The control phase of your game improves along with your winning opportunities.

Handle FL, ST / Wt 85 gms / Plies 5W, 2Z/C / Item SXHZX

OFF 94 60 Blade \$164.95

Hayabusa ZXi

The Hayabusa ZXi is constructed with an amazing synergy of wood and composite material. Revolutionary Zephylium Carbon placed towards the center of the blade makes ZXi feel more solid, but very genuine. Spin loading is leveraged and easily performed due to this new construction. Accurate and powerful ball control makes the player keep up and win in longer rallies. The control phase of your game will improve along with the winning opportunities.

Stradivarius

PRO

Two plies of Aramid Carbon (a mixture of vibration-absorbing soft Aramid and highly elastic Carbon), provides ideal performance for professional offensive players. The blade catches the ball deeply with minimal residual vibration after impact. Results are a combination of exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure.

Handle FL, ST / Wt 85 gms / Plies 5W, 2A/C / Item SXSTV

OFF 91 64 Blade \$99.95

Zetro Quad

This is the blade for topspin. Zylon fiber is directly placed under the top layers to increase the ability to grab the ball. Soft carbon fiber under the middle layers adjusts the overall performance, and the top layer of selected Kiso Hinoki wood guarantees comfortable feel. Making heavy topspin is effortless, and even secure. Players can take the initiative in the game with effective preparatory topspin attack, and keep the initiative with continuous topspin from any distance. Handle FL, ST / Wt 92 gms / Plies 5W, 2C, 2Z / Item SXZEQ

OFF 93 63 Blade \$114.95

V1

Hard, fast, lightweight carbon blade with a thickness of only 5.4 mm, which allows sufficient deformation required by modern aggressive top-spin players. Special hard wood on the surface and "Energy Carbon" directly under the surface, results in a combination of high speed and compact feel. Both close-to-table topspin and hard smash are very easy. Excellent for precise ball placement with blocks. Stability and security of V1 even gives players the advantage in topspin vs. topspin. Handle FL, ST / Wt 85 gms / Plies 5W, 2C / Item SXV1C

OFF- 88 65 Blade \$84.95

V1 Quad

High-tech blade provides both super power and precise control. Utilizes advanced "Quad" technology. Two layers of "Energy Carbon" with very high energy transfer efficiency are used directly under the hard surface woods. Another two layers of soft carbon are used inside for adjusting the balance and performance. Lightweight, with extremely large sweet spot and unique feel allowing for very precise control, as well as superb power. Handle FL, ST / Wt 88 gms / Plies 5W, 2C, 2Z / Item SXV1Q

OFF+ 95 62 Blade \$109.95

Axelo

Named for "acceleration". Top layer is Kiso Hinoki wood, which provides a very high level of energy efficiency as well as a comfortable feel. Newly developed Energy Carbon is inserted under this layer, which also provides very high energy efficiency. Overall thickness is about 7.5mm, which makes this a very powerful blade. Amazing speed, but also very good for top-spin or passive blocking. Strong topspin from any distance is the most important advantage.

Handle FL, ST / Wt 92 gms / Plies 3W, 2C / Item SXAXE

OFF+ 97 59 Blade \$94.95

Strato

Newly developed Energy Carbon layers for a new level of performance and feel. Improved efficiency of energy transfer for more powerful strokes. Kiso Hinoki wood for the outer layers provides a very comfortable and mild feel. Improved control, and excellent for all-round play though it is very fast blade. Topspin is more stable than players expect, and it draws a very sharp trajectory with good control. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXSTR

OFF+ 97 60 Blade \$94.95

Ignito

The blade for passionate and aggressive table tennis. Ideal weapon for aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put a lot of pressure on the opponent. Light in weight, it needs less energy to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. Recommended for players migrating from all-wood offensive blades. Handle FL, ST / Wt 88 gms / Plies 3W, 2C / Item SXIGN

OFF 94 61 Blade \$94.95

Allround S

PRO

Xiom Allround S is a classic allround blade of European style construction. Lower and controlled speed provides the opportunity to manage the game against your opponent. Slightly bigger and thinner face combines well with soft /max sponges. Solid and clear feel connects the ball with the player's senses. Perfect for the traditional allround player. Handle FL, ST / Wt 85 gms / Plies 5W / Item SXALS

ALL 73 77 Blade \$44.95

RATINGS KEY

CLASS	SPEED	CONTROL
Xiom BLADES COMPARISON CHART page 42		

Offensive S

Perfect for speedy drives with great speed performance and excellent control from both forehand and backhand. Soft touch at contact offers amazing ball control. Excellent for both modern offensive players with higher/speedy hits and also traditional style players with lower/controlled hits.
Handle FL, ST / Wt 87 gms / Plies 5W / Item SXOFS

OFF- 82 74 Blade \$49.95

Extreme S

Piercing speed and destructive power in this classic offensive 7-ply all wood blade. Special layer construction is focused on providing very sharp and delicate control for top-spin drives and defensive blocks. Superb fit for both mid-distance power play and close to the net speed play.
Handle FL, ST / Wt 92 gms / Plies 7W / Item SXEXS

OFF+ 95 61 Blade \$54.95

Solo

Unique 7-ply blade developed for continuous topspin or all-round strategic play. Though it has a 7-ply construction it is soft, mild, balanced, and full of stability. The linear relationship between impact strength and the level of rebound provides ideal predictability with exceptional stability. Every technique of table tennis is so easy with Solo. Topspin is quite easy and full of rotation. Hard smash is very safe and full of speed. Block is secure and full of variation.
Handle FL, ST / Wt 91 gms / Plies 7W / Item SXSOL

OFF- 84 67 Blade \$59.95

Diva

Optimal feel and performance for players of all ability levels. Medium-speed blade, but high level of energy efficiency results in higher speed than expected, especially for top-spin shots. Hard wood top layer maximizes feel, and sophisticated construction reduces vibration. Overall feel is slightly sharp, although soft. Excellent stability and control.
Handle FL, ST / Wt 83 gms / Plies 5W / Item SXDIV

ALL+ 77 78 Blade \$54.95

Acro

All-round blade with natural vibration and clear sound, with enhanced speed for power all-round players of the new era. Based on traditional all-round construction, the center layer is divided into two layers, and overall thickness is enlarged to 5.8 mm. The result is a very unique 6-ply construction.. Faster than traditional 5-ply all-round blades, but still soft and mild. The sound upon impact is very high and clear.
Handle FL, ST / Wt 85 gms / Plies 6W / Item SXACR

ALL+ 78 76 Blade \$64.95

Fuga

Recommended for aggressive players whose strategy is close-to-table top-spin. Everything is optimized for hitting the ball on the rise from the bounce. Hard wood was selected as the material for the thin outer layer for sharp and compact feel but also has overall flexibility and stability. Aggressive close-to-table top-spin is very secure and effective. Players will be able to dominate a fast game as well as every technique in table tennis with ease.
Handle FL, ST / Wt 81 gms / Plies 5W / Item SXFUG

ALL+ 81 74 Blade \$54.95

Aria

One of the most powerful all-wood 5-ply blades, recommended for skilled players. Excellent for all-round power play from close to mid to far distance from the table. Thick, medium soft wood outer layer provides a neutral feel and the second layer provides clear feel and optimal balance. Overall thickness is 6.4mm. Hard and fast, but able to catch the ball softly and release it with great control, especially when players attack with topspin.
Handle FL, ST / Wt 84 gms / Plies 5W / Item SXARI

OFF- 86 68 Blade \$64.95

Aria Lite

Lighter weight version of the Aria. Thickness is 5.8 mm for optimal stability and aggressive topspin strategy. Great for powerful close-to-table topspin. Weight is reduced and control is significantly enhanced. Allows for easy stroke right off the bounce, and for heavy and sharp topspin. Optimized performance for aggressive, close-to-table play. Recommended for aggressive topspin players and for the modern all-round strategic game.
Handle FL, ST / Wt 80 gms / Plies 5W / Item SXARL

Allround Evolution

Suitable for the modern, allround player who exploits every variation of speed and spin. The blade of Evolution is based on the Stiga Allround Classic, but it is faster. Handle FL(lg), FL(sm), AN, ST, CO / Wt 78 gm / Plies 5W / Item SSALEN

ALL+ 80 77 Blade \$37.95

CC Series (Crystal Carbo)

Developed in close cooperation with members of the Chinese National team, the CC Series has focused on the importance of the trajectory of the ball. With a longer trajectory you can push your opponent away from the table and take control of rallies and the game. The CC5 and CC7 blades were developed to meet those demands. Both blades have carbon layers inside, along with STIGA's famous NCT and Crystal treatment on the surface.

CC5

A very unique blade that balances control with long trajectory and power. This blade is for the control minded player who still wants to have power when striking the ball. Handle FL(lg), FL(sm), AN, ST, CO / Wt 96 gm / Plies 5W, 2C / Item SSSC5

OFF 89 62 Blade \$128.95

CC7

A more powerful blade than the CC5, the CC7 is recommended for highly skilled attackers with excellent technique. Outstanding when you are playing back off the table and getting into topspin rallies. With CC7 you can feel the long trajectory in your topspin strokes and gain control over the game. If you like to play topspin against topspin, then this is the blade for you. Handle FL(lg), FL(sm), AN, ST, CO / Wt 99 gm / Plies 5W, 2C / Item SSSC7

OFF+ 94 58 Blade \$145.95

Titanium 5.4 & Titanium 5.4 WRB

Extreme speed, but no loss of feeling or control. Four non-solid titanium layers + 5 layers of wood veneer. Titanium powder mixed with unique bonding glue for consistent playing surface with more power. WRB: accelerates the blade for speed & power. FL(lg), FL(sm), AN, ST, CO / Plies 5W, 4T.

TITANIUM 5.4: Wt 86 gm / Item SSTI5N

OFF 91 60 Blade \$84.95

-------	-------	---------

DONIC BLADES COMPARISON CHART page 44

PRO Look for this sign for blades that are available as PRO SPECIALS. Details on pages 4-7.

DIMA OVCHAROV:
blade: **DONIC Waldner Senso Carbon**
rubber: **DONIC Bluefire M1**
2012 Olympics Bronze Medalist
2 x World Team Championships Silver Medalist with Germany
5 x European Team Champion with Germany

**Persson Seven**

The Persson Seven blade was developed especially for modern, dynamic top spin players. This 7-ply blade (Limba-Ayous-combination) has good feel and is very apt at producing spin. It also offers excellent control when hard top spins are required.

Handle: FL, ST / Wt: 90 / Plies 7W / Item SDPE7

OFF-	88	67	Blade \$52.95
------	----	----	---------------

Waldner Legend Carbon

The Donic Waldner Legend Carbon is a fast and extremely light offensive blade. Having a larger "sweet spot" ensures premium control. The blade has been designed with great care. The choice of wood plies - Hinoki outer ply in combination with carbon layers and a soft inner ply provide stiffness for good topspin. Especially effective for players that like to dominate close to the table.

Handle: FL, ST / Wt. 85 / Plies 5W, 2C / Item SDWLC

OFF	93	66	Blade \$78.95
-----	----	----	---------------

BURN TOX BLADES

Two new related materials, Aratox and Carbotox fibers, are used in the production of Burn Tox blades, based on the Burn blade manufacturing process. Both fibers are softer and more elastic than their predecessors Aramid (which has been replaced by Aratox) and Carbon (replaced by Carbotox).

**Burn Aratox**

A softer outer ply of Koto offers greater control than the Aratox RS. Excellent for allround, spinny game with soft rubber. Also great for fast, dynamic game played with harder rubber. Good feel and easy to use despite their apparent stiffness when striking the ball.

Handle: FL, AN, ST / Wt 90 / Plies 5W, 2A / Item SDBAT

ALL+	81	74	Blade \$79.95
------	----	----	---------------

Burn Aratox RS

The Burn Aratox RS version differs from the normal Burn Aratox mainly through its outer mahogany ply, making it stiffer and more direct. Most suitable for the OFF-category. The outstanding blade performance speaks for itself! Handle: FL, AN, ST / Wt 85 / Plies 5W, 2A / Item SDBAS

OFF-	86	70	Blade \$84.95
------	----	----	---------------

Burn Carbotox

Stiff, fast blade for offensive play. Fine Mahogany outer ply paired with Kiri and Carbotox plies ensures speed and power for the modern attack game. Excellent feel and easy to use despite a stiff feel when striking the ball. Handle: FL, AN, ST / Wt 85 / Plies 5W, 2C / Item SDBUC

OFF	93	65	Blade \$89.95
-----	----	----	---------------

Li Ping Kitex

The blade of Li Ping, young rising star of the Chinese National Team. High-quality, hard hinoki outer plies, along with two texalium inner plies guarantee strength, flexibility, and power. The combination of the soft ayous inner ply and kiri middle layer produce a perfect synthesis between speed and control. If you are an attacker who, like Li Ping, has a varied topspin game, you will enjoy using this blade. Handle: FL, AN, ST / Wt 90 / Plies 5W, 2X / Item SDLIP

OFF	91	64	Blade \$78.95

OFF 91 64 Blade \$49.95

Persson Power Allround

Aggressive allround characteristics. Perfect ball control. A Donic best-seller for many years. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDPPO

ALL+ 78 78 Blade \$42.95

Dima Sawtec AR

The chameleon of table tennis blades! Champion Ovtcharov's greatest strength is his extreme adaptability at the table. A combination of woods for every stroke: flick, push, block, topspin, loop, and smash. Excellent control and speed, with DONIC Cork-Covered handle. Handle FL / Wt 85 gm / Plies 5W / Item SDDSA

ALL+ 83 74 Blade \$48.95

Ovtcharov Carbospeed

Very fast carbon blade with great stiffness and durability. High class Hinoki outer ply. Recommended for all out attackers with hard top-spins who prefer to counter-attack. Handle FL, ST / Wt 85 / Plies 3W, 2C / Item SDOVP

OFF+ 95 55 Blade \$79.95

Ovtcharov Soft Carbon V1

Offense with feeling! Based on the best-selling Ovtcharov Senso V1 and Waldner Senso Carbon blades, this carbon blade has relatively soft feeling on contact. Walnut outer-veneers provide speed and hardness for an attacking offense. Medium-hard Scandinavian pine middle veneer results in high tension dynamics and power. A fast, offensive blade, but with exceptional feeling + ball control. Two thin carbon mid-layers and Abachi middle veneer complete this top quality blade that is in a class of its own. Senso handle technology creates extremely good feeling. Slightly more direct when hitting the ball than the Waldner Senso Carbon. Handle FL,AN,ST/Wt 90 gm / Plies 5W,2C/Item SDOVS

OFF- 84 67 Blade \$74.95

DONIC Bloodwood Series

Made with the finest wood, normally used in the production of exclusive high quality speakers and musical instruments.

Bloodwood 5

This 5-ply blade is perfect for players who demand good ball control and sufficient speed to mount an attack. Outer plies are especially solid and hard, and inner plies are soft, with a harmony of thicknesses, creating the best possible mixture of power and feel. Special plies glue technology gives the perfect feel. Great balance of speed+ control+feel. Handle FL,AN,ST / Wt 85 / Plies 5W / Item SDBL5

OFF 88 68 Blade \$94.95

Bloodwood 7

Exciting blade for the uncompromising attacker. The well-balanced Senso - Technology on this 7-ply top quality Swedish blade gives the player full initiative and power without loss of control. Outer plies are especially solid and hard, and inner plies are soft, with a harmony of thicknesses, creating the best mixture of power and feel. Special new technology in gluing plies gives the perfect feel. Handle FL,AN,ST / Wt 90 / Plies 7W / Item SDBL7

OFF+ 95 60 Blade \$99.95

DONIC Burn Series

Thermic Burn Technology! A thermal treatment of the veneers results in extremely high stability, similar to features of high-quality tropical woods. Blades are exposed to 200 degrees centigrade for 24 hours to harden the wood and remove humidity. The resulting playing characteristics of these blades are unique.

Burn OFF

Stiff and fast with excellent control and an outstanding sweet spot. It is not too heavy even used with heavy and hard rubbers. Handle FL, AN, ST / Wt 90 gm / Plies 5W / Item SDBUO

OFF 94 65 Blade \$49.95

Burn OFF-

More controllable than the Burn OFF blade. In harmony with the thinner middle ply it is slightly more elastic. With softer rubbers imparts slightly more spin than the OFF version. Beautiful blade, excellent sweet spot. Handle: FL, AN, ST / Wt: 85 gm / Plies: 5W / Item: SDBUM

OFF- 89 68 Blade \$49.95

Burn AR+

Priority for this blade series is ease of control and feel. The thinner Kiri center ply offers great control, and at 80 gms, it is relatively light. Use with harder attacking rubbers for fantastic speed or use softer rubbers for greater spin. Handle: FL, AN, ST / Wt: 80 gm / Plies: 5W / Item: SDBUA

ALL+ 81 73 Blade \$49.95

 Item XSDEAL

EpoX Powerallround

COMBO SPECIAL

Fast allround, light weight blade, featuring a well-balanced speed and control. Great for all playing strategies. The rigid veneer gives necessary speed for an attacking game. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDEAL

ALL+ 85 72 Blade \$56.95

COMBO SPECIAL with 2 rubbers
\$121⁹⁵
 Item XSDECO

EpoX Control COMBO SPECIAL

Comfortable player-friendly blade with thin Fineline outer veneers. Outstanding control without unpleasant vibration. Used with medium to relatively hard rubbers, this blade is also great for attack play. Handle FL, AN, ST / Wt 80 gm / Plies 5W / Item SDECO

ALL 82 74 Blade \$56.95

EpoX Carbotec

Ideal blade for attack play with spin/speed variation. Soft carbon fibre, between Kiri and Ayous veneers gives an elastic, lively blade with good feel. Somewhat softer and easier to control than the EPOX Powercarbon. Handle FL, AN, ST / Wt 85 gm / Plies 5W, 2C / Item SDECA

OFF 93 67 Blade \$65.95

EpoX Powercarbon

High speed, aggressive blade of excellent design and quality. Soft carbon layer is between Fineline and Ayous layers. More dynamic and stiff when compared to the EpoX Carbotec. Handle FL, AN, ST / Wt 90 gm / Plies 5W, 2C / Item SDEPO

OFF+ 96 62 Blade \$65.95

Alligator Combi

The main feature of this blade is the difference in speed between forehand and backhand sides. The ALL+/DEF+ blade is a 5-ply combination that creates perfect harmony between playing styles. Soft Balsa wood core makes the blade light and relatively stiff. The forehand side's two hard, fast veneers guarantee powerful topspin. Backhand side's softer, slower veneers give you great control for defense away from the table. Amazing possibilities with anti and long lips rubbers. Handle: FL, ST / Wt: 80 gm / Plies: 5W / Item: SDALG

ALL+/DEF+ 76/66 75/90 Blade \$43.95

Baum SawTec Off

Fast blade for powerful attack, developed especially for World Jr Champ Patrick Baum. Comfortable handle w/ DONIC Cork Covered System. A dynamic five-ply Ayous blade for speed and power. Handle FL, AN, ST / Wt 85 gm / Plies 5W / Item SDBSA

Stellan Bengtsson:

1971 Men's Singles World Champion and holder of 67 International Titles including the 1973 World's Doubles and Team Championships, and 7 European Championships. He and wife Angie reside in San Diego, California and devote their table tennis time to coaching and developing players. He is proudly sponsored by, and uses JUIC equipment exclusively!

**BALSA + CARBON WITH
OUTSTANDING FEEL!**

Stellan Bengtsson Balsa-C

Made with a thick balsa core and two layers of carbon, this blade is 10mm thick and lightweight. It's fast with great feeling and touch. Stellan Bengtsson, former World Champ and full-time coach, said, "My Balsa-C blade is very fast but I can still feel the ball. The ball gets a great arc and I can create good spin. Unlike some balsa blades, the feeling is very solid. Blocking is fast and with great control. The light weight makes it easy to have fast arm speed and it is good in the changes from BH to FH. I am very proud to have my name on this racket. Good job, JUIC!" Handle FL, AN, ST / Wt 75 / Plies 5W, 2C / Item SJBEC

TENALY ERGONOMIC HANDLE

The word "Tenaly" means "it becomes the hand." Innovative handle has an ergonomic design to make the blade an extension of the player's natural angle of the wrist, hand and forearm to the head of the blade. The handle is comfortable and effective for the shakehand or penhold grip.

Tenaly Feruku

The unique ergonomic handle can be gripped either as shakehand-style or as penhold-style. This is a powerful blade combining Japanese cypress wood with the speed of Kevlar. Although constructed of hard wood, it also has good elasticity. Three plies wood and two plies of Kevlar for an ultimate heavenly feel for the offensive player. Handle Ergo FL / Wt 82 / Plies 3W, 2K / Item SNTF

OFF 90 67 Blade \$174.95

Dr. Neubauer

Kung Fu

Allround blade for the combination player, specially for anti-spin and pips-out rubbers. Softer with slightly better control than Dr Neubauer's Gladiator, it also enables the production of a game that is just as effective, and can be used for powerful attacking shots. Handle FL, AN, ST / Wt 85 gms / Plies 7W / Item SUKUN

ALL 76 74 Blade \$77.95

Titan

"Combination" blade, with faster forehand speed on the backhand (ALL+ & ALL-). Disruptive effect with with long pips and anti-spin rubbers. Dynamic attacks with pips-out and inverted rubbers. Astounding control and feeling. FL, AN, ST / Wt: 65 gms / Plies: 7W / Item: SUTIA

ALL+/ALL- 80/66 69/85 Blade \$177.95

Bulldog

Fast allround blade, light, with control for all shots. Long pips or anti-spin rubbers slow ball for short shots with maximum disruption and spin reversal. With short pips, deadly shots can be produced while straight hitting. With fast inverted rubber, you get a powerful weapon for topspin. Handle: FL, AN, ST / Wt: 68 gms / Plies: 7W / Item: SUBUL

ALL+ 87 69 Blade \$63.95

Gladiator Maximum Effectiveness with Pimples!

A normal sized blade of special non-balsa wood composition for great control + maximum spin reversal in blocking close to the table with long pips. FL,AN,ST / Wt. 79 gm / Plies 7W / Item SUGLA

ALL 86 70 Blade \$83.95

Barricade Maximum Defense, Excellent Control!

For short blocking close to the table and safe yet dangerous chopping. For all rubber types. Attack by looping or hitting to confuse your opponent. Effective for all passive and active strokes. FL,AN,ST / Wgt 58 gm / Plies 7W / Item SUBAR

DEF+ 65 88 Blade \$63.95

Special

The magical blade yet improved! Maximum effects and very short blocking when used w/long pips. Excellent touch thanks to the Balsa wood handle. Enables easy and effective counter-attack, pushing and lifting w/long pips. Thick 7-ply blade w/large handle. FL,AN,ST / Wt. 68 gm / Plies 7W / Item SUSPE

OFF- 88 68 Blade \$190.95

Combination Effect

Different speed values on the two sides of the blade using a unique wood composition. Low rebound coefficient on one side slows the ball, allowing return short over the net with a maximum spin reversal on block. FL,AN,ST / Wt. 70 gm / Plies 6W / Item SUCOM

ALL+/ALL- 79/66 70/84 Blade \$179.95

High Technology Plus Offense, Excellent Control!

For all strokes. Gluing technique + Balsa handle, gives great ball feeling. Effective attack with long pips through push/lift and counter-attack, with safe returns while blocking. Super acceleration and attack. FL, AN, ST / Wt. 65 gm / Plies 5W / Item SUHIP

ALL+ 89 64 Blade \$89.95

Firewall Plus

Similar to the Firewall, but without weight shakers. Modified plywood composition enables dynamic offense w/reversed rubbers or short pips. Balsa core gives acceleration for hitting/looping. Good feel on passive strokes. High spin reversal + fast attack thru aggressive pushing or lifting w/long pips. FL,AN,ST / Wt. 65 gm / Plies 5W / Item SUFIP

ALL 79 73 Blade \$68.95

World Champion Fast OFF- for Dynamic Attack!

Great for attack hitting/looping (topspin), close to table and mid-distance and for combination bat players w/pips out or anti-spin rubbers. Special heat treatment gives soft feeling and outstanding control. Handle FL, AN, ST / Wt 80 / Plies 5W / Item SUWOR

OFF- 86 71 Blade \$69.95

HALLMARK

Combination

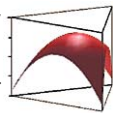

Specially selected wood plies to a blade with the two sides of the blades with different speeds. The backhand is slower with more control and the forehand is faster. This light weight blade has proved popular with reverse rubber players and combination players who require more speed on one side of the bat. Handle FL,AN,ST / Wt 76 / Plies 5W / Item SHCOM

OFF-/DEF 88/65 62/85

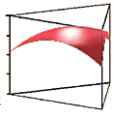

Blade \$57.95

ACT = Anti-Vibration Cork Technology

Conventional Blade speed/spin/control rapidly degenerates due to small surface area of sweet spot.

ACT Blade has consistently high results for speed/spin/control. Enlarged sweet spot

Ultra

Five-ply large oversize blade with thick balsa core for the offensive player looking for a "club". Large handle and head size, with thick blade, but lightweight. Great attacking properties, but is very easy to hit any ball consistently. Devastating effect when used with long pips rubber. ACT system (Anti-Vibration Cork Technology). Handle FL, AN, ST / Wt 73 / Plies 5W / Item SHULT

OFF 90 60 Blade \$57.95

Carbon Extreme

Unique 7-ply combination of balsa, carbon, abachi and limba. Balsa gives speed and a layer of the special carbon veil on top gives excellent control. Result: a lightning fast blade with good control and a massive sweet spot for over the table play. Has Hallmark's ACT system (Anti-Vibration Cork Technology). Handle FL,AN,ST / Wgt 80 gm / Plies 3W, 2C / Item SHCAE

OFF+ 99 53 Blade \$74.95

Enigma

Oversize blade with thick double balsa core that's excellent for attacking play, even with pimple rubbers. Outstanding control, incredible attacking properties with long pimples. Very light in weight. Three plies of wood is thick in width. Has Hallmark's ACT system (Anti-Vibration Cork Technology). Handle FL, AN, ST / Wgt. 63 / Plies 3W / Item SHENI

OFF- 84 72 Blade \$57.95

Aurora

The Aurora is a great combination blade, with faster forehand side for attacking and slower backhand side for defense. Light blade with thick 5-ply wood construction. Has Hallmark's ACT system (Anti-Vibration Cork Technology). Handle FL, AN, ST / Wgt. 70 / Plies 5W / Item SHAUR

OFF-/DEF+ 88/67 68/84

Blade \$45.95

Strategy

A five ply slow oversized blade, great with long pips rubbers for close-to-table play. Reverse rubber can be used on the other side for good contrast between attack and defence. The blade is very popular with Super Special and Original users. Has Hallmark's new ACT system (Anti-Vibration Cork Technology). Handle FL, AN, ST / Wt 93 / Plies 5W / Item SHSTR

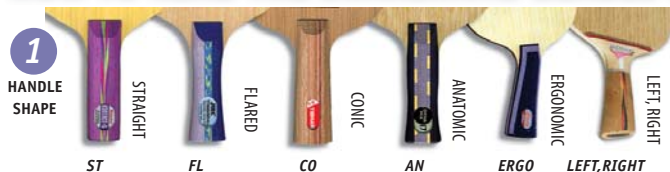

ALL- 66 84 Blade \$44.95

NIGEL ECKERSLEY, England mens team commonwealth gold medalist and highly ranked Veteran player, recently won a European medal using the Hallmark Strategy blade with Hallmark Super Special rubber.

HOW TO READ THE SHAKEHAND BLADES CHART

- 1 HANDLE SHAPE**
- 2 PLY** [Number of layers or plies] W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon
- 3 THICKNESS** [Thickness of blade, shown in millimeters.]

Paddle Palace is happy to assemble new blades with rubber at no extra charge upon request. One rubber sheet will cover one side of a blade. Rubber comes in red and black. No returns on custom-made paddles.

Turn to page 15 for Blade Selection Guide

- 4 BLADE MEASUREMENTS: LENGTH/WIDTH/HANDLE LENGTH**
The length, height, and width of the blade and handle length are shown in centimeters.
- 5 WEIGHT:** The average weight of each blade is indicated in grams. Individual weights may vary.
- 6 CLASS:** OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. The rubber sheet that is applied to the blade will naturally affect the speed of the paddle.
- 7 SPEED:** The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.
- 8 CONTROL:** The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

Nittaku 3-Star Premium

The Nittaku 3-Star Premium is more consistent in hardness and lasts longer than any other ball in the world. Label on ball says "Premium 40, Made in Japan". Packaged in boxes of 3 balls each. Item BNPR

\$6.95 for 3 balls/\$13.50 for 6 balls/\$25.95 for 12 balls
Bulk Pack: \$208.95 for 10 dozen

Nittaku 3-Star

High quality 3-star ball, exceeding highest standards for ITTF approval. Label on ball says "40" and "Japan". Packaged in boxes of 3 balls. Available in white or orange. Item BNCH

\$4.95 for 3 balls/\$9.50 for 6 balls/\$17.95 for 12 balls

Nittaku Super Training Balls

10 Dozen bulk pack. Outstanding practice ball at outstanding price! Top quality 40mm practice balls for training, matches, multi-ball drills, and robots. Ten dozen balls (120 balls) in one box. Available in white or orange. Item BNSK

\$59.95 for 10 dozen

Nittaku Top Ball

Best practice ball in the world! This 40mm ball is made in Japan with the same quality material and process and in the same Nittaku factory as the Premium ball. Packaged loose in a bulk-pack of two dozen (24) or ten dozen (120). White or orange.

\$26.95 (2 doz.) Item BNT0
\$125.95 (10 doz.) Item BNTK

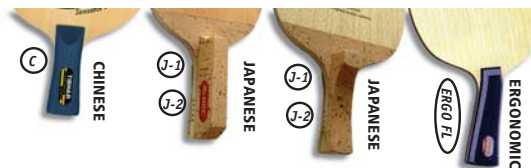

Nittaku Large 44mm 3-Star

These are extra-large 44mm balls for the 44mm game. Slower speed, less spin--easier to see, hit, and control. Top quality, made in Japan by Nittaku. Orange only. Item BN44

\$6.95 for 3 balls
\$13.50 for 6 balls
\$25.95 for 12 balls

HOW TO READ THE PENHOLD CHART

1 Handle Shapes

- 1 **Handle** C=Chinese style. J-1=Japanese style designed for one rubber. J-2=Japanese style designed for either one or two rubbers. Ergo FL = Ergonomic.
- 2 **PLY** [Refers to number of layers or plies]
W=Wood, C=Carbon, G=Glass Fibre, X=Texalium, T=Titanium, U=Aluminum, K=Kevlar, S=Synthetic, A=Arylate, R=Aramid, Z=Zylon
- 3 **THICKNESS** [Thickness of blade, shown in millimeters.]
- 4 **BLADE MEAS.: LENGTH / WIDTH**
The length [height] and width of the blade are shown in centimeters.
- 5 **WEIGHT:** The average weight of each blade is indicated in grams. Individual weights may vary.

- 6 **CLASS:** OFF = offensive blade ALL = allround blade DEF = defensive blade. The class of blade ranges from fastest [OFF+] to slowest [DEF-]. Rubber sheets that are applied will affect the speed of the paddle.
- 7 **SPEED:** The higher the number, the greater the speed, meaning bounce per force input. Use to compare relative blade speeds.
- 8 **CONTROL:** The higher the number, the greater the control. Use to compare relative blade control. Naturally, control ultimately is most dependent on player's skill.

ABOUT PENHOLD BLADES

There are two main styles of penhold blades: Chinese and Japanese. The Chinese style normally has a rounded head, similar to a shakehand blade head but often somewhat smaller. The Chinese-style handle is smaller and shorter than a shakehand handle. The Japanese-style penhold has a handle with a protrusion on one or both sides around which the player wraps the index finger. The Japanese-style blade head is often more squarish in shape than the Chinese-style penhold, but it can vary from roundish to squarish, so check the image. Penhold-style blades are used by fewer than 10% of players in North America, although the popularity in Asia

is 20% to 40%, with the younger players favoring the shakehand style.

All Chinese-style penhold blades (C) are suitable for putting either one or two rubbers on the blade. Some Japanese-style penhold blades are designed for applying just one rubber (J-1), and some are suitable for applying either one or two rubbers (J-2).

See the Blade Selection Guide on page 12 for information about choosing Blades and Combo Specials, and see page 47-48 for the Penhold Blades Comparison Chart.

COMBO SPECIALS

Combo Specials include penhold blade plus a choice of 1 or 2 rubber sheets, as indicated, from any of these brands: NITTAKU, JUIC, STIGA, TIBHAR, DONIC, HALLMARK, DR NEUBAUER, YASAKA, XIOM.

Up to \$50 = no extra charge
 (\$50 - \$55) = \$10
 (\$55 - \$60) = \$15
 (\$60 - \$65) = \$20
 Extra charge for each rubber priced over \$50

PRO PRO SPECIALS include selected blade and rubber combinations at a special price. Details on pages 4-7.

See Page 5

Stradivarius

Two plies of Aramid Carbon (vibration-absorbing soft Aramid+highly elastic Carbon) makes this blade ideal for professional offence play. Ball goes deep in blade with little vibration after impact. Exceptional spin and stable feel. Players can feel the moment of impact directly and clearly without any irritating vibration. Topspin attack close-to-table or from mid-distance is very powerful and secure. Handle Chinese / Wt 85 gms / Plies 5W, 2C / Blade \$99.95 / Item PXSTVC

PRO

OFF 91 64

V1

Hard, fast, lightweight carbon blade with a thickness of only 5.4 mm, allowing sufficient deformation required by modern aggressive top-spin players. Special hard wood on the surface and "Energy Carbon" directly under the surface, results in high speed and compact feel. Both close-to-table topspin and hard smash are very easy. Precise ball placement with blocks. Stability of V1 even gives players the advantage in topspin vs. topspin. Handle Chinese / Wt 85 gms / Plies 5W, 2C / Blade \$84.95 / Item PXV1CC

OFF- 88 65

Ignito

For passionate, aggressive, close-to-table top-spin play. Excellent for hitting the ball on the rise from the bounce to easily put pressure on the opponent. Lightweight makes it easier to swing fast, but due to the high energy efficiency of Energy Carbon and Kiso Hinoki wood, more energy is transferred to the ball during impact. For players migrating from all-wood offensive blades. Handle Chinese / Wt 88 gms / Plies 3W, 2C / Blade \$94.95 / Item PXIGNC

OFF 94 61

ABOUT RUBBER: HOW TO CHOOSE

About Rubber

Rubber sheets come as a square in a sealed package. The rubber is custom-assembled to a blade after the player makes their blade and rubber choices. Paddle Palace will assemble rubber to the blade as a free service upon request. One rubber sheet covers one side of a blade, so shakehand blades require two rubbers. ITTF regulations require red rubber on one side and black on the other.

4 Main Rubber Types

Smooth, Short Pips, Long Pips, and Anti-Topspin.

■ **Smooth:** Most players in the modern game of table tennis use smooth rubber, also called “inverted” rubber. The surface of the rubber is smooth with a layer of sponge underneath. Smooth rubber provides the most spin and is used by over 85% of tournament players. Hitters, loopers, all-around players and defensive players all use smooth inverted rubber.

■ **Short Pips,** also called “pimpled” rubber, has a bumpy surface and usually has a layer of sponge underneath. It is used by players who do not execute a great deal of spin in their game. Some close-to-the-table hitters, all-around players, and defensive players use short pips. Short pips often provide more control for players who have difficulty playing against spin. “Hard rubber” is the term for short pips rubber with no sponge, and it is used primarily for the old-fashioned “Classic” or “Hardbat” play.

■ **Long Pips** rubber has extra-long pips that reverse the spin of the opponent. The unpredictability of the spin from long pips can give the long pips player an advantage over the opponent who has not learned to read the spin. It is difficult to play offensively with long pips, so most players who use long pips only use it on one side.

■ **Anti-Topspin** rubber has a smooth surface and does not generate much spin or speed. Anti rubber neutralizes the spin of the opponent. Most players who use anti, block with it on one side and use a different rubber on the other.

Choosing Rubber

■ **Speed vs. Spin:** With so many rubber sheets, how do you choose? The Paddle Palace Rubber Ratings are a good place to start. Look at the speed and spin ratings of the rubber and match one to your playing style. Offensive players who use topspin, drive, loop, and smash usually prefer rubber with a high speed rating, while defensive players who primarily use underspin, chop, push, and block usually prefer slower rubber. Loopers and choppers prefer rubber with a high spin rating. The faster or spinnier a rubber is, the harder it is to control. Rubber that is spinny also is more affected by the opponents’ spin.

■ **Sponge Thickness** affects the speed of the rubber. Thicker sponge = speed and somewhat more spin. Thinner sponge = more control. Thicker sponge adds weight to the paddle and gives a more cushioned feeling. Thinner sponge is lighter and gives a woodier feeling. Offensive players prefer 1.8 to 2.5mm. Allround players prefer 1.5 to 2.0mm. Defensive players prefer 0X (no sponge) to 1.6mm. Loopers prefer thicker sponge. Choppers prefer thinner sponge. Developing players who need more control should choose a sponge that is at the thinner end of the range that fits their playing style.

Rubber Ratings

The rubbers are assigned ratings for Speed, Spin, & Control on a scale of 10 to 99. The higher the rating, the higher that attribute. Paddle Palace ratings use a universal scale which differs from the manufacturers’ ratings so that the rubbers from all the brands can be compared. Ratings are intended only as a tool for helping to select rubber. Naturally, speed, spin, and control are all factors that are greatly affected by an individual player’s skill, strokes, playing style, and blade.

Each issue of our Paddle Palace catalog includes a comparison chart of all the rubbers so you can see them at a glance. If you go to PaddlePalace.com, you can click on “Chart View” for a comparison chart that is interactive. You can view by specific categories or brands, and click on columns to numerically order the ratings for each attribute. We also have charts online for blades, tables, and paddles.

Is Your Rubber Legal?

The USATT and ITTF have several regulations to determine if a rubber sheet is legal to use in sanctioned competitions. To be legal, a rubber sheet must meet all of the following conditions:

Each side of the blade used for striking the ball must be covered with ITTF approved rubber, either pimples rubber (long pips or short pips), or inverted rubber (smooth or anti-spin). A list of ITTF-Approved rubbers is published on the ITTF (International Table Tennis Federation) website at www.ittf.com. If a rubber is ITTF-Approved, then it is also approved for USATT sanctioned events.

The rubber on one side of the blade must be red and the other side must be black. If you only use one side of the blade for striking the ball, you do not need to have that side covered with rubber. For example, some penhold players only hit with one side of the blade and they only put rubber on one side. In this case, the unused side must be colored the opposite color (either red or black) from the side with rubber. Many penhold players use a “paint sheet” on their blade to comply with this rule. However, if you hit the ball with the side that does not have rubber, you lose the point!

Rubber sheets must extend up to, but not beyond, the limits of the blade face, except that the part nearest the handle and gripped by the fingers may be left uncovered or covered with any material. The rubber (and all layers of the blade) must be continuous and of even thickness throughout. The surface must be matte (not shiny). Slight deviations from continuity of surface or uniformity of color due to accidental damage or wear may be allowed provided that they do not significantly change the characteristics of the surface.

Pimpled rubber (pips out) must have the pimples evenly distributed over its surface at a density of not less than 10 per cm² and not more than 30 per cm². The length of the pips must be uniform and no longer than 2mm.

Inverted (smooth) rubber may have a total thickness no more than 4mm, including sponge and rubber together. The rubber layer (not including sponge) may have a thickness no more than 2mm. There is no maximum thickness stipulated for the sponge thickness alone.

Rubber sheets may not have any physical, chemical or other treatment applied that affects the characteristics of the rubber or sponge. This means no more speed glue! Speed glue and other elements such as baby oil that expand the sponge, or sticky solvents used on the surface of the rubber, change the characteristics of the rubber and make it illegal for use in USATT and ITTF sanctioned events.

Confused by all the regulations? Don’t be uncertain. If you buy rubber at Paddle Palace you know it is legal! Paddle Palace only carries rubbers approved by the USATT and ITTF.

Go to PaddlePalace.com to our News section for more info including:

- Official Rules of Table Tennis
- ITTF Racket Testing Video

The ITTF Racket Testing Video shows an official performing and explaining the step-by-step racket testing for an international competition. He checks for ITTF rubber approval then does the four tests for Flatness, Thickness, VOC gas, and Gloss.

NEWEST RUBBER FROM TIBHAR EVOLUTION

PRO-TENSION rubber surface is grippy and rich in spin, with perfect elasticity and stability.
RED POWER SPONGE is bright red, open porous, and spectacular. Adapts perfectly to the situation.
 Go to PaddlePalace.com for more details about the amazing new **EVOLUTION** rubber!

VLADIMIR SAMSONOV:

blade: TIBHAR Samsonov Force Pro
 rubber: TIBHAR Evolution MX-P
 3 x European Champion
 3 x World Cup Champion

5Q

The softer version of the Q-rubber-family, 5Q has a medium-hard sponge that transfers lots of rotation to the topspin and counter-topspin shots at mid-distance. The rubber surface is full of sensation, supported by the SPI-Advanced-Technology, and giving a wonderful sound and a good handling. The newly conceived rubber surface allows lots of rotation and provides the necessary security when playing the large pallet of spins. Sponge 1.9, 2.1 Item RT5Q

96 97 70 \$64.95

1Q XD

This new version of 1Q possesses a higher potential of penetration. The adhering rubber surface and the harder sponge confer even more energy to the strokes from topspin players making no concession. Supported by SPI-Advanced-Technology, 1Q XD is the ideal rubber for the professional players able to execute good arm and wrist acceleration for fast and aggressive play. Excellent balance for passive and aggressive adversarial strokes, resulting in outstanding precision at high speed! Sponge 1.9, 2.1 Item RT10X

99 92 68 \$64.95

1Q

Thanks to SPI Technology Optimization, 1Q has the greatest speed glue effect of all, resulting in a fast, dynamic rubber with a high ball curve. Robust rubber surface enables an explosive game rich in spins. The basic principle of OPTRA technology (Optimized Trajectory - Optimized ball curve) was also improved for longer trajectories although ball curve is very high. Opponents will have a hard time controlling and returning the ball, putting you at the edge of your potential without passing your limits! Sponge 1.9, 2.1 Item RT1Q

98 90 69 \$64.95

Evolution FX-P

The most flexible and soft version of the EVOLUTION rubber family. This rubber confers a lot of sensation and control in any playing situation. FX-P is a high-performing rubber proven by the enormous sound resulting from topspin strokes. The rubber surface is rich in spins and its soft sponge with high catapult effect gives the sufficient power necessary for a variable topspin game. The player who likes to attack near the table and is not willing to concede any ball while playing a risky game will be delighted by the fine tuning of the rubber surface with the soft sponge of the EVOLUTION FX-P. Sponge 1.7, 1.9, 2.1 Item RTEVF

94 98 68 \$59.95

Evolution EL-P

The most elastic rubber of the Evolution rubber series. EL-P with its medium sponge perfectly fits in between the harder MX-P and the softer FX-P. The selected pimple geometry of the elastic EL-P does not even come close to the other Evolution versions in terms of Spin and speed. Very precise and powerful strokes can be realised at half distance or at the table. Evolution EL-P: chosen by most of the Topspin players for whom the MX version is too hard and the FX version too soft, however putting the emphasis on rotation and power! Sponge 1.7, 1.9, 2.1 Item RTEVE

96 97 67 \$59.95

Evolution MX-P

The fastest and most dynamic rubber of the EVOLUTION rubber family. Thanks to the perfect adjustment of the pimple geometry, more flexibility is conferred to attacking balls extra energy. MX-P is very well adapted to any player's game, making no concession in terms of speed and spin. The ball/bat contact time of the MX-P is a little bit longer than the reference time, thus conferring much more sensation. Chosen by topspin players willing to feel the necessary pressure of their strokes at the table and at half distance. Sponge 1.7, 1.9, 2.1 Item RTEVM

98 96 67 \$59.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

MORE TIBHAR RUBBER ▶

AURUS

INTEGRATED SPEED GLUE EFFECT

Expect Golden Times!

Aurus

For the ambitious player striving to play topspin strokes in any situation. Ultra soft rubber surface provides outstanding spin and playing sensation, allowing a secure and aggressive game. The integrated SPI (Speedglue-Effect-Inside) technology confers an extreme catapult reaction to the ball. Sponge 1.9, 2.1. Item RTAUR

96 89 70 \$54.95

Aurus Soft

Softer version of Aurus, offering better control with a high ball rebound. An energy-loaded rubber ideal for spin-rich strokes and secured topspins with good control. Very well adapted to each game level for an optimal performance. Sponge 1.9, 2.1. Item RTAUS

92 94 70 \$54.95

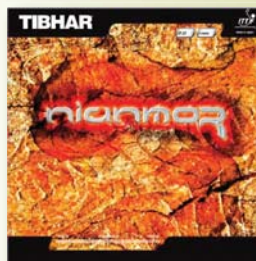

Aurus Sound

The softest version of Aurus produces a great sound and pure playing pleasure. Balanced playing sensation of the soft sponge and the elastic rubber surface were adapted to players who want to use energy-loaded strokes with greater accuracy. Sponge 1.9, 2.1. Item RTAUO

89 96 70 \$54.95

UNBEATABLE IN SPEED

Nianmor

Perfect for the mid-distance offensive game, with topspin and counter topspin strokes. Thanks to a mix of natural and synthetic caoutchouc in the sponge composition + a new arrangement of pips, Nianmor offers highest standards of Japanese rubber technology, giving you topspin strokes with high catapult level + speed and rotation. Best suited for the new offensive game! Sponge 2.0, Max. Item RTNNM

97 86 71 \$54.95

NEW. HOT. RED.

\$49.95

Grip-S Europe SPECIAL

High performance rubber with high catapult effect and dynamic speed. Under extreme strokes the ball contact onto the stable and adhering rubber surface is unequalled in opening up new possibilities. Revolutionary RPS (Red Power Sponge) Technology enables energy transfer with optimal effect on the speed of the ball bounce and trajectory. With GRIP-S Europe you are best equipped for a variety-rich serve and return game. Sponge 2.0, Max. Item RTGRE

91 93 71 \$50.95

\$49.95

Grip-S Europe Soft SPECIAL

This softer RPS sponge version of the Grip-S confers more sensation and flexibility than the Grip-S Europe. The RPS technology is synonymous with pure playing pleasure—efficient energy transfer means optimal balance between speed and ball curve. GRIP-S Europe Soft is conceived for the player favoring a mid-distance game, allowing dynamic topspins, good control, and lots of spin rotation. Sponge 2.0, Max. Item RTGRS

85 98 72 \$50.95

Grip-S

From TIBHAR's Optra development (Optimizing Trajectory), GRIP-S has extreme adhering surface and powerful sponge for perfect ball trajectory. You will master every situation with a feeling that every mistake is forgiven. You determine the speed and rotation! Grip-S comes with a layer of glue already on the sponge. Remove the protective sheets, spread a layer of glue on the blade and let dry, then press the rubber onto the blade. Simple! Sponge Max only. Item RTGRI

85 97 71 \$49.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

MORE SMOOTH RUBBER

SINUS RUBBERS

Sinus Alpha

Softer sponge than Sinus provides even better control. Not as fast as its harder twin but with unequaled precision on fast topspins and blocking balls. Balls have longer, evenly curved trajectory, for more pressure on the opponent. For players looking for dependability + acceleration. Sponge 2.0, Max. Item RTSIA

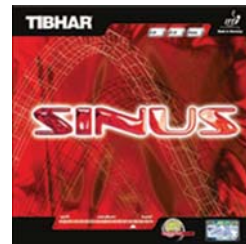

88 82 79 \$59.95

Sinus Sound

The "loud" variety of the SINUS series. Great sound with ball contact + amazing speed glue effect! Pronounced ball curve forgives mistakes. Integrated speed-glue-effect sponge is softer than Sinus or Sinus Alpha. You get great game sensation, optimal contact, and maximum spin + speed, even during slow topspin exchanges. Sponge 2.0, Max. Item RTSIS

83 84 78 \$59.95

Sinus

NO LIMITS! Developed for high-performance with harder sponge for powerful play. Unsurpassable, with tremendous ball speed. Great rotation during topspin, service and short exchanges. Also provides the ever popular fresh-glue sound. Sponge 1.8, 2.0, Max. Item RTSIN

91 79 83 \$59.95

NIMBUS RUBBER

Nimbus Sound

Thanks to the new SPI technology, the playing sensation and sound are highly emphasized. The extremely soft sponge gives this rubber an extraordinary sound and high spin. It also gives players high potential for flexibility in stroke play. Especially designed for players who look for more than just speed in a rubber. You get extreme spin rotation which improves delivery of strong offensive stroke play. Sponge 1.8, 2.0, MAX. Item RTNIO.

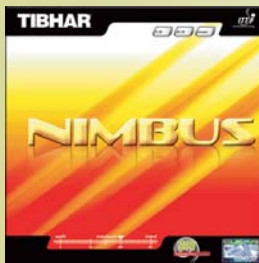

75 81 83 \$45.95

Nimbus Soft

The soft version of Nimbus will definitely impress players who like very soft offensive rubbers. Nimbus Soft with its 37.5 degree sponge hardness has exceedingly perceptive ball control and was developed in such a way that, even in extreme playing situations it provides a large margin for technical error. Sponge 1.8, 2.0, MAX. Item RTNIS

79 78 84 \$45.95

Nimbus

No need for speed glue! NIMBUS -SPI includes TIBHAR's newly developed 'speedglue integrated configuration' giving you all the essential factors of speedglued rubber. Incredible spin-speed dynamic plus typical sound and ball contact feeling. With a 45 degree sponge hardness it is not only the hardest Nimbus rubber, but also the fastest. Sponge 2.0, Max. Item RTNIM.

84 78 79 \$45.95

CHANTAL MANTZ

German Junior Girls Champion

GENIUS RUBBER

Genius+ Optimum

A premium rubber with Optima and Speed Effect Inside Technologies. The pimple structure is a little bit different and smaller than that of Genius, thus conferring more rotation and an unbelievable dynamic for the topspin game.

Sponge 1.8, 2.0, Max. Item RTGOP

94 91 70 \$54.95

Genius+ Optimum Sound

Soft version of Genius+ Optimum. Extremely strong catapult effect paired with a light playing sensation. Energy-loaded sponge and rubber surface offers an optimal mixture of dynamism, playing sensation, sound and control. Sponge 2.0, Max. Item RTGOS

91 93 71 \$54.95

Genius Sound

Softer and reworked version of Genius. Ideal for a very dynamic game, and allowing a brand new variety of strokes at mid-distance. The combination of newly developed sponge and spin-rich surface give you a rubber rich in sensation, with great sound, fast and full of spin. Sponge 1.8, 2.0, Max. Item RTGES

89 95 71 \$54.95

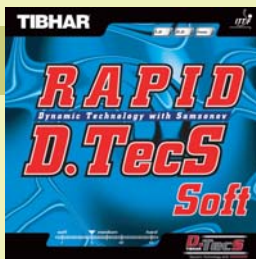

Genius

Rich in spin for the offensive game!

Obviously focused on spin--and more spin in this case also signifies more speed. More spin also means that the angle of the ball rebound is more upright, conferring a bow-formed ball curve, giving more precision to your strokes and putting your adversary under pressure. Sponge 1.8, 2.0, Max. Item RTGEN

91 87 73 \$54.95

Available with TIBHAR Black Carbon blade as part of a professional blade/rubber PRO SPECIAL. See page 4

Rapid D.TecS Soft **PRO**
Dynamic Technology! SOFT version is even more advanced than the normal D.TecS rubber. The sound is fantastic and the speed is extreme, even without speed glue. Sponge Max. Item RTRADS

80 76 80 \$44.95

Available with TIBHAR Samsonov Alpha blade as part of a professional blade/rubber PRO SPECIAL. See page 4

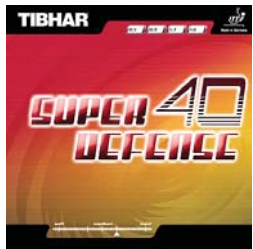

Rapid **PRO**
 Vladimir Samsonov helped develop this rubber. Soft sponge+very elastic rubber provide speed, spin and lots of ball feeling with optimum control. Sponge 1.8, 2.0, Max. Item RTRAP

69 58 91 \$35.95

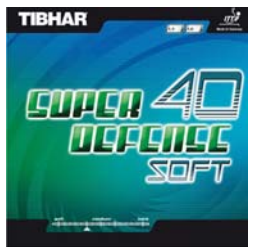

Legend
 An extremely adhering surface, which when combined with a very soft sponge allows this high quality Chinese rubber to play more like its European counterparts. This then makes it the ideal rubber for players looking to produce much rotation and benefit from feeling. Sponge 2.0, MAX Item RTLEG

61 58 94 \$27.95

Super Defense 40
The best super defense! Developed expressly for defense with pimple geometry and extremely thin smooth rubber surface, plus special sponge. Definitive ball control allows you to cut the ball spin with extra spin. Item RTDEF. Sponge 0.5, 0.9, 1.3, 1.5, 1.7, 1.9.

62 92 83 \$46.95

Super Defense 40 Soft
 The soft version of Super Defense 40 offers even better control with excellent spin variations. Effective for close-to-table strategies. Put your adversary under pressure, applying even more tactical force in Allround defensive play. Sponge 1.3, 1.6. Item RTDES

60 95 84 \$46.95

Vari Spin D.TecS
 Control + Spin An "I can do everything" feeling! Very mild tension enhances ball control in most styles of play. With D.TecS version ball speed increases a little but ball control is significantly emphasized. Like each of Tibhar's D-TecS rubber sheets, Vari Spin D.TecS also comes in Tibhar's "airtight pack" that ensures longevity and keeps the rubber "intense" and ready to play. Sponge 1.5, 2.0. Item RTVAD

65 71 89 \$39.95

Volcano
 A high quality Allround attacking rubber at a competitive price. But do not let the excellent price mislead you! Volcano is top-notch with its superior adhering surface and typical "characteristics" of rubbers made in Germany. Sponge 2.0, MAX. Item RTVOL

84 65 84 \$23.95

LONG PIPS RUBBER

Mythik
 Multifaceted long-pips rubber with a wide range of playing possibilities. Relatively soft pips offer high control, extreme undercuts, and effective defensive play from the table. With OX and 0.5mm sponge, ideal rubber for playing a potent long-pimpled disturbing game at the table. Sponge OX, 0.5, 1.0, 1.5 Item RTMYT

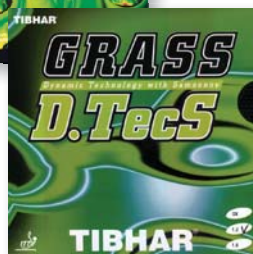

55 68 83 \$42.95

Grass Defense
 The wave of the longest (and legal) Japanese long pips is similar to waving grass in the wind. The Defense version has a soft sponge and is easy to play with.

GRASS DEFENSE 1.0 or OX [no sponge] Item RTGRDE

54 61 86 \$41.95

Grass D.TecS
 D.TecS effect integrated into classical long pips rubber. You get new ways to cut the ball and counter destabilizing strokes. Softer pips provide amazing control plus speed to destabilize the opponent with nervous aggressive shots during attacks. Sponge 1.2, 1.6, OX [no sponge]. Item RTGRDT

56 67 83 \$44.95

SHORT PIPS RUBBER

Speedy Soft
 Broad, short pips for highest speed on counter attack or block at the table. Soft sponge gives maximum ball control, without affecting the popular "naps effect." Sponge 1.0, 1.5, 2.0. Item RTSSO

89 58 79 \$39.95

Speedy Soft D.TecS
 D.TecS (Dynamic Technology with Samsonov) results in more speed and more danger for your opponent on block or counter balls! Sponge 1.5, 2.0. Item RTSSD

91 53 80 \$41.95

ANTI TOPSPIN RUBBER

Ellen Defense & Ellen Offense
ELLEN DEFENSE-Soft sponge for defense players sensitive to topspin. Has a distinct braking effect, to give unsurpassable ball control. Sponge 1.5, 2.0. Item RTELD

SPEED 51 CONTROL 89 \$29.95

ELLEN OFFENSE-Hard sponge for active anti game. Very strong against opponents' spin, w/ distinct braking effect, resulting in unsurpassable ball control. Sponge 1.5, 2.0. Item RTELO

SPEED 64 CONTROL 84 \$29.95

BUILDING WORLD CHAMPIONS SINCE 1944

ENJOY THE ULTIMATE PRECISION-SHOT-MAKING EXPERIENCE!

Calibra Tour is something you must experience to believe! It is equipped with the brand new APS-technology, and provides very high speed and the fantastic possibility to shape your shots with the increased spin features. The APS technology (Advanced Pimple Structure) with straight shaped pimples makes the rubber adapt to the ball like never before and provides an explosive and spinny rubber that is reliable in every situation.

THE SPECIAL TREATED
SURFACE GENERATES
ULTIMATE BALL CONTACT!

SPONGE: SOFT

CALIBRA TOUR S

Soft sponge. Suitable for players with lower hitting power who need a rubber that helps generate extra speed with the exceptionally lovely sound of built-in speed glue effect. Sponge 1.7, 1.9, 2.1 Item RSCTS

95 97 68 \$62.95

SPONGE: MEDIUM

CALIBRA TOUR M

Medium-hard sponge. Suitable for players with medium strong hitting power who need a rubber that helps generate a bit more speed with the lovely feeling of built-in speed glue effect. Sponge 1.7, 1.9, 2.1 Item RSCTM

96 96 68 \$62.95

SPONGE: HARD

CALIBRA TOUR H

Hard sponge. Suitable for players with strong hitting power who need a rubber with built-in speed glue effect that is reliable in all situations. Sponge 1.7, 1.9, 2.1 Item RSCTH

98 95 67 \$62.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

CALIBRA

TAKE THE ULTIMATE STEP FOR LONG TRAJECTORY

\$48.95

\$48.95

Calibra LT

A medium hard sponge, suitable for the highly skilled player with excellent technique. Calibra LT is for advanced players who demand tremendous spin and speed, combined with a sensitive touch. If you want to advance your game, this is the rubber for you! Sponge 1.8, 2.0, MAX. Item RSCAL

96 91 70 ~~\$59.95~~

Calibra LT Sound

Made with soft sponge for all types of attacking game. With the softer sponge you get more control, especially for blocks and receiving serves, but you are still able to make lethal strokes to finish your opponent. The soft sponge of Calibra LT Sound will also give you a crisp clear sound when striking the ball. This is the closest you will get to the feeling and sound of speed glue! Sponge 1.8, 2.0, MAX. Item RSCAO

94 93 71 ~~\$59.95~~

\$48.95

Calibra LT Spin

Made with medium soft sponge, and recommended for highly trained attackers and loopers who emphasize tactical spin. You will have outstanding control for touch shots and service return, but when you are attacking you will experience new levels of possibility.

Sponge 1.8, 2.0, MAX. Item RSCAN

95 92 70 ~~\$59.95~~

PRO

Available with STIGA Carbo 7.6 blade as part of a professional blade/rubber PRO SPECIAL. See page 5

Calibra LT Plus

Made with extra hard sponge that ensures tremendous power when hitting. This is an excellent choice for the highly skilled player who demands a professional combination of spin, speed, power and long trajectory. Sponge 1.8, 2.0, MAX. Item RSCAP

97 91 69 ~~\$59.95~~

MAGNA RUBBERS

Magna TX II

Magna TX II is the answer for the player who wants to achieve optimum acceleration. It generates maximum tension, and it provides high acceleration returns for a fast spin and speed game. Recommended for highly trained attackers with good technical know-how. Sponge 1.8, 2.0, MAX. Item RDMAX

95 92 70 ~~\$52.95~~

New version of Tension Clic (TC) and Tension Sound (TS) sponges combined with the very popular Magna top sheet. Developed specifically to transform your game, bringing out the very best in each individual player!

Magna TC II

Very dynamic, very sensitive, and generating great spin - and it is very fast. You get a crisp, clear sound from the Magna TC II when striking the ball. With Magna TC II you can easily attack short balls over the table and you will feel the grip and speed when touching the ball. Recommended for highly skilled attackers with excellent technique. Sponge: 1.8, 2.0, Max. Item: RSMAC

90 93 71 ~~\$52.95~~

Magna TS II

Outstanding for offensive play of all levels with soft sponge and amazing sound when striking the ball. Magna TS II gives you excellent control of all your strokes, thanks to the unique Magna surface, while the specially developed TS II sponge gives you the speed you are searching for when attacking the ball. Sponge: 1.8, 2.0, Max. Item: RSMAS

86 95 72 ~~\$52.95~~

BOOST RUBBERS

\$46.95

Built-in Speed Glue Effect

BOOST TX SPECIAL

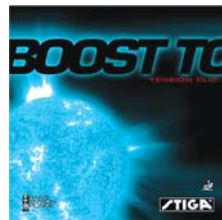

is the answer for the player who wants optimum acceleration without speed glue, because of its outstanding combination of speed and spin. TransTension Sponge generates maximum tension and provides high acceleration returns for a fast spin/speed game. The sponge hardness of Boost TX rubber is between Boost TC and Boost TP. Boost TX is recommended for attackers with good technical know-how. Sponge: 1.8, 2.0, MAX. Item: RSBOX

94 91 71 ~~\$54.95~~

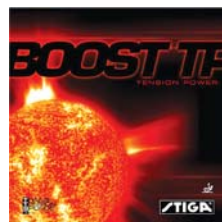

BOOST TS is outstanding for offensive players of all levels who like soft sponge. Boost TS gives a crisp clear sound when striking the ball. Although the sponge is soft, it generates very good speed. The Boost TS sponge is softer than Boost TC. The sound and feeling of Boost TS is unsurpassed! It enables offensive players of all abilities to play to full potential. Sponge: 1.8, 2.0, MAX. Item: RSBOS

89 96 73 ~~\$54.95~~

BOOST TC Thanks to the TransTension Sponge, new exciting material and a new formula, your game will be enhanced with maximum tension and power. Boost TC is for leading players who demand ultimate spin, speed plus a sensitive touch. Soft sponge for sensational touch and feel, plus crisp clear sound on striking the ball. Sponge: 1.8, 2.0, MAX. Item: RSBOC

91 94 72 ~~\$54.95~~

BOOST TP TransTension Sponge and new exciting material to generate maximum tension and power. TransTension sponge will transform your game and bring out your individual characteristics. Boost TP rubber is for the leading players who want maximum spin/speed plus a sensitive touch. Boost TP offers a soft sponge, this creates a truly sensational touch and feel for the player. Sponge: 1.8, 2.0, MAX. Item: RSBOP

92 93 72 ~~\$54.95~~

\$24.95

Chop and Drive SPECIAL

Great ball control. Its unique sponge absorbs the ball, thus increasing the contact time that the ball is on the bat. This creates a "can't miss" feeling for the player. Sponge 1.1, 1.5, 1.8. Item RSCHO

55 88 86 \$29.95

China Extreme

One of the World's foremost rubbers for maximum spin. With macromolecules and optimized pimple structure STIGA has developed one of the best tacky rubbers for competition play. Sponge 2.1. Item RSCHI

56 83 87 \$27.95

J.M.S. EVO 1

An exceptional allround rubber for players wanting to develop their game. Evo 1 guarantees ease in learning all modern offensive strokes. Evo 1 is suited for a powerful attacking style of play with a focus on control. From the J.M. Saive signature series. Sponge 2.0 Black. Item RSSE1

53 52 96 \$17.95

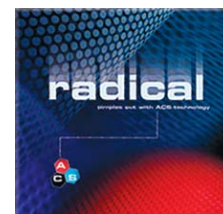

SHORT PIPS RUBBER

Royal

STIGA's fastest pips-out rubber. Built for speed! Nano Composite technology in a medium sponge. NC's mixing technique creates 50-100 nanometer sized grains, producing stronger, tighter bonds for greater dynamic effect. You get great spin with the control you need. If you want to finish the point fast, Royal will deliver with its explosive power and sting! Sponge 1.8, 2.0. Item RSR0Y

82 53 83 \$35.95

Radical

ACS Technology is now available for pips out players! Combines the shock absorption of ACS sponge for control and extra ACS power for smashes and attacks. Great for passive and active blocking, and power in counter and smashes. Extra thin sticky surface w/very elastic base. Sponge 1.8, 2.0, MAX. Item RSRAD

78 53 85 \$32.95

Clippa

Clippa is an offensive world class pips out rubber. Clippa's pips-out surface rubber is combined with a hard sponge. Ideal for fast, attacking play near to the table. Sponge 1.8, 2.0. Item RSCLI

75 51 87 \$29.95

LONG PIPS RUBBER

Destroyer

A revolutionary long pimple rubber that has been developed by the Worlds' leading players. Destroyer has exceptional unique long pimple characteristics that are soft and specially shaped to get a maximum response from individual techniques. Sponge OX, 1.0, 1.5. Item RSDSE

53 61 86 \$24.95

DONIC
TUNED TO PERFECTION

Bluefire is a completely new rubber development offering top speed. A new high-tech generation of rubbers in the proven Formula FD3-technology has been developed as a result of the perfect combination of the large pored blue sponge with an extremely spinny top surface rubber. The top rubber with its small, long pimples-in-structure lends the rubber the best possible flexibility and sensational feeling. Above all, the Bluefire is unbelievably fast with a characteristic high arc when top-spinning that enables maximum spin and increased speed.

Bluefire M1

Characteristics: highly dynamic, extremely spinny top sheet. Recommended for: top players or players who practice a lot and prefer to use harder rubbers.

Sponge 1.8, 2.0, Max Item RDBM1

98 96 66 \$60.95

Great for close to- and away from- the table for topspin/topspin duels. Great for power allrounders and attacking players. Sponge 1.8, 2.0, MAX. Item RDAC2

93 95 69 \$49.95

Acuda S3

Acuda S3 is spin-optimized, fast, paired with perfect sound. The very soft sponge increases feel and sound, and offers sufficient speed for powerful spin and a positive block game. Unique sound! Recommended for players with an allround style who require excellent control. Price \$49.95. Sponge 1.8, 2.0, MAX. Item RDAC3

90 97 70 \$49.95

Sonex JP Gold

Excellent attacking characteristics with a built-in speed-glue effect. Recommended for ambitious attackers who want a well-balanced rubber that has the effect of speed glue without re-gluing. Incorporates speed and spin plus good control. Used by Jorgen Persson who likes softer sponge than other pros, and is a quite suitable rubber for most players. Sponge 2.0, MAX. Item RDSOG

94 92 68 \$43.95

DONIC RUBBER COMPARISON CHART
page 83 & 84

TRACTION MS

**Traction MS Soft**

Softer version, intended for spin/control. Great as a backhand rubber for top players. Compared to harder Traction MS Pro, TRACTION MS SOFT is somewhat more flexible. This rubber offers outstanding control, with a pleasant elasticity, yet it is very spinny. The sponge color is yellow. Sponge 2.1. Item RDTRS

88	96	71	\$59.95
----	----	----	---------

**Traction MS Pro**

The harder alternative for top class players. Taut top rubber surface and relatively hard sponge guarantee steep penetration and length with all top spin strokes. Ideal for aggressive serves and returns due to the grippy top surface of the rubber. It also gives sufficient control for more defensive strokes. Sponge color is pink. Sponge 2.1. Item RDTRP

90	95	70	\$69.95
----	----	----	---------

VARIO SERIES

**Vario Sound**

Unique sound system! Soft sponge and very elastic top surface rubber gives a distinctive loud sound when top-spinning. This rubber is the softest of the three Japanese Vario rubbers and is very spinny, with a high ball arc and fast topspin. Great for attack that combines stiff blade with soft rubbers, or for allround game of spin+control when striking the ball. Sponge 2.0, MAX. Item RDVAO

76	86	79	\$59.95
----	----	----	---------

**Vario Big Slam**

Perfect feeling with fantastic sound!

First Vario rubber to be made in Germany, with world-famous Formula Donic technology with built-in speed glue effect. Donic developed this soft Vario rubber sheet to match modern demands of the sport. The result is a whole new playing level! Soft, 35 degree sponge gives perfect feeling - great for controlled all around play, with a tendency to an offensive game. Also ideal for spin/rotation players who prefer soft rubbers with a fantastic sound when hitting the ball. Sponge 2.0, MAX. Item RDVAB

74	86	85	\$41.95
----	----	----	---------

**Vario**

One of the best selling rubbers world-wide. Semi hard sponge, high grip, outstanding spin elasticity, high speed, good control. As its name indicates, this rubber is recommended for all modern playing strategies. Sponge 2.0, MAX. Item RDVAR

72	82	79	\$37.95
----	----	----	---------

COPPA SERIES

**Coppa X1 Turbo (Platin)**

Compared to its predecessors, the new Donic Coppa series, including Coppa X1 Turbo (Platin), produces more spin and a higher arc at maximum speed. Effective for topspin away from the table. Like all in the FD3 series, Coppa X1 Turbo will ensure accuracy in your game. Basic character: speed-focused, high precision spinny. Play style: offensive, fast counterspin, half-distance play. Sponge 2.0, MAX. Item RDCXP

97	89	70	\$49.95
----	----	----	---------

**Coppa X1 (Gold)**

Variation of the Donic Coppa X series with medium-hard sponge. Better ball control/feel with high speed and spin for precision and control. Ideal for most attacking players. Basic character: fast, high precision spinny, perfect touch. Play style: offensive with fast topspin, half-distance play. Sponge 2.0, MAX. Item RDCXG

96	90	70	\$49.95
----	----	----	---------

**Coppa X2 (Platin Soft)**

Excellent balance between attack and aggression. Speed, spin, and control come naturally whether close or away from the table. Also well suited for producing power for a strong backhand player. Soft-medium sponge. Outstanding for Power-Allround play, spin, block, and smash. Sponge 2.0, Max. Item RDCX2

95	91	70	\$49.95
----	----	----	---------

**Coppa X3 (Silver)**

Evoking best memories from speed glue times! Coppa X3 Silver's mega-loud sound and easily controlled speed is a great pleasure to use. With soft sponge, it offers perfect control for an active topspin game from all positions. Outstanding for allround style with good control plus speed. Sponge 2.0, Max. Item RDCX3

92	92	71	\$49.95
----	----	----	---------

**Coppa**

For aggressive offensive play with topspin, counter topspin and block, & winning points with hard strokes. High-elastic, spinny surface with soft, dynamic sponge = outstanding control. One of Donic's best-selling rubbers. Used by J.O. Waldner and Jörgen Persson to win the World Champs titles in men's singles. Sponge 2.1, MAX. Item RDCOP

74	75	83	\$37.95
----	----	----	---------

**Coppa Tenero**

Well liked soft-sponge version of the bestseller World Champion rubber, COPPA. Coppa Tenero has the same outstanding spin abilities. Due to its soft sponge it grants an absolute ball control with a slightly reduced speed. Excellent ball feeling. Sponge 2.1, MAX. Item RDCOT

74	88	79	\$44.95
----	----	----	---------

**Coppa Speed**

Enjoy the flight! Advanced players like a taut, grippy top surface for maximum spin on serve, return and topspin. With topspin, Coppa Speed produces a higher arc to the ball flight. Perfect for players who value a varied spin game. Also, this rubber has excellent long-lasting qualities. Taut Japanese rubber topsheet is extremely fast and spinny. Sponge 1.9, 2.1. Item RDCOS

95	88	71	\$53.95
----	----	----	---------

DESTO SERIES

These rubber sheets have **DONIC FORMULA** technology with strengthened inbuilt speed glue effect. Fast + spinny. DESTO F1 has even more speed. Improved durability.

Desto F3 Big Slam

Loud sound, without speed glue! Distinctive sound is permanently incorporated into BigSlam, which is softer but not slower than the popular DESTO F3. It has the same amazingly simple ball control, but with the same effect as optimum speed glue. For players who used speed glue and those who value sound and outstanding ball control qualities rather than maximum speed. Sponge 2.0, MAX. Item RDDFB

75 86 79 \$44.95

Desto F1

The fastest rubber from the DESTO Formula series! More speed and spin due to built-in speed glueing effect! A high-tech weapon for well-trained players of ability, who want more speed. Good sound, softness, plus speed and spin. Sponge 2.0, MAX. Item RDDF1

90 84 74 \$44.95

Desto F2

The bridge between F3 and F1, giving great control at high speed. F2 is soft, has a good feel and the full sound of speed glue. It produces more speed than traditional spin elastic rubber. Slower than F1.

Sponge 2.0, MAX. Item RDDF2

84 86 76 \$44.95

Desto F3

Built-in speed glue effect, with same speed but more control. Desto F3 is somewhat faster than a traditional spin elastic rubber. Soft, dynamic, w/excellent control, and great sound of speed glue. Speed glue must not be used. Sponge 2.0, MAX. Item RDDF3

76 87 78 \$44.95

Quattro Formula

Classic allround rubber with speed glue effect. Speed gluing makes rubber faster but the dominant effect is a softer rubber with better ball control, despite being spinnier and faster. Formula tuning in the Quattro rubber improves performance, but limits speed for control. Ideal for allround play. Sponge 2.0, MAX. Item RDQUF

61 86 84 \$45.95

Liga Plus

Combines the tried and tested Liga top sheet with a new more flexible sponge. This combination guarantees even more playing fun with relatively high grip and spin. The rubber with the perfect price-performance ratio.

Sponge 2.0 Item RDLIP

56 52 95 \$24.95

Liga

Moderately priced allround rubber, designed with a longer lasting top sheet and a somewhat more noticeable amount of grip and spin. Outstanding control. Sponge 1.8. Item RDLIG

53 50 97 \$25.95

Slice 40

Smooth rubber with a sophisticated pips-in design, with a soft rubber surface tuned for defensive strategies. Quicker than the standard version Slice rubber. It offers more chop possibilities and more trickiness when defending with the 40 mm ball. Great control, but very good offensive characteristics for top-spin and counter attacks. Sponge 1.2, 1.5. Item RDSL1

52 79 90 \$43.95

Akkadi Taichi

Very grippy top surface for maximum spin, and rotation. Used by many world top ranked Asian players on forehand. Special black sponge makes this harder and stiffer than the red version. Red Akkadi Taichi is more elastic with even better bounce of the ball. This black version is recommended for the forehand. Great for serve and the first top spin in the rally. Sponge 1.5, 1.8, 2.0. Item RDAKK

78 89 77 \$33.95

SHORT PIPS RUBBER

Baxter D-25

Short pips-out rubber with Spin-Control-System! Do you have problems controlling your opponent's serve or problems controlling your backhand? Do you have problems returning heavy topspins? The Donic Baxter rubber masters easily every kind of topspin and underspin variation. With 25% speed moderation for the safe and controlled pips-out player. Sponge 1.9. Item RDBAD

61 62 88 \$42.95

Baxter F1-A

Fast short pips-out rubber. The typical softness of the sponge gives a superb feeling for the ball. Baxter F1-A masters ball control in slow rallies, yet gives explosive power for fast strokes. This is the result of the integrated molecular tension of Formula Donic technology. Sponge 2.0. Item RDBAF

91 62 77 \$44.95

LONG PIPS RUBBER

Piranja Tec

The technical defense long pips rubber for classical defenders. Formula DONIC technology was introduced into a long pimped rubber, resulting in an exceptional long pips rubber which is soft, very elastic, with excellent gripping qualities. Enables the player to impart far more backspin against topspin than has been possible with other current rubber technology. The pimples are faster but easier to control because of their inbuilt "speed glue" effect, ensuring more accurate blocking, counter attacking and variations of spin. The best weapon for the technically gifted classic defender, particularly effective when paired with modern sponge rubber on the other side.

Sponge OX, 1.2. Item RDPIR

65 75 77 \$45.95

ANTI TOPSPIN RUBBER

Alligator Anti

This is anti-loop rubber that is very troublesome for the opponent—it has a bite! The taut anti-spin top sheet and the hard sponge ensure that the ball is returned with speed, therefore putting the opponent under pressure. It enables using effective variations and dropping the ball short with good touch. The opponent's shots can be returned short or long with this effective weapon. Attack and counter-attack are easily possible. Sponge 1.0, 1.5. Item RDALL

59 86 \$39.95

SPEED CONTROL

Anti Classic

The elastic anti-spin top surface and the soft sponge make this the classic among anti-spin rubbers. Great for defenders who play with variety as well as allround players who attack close to the table. The outstanding control is apparent in all playing situations. Made in Japan.

Sponge 1.5, 2.0. Item RDANC

42 92 \$44.95

SPEED CONTROL

Newest Rubber from XIOM

Sigma II Pro

- **IMB Generation for the modern close-to-table style**
- **Winning trajectory with extra-energized spin**
- **Hyper dynamics of the world-dominating Carbo Sponge**

Sigma II Pro from Xiom: The close-to-table strategy initiated and matured by Chinese players is changing the professional playing style all over the world. Advantages of the close-to-table strategy vary from the aggressive service return to overall tactical efficiency. Sigma II Pro is the rubber of choice for close to the table play! Internal Mechanic Boost (IMB) of Hyper Elasto technology is advanced for close to the table play. Dynamics of Sigma II Pro is designed to deliver higher energy on the spinning ball. The ball winds up quicker and aggressively lower on the opponent's court while starting out comfortably higher. Very exact and hyper-spinning ball trajectory is made by the combination of new IMB technology and the world dominating black Carbo Sponge.

Sponge 2.0, Max. Item: RXS2P
Speed 97, Spin 96, Control 67 Price \$58.95

Sigma II Europe

- **Pro-made Tour version of IMB generation**
- **Winning trajectory with extra-energized spin**
- **Hyper dynamics of the world-dominating Carbo Sponge**

Sigma II Europe delivers the real results for tour professionals. Tour professional version of Internal Mechanic Boost (IMB) makes you control the magnitude of spin energy easier and better. Developed by and made for tour professionals, Sigma II Europe also shapes the ball trajectory easier than any other rubber. High level players will realize the well-controlled short balls and the accurate ball path that increases the real winning probability. You can also charge far more energy on the spin with IMB technology. As a result, the ball winds up quicker and aggressively lower at the opponent's court, while it can start comfortably higher. Dynamics of the black Carbo Sponge also boost this energy mechanism to create the real advantages for tour professionals.

Sponge 2.0, Max. Item: RXS2U
Speed 95, Spin 98, Control 67 Price \$58.95

Vega Japan

- **True Innovation - Hyper Elasto IMB technology for Vega**
- **Super Dynamics - Engined by Black Carbo Sponge**
- **New Era, New Shape - Celebrating Vega's "Win Fit" design**

Vega Japan from Xiom: Technology drives the new world of table tennis. Internal Mechanic Boost of Hyper Elasto IMB generation opens the new opportunity for Vega users. Tuned to make more spin energy easier, Vega Japan makes the power-charged spin and allows for flexible control. Service return and topspin attacks are far more accurate and consistent to give real-life advantages in your game. Energized spin also drops the ball quicker and lower at the opponent's court. Specially constructed Carbo sponge synchronizes perfectly with the energy mechanism of Vega Japan. Ball capturing at the contact is very solid, yet also superbly comfortable.

Sponge 2.0, Max. Item: RXVGJ
Speed 90, Spin 90, Control 72 Price \$46.95

Vega China

- **Max built-in tension by German Tensor Bios technology**

Vega China from Xiom: The combination of sticky surface top sheet with extremely hard sponge has been a key weapon for China to dominate the modern table tennis world. But the uncomfortable truth is that unhealthy external chemicals like speed glue are required to balance out the proper elasticity from these hard rubbers. With world renowned Tensor Bios technology, the hard sponge on Vega China has been softened to reach the proper elasticity.

Sponge 2.0, Max. Item: RXVGC
Speed 85, Spin 94, Control 72 Price \$44.95

SIGMA I SERIES

- **Hyper Elasto IMB for real pro advantages**
- **Black Carbo Sponge with super extra dynamics**
- **New shape "Win Fit"**

Sigma series built an extra power effect of speed glue mechanically in 'Hyper Elasto' rubbers. Advances to Internal Mechanic Boost (IMB) system of 'Hyper Elasto' technology perfects the effect without illegal aids like speed glue or boosters. Black Carbo Sponge harnesses the power of 'Hyper Elasto' IMB generation. Special construction of Carbo Sponge gives an extraordinary advantage to rubber dynamics. IMB rubber with Carbo Sponge also responds more precisely to the player's intention. New "Win Fit" Shape of Sigma series declares the new era of historic IMB rubber production.

PRO

XIOM Sigma 1 Pro Rubber is available with the XIOM Stradivarius blade as part of a professional blade/rubber PRO SPECIAL. See page 6

Sigma I Pro

Pro version in the Sigma I line combines a hard sponge for maximum speed potential. Sponge 2.0, Max. Item: RXS1P
Speed 97, Spin 94, Control 68
Price \$54.95

Sigma I Europe

Europe version in the Sigma I line combines a medium hardness sponge for maximum spin potential. Sponge 2.0, Max. Item: RXS1U
Speed 95, Spin 96, Control 68
Price \$54.95

Musa

"The name Musa stands for warrior. A warrior doesn't always concentrate on attack, but controls the situation in hand and acts to win. Musa is engineered to give players the ability to attack vigorously with the ability to pinpoint where the ball should land on the opponent's side. With new "Physi Elasto" technology, players can experience excellent spin and control while maintaining high speed play. Dynamic play due to Musa will bring out the warrior inside of you. Experience the rubber that you've never experienced before."

Sponge Max. Item: RXMUS
Speed 77, Spin 78, Control 81 Price \$29.95

VEGA SERIES

Vega Pro

- Professional Spin Weapon
- Innovatively enlarged attack window over the net
- New Black Carbo sponge to generate more power

Extreme topspin performance is realized by the mixture of Hyper-Elasto and Carbo Sponge technologies. The top sheet of "Hyper Elasto" technology is natural rubber for extraordinary grip and spin. The black "Carbo Sponge" puts maximum energy into the ball. Pips are densely arranged for a harder, more direct feel. The ball draws a higher, sharply curved arc that enlarges the 'safe zone' above the net. Precise response lets you lead the game. *Sponge 2.0, Max. Item: RXVGP. Speed 88, Spin 90, Control 73 Price \$38.95*

Vega Asia

- Spin Weapon with upgraded speed
- Higher success rate with "big window" over the net
- Black Carbo sponge generates more power

Faster, more balanced version in the Vega series. New "Hyper Elasto" top layer of natural rubber provides superb spin. Unique "Carbo Sponge" provides the most energy efficiency. Pips on Vega Asia have a special structure to create more trampoline effect and feeling at impact. Softer than the Vega Pro, with more speed and balance. It also has a bigger safe zone (window) above the net, for topspin attack. Great balance between speed, spin, and control. *Sponge 2.0, Max. Item: RXVGA. Speed 90, Spin 88, Control 73 Price \$36.95*

XIOM Vega Europe Rubber is available with the XIOM Allround S blade as part of a professional blade/rubber PRO SPECIAL. See page 6

Vega Europe

PRO

- Safer Spin Attack with upgraded control
- More chances and fewer miss-shots with "big window"
- Black Carbo sponge generates more power

Softest of the Vega series, with a soft version of the "Carbo Sponge" for an exciting feel, plus same level of energy efficiency as the harder Vega Pro and Asia. The "Hyper Elasto" top layer of natural rubber has a special pip structure for great trampoline effect. Special sponge and top layer give great control, and spin performance. Large safe zone (window) above the net for accurate topspin attack. Perfect for modern European play style, with controlled topspin. *Sponge 2.0, Max. Item: RXVGU. Speed 86, Spin 92, Control 73 Price \$36.95*

Vega Elite

- Super balance for all levels of players
- Spin, speed, control, and softness
- Dynamic sound for pure pleasure of table tennis

Soft version of the "Carbo Sponge" gives soft, exciting feel, and the same level of energy as the harder Vega Pro and Asia. New "Hyper Elasto" top layer of natural rubber has a special pip structure for great trampoline effect and dwelling time. Special sponge and top layer endows Vega Elite with mighty control, as well as spin. Largest safe zone (window) above the net for accurate topspin attack. Loud metallic sound at contact helps you adjust the shot. For modern European style of play with continuous, controlled topspin on both sides. *Sponge 2.0, Max. Item: RXVGE. Speed 84, Spin 84, Control 76 Price \$36.95*

OMEGA SERIES

Omega IV Pro

- Extra playing properties by new carbo sponge and top layer

- Additional clicking feel for sharper control

- Extra spins with new chemical composition

Historic evolution towards full "speed-glue" aggression. Based on 'Hyper Elasto' technology, the new top sheet matched with an upgraded Carbo Sponge offers extraordinary playing properties. Feel at ball contact fully assimilates the clicking sensation generated by speed glues. New chemical composition plus built-in tension makes the ball trajectory higher for more spin. You can return the ball fiercely after the bounce, as if launched from speed-glued rubber. *Sponge 2.0, Max. Item: RX04P. Speed 92, Spin 92, Control 71 Price \$49.95*

Omega IV Asia

- For dynamic power-spin attackers.
- Powered by extra-hard new Carbo sponge
- Extra spin by new constructions and built-in tension.

Extreme power with extra spins in deadly aggression. Grippy top sheet with hard Carbo Sponge and fully built-in speed-glue effect creates amazing power-spin performance. Players with higher swing speed will benefit most from this rubber. Omega IV Asia returns the ball aggressively and low with extra spin. Extra precision and superb consistency from solid construction also benefits high-speed players. *Sponge 2.0, Max. Item: RX04A. Speed 94, Spin 90, Control 71 Price \$49.95*

Omega IV Europe

- For technical style keen on balanced aggression
- Deeper and longer ball dragging at the surface
- Extra power spins from high-density carbo sponge
- Newly integrated dynamics for reliable control

Newly integrated dynamics and perfect hardness for reliable control. Hyper Elasto technology rubber upgraded by new chemical composition and new Carbo Sponge. Solid ball-capturing at the surface and perfectly matching sponge hardness promote extra spins and control at ball contact. Higher ball arc makes bigger window over the net. Aggressive launch from speed-glued rubber. Clicking sensation at ball contact also reflects the maximized built-in tension simulating full speed-glue effect. *Sponge 2.0, Max. Item: RX04U. Speed 90, Spin 94, Control 71 Price \$49.95*

Omega IV Elite

- Designed for modern allround pros
- Longer ball dragging at contact with softer feel
- Very precise and consistent control
- Higher ball trajectory with extra spin performance

Balanced towards full "speed-glue" feel. New top sheet matched with upgraded soft Carbo Sponge offers amazing spin and extra feel. At ball contact you get soft and solid clicking sensation generated by speed glues. Bigger window over the net with high spinning trajectory. Deeper and longer ball dragging at the rubber surface promotes extra control at impact. Extra spin capability, precision, and consistency benefit modern allround professionals. *Sponge 2.0, Max. Item: RX04E. Speed 86, Spin 96, Control 71 Price \$49.95*

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

NEW NANO SPIN RUBBERS

\$48.95

NANO Spin II+S SPECIAL

NanoSpin II+S utilizes the same Nano Spin II topsheet as the original in combination with a softer sponge to create even greater spin on the ball. Featured characteristics of this rubber are the ball grip, control, and width of sweet spot. With Nano Spin II +S, you get an amazing feel as if the rubber is an extension of the hand. Sharp topspins and surprising services are a breeze. NanoSpin II +S is a great weapon for the player seeking the best ball feeling! Sponge 1.8, 2.0, MAX. Item RJNSS

95 93 69 ~~\$58.95~~

\$48.95

NANO Spin +Flex SPECIAL

The grippy topsheet and soft-flexible tension sponge of the Nano Spin + Flex rubber combine to give the idealistic arc to the topspin ball. Based on the original Juic Nano Spin rubber, the new +Flex version utilizes greater flexibility between sponge and topsheet to boost speed and spin performance. Its light weight allows for higher swing speeds and greater ball rotation to be created. This rubber is recommended for the player with allround-aggressive play. Sponge 1.8, 2.0, MAX. Item RJNSS

89 90 72 ~~\$58.95~~

\$48.95

NANO Spin II SPECIAL

The newest rubber from Juic, Nano Spin II gives you more power and sound. Excellent spin and enhanced speed brings a new dimension to the spin attack game. Sponge 1.8, 2.0, MAX. Item RJNS2

93 91 71 ~~\$58.95~~

\$46.95

NANO Spin SPECIAL

Special JUIC Technology offers speedy play with tacky rubbers that tend to be most effective when serving or chopping, but Nano Spin enables outstanding all-round and offensive play close to and far from the table. Spin, speed and control: If you need the best of them all, Nano Spin is the rubber you are looking for! Sponge 1.8, 2.0, MAX. Item RJNAS

90 90 72 ~~\$54.95~~

"I really love the new rubber Nano Spin II. In my opinion the best Juic rubber so far. Good spin, good control and a great sound that makes a very good feeling. Congratulations. Good job."
Stellan Bengtsson, former Men's Singles World Champion.

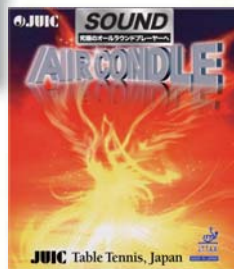

AIR CONDLE: SPIN+CONTROL+POWER+DURABILITY!

Air Condle Speed

The highest offensive performance rubber of the Air Condle Series. The topsheet provides outstanding grip with speed, and the offensive tension sponge transfers the player's power completely to the ball, while allowing the player to be in control of the opponent and of the game itself. Sponge 2.0, MAX. Item RJ AIS

96 88 71 ~~\$54.95~~

Air Condle Sound

The most versatile rubber of the Air Condle Series. The special sponge gives a loud crack sound as it creates heavy spin and ball acceleration. With its precision and softness, it gives outstanding feeling and control. It's the ideal rubber for players with an allround game. With Air Condle Sound the sound you hear is the sound of victory! Sponge 2.0, MAX. Item RJ AIS

91 96 70 ~~\$54.95~~

Air Condle

The perfect balance of spin, control, power, and durability. Maximum tension in both the topsheet and sponge makes this an excellent choice for the offensive power and finesse player.

Sponge 2.0, MAX. Item RJ AIS

96 90 70 ~~\$54.95~~

SPINSPIEL RUBBERS

SpinSpiel

A very popular world-wide. Sticky adhesive on the smooth inverted topsheet gives explosive spin, power drives, and stable control. Very tacky and spinny. For power players who need lots of spin, w/ medium-fast speed. Sponge 1.0, 1.5, 2.0, MAX. Item RJSSP

69 86 81 \$35.95

SpinSpiel SV

Great for even more tacky spin. Softer sponge results in slower speed, more contro. Sponge 2.0, MAX. Item RJSSS

64 89 82 \$35.95

DRIVA SMASH RUBBERS

\$25.95

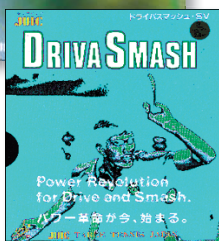

Driva Smash Ultima SV SPECIAL

The ultimate for regluing! This new SV Soft Version has the great "Super High Tension Ultima" characteristics but with even softer Ultima sponge. Sponge thickness 2.0, MAX. Item RJDRUS

78 82 79 \$35.95

Driva Smash Ultima

Ultima high tension sponge is combined with fantastic Driva Smash topsheet. Results are WOW! Very powerful, and highly recommended for the advanced offensive player. Sponge thickness MAX. Item RJDRUL. Reg: 35.95.

82 80 79 \$35.95

Driva Smash

Cadillac of rubber sheets. Outstanding for offensive play, fast with excellent spin. Made for topspin play and good for smashing and counterdriving. Sponge 2.0. Item RJDRJ

84 73 80 \$35.95

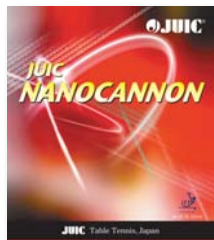

Spark

Super control with medium-fast speed and spin. Spark is great for the player who wants to wear down the opponent with consistency and accuracy of ball placement. You can hit the ball hard and still retain control. Sponge: 2.0. Item RJSPA

60 59 94 \$21.95

Couga

This rubber from JUIC is truly ahead of its time! Applying Nano technology to the manufacturing process creates a rubber with the feel and speed of speed glueing. This innovation is critically important with the new ITTF rules for the elimination of harmful matter from all adhesives. Sponge 1.8, 2.0, MAX. Available in black only. Item: RJCOU

97 85 71 \$49.95

Nano Cannon

With the newest Japanese nano-technology, and with the process of fusion-pulverization-reunion of nano level, Nano Cannon is produced. With nano-unification, the sponge and topsheet are far more flexible than regular rubbers, providing greater rotation and stability, while the ball hit by this rubber draws a sharp arch in the air with superb speed. Sponge 1.0, 1.5, 2.0, MAX. Item RJNAN

92 89 72 \$42.95

SCRAMBLE + SCRAMBLE 21 RUBBERS

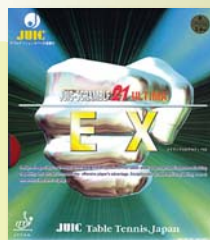

Scramble

An all-time best seller! Inverted rubber made for aggressive offensive players. Great speed + spin + consistency. Similar to Mark V. Sponge 1.0, 1.5, 2.0, MAX. Item RJSCRA

77 75 82 \$34.95

Scramble 21

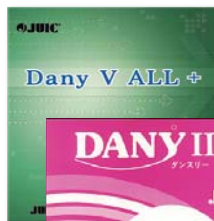

For the 40mm ball. Inherent tension in rubber sheet improves attack and increases the offensive advantage. Durable & long lasting, even at the world-class level of play. Sponge 2.0, MAX. Item RJSC2W

86 68 82 \$35.95

Available with JUIC Light Offense blade as part of a professional blade/rubber PRO SPECIAL. See page 6

Scramble 21 EX Ultima PRO

Tension added to the sponge itself! Explosive rotation and speed. Thinner, stronger cell walls enable the sponge to be 10% lighter, for more flexible play, softness, and greater power. Sponge 2.0, MAX. Item RJSCXU

89 71 79 \$35.95

Dany V

For the powerful allround player. Good spin and speed, but with more control than many other offensive rubbers. Dany V combines a topsheet balancing spin and control with a intermediate tension sponge, making it an excellent rubber for the player who uses a variety of techniques. Sponge 2.0. Item RJDAV

68 67 88 \$27.95

Dany III

Inverted rubber, excellent for the intermediate and developing player. Med. speed/spin, excellent control. Sponge 1.5, 2.0. Item RJDAN

54 55 98 \$20.95

SHORT PIPS RUBBER

889 NEO

Pips Out. Updated version of the popular pips out 889 rubber. New topsheet and sponge. For the attacking and counterdriving game. Sponge 1.0, 1.5, 2.0, MAX. Item RJ8NE

91 58 79 \$33.95

Pips Ace

An allround pips out rubber. The 03 is excellent for all-around players and choppers. OX [No sponge], 1.0, 1.5, 2.0, MAX. Item: RJPIP

75 45 87 \$31.95

LONG PIPS RUBBER

Leggy Defense

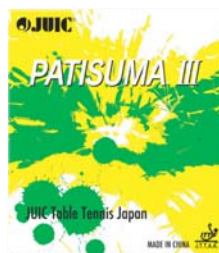

LONG PIPS

Long pips rubber that complies with the new ITTF long pips rule. Pips have maximum legal pip length ratio. Deception and spin-reversal is great. Sponge is soft, giving you added control. Sponge OX, 1.0, 1.5, 2.0. Item RJLEG

54 61 86 \$30.95

PATISUMA

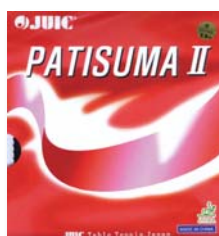

BEST PIPS-OUT RUBBER FOR SPIN AND BLOCK!!

Patisuma III

The latest evolution of the Patisuma series! The Patisuma series is regarded as the best pips-out rubbers for spin and block. Now JUIC has added increased speed with Patisuma III. A soft but fast sponge with built-in tension produces the power longed for by pips-out players. Sponge: 2.0 Item: RJPA3

95 75 73 \$39.95

Patisuma II

Patisuma II is offered as a faster, quicker version with a harder sponge than Patisuma (but still relatively soft). High-friction material and perfect allocation of pips give superb spin. This is the rubber of choice for offensive-minded spin-minded pips players who want exceptional quickness, with outstanding <knuckle> ball when blocking, and powerful topspin ball and sharp smash. Sponge 2.0, MAX. Item RJPA2

91 74 73 \$35.95

SONG

ISEKI

ANTI TOPSPIN RUBBER

Anti Super Spin

is a smooth rubber that neutralizes your opponent's spin, producing a "dead" ball. Very effective for fast or spinny shots. Faster in speed than other anti-rubber. Sponge 1.0, 1.5, 2.0. Item: RJANT

70 82 \$31.95

SPEED CONTROL

Neo Anti

Designed to kill the spin of your opponent's ball, and with its dead, slow speed gives incredible control. Elastic surface with special sponge gives added tricky spin when ball is hit hard. Sponge 1.0, 1.5, 2.0. Item RJNEO

57 87 \$36.95

Fastarc C-1 SPECIAL

The Nittaku Fastarc C-1 rubber is "Fast" with an "Arc"! It is the ingenious creation from Nittaku combining a "tension spin" topsheet with a "soft strong sponge". It takes the best attributes from earlier Fastarc rubbers: G-1 and S-1 and utilizes them to make the new Fastarc C-1. This combination creates incredible grip and speed to allow players to create artistic shots. Sponge thickness 1.8, 2.0. Item RNFC1

97 97 67 \$54.95

KAZUHIRO CHAN:

blade: NITTAKU Barwell Fleet
rubber: NITTAKU Renanos Hold / Hammond Pro Beta

Available with NITTAKU Flame Carbon blade as part of a professional blade/rubber PRO SPECIAL. See page 7

Fastarc S-1 PRO

This is the "Speed First" version of Fastarc. It features a Tension Speed top sheet and Soft Strong Sponge. This rubber is high spec quality, but it is also suitable for a broad range of high level players. It is great for high speed balls, ideal arc, powerful topspin, and excellent touch for all strokes of your game. Sponge thickness 1.4, 1.8, 2.0. Item RNFS1

97 96 70 \$44.95

Fastarc G-1

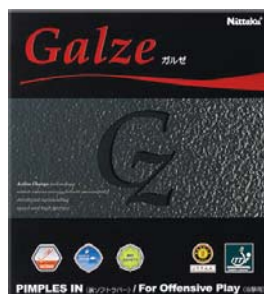

This is the "Grip First" version of Fastarc. It features a Tension Spin top sheet and Strong Sponge, Ideal new technology rubber for players who desire high speed balls, ideal arc, powerful topspin, and touch for all strokes of your game. Sponge thickness 1.9, 2.1. Item RNFG1

96 97 67 \$54.95

Made in Germany

Fastarc is "Fast" with an "Arc". This is the new technology rubber for players who desire high speed balls, ideal arc, and powerful topspin, and touch for all strokes of your game.

Galze

AC (Active Charge) Technology is incorporated in this rubber made from high-quality natural rubber. This is the basis for the outstanding grip performance and speed performance while maintaining delicate ball touch. Sponge 1.8, 2.0 Item RNLZ

98 94 70 \$59.95

Prices listed are for one rubber. One rubber covers one side of a blade. Rubbers are available in both red and black unless otherwise noted.

FLYATT HARD and FLYATT SOFT

Available with NITTAKU Flyatt Carbon blade as part of a professional blade/rubber PRO SPECIAL. See page 7

Flyatt Hard **PRO**

Harder sponge version of Flyatt. Produced from high grade natural rubber with the help of advanced high polymer Active Charge Technology. You will enjoy outstanding spin and speed with ideal ball trajectory. Harder sponge for excellent power play. Sponge 1.8, 2.0 Item RNFLH

97 93 68 \$49.95

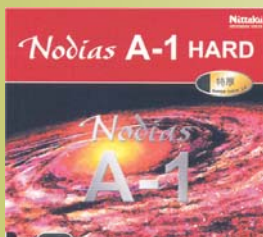

Flyatt Soft

Softer sponge version of Flyatt. Produced from high grade natural rubber with the help of advanced high polymer Active Charge Technology. You will enjoy outstanding spin and speed with ideal ball trajectory. Softer sponge for excellent feel and balance. Sponge 1.8, 2.0 Item RNFLS

95 96 69 \$49.95

NODIAS and MORISTO

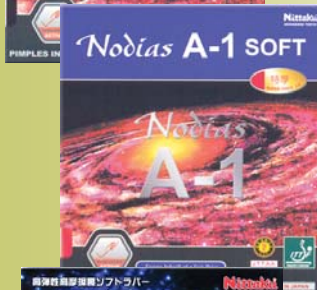

Nodias A-1 Hard and Nodias A-1 Soft

Nodias A-1 Hard

Nittaku's updated version of Nodias, Nodias A-1, uses high grade natural rubber and Japanese technology to create the ideal top sheet. Inbuilt energy with Nittaku's Active Charge technology insures outstanding speed and high friction. The Hard version of Nodias A-1 is optimized for power and speed. Sponge: 2.0. Item RNNOH

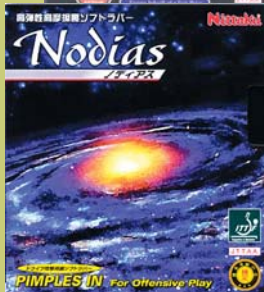

88 89 73 \$44.95

Nodias A-1 Soft

Nittaku's updated version of Nodias, Nodias A-1, uses high grade natural rubber and Japanese technology to create the ideal top sheet. Inbuilt energy with Nittaku's Active Charge technology insures outstanding speed and high friction. The Soft version of Nodias A-1 is optimized for spin and control. Sponge 2.0. Item RNNOS

86 91 73 \$44.95

Nodias

Powerful topspin and Pin-Point Control! Careful mix of natural rubbers in the topsheet, results in superior "bite" (or "grab") feeling. Even in counter attack, the rubber grabs the ball firmly with control. Combined with highly elastic sponge, you get powerful topspin, slow shots, and pin-point control in a variety of shots. Sponge 2.0, 2.2. Item RNNOD

80 81 79 \$38.95

Moristo 2000 NX

The Tension of Speed Glue!

Top-sheet and sponge has the latest special technology, keep the tension inside as if speed glue were applied. Super elastic top-sheet and sponge puts the ball deep into the rubber on attack, then springs with outstanding spin and speed, + control. Sponge 2.2. Item RNMNX

89 91 72 \$49.95

Moristo RS

Tension with control and performance!

Great built-in tension factor with Moristo RS Rubbers. Powerful offense with the best feeling of invincibility. You will forget that speed glue ever existed! Available with hard version and soft version sponge.

Moristo RS Soft

Sponge thickness 2.0, 2.2. Item RNMRS

87 89 74 \$46.95

Moristo RS Hard

Sponge thickness 2.0, 2.2. Item RNMRH

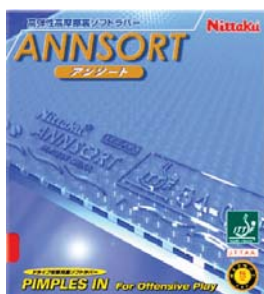

88 86 74 \$46.95

Moristo DF

AMAZING FEELING! For defensive and allround play. Super elastic topsheet and sponge. Ball goes deep into sponge for a great spring effect, but with slower speed it also provides a "hang effect" with excellent control. Sponge 1.3, 1.5, 1.9. Item RNMDD

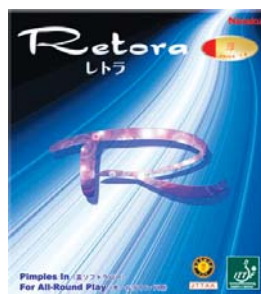

69 93 79 \$37.95

Annsort

Unique combination of a China-made topsheet and Japanese sponge provides the player excellent spin and control. Ideal for the at-the-table technique player who uses quick drives. Sponge 1.9, 2.1. Item RNANN

80 72 82 \$35.95

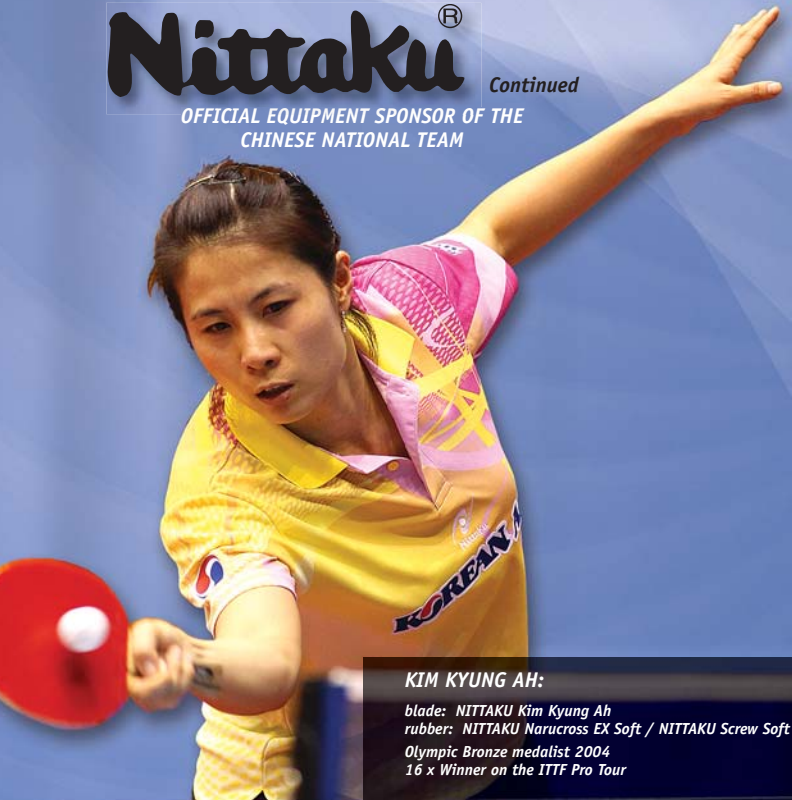

Retora

This easy to handle rubber is especially recommended for the player who emphasizes control in their game. Quality rubber, and quality performance. Sponge 1.8, 2.0 Item RNRTR

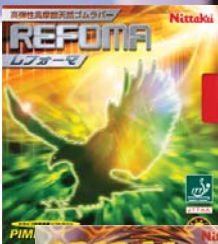

69 74 86 \$26.95

Olympic Bronze medalist 2004
16 x Winner on the ITTF Pro Tour

Refoma

Maximizes the characteristics of Natural Rubber! Special time-intensive rubber production process maximizes the unique great feeling and high elasticity of natural rubber. You maintain control while producing fatal power shots - topspin, blocking and short chopping. Sponge 1.9, 2.1. Item RNREF

90 95 76 \$43.95

Spiral

All-Around + Defense! Outstanding spin, with the control you need for a devious and consistent all-around or defensive game. Used by Jie Schopp of Germany. Sponge 1.0, 1.3, 1.6. Item RNSPI

68 76 85 \$38.95

NARUCROSS

Narucross EX Hard

Narucross "cross system" PLUS the Narucross "tension" in its maximum form! Maximum tension = maximum power and performance without speed glue. EX Hard version is speedier than EX Soft with good spin. Sponge thickness 1.9, 2.1. Item RNNXH

88 92 72 \$52.95

Narucross EX Soft

Narucross "cross system" with "tension" to the MAX = maximum power and performance without speed glue. Soft version is very spinny with more control. Available in sponge thickness 1.9 and 2.1. Item RNNXS

86 94 72 \$52.95

HAMMOND

Hammond Pro Alpha
Choice of Champions!

This is the magic rubber you have been waiting for!!! Extremely fast and spinny, with amazing feel. You get more power than other rubber on the market and it has fantastic control. Ver soft power sponge combined with top rubber of maximum elasticity. Sponge 1.9, 2.1. Item RNHAP

87 80 77 \$37.95

Hammond X

If you prefer spinny rubbers, you will love HAMMOND X. Based on HAMMOND, with "integrated Energy (ID), but with "nano-composite," where the chemical component, ground up to nano level, is compounded to enhance the characteristics of each component. Hammond X sponge is 70% synthetic to maximize the spring effect. Sponge 1.9, 2.1. Item RNHAX

89 72 79 \$42.95

Hammond

Extremely soft but fast rubber sheet with a maximum spin. Very fast but with outstanding control. Made in Japan with the finest production methods. Hammond is well-liked by top players for fast play: smash, attack and topspin. With the right sponge this is the ideal rubber sheet for all offensive and allround players. Sponge 1.9, 2.1. Item RNHAM

78 78 81 \$37.95

Hammond Pro Beta

New Horizons in Speed Performance!

This Beta version of Hammond Pro has the latest IE (Integrated Energy) technology, enabling new horizons in speed performance. Also outstanding for hitting topspin from any distance from the table. Hammond Pro Beta is the must-have rubber for the most enthusiastic table tennis players. Sponge 1.9, 2.1. Item RNHAB

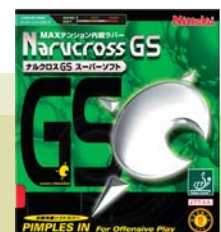

93 86 72 \$48.95

Narucross GS Hard

Narucross GS Soft

Narucross GS Super Soft

Narucross GS

Spinniest of all the Narucross series rubbers. Designed with "Max Tension Technology" for maximum tension in the topsheet and sponge. Superb balance of spin and speed makes this the choice of top players. Recommended for powerful and offensive game.

NARUCROSS GS is available in three sponge choices: HARD, SOFT, and SUPER SOFT.

HARD sponge is faster and favored by the quick, powerful, driving players.

SOFT sponge has the most equal balance of speed and spin, and is favored by powerful driving and spin players.

SUPER SOFT sponge has good spin with outstanding touch and control.

Hard sponge is cream colored. Soft and Super Soft sponge are yellow in color.

Available in Sponge thickness 1.9 & 2.1.

RUBBER RATINGS KEY

SPEED SPIN CONTROL PRICE

DR. NEUBAUER RUBBER COMPARISON CHART
page 83 & 84

ANTI TOPSPIN RUBBER

**New Gorilla**

Gorilla with a slow dampening sponge = better control, while producing very good spin reversal in blocking spinny topspin balls. The 1.2mm sponge is the slowest and most effective for short blocking close to the table, while the 1.5 and 1.8mm give a decisive disruptive effect while blocking but with better attack through aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8 (PINK color). Item RUGON

SPEED **42** CONTROL **92** \$57.95**Gorilla**

Dr Neubauer Gorilla rubber is the new benchmark for blocking close to the table.

- Outstanding playing characteristics for blocking and chopping.
 - Excellent disruptive effect with good control.
 - Enables a versatile game using aggressive pushing and lifting.
- Dr. Neubauer GORILLA is the answer to the ban on frictionless long pips and a perfect choice for players who used Dr Neubauer 'Super Block', 'Inferno' or 'Scalpel' rubbers. This revolutionary anti-topspin rubber enables highly effective blocking, even against strong topspin shots and offers a disruptive effect because the ball can be returned short or long over the net, with the ball staying low after the bounce, making it extremely hard for an opponent to keep looping the ball.

Good control of the rubber makes for easy return of serve, either passively or aggressively. GORILLA is perfect for a versatile game of aggressive pushing and lifting, whether against chopped or counter-attacked balls.

The best disruptive effect is created when using it with 0.6mm sponge. Choose GORILLA and be surprised and fascinated by the good control and highly disruptive effect! Sponge 0.6, 1.0, 1.3 (CREAM color) Item RUGOR

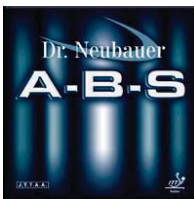

SPEED **49** CONTROL **90** \$54.95**Grizzly ABS Sponge**

Slower than the original version, topsheet produces good spin reversal on topspin balls with a lot of rotation. The ball bounces very low on the other side of the table. A.B.S. has a dampening effect to reduce rubber speed but with remarkable control. Sponge 1.2, 1.5, 1.8 (PEACH color). Item RUGRN

● **Please note:** Packaging for original and new versions of Grizzly are the same. The sponges are different colors – original sponge is white, new A.B.S. sponge is peach.

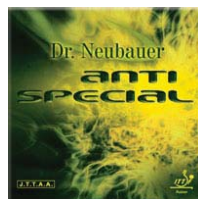

SPEED **44** CONTROL **91** \$53.95**Grizzly**

Innovative anti-spin rubber, adapted to an allround game. Offers good control and great disruptive effect and is also effective for classical defence by providing very good control and backspin variation. Even strong topspin shots can be returned with a flat flight path and a maximum of backspin. It is also effective for control and placing of service returns. Sponge: 1.0, 1.6, 2.0 (WHITE color). Item RUGRI.

SPEED **53** CONTROL **88** \$53.95**A.B.S.**

Control + good spin reversal! For close to the table blocking. Distinctly slower than Gorilla and Grizzly and offers much better control. Very good spin reversal and attacking possibilities through aggressive pushing and lifting, especially against chop

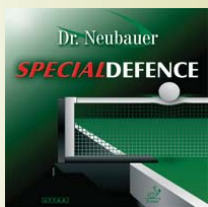

shots. Sponge 1.2, 1.5, 1.8 Item RUABS

SPEED **36** CONTROL **95** \$53.95**Anti Special**

Slower than Dr Neubauer's Gorilla and Grizzly, but with better control. Great for spin reversal for an effective blocking game close to the table. Provides good attack through aggressive pushing and lifting. Sponge 1.2, 1.5, 1.8. Item RUANT

SPEED **40** CONTROL **93** \$53.95

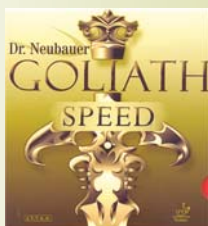

SMOOTH RUBBER

**Special Defence**

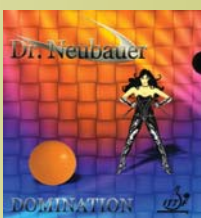

High friction surface without being sticky. Effective in combination with pips or anti-spin rubber. Sponge 1.0, 1.2, 1.5. Item RUSPE

SPEED **79** CONTROL **92** SPIN **86** \$46.95**Domination Speed**

Inverted smooth rubber with "speed glue" tension in sponge & top sheet. Sponge 1.5, 1.8, 2.1. Item RUDOS

SPEED **92** CONTROL **80** SPIN **76** \$46.95**Goliath Speed**

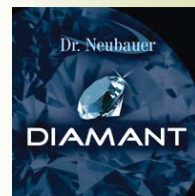

Speed glue effect without speed glue, for an extremely dynamic attacking game. Harder sponge allows more speed for attacks. Sponge 1.5, 1.8, 2.1. Item RUGOL

SPEED **93** CONTROL **77** SPIN **76** \$46.95**Domination**

"Speed glue" tension in sponge and the top sheet. Elasticity and tension create acceleration. Sponge 1.2, 1.5, 1.8, 2.1. Item: RUDOM

SPEED **84** CONTROL **71** SPIN **83** \$46.95**Terminator**

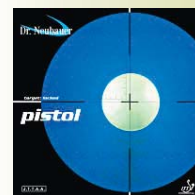

Different from all other short pips rubbers on the market. Available exclusively with fabric reinforcement (no sponge) underneath to produce a disruptive float ball while blocking passively. The ball bounces very low and drops when performing aggressive blocking. Enables very dynamic, efficient play against chopped balls. Also produces fast "dummy loop". Great for allround type of game with disruptive effect. Sponge OX. Item RUTRM

SPEED **58** CONTROL **64** SPIN **90** \$49.95**Diamant [Half-Long Pips]**

A multi-purpose weapon for serve return, block, attack and defense. Also great against chops: any backspin can be smashed for winner points. Sponge 1.2, 1.5, 1.8, 2.1 Item RUDIA

SPEED **70** CONTROL **59** SPIN **86** \$44.95**Leopard [Short Pips]**

This rubber will be a real challenge for your opponents. Blocking with topspin or smash produces disturbing returns with the ball dropping and wobbling. A supreme weapon for block, counter-attack, and provides very good control for all blocking and attacking strokes. Sponge 1.0, 1.5, 2.0. Item RULEO

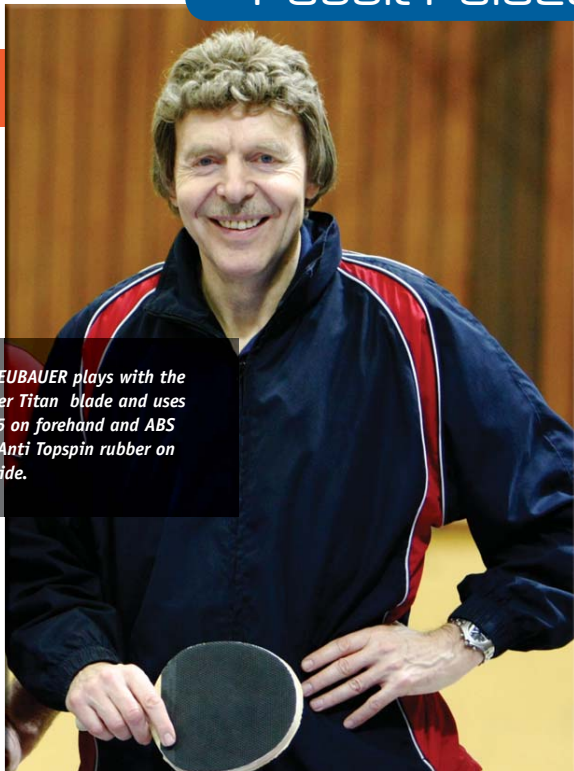

SPEED **61** CONTROL **61** SPIN **88** \$42.95**Pistol [Short Pips]**

Fast, powerful, dynamic for fast attack - especially straight hitting and fast looping. Enormous speed with a disturbing "flat" effect. Sponge 1.0, 1.6, 2.0. Item RUPIS

SPEED **95** CONTROL **68** SPIN **73** \$44.95**Tornado Ultra [Short Pips]**

Big spin/speed and tactically dynamic for blocking and counter-attack. Creates wobbling balls. Sponge 1.5, 2.0. Item RUTOR

SPEED **94** CONTROL **55** SPIN **78** \$42.95

HERBERT NEUBAUER plays with the Dr. Neubauer Titan blade and uses Leopard 1.5 on forehand and ABS 1.2 or 1.5 Anti Topspin rubber on backhand side.

LONG PIPS RUBBER

NEW

Dr. Neubauer
DESPERADO

Desperado
New long pips rubber from another dimension! Both versions without sponge (OX) and with sponge (0.6, 1.0mm) are very effective for chop-blocking close to the table. The ball can be blocked passively or aggressively against topspin with push-blocking technique where the ball is being "pushed down" while holding the bat at a closed angle. The OX version is most effective for close-to-the-table block. The 0.6mm and 1.0mm sponge are better for attacks and floating balls while playing actively.
Sponge OX, 0.6, 1.0 Item RUDES

56 38 95 \$49.95

Dr. Neubauer
INFERNO Classic
OX

Inferno Classic
New long pips rubber with friction, offering a great disruptive effect for surprising attack. Enables dangerous returns both through passive and active blocking ("chop-blocking") since the ball bounces very low on the other side of the table. Good control and surprising attacking possibilities through aggressive pushing and lifting, and also through classical defense since the rubber produces a lot of backspin.
Sponge OX, 0.6, 1.0 Item RUINC

56 40 93 \$51.95

HALLMARK
Friction Special 2

Friction Special 2 [Long Pips]

This long pimple rubber has full friction but still gives a good level of disruption to the flight of the ball and is slower than other long pips rubbers. Ideal for defensive players and for combination bat players who block with their backhand.
Sponge 1.8, 2.0, Max Item RHRF2

45 59 89 \$54.95

HALLMARK
PHOENIX

Phoenix [Long Pips]

Designed for close-to-table play against topspin. Special rubber formulation and geometry + Hallmark super anti sponge = high level of control. Returns are low over the net with some spin reversal obtained. Spin serves can be returned with ease and push and float balls can be attacked aggressively without problem with some spin generated from the rubber. Sponge: OX, 1.0, 2.0. Item: RHPHO

53 69 83 \$46.95

HALLMARK
POWER SPIN

\$33⁹⁵

Power Spin [Smooth] SPECIAL

This smooth inverted rubber produces very high levels of spin. The 2.0mm version is faster and better for top spin, 1.0 gives good control when chopping away from the table but still produces high level of back spin!!!!
Sponge 1.0, 1.5, 2.0. Item: RHPOW

87 74 79 \$42.95

HALLMARK
PANTHER

Panther [Medium Pips]

Medium pips rubber. Get the tricky advantage of long pips and the offensive potential of short pips rolled into one rubber. Relatively wide pips. Slightly improved control and slightly reduced effect when compared to Half Long. Sponge OX, 1.0, 1.5, 2.0. Item: RHPAN

61 55 90 \$36.95

HALLMARK
MAGIC PIPS

Magic Pips [Short Pips]

The 2.0mm version produces great top spin + excellent control for close to the table hitting and blocking. The 1.0mm produces less rotation but great blocking against topspin. Sponge OX, 1.0, 1.5, 2.0. Item: RHMAG

78 61 82 \$36.95

HALLMARK
Frustration

Frustration [Long Pips]

A long pips rubber with a slightly sticky surface, it actually produces some rotations of the ball. Sponge OX, 1.0, 1.5, 2.0. Item: RHFRU

54 71 82 \$54.95

MA LIN

blade: YASAKA Ma Lin Carbon
rubber: YASAKA Rakza7

Olympic Gold Medalist - Singles, Doubles and Team

RUBBER RATINGS KEY

SPEED SPIN CONTROL PRICE

YASAKA RUBBER COMPARISON CHART
page 82 & 84

RAKZA 9

Improved speed characteristics! The surface rubber of Rakza 9 has a newly developed formula/rubber combination on surface rubber, and a new sponge made of a more homogenous material with larger pores. Rakza 9 is the fastest of Yasaka's Hybrid Energy rubbers and is suitable for technical offensive players, using both high speed and spin to win the point. Sponge: 1.8, 2.0, Max Item RYRA9

95 93 71 \$56.95

RAKZA 7

Natural rubber gum in the top sheet dramatically improves grip and spin. Top sheet is combined with the new Power Sponge to produce Yasaka's newest Hybrid Energy rubber. When you hit the ball hard, the rubber grips the ball so you can place the ball accurately, both in direction and length. Serve and short returns are sharp and easy to control. Natural gum also improves durability. A winning combination! Sponge: 1.8, 2.0, MAX Item: RYRAK

93 94 70 \$52.95

RAKZA 7 SOFT

Yasaka Rakza 7 Soft uses the same top sheet as Rakza 7, but with softer sponge, giving the rubber more sound and built-in speed glue effect plus increased control. After hitting a topspin shot, the curve of the ball is slightly higher, giving little bit bigger margins in the game. In the short return play, the ball feel is better. Sponge: 1.8, 2.0, MAX Item: RYRAS

88 96 71 \$52.95

Mark V is available with YASAKA Balsa Plus blade as part of a professional blade/rubber PRO SPECIAL combination. See page 6

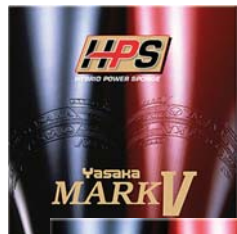

Mark V: PRO

Used by 2008 Olympic Gold Medalist Ma Lin

A Best Selling Rubber from Yasaka! Many championships have been won with Mark V, which represents the absolute highest quality of rubber production. For the aggressive player who masters the modern, fast technique close to the table, Mark V gives unique possibilities. Sponge: 1.0, 1.5, 1.8, 2.0, MAX. Item: RYMKV

79 79 80 \$37.95

Mark V HPS & Mark V HPS Soft

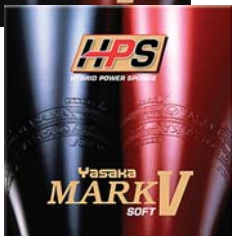

Outstanding top-of-the-range fast rubber has all the characteristics required for advanced offensive play. The HPS (Hybrid Power Sponge) technology is the result of the newest advances in Japanese rubber technology. It provides improved dynamics in the sponge, and more speed and spin, without higher weight.

MARK V HPS has a medium-hard sponge, suitable for aggressive play close to the table. Sponge: 2.0, MAX. Item RYMKH

83 83 77 \$47.95

Mark V HPS SOFT has a slightly softer sponge than the regular Mark V HPS, suitable for offensive allround players. Sponge: 2.0, MAX. Item RYMK3

81 89 76 \$47.95

Mark V XS

Newest rubber sheet from Yasaka: Mark V XS. This highest quality rubber is ideal for the aggressive player who masters the modern, fast technique close to the table. Sponge: 2.0, MAX. Item: RYMKX

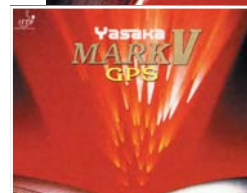

81 79 79 \$45.95

Mark V M2

Made for Maximum Speed. Based on the incomparable technical features of Mark V, but with slightly harder sponge. Gives the ball sharp spin and ultimate speed. Sponge: 2.0, MAX. Item: RYMKM

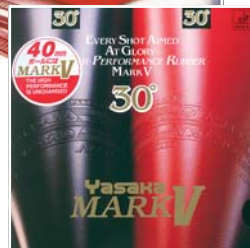

92 74 77 \$39.95

Mark V GPS

Same quality surface rubber as Mark V with softer sponge, giving more "feeling" and "control". Sponge: 2.0, MAX. Item: RYMKG

69 84 82 \$37.95

Mark V 30

Double glue absorption, improved spring capacity due to maintaining the sponge hardness levels at 30 degrees. Sponge: 2.0, MAX. Item: RYMK3

68 82 83 \$37.95

Fusion

Three different synthetic rubbers are mixed with natural rubber, each with unique characteristics for speed, spin and durability—"Energy Fusion Rubber". Fusion contains synthetic rubber for speed glue effect - very elastic feeling and strong sound! Sponge: 2.0, MAX. Item: RYFUS

83 82 78 \$38.95

V-Stage

For players looking for powerful spin and speed. V-Stage is produced by simultaneously vulcanizing high-friction coefficient rubber to improve spring and high elasticity. Sponge: 2.0, MAX. Item: RYVST

89 85 74 \$52.95

Pryde 30

Maximum sound and spin! Pryde 30 is a new, softer sponge version of Yasaka Pryde. Combines the built in speed glue effect of Yasaka's Power Tension technology with an elastic sponge for maximum sound and spin, with great built-in speed-glue effect, plus more control for greater variation in offensive play. Sponge: 2.0, Max Item: RYPR3

84 89 75 \$49.95

Pryde 40

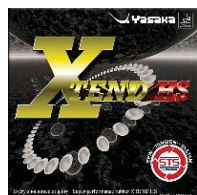

Feel the speed, recognize the sound! Pryde 40 is a superb new rubber from Yasaka using the latest technology. Newly developed medium-soft sponge creates better speed and bigger sound for a fast attacking game. Power Tension rubber does what traditional rubbers and other tension rubber cannot do: gives you outstanding performance without the need for speed glue. It's the perfect mix of speed, spin, sound and feeling. You will love it! Sponge: 2.0, Max Item: RYPR4

91 87 73 \$49.95

Pryde

Delivering the devastating energy of POWER TENSION! Yasaka's powerful reply to the speed glue ban. The characteristic speed and touch of speed glue - without speed glue. You feel the powerful speed and you'll recognize the sound! Sponge: 2.0, MAX. Item: RYPRY

97 85 71 \$49.95

X-Tend HS

The Spin Machine! No speed glue needed! STS (Spin-Tension-System) technology by Yasaka gives 2/3 of the tension energy to spin and 1/3 to speed. Topsheet and sponge have been completely re-designed to deliver high-power speed with easy handling-- just what the players asked for. Do NOT apply speed glue, as it will destroy the rubber. Xtend HS is made to be fast without speed glue. Sponge: 2.0, MAX Item: RYXTH

84 83 77 \$43.95

X-Tend

The Spin Machine! No speed glue needed! "Tension increase" gives you 2/3 more spin and 50% more speed. Sponge: 2.0, MAX. Item: RYXTE

82 85 77 \$43.95

LONG PIPS & ANTI TOPSPIN RUBBERS

Anti Power [Anti] Sponge: 2.0. Item: RYANT

SPEED 61 CONTROL 85 \$34.95

Phantom Infinity [Long Pips]

Regulation length long soft pips: Deadly weapon for any defen-

sive player. Neutralize opponent's spin and use the effect of the spin to benefit your own returns. Design of the top of the pips aid attack.

0011 Sponge: 1.0. Item: RYPH1

49 58 88 \$34.95

0012 No sponge. Item: RYPH2

42 65 88 \$32.95

BEST BALLS IN ANY DIMENSION

Nittaku 3-Star Premium

The Nittaku 3-Star Premium is more consistent in hardness and lasts longer than any other ball in the world. Label on ball says "Premium 40, Made in Japan". Packaged in boxes of 3 balls each. Item BNPR

\$6.95 for 3 balls/\$13.50 for 6 balls/\$25.95 for 12 balls
Bulk Pack: \$208.95 for 10 dozen

Nittaku 3-Star

High quality 3-star ball, exceeding highest standards for ITTF approval. Label on ball says "40" and "Japan". Packaged in boxes of 3 balls. Available in white or orange. Item BNCH

\$4.95 for 3 balls/\$9.50 for 6 balls/\$17.95 for 12 balls

Nittaku Super Training Balls

10 Dozen bulk pack. Outstanding practice ball at outstanding price! Top quality 40mm practice balls for training, matches, multi-ball drills, and robots. Ten dozen balls (120 balls) in one box. Available in white or orange. Item BNSK

\$59.95 for 10 dozen

Nittaku Top Ball

Best practice ball in the world! This 40mm ball is made in Japan with the same quality material and process and in the same Nittaku factory as the Premium ball. Packaged loose in a bulk-pack of two dozen (24) or ten dozen (120). White or orange.

\$26.95 (2 doz.) Item BNT0
\$125.95 (10 doz.) Item BNTK

Nittaku Large 44mm 3-Star

These are extra-large 44mm balls for the 44mm game. Slower speed, less spin--easier to see, hit, and control. Top quality, made in Japan by Nittaku. Orange only. Item BN44

\$6.95 for 3 balls
\$13.50 for 6 balls
\$25.95 for 12 balls

HOW TO READ THE RUBBER CHART

The Rubber Comparison Chart lists Smooth Rubber on pages 82-89. Short Pips, Long Pips, and Anti-Topspin Rubbers are on page 90. For more info on rubber types and how to choose rubber, see page 55.

Sponge Thickness is shown in millimeters. The measurement includes only the sponge (not the topsheet). Often the manufacturer indicates "MAX" for the thickest sponge available for a rubber. MAX thickness can vary from brand to brand, but usually means the sponge thickness is approximately 2.3 to 2.5mm. Often MAX means sponge and topsheet together measure 4.0mm, since this is the

maximum thickness allowed under ITTF regulations. All rubber sheets at Paddle Palace are produced with ITTF legal sponge thickness.

Speed/Spin/Control Ratings are on a scale of 10 to 99, with the higher the rating, the higher that attribute. These ratings use a universal scale which differs from manufacturers' ratings so that the rubbers from all the brands can be compared. Ratings are meant only as a tool to help select rubber. Naturally, speed, spin, and control are affected by a player's skill, strokes, and playing style.

Rubber sheets are available in red and black unless otherwise indicated. One rubber covers one side of a blade. Paddle Palace will apply rubber to the blade at no extra charge upon request. ●

PADDLE PALACE H2W TOUCH PRO ROBOT

The Most Versatile High-Tech Robot + Easy to Use!

The Paddle Palace H2W Touch Pro Robot is a very versatile and user-friendly high-tech robot. The new LCD Touch Screen makes operation and programming of all functions of the robot very easy! Get started in seconds using one of the 30 built-in ball sequences with just a few touches on the screen. Making your own custom sequences is also simple, as the Touch Screen walks you step by step through the setup. You can save up to nine of your own favorite custom sequences, and you can easily modify the 30 built-in sequences. Whether you use built-in sequences or your own custom sequences, start-up is easy every time you play.

The new Spin Indicator Panel located just below the shooting head on the robot shows you the spin for each ball before it shoots. This makes playing with the robot more like playing with a human partner, as you can visually anticipate the spins on the upcoming balls.

The H2W Touch Pro Robot has two throw wheels with independently programmed motors, allowing a great variety and degree of spins, including topspin, underspin, sidespin, and no-spin. Plus the robot can seamlessly shoot consecutive shots with different spins. There are 22 possible landing spots on the table including short and long balls, making possible any combination of spins and landing spots you choose. The H2W Touch Pro Robot is designed for the player who wants a high-quality long-lasting robot that is easy to use, yet offers the sophisticated technology for practicing the ideal training patterns to take your game to the next level.
Item OPVH2

\$1795⁹⁵

***Includes Shipping**

H2W Touch Pro Robot includes:

- Net Collection & Ball Recycling System
- Free 120 Nittaku training balls
- Free Robot Training DVD
- Free Shipping to contiguous USA
- 30-day money-back Guarantee
- One year limited Warranty

Spin Indicator!

Spin Indicator panel on the robot shows you the spin for each ball before it shoots.

LCD Touch Screen!

Operation and programming of all functions of the robot is very easy with the new Touch Screen.

Paddle Palace

ROBOTS FROM PADDLE PALACE at affordable prices!

Paddle Palace A32W Pro

The Paddle Palace A32W Pro has many outstanding advanced robot features, but is offered at a very affordable price! Unlike other robots in this price range, it has two throw wheels controlled by two independent motors. This gives you great control over setting the variety and degree of spins including topspin, underspin, sidespin and no-spin. It includes an automatic ball recycle and net collection system. It has multiple oscillation options, and has convenient robot controls on the player's side of the table. The A32W Pro is high quality, sturdy, reliable. It comes ready to play with virtually no assembly required, and it rolls from storage to table for very quick setup/take-down. Item OPVA3

- Two throw wheels, for multiple spin options
- Multiple Oscillation Options
- Very durable, made with high quality materials
- Ball Recycling and Net Collection System
- Rolls easily from table for easy storage
- No-Jam, easy-feed engineering

FREE shipping to contiguous USA!
FREE 120 Nittaku Super Training Balls

*Includes Shipping

Paddle Palace Table Top Pro

The Paddle Palace Table Top Pro is an affordable and quality robot that delivers strong and consistent topspin, underspin, and sidespin shots. It is simple to use and is jam free. The frequency and speed of the shots are controlled by convenient robot controls on the player's side of the table. It can be set to hit to one spot on the table, and it also has multiple oscillation options, both controlled and random. It can be set to shoot serves or rally shots. It can be placed on any location on the table, or it can be set on a stand behind the table (stand not included). A ball collection net is available for an extra charge. The Paddle Palace Table Top Pro is the easiest robot to set up and use that we have ever seen! Item OPVTT

- Versatile, shoots from any location on the table
- Outstanding topspin, underspin, sidespin
- Multiple Oscillation Options
- Set for serves or rallies
- Easiest robot to set up and use
- Net not included. Nets available. See p. 96

\$499⁹⁵

FREE shipping to contiguous USA!
FREE 48 Nittaku Top Balls

S4W Pro Robot

Taking Robot Technology to the Next Level

The Paddle Palace S4W Pro has two heads, each with two throw wheels. Both heads, and the four throw wheels, are all independently programmable, allowing you great flexibility in designing playing patterns and practice options. You can program a seamless combination of topspin and underspin (or side-spin or no-spin) shots in the same play sequence. The S4W Pro comes with an easy to use, comprehensive control box that is conveniently located at the player's end of the table. This heavy duty robot is ready to use right out of the box - for club or home.

You can use either one or both heads to produce their desired practice patterns. Use the single head to set up a specific serve or volley, or employ both heads to alternate seamlessly between types of spin, short and long balls, strong and weak balls, or high and low balls. Plus, you choose the landing spots, as well as the speed and throw frequency. Another advantage is you can set up one head to reproduce a realistic serve that hits the robot side of the table first, then complete the sequence with volleys from the 2nd head. The S4W is easy to use, yet provides the sophisticated technology and flexible programming to be your ultimate training machine. Item OPVS4

\$1499⁹⁵

*** Includes Shipping**

PADDLE PALACE S4W ROBOT INCLUDES:

- Free 120 Nittaku Super Training Balls
- Free Ball Pick-up Net
- Free Robot Training DVD
- Free shipping to contiguous USA
- 30-day money-back Guarantee
- One year limited Warranty

See PaddlePalace.com for details and owner's manual.

Throw Wheels – One, Two, or Four?

Robots with one throw wheel can shoot topspin, underspin, and sidespin. With two throw wheels, the two independently controlled motors make it possible for independent spin and speed settings. This results in a great range of spin options – light to heavy topspin, underspin, or sidespin – or no spin shots. Four throw wheels provides the greatest versatility of all, including serve and volley in the same training sequence.

Oscillation - Random (R), Controlled (C), Programmable (P)

Controlled Oscillation means you can set the robot to hit alternately only to the two widest points in the angle range, plus you can set the width of the angle. With Random Oscillation, the robot hits to the inner angles as well as the

widest angles. With Random Oscillation, where the ball lands depends on the frequency and speed settings you have chosen. Programmable Oscillation is the most versatile. It achieves everything Controlled and Random Oscillation does, plus you can program sequences of your choice for where the ball lands!

LCD Touch Screen

The LCD Touch Screen is a very easy and intuitive menu-based interface to control all functions of the robot.

Serve & Volley Sequences

The Robot can be set to serve and volley in the same sequence. So, for example, you can set a sequence to begin with a serve, then

shoot volleys to specific landing spots with spins of your choice for a realistic training pattern.

Topspin/Underspin Sequence

The robot can shoot topspin shots and underspin shots (and other spins) in consecutive shots in the same sequence.

Spin Indicator

The Spin Indicator is located just under the shooting head. Before the ball shoots, it shows you the spin type on next shot: topspin, underspin, right-sidespin, left-sidespin, right-side/topspin, left-side/topspin, right-side/underspin, left-side/underspin, or no-spin/deadball.

Each product comes with a 30 day money-back guarantee, 1 year warranty and free 5 year service policy.
©2010 Newgy Industries, Inc.

FOR CURRENT PRICING AND SPECIALS, GO TO PADDLEPALACE.COM

Paddle Palace always offers the latest NEWGY web specials and offers.

Newgy Robots are affordable robots that provide hours of table tennis fun for the whole family. All Newgy Robots have one throw wheel, and they can throw topspin, sidespin, and underspin. They throw one spin at a time. The robots can oscillate to different landing spots (except for the Robo-Pong 540)

\$899*

Newgy Robo-Pong 2050

Newgy's top robot has digital technology for easy, precise regulation of ball speed, wait time, and landing location. Normal Mode gives you simple manual control over each function, while in Drill Mode you can run any of 64 drills stored on the controller. Use PC Mode to create and save drills using a simple interface, then run those drills direct from your PC. Setup Mode makes it easy to calibrate motors to a set standard and select your desired language. Intelligent design also allows selection for right-handers and left-handers alike. Item: ON5

Package Includes:

- Ball Thrower (w/Oscillation)
- Recycling Net System
- Side Net Extenders
- Rubber Tips Packet
- Full Size Digital Control Box
- Transformer
- Connector Cable
- Owner's Manual
- Set-up DVD
- 48 Orange 40mm Robo-Balls
- Training Book

\$599*

Newgy Robo-Pong 1050

Identical to the Robo-Pong 2050 except it does not have the Recycling Net System. Purchase a Ball Catch Net (sold separately) for ball capture and manual recycling. Or later on, upgrade to full 2050 capabilities with the Newgy Recycling Net Upgrade Kit. The 1050 Ball Bucket holds 200 balls for several minutes of non-stop play. Position the robot anywhere on top of table or mount it back from the table in the optional Robo-Caddy (sold separately) to get a variety of angles and trajectories. Item: ON1050

\$399*

Newgy Robo-Pong 1040

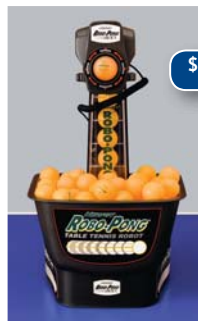

Includes all features of Robo-Pong 540 plus it includes oscillation and more powerful speed and frequency controls. Bucket Extender expands ball capacity for longer continuous play. Item: ON1040

\$699*

Newgy Robo-Pong 2040

Includes recycling net and ball recycle system for non-stop action. Can oscillate back and forth or set it to shoot to one landing spot. Can shoot topspin, underspin, and sidespin. Shoots one spin at a time. You can set the frequency, speed, and oscillation. Item: ON4

\$249*

Newgy Robo-Pong 540

Ideal for the budget-minded recreational player. Lower speed and frequency ranges and static delivery accommodate untrained strokes. Set on top of table and twist base to change trajectory. Improved bucket design ensures reliable ball feed. Item: ON540

* Prices on Newgy Robots do not include shipping charges

OFFICIAL TABLE OF SPiN CLUBS WORLDWIDE

Thick 30mm Top!

The Stiga Optimum 30 sets a new standard for consistency and design in table tennis tables. With a 30 millimeter (1.2 inch) top, the thickest in the sport and 20% thicker than its closest competitor, the Optimum 30 has the most even and consistent bounce of any table. ITTF approved and made in Germany, this table represents the pinnacle of current table tennis tables.

The playing surface of the Optimum 30 is coated with a special varnish for the ideal amount of friction and the truest bounce. The edge and center lines are silk screened for even placement and professional appearance. The undercarriage features a 2.4 inch steel apron and 2.4 inch by 1.6 inch steel legs with levelers. The table separates into two halves, each with their own set of four 4 inch casters for easy movement and the two halves allow compact storage as well as use in playback position. The Optimum 30 also comes with a high-quality Stiga VM net set. Size: 61" x 60" x 26" in folded position. Item: TEOP3

For your table: Covers, Barriers and other accessories. See page 96

WORLD CHAMPION TC

World Championship Quality!

This is the same table used at the 2006 World Team Championships, as well as the 2007 European Championships. Tournament-grade 1" (25 mm) thick playing surface ensures consistent bounce. Delivered assembled, the table requires only minor adjustment to ready it for play. Large 5" wheels with rubber tires and a low folded height make it easy to move. Quick-release locking mechanism is easy to use when setting up the table, the table can also be partially folded into a playback position and the design allows clearance for wheelchair use. Three inch round steel legs with height adjusters for leveling and a galvanized steel undercarriage insure a stable, durable table. Made in Germany. Measures 63" x 62" x 32" in folded position. Item: TDWOR

Donic table features include:

- Made in Germany
- Little or No Assembly
- 25mm top
- ITTF Approved
- Highest Quality Standard and Design

ABOUT PURCHASING YOUR TABLE

Table Top

Look for tables with thicker tops. Thicker tops give a more consistent bounce and are less likely to warp after years of use. The Paddle Palace recommends table tops of 3/4 inches or more.

Net Set

Some tables have net posts permanently attached to the frame. These make setup and takedown a little quicker but may not be as adjustable or sturdy as separate net posts. Table price includes net set.

Frame

Look for tables that have larger, sturdier legs and support frames. Sturdier frames contribute to a more consistent ball bounce and also help prevent top warpage. If you set up and store your table regularly, a larger frame increases durability.

Wheels

Larger and stronger wheels are important particularly if you set up and store your table frequently.

Table Shipment

Tables are shipped directly from the manufacturer by freight line. Delivery generally takes 2-3 weeks from the date of order. The delivery person will need assistance in unloading your table and will leave table at the curbside. Some tables require some assembly.

Shipping Charge:

*Price includes shipping!
Some locations incur extra shipping charges. In that case, Paddle Palace will contact you before processing the order.*

NEW BOOK: Table Tennis Tactics for Thinkers

By Larry Hodges
240 pages

Learn table tennis tactics from USATT Certified National Coach and Hall of Famer Larry Hodges. Includes tactics against different styles, grips, and surfaces as well as tactical and strategic thinking.

The book opens with this: "Tactics isn't about finding complex strategies to defeat an opponent. Tactics is about sifting through all the zillions of possible tactics and finding a few simple ones that work." The book then explores the tactical and strategic development needed to have the specific tactical tools needed in any given match - your "tactical toolbox."

SERVE AND RETURN TRAINING FOR TABLE TENNIS: PART #1

By Dynamic Table Tennis

\$43.95 2 hours, 20 minutes Item: VMDPS1

Brian Pace (USATT Certified Coach), has created the most extensive video for the most complex skill in table tennis, which is the serve and serve return. This first video focuses on the classic forehand high-toss serve, which creates six different types of spin. Then this concept is flipped on its head, and video takes you through how to identify these types of spin, as well as how to return it.

SERVE AND RETURN TRAINING FOR TABLE TENNIS: PART #2

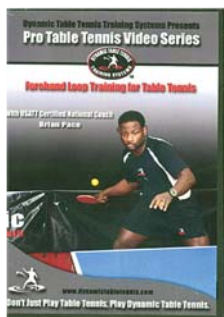

By Dynamic Table Tennis

\$43.95 1 hour, 55 minutes Item: VMDPS2

Join Brian Pace (USATT Certified Coach), for the second video of Serve & Serve Return Training, which covers the following:

- Forehand Reversed Spin Serve & Return
- Backhand Serve & Return
- Tomahawk Serve & Return
- Left-Handed Serve & Return
- Hybrid Return – Bananas Return
- Maximizing Serve – Serving to Pips

ALSO BY BRIAN PACE / DYNAMIC TABLE TENNIS

- Stroke Production
- Changing Tempo and Changing Position
- Implementing Footwork
- Counter Looping
- Looping Underspin
- Attacking the Serve
- Game Situations
- Hooking and Fading the Loop
- Long Distance Counter-looping
- Looping against Pips

ADVANCED TRAINING FOR TABLE TENNIS

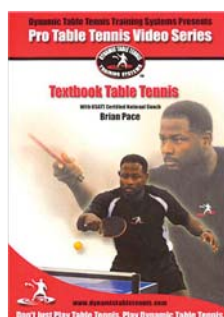

by Dynamic Table Tennis

\$43.95 2 hrs. Item: VMDPAD

Focuses on adding a higher level of complexity to your existing game. This DVD consists of 5 Sections, and each Section starts out with an Advanced Concept. It is then followed by 5 Exercises to develop and strengthen that concept. This video will give you a deeper understanding of how to get the most usage out of each shot in your game. The workouts in this training video have been designed to systematically train in a way that elevates every aspect of your game.

"Every player wants to have the most advanced arsenal. This video helps you get the most out of having that arsenal."

– Brian Pace

PRO TABLE TENNIS SERVE RECEIVES

New, from Alpha Productions. Serve receive is the most difficult part of competitive table tennis. This dvd shows over 250 examples of service returns executed by some of the best players in the world. The most popular options for receiving specific serves are included. The DVD is organized according to the type of service that is to be returned, whether long, short, underspin or topspin, to the forehand or the backhand. Alpha Productions shows the serve and the receive and how the point plays out. Then the sequence is repeated in slow and stop motion, occasionally employing graphics to illustrate the spin, and then it is played once more at regular speed. Commentary points out some of the significant factors for each receive. Item: VADSR

\$29⁹⁵

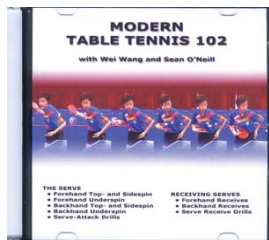

PRO TABLE TENNIS SERVES

Program features 29 players and 140 serves! Alpha Productions has captured the serves of some of the world's best players during practice. This program clearly shows each detail in their movement and reveals the secrets of the contact.

Covers serves of all styles - shakehand, penhold, righthanders, lefties -- organized in the basic categories of underspin, topspin and no spin, with a special mention if the side spin component becomes significant. Each serve is presented at full speed, half speed and a extra-slow "analysis speed". On some serves, the use of a super slow motion camera reveals even more detail of motion. Item: VADSE

\$34⁹⁵

MODERN TABLE TENNIS 102 DVD

By Alpha, 35 minutes.

1996 Olympic Team member Wei Wang and five time U.S. Men's Champion Sean O'Neill explain serve motion & strategy, receive motion, footwork & strategy. See paddlepalace.com for more details. Item: VADM2

\$34⁹⁵

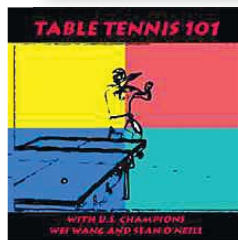

TABLE TENNIS 101 DVD

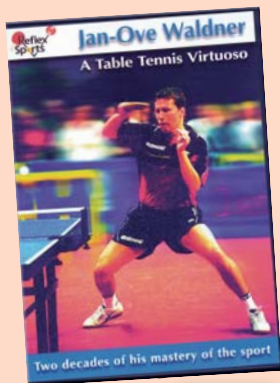

By Alpha, 35 minutes.

Learn all basic strokes of Olympic level Table Tennis plus a clear overview of key competitive skills. Access each of them directly by a click of the remote control. U.S. Champs Wei Wang and Sean O'Neill illustrate each stroke in video clips shot from three different angles. Audio commentary supports visual presentation. See paddlepalace.com for more details. Item: VADV1

VOC-FREE WATER-BASED GLUE

These Water-Based glues contain no VOC's, are legal under the new ITTF regulations, and can be sent by air shipping methods. All water-based glues must be kept at room temperature. When water-based glues freeze, they harden and are no longer usable.

**Nittaku Finezip**

Water-based glue. VOC-free and legal under the new ITTF regulations. Apply Finezip to both blade and rubber, dries in about 5 minutes, then apply rubber to blade. Can be sent by air shipment. Available in 50ml or 100ml plastic tube. Item: GNZIP

50ml **\$19⁹⁵**100ml **\$24⁹⁵****Stiga Syncro BTG Glue**

Thin, soft, flexible, voc-free waterbased glue provides both excellent bonding and easy removal. Normally with water-based glues the glue is very difficult to remove from the blade and sponge. But with the unique new formula of Syncro BTG (Bond Technology Glue), these problems are over. 150ml has a built-in brush to apply the glue. Item: GSSYN

150ml **\$25⁹⁵****Stiga Attach Power Glue**

A new water-based glue, formulated to eliminate glue buildup. Very adhesive, so one application is all that is needed. Available in 50 and 100 ml. Item: GSATT

50ml **\$15⁹⁵**100ml **\$22⁹⁵****Stiga Glue Applicator Set**

Set includes ten cylinder-shaped sponge applicators for water-based glue, and a reusable clip. Item: MSGLA

\$4⁹⁵**Paddle Palace EZ PRO Glue***Easy to use, Easy to remove!***Used and recommended by Paddle Palace!**

This water-based glue is VOC-free and legal under ITTF regulations. This is the glue used at Paddle Palace for the gluing of all our custom paddles and we love it!

Paddle Palace EZ Pro Glue is superior in how easily it is removed when changing your rubber. Any glue residue on the blade or rubber easily peels off. No shipping restrictions. Made in USA. Item: GPEZ.

Includes glue applicator kit with a reusable clip and 20 sponges.

4 oz/118 ml

\$14⁹⁵

8 oz/236 ml

\$22⁹⁵**Tibhar Clue Glue**

Water-based glue with no VOC's, according to the ITTF standards. Integrated brush on cap for easy application. Quick drying phase (5 - 10 minutes) . Easy removal of the rubber off the blade and easy removal of glue remains. Item: GTCLU

150 ml **\$28⁹⁵****Tibhar Clean Fix**

Water-based, VOC-free, according to ITTF guidelines. Easily applied to blade and rubber thanks to sponge applicator. Relatively fluid glue requiring a drying period of about 5 minutes depending on the environment. Recommended to apply one layer on both blade and rubber. Item: GTFIX

25g bottle w/sponge applicator

\$9⁹⁵**Tibhar VS Top Glue**

80 ml. Quick-drying VOC-free glue made from 100% liquidized natural caoutchouc. After a drying period of 10 - 15 minutes it allows you to stick the rubber to the blade. Easy to remove the rubber from your blade and any remaining particles of glue are easily peeled away from the sponge. Comes in a 80ml bottle with two sponges and clip for spreading the glue. Item: GTTOP

80ml bottle

\$19⁹⁵**Donic Vario Clean Glue**

Water-based glue, plus clip fixture and sponge included. Easy handling and fast drying. No VOC (volatile organic compounds) and no health risk. Legal under the newest ITTF regulations. Made in Germany.

\$11⁹⁵

37ml

\$18⁹⁵

90ml

\$61⁹⁵

500ml

Application: Apply the glue evenly on blade and rubber sheet using the clip fixture and sponge (included). After approx. 5 minutes apply the rubber to the blade using a press roll. If possible store the glue in a cool place. Item: GDVAR

Donic Formula First Glue

Ideal glue to apply all kinds of table tennis rubber sheets to the blade. Great for high tension and speed glue effect rubbers. Water-based glue contains no (VOC) and legal under new ITTF regulations. Made in Germany. Item: GDFOR

25g

\$9⁹⁵

GLUE SHEETS

Glue sheets adhere rubber to blade without mess or fumes. Peel paper off one side of glue sheet and stick to rubber, trim glue sheet. Then peel paper off other side of glue sheet, stick rubber to blade, then trim rubber. Price listed is for one glue sheet. One sheet adheres one rubber.

Reigning US National Champs!

Our U.S. Women's and Men's National Champions, Lily Zhang [left] and Timothy Wang [right and on front cover], are goal setters, and they are raising the bar for USA Table Tennis!

PHOTOS BY BRUCE H. LIU

LILY ZHANG, as an American has broken the international glass ceiling, having reached a very impressive #5 in the latest World Junior Rankings (U-18). She attributes her success to support from her parents and to team mates and coaches at the ICC, and her sponsorship with STIGA. Her intense schedule makes this encouragement a necessity; being both a full time high school student in Palo Alto and world ranked player, Zhang is under pressure to succeed. However, her commitment to the sport is internally motivated, "Table Tennis is a big passion in my life. I just love the game." That love has propelled her to win numerous titles, recently 2013 ITTF North America Cup Women's Champion, 1st place finish at the 2013 US National Women's team trials, 2012 National Women's Singles Champion, and she is an Olympian. With these impressive achievements in mind, Lily continues to train and prepare for the future. Only 16-years-old, Lily is USA's best hope for a title at the Junior World Championships.

TIMOTHY WANG, through his hard work and dedication, is the one male player consistently at the top in USA. He was the 1st place finisher at the 2013 US National Team Trials. An Olympian in 2012, Tim returned home to win a clean sweep at the 2012 National Championships in Singles, Doubles, and Mixed Doubles. He was also the 2010 National Men's Singles Champion. At age 21, Timothy has poured his heart and soul into the sport. He put his education on hold to become

a full-time professional player. Leaving his home in Houston, he has trained in China and Europe. In recent years he has found a home at the ICC in Milpitas, CA. Tim said, "My relationship with STIGA and ICC offers me full-time world class training and coaching, and help with my expenses. I don't know of any other club that can do that. They are not only creating great players, but ICC is also trying to make the sport better for USA players."

For more info on US Champs Lily Zhang and Timothy Wang, go to the news blog at www.PaddlePalace.com. ●

What is the ICC?

Launched in 2005, the ICC (India Community Center) located in Milpitas, CA is the largest dedicated table tennis club in the USA. It is an ITTF "Hot Spot Training Center" and has produced three 2012 USA Olympic players. It is the home for the STIGA Elite Team, a talented group of young players, including Lily Zhang and Timothy Wang, who are the top players in the country. ITTF high performance coach Massimo Costantini and six full time nationally acclaimed coaches are included in the impressive staff. In addition to the STIGA Elite Team, ICC has programs for players of all ages and levels of play. ●

2013 US Open:
July 2-6, Las Vegas

2013 US Nationals:
Dec. 18-22, Las Vegas

We hope you can visit us at the Paddle Palace Booth at the US Open or the US Nationals this year! Whether you are a player or a spectator, there's always plenty of excitement in Las Vegas. For more information and entry details for these tournaments, go to our News section at PaddlePalace.com.

Paddle Palace EZ PRO Glue

Easy to use, Easy to remove!

Used and recommended by Paddle Palace!

This water-based glue is VOC-free and legal under ITTF regulations. This is the glue used at Paddle Palace for the gluing of all our custom paddles and we love it! Paddle Palace EZ Pro Glue is superior in how easily it is removed when changing your rubber. Any glue residue on the blade or rubber easily peels off. No shipping restrictions. Made in USA. Item: GPEZ

Includes glue applicator kit with a reusable clip and 20 sponges.
